**1. METHODS**

During the months of September and October of 2001, samples were collected from 169 park properties including those provided by the city as of July 2001, as well as additional properties MOE located that were not listed by the city. At each site samples were collected in duplicate from all play areas and especially from areas where young children could come in direct contact with bare soil. Samples were collected in different ways from different locations as described below.

Sand samples were collected from beneath all play structures and/or beach areas. Due to the constant mixing of sand and homogenous nature of the sanded areas, sand samples were collected with hand trowels or corers to represent the 0-15 cm depth. Duplicate samples were collected in a reproducible and representative manner of the sanded areas (ie. "X" pattern)

Soccer and football fields were sampled in duplicate with a soil corer in an "X" pattern of the entire length of the field. Cores were separated into three depths, 0-5 cm, 5 - 10 cm, and 10 - 20 cm where possible. In addition, duplicate samples were taken in any worn area; most predominately at soccer goal posts and centre field. Due to the compacted nature of these areas, surface soil samples were taken with a trowel when necessary.

Baseball diamond infields were in most cases gravel and very compacted. Therefore, duplicate surface samples were taken with a trowel or corer while walking along the baseline. Baseball diamond outfields were sampled in duplicate with soil corers in an "X" or "M" pattern. Cores were separated into three depths, 0-5 cm, 5 - 10 cm, and 10 - 20 cm where possible. Where the infield was grassed, samples were collected with a soil corer either as a separate site or combined with the baseball diamond outfield.

Sand from long jump pit landing sites was sampled in duplicate in an "X" pattern. A hand trowel or corer was used to sample the 0 to 15 cm layer due to the constant mixing of the sand in this location.

Samples were also taken from any grassed area where children would play. Cores were separated into three depths, 0-5 cm, 5 - 10 cm, and 10 - 20 cm where possible.

Soil samples were delivered to the MOE Phytotoxicology laboratory where they were organized and shipped to Agat Laboratories for Processing (MOE 2000, Appendix F). Agat followed MOE Standard Operating Procedures which included air drying and sieving samples to obtain the 2 mm size fraction, and then further grinding the sample in a mortar and pestle to pass through a Number 45 mesh (0.355 mm) sieve. Finally, the ground material was stored in glass jars. All soil samples were then forwarded to Lakefield Laboratory for chemical analysis including: arsenic (As), aluminum (Al), barium (Ba), beryllium (Be), calcium (Ca), cadmium (Cd), cobalt (Co), copper (Cu), chromium (Cr), iron (Fe), magnesium (Mg), manganese (Mn), molybdenum (Mo), nickel (Ni), lead (Pb), selenium (Se), strontium (Sr), vanadium (V), and zinc (Zn). MOE data management and quality control procedures for both sample processing and metals analysis carried out by contract laboratories is outlined in Appendix F.

Soil data were compared with the MOE Table F Soil Background Guidelines and Table A Soil Clean-up Guidelines (MOE 1997). Table C3.1 summarizes the total number of parks that were sampled in the City of Greater Sudbury, as well as the number of parks sampled in each community where at least one sample exceeded the MOE soil criteria for nickel (Ni), copper (Cu), cobalt (Co), arsenic (As) or lead (Pb). Complete results for each park are listed in Section C4. All of the data

presented within this report will be used to support the Human Health Risk Assessment that will be conducted for the Greater City of Sudbury.

Sketch maps of each park showing the sampling location and pattern of sampling are located in Section C5. The maps were recreated from hand drawn sketches made by MOE field investigators in the field and thus the sampling site locations are only approximate.

## 2. INDIVIDUAL PARK RESULTS, DESCRIPTION AND MAPS

The three parks with the highest metals concentrations are discussed individually within this section. These parks are: Bell Park in the Sudbury Core, Copper Cliff Nickel Park and Gerry Mills Park in Copper Cliff, and Centennial Park and Falconbridge Ball Fields in Falconbridge. For each of the three parks there is a section below describing the results, a table with a subset of the results, and a map showing the sampling locations.

### C2.1 Bell Park - Sudbury Core 900 Paris Street, Sudbury

Bell Park was sampled on September 12, 2001. Figure C2.1 details the sampling locations at this property. Samples were taken from sixteen play areas and five beaches on the park property. Sampling locations descriptions are provided in Table C2.1.

All soil samples were taken from three depths of 0-5 cm, 5-10 cm and 10-20 cm. Due to the constant mixing of sand and the homogenous nature of the sanded areas, play sand and beach sand samples were collected with hand trowels or corers to represent the 0-15 cm depth. Due to constant mixing, bark chips were collected with hand trowels to represent the 0-10 cm depth. All data were compared with the MOE Table F Ontario Soil Background Criteria and Table A Effects Based Soil Criteria.

