

Public Advisory Committee

Who are we?

The Public Advisory Committee (PAC) for the Sudbury Soils Study was established in 2001 to address community concerns by providing input to the Technical Committee and consultants conducting the human health risk assessment (HHRA) and ecological risk assessment (ERA) for the Greater Sudbury area.

The PAC provides valuable feedback about community concerns and how best to present information gathered throughout the study to the community.

As residents of the Sudbury area, PAC members are keen to do their part to ensure that the process and outcomes reflect the concerns and needs of the communities involved in the study.