Metal concentrations were not elevated in the sand beneath the play structures of Areas G and K and one replicate of Area M. The sand present is not likely native to the park property and is believed to have been introduced when the play structures were constructed. However, beach sand from Beach Areas 1 to 5 did have nickel concentrations elevated above the MOE Table F Ontario Soil Background Criteria. Beach sand is known to be native and thus concentrations found may reflect natural elevations due to long term metals deposition.

Nickel (Ni) concentrations were elevated above the MOE Table F Ontario Soil Background Criteria in all other soil samples from this property. The highest nickel (Ni), copper (Cu), cobalt (Co) and arsenic (As) concentrations, 3284, 1800, 100 and 45 ppm, respectively, occurred in the surface soil of the treed area west of the parking on the west side of Paris Street, north of York Street (Area O). Areas O and P were the only non landscaped areas sampled from this park and had the highest concentrations of metals. Within the landscaped areas of the park, Area A had the highest nickel (Ni), copper (Cu) and cobalt (Co) concentrations at 1528, 950 and 55 ppm, respectively. All other areas of Bell Park have substantially lower metals concentrations than Areas A, O and P, with average nickel, copper, cobalt and arsenic concentrations of approximately 110, 88, 9 and 6 ppm, respectively.

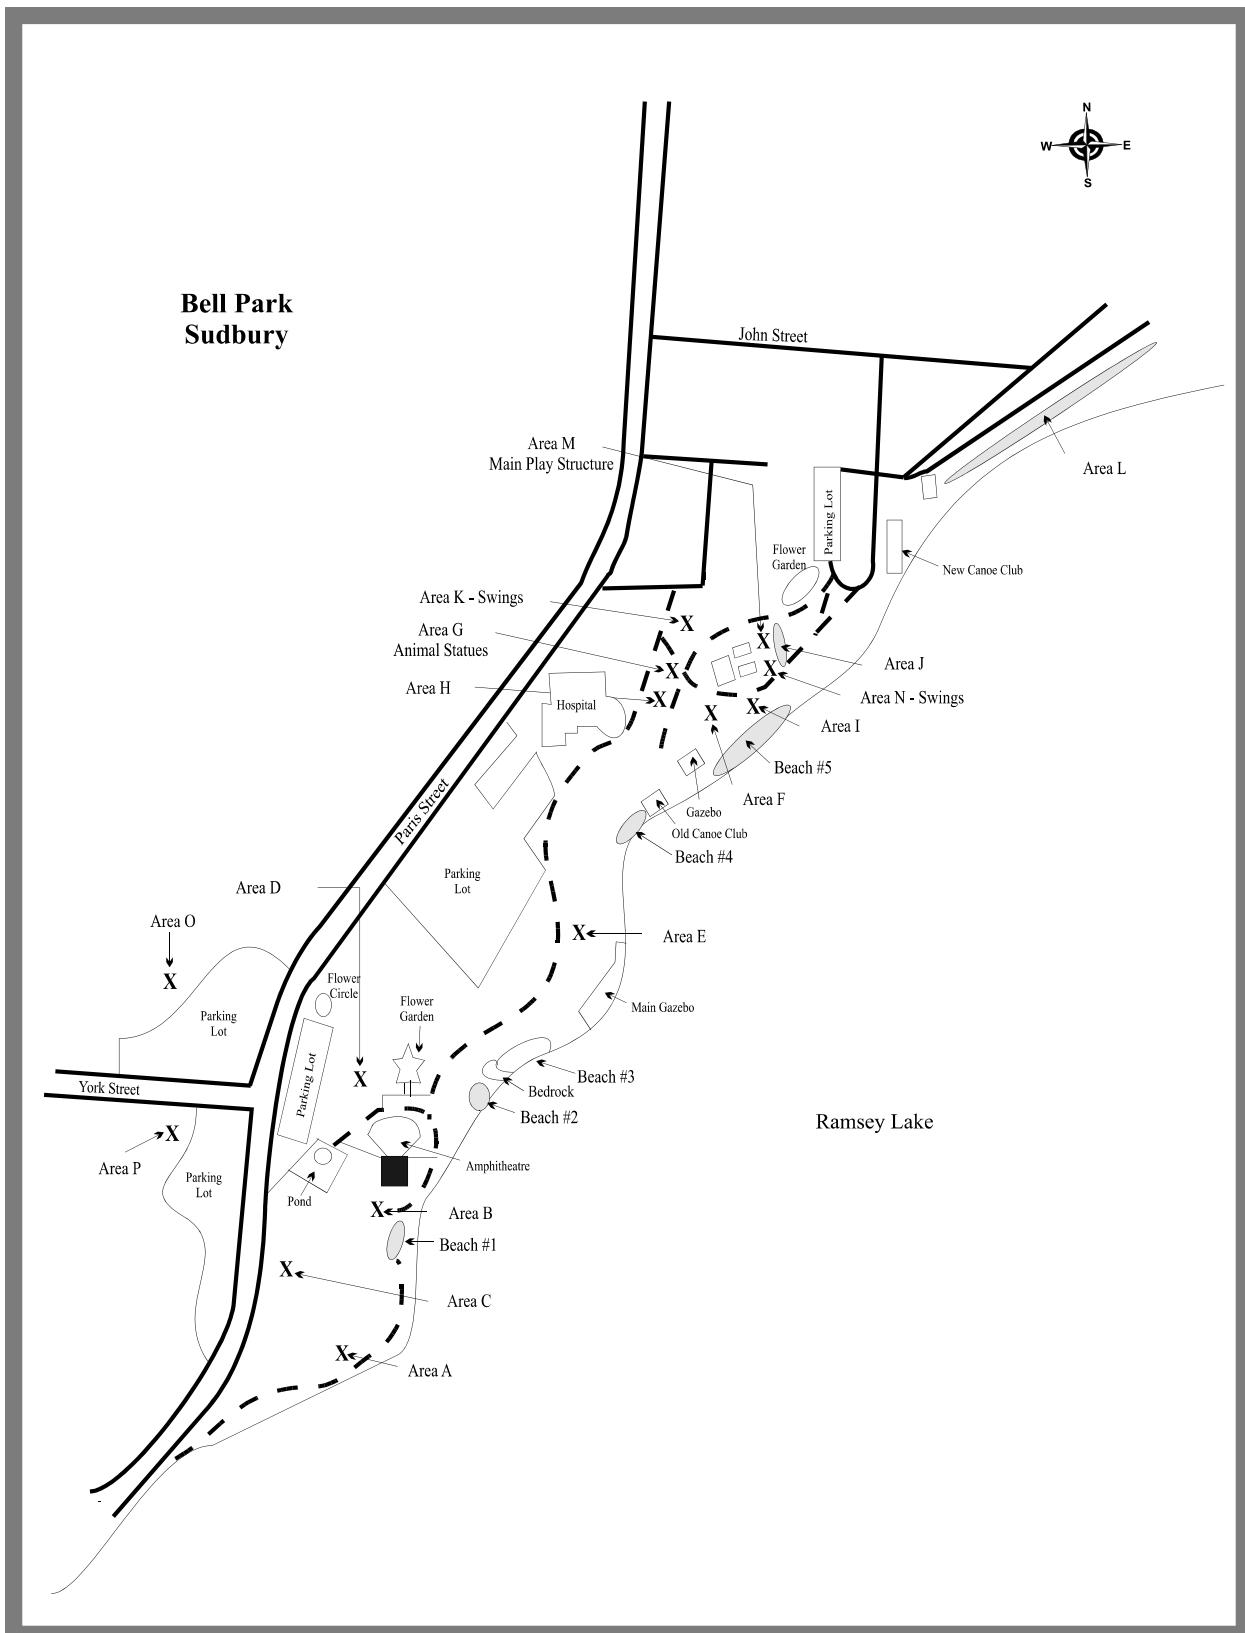

The nickel (Ni) and copper (Cu) results for Areas A, O and P are much higher than those reported historically, whereas metals results for all other locations at Bell Park are similar to or lower than historic findings. Previous MOE sampling of undisturbed soils approximately 0.4 km north northwest and 2 km northeast of Bell Park, Stations 74 and 75, respectively, of the MOE Sudbury 2000 Report for the City of Greater Sudbury (MOE 2001), indicated a nickel (Ni) concentration range of 145 - 830 ppm. Copper (Cu) concentrations ranged from 220 - 820 ppm. Cobalt (Co) concentrations ranged from 11 - 38 and the arsenic (As) concentration range was 11 - 52 ppm.

**Table C2.1: Sample Location Descriptions for Bell Park, Sudbury Core**

<b>Sample Area</b>	<b>Area Use</b>	<b>Sample Type</b>
Area A	Greenspace South of York St. Parking Lot	soil
Area B	Greenspace behind Amphitheatre	soil
Area C	Greenspace South of Pond	soil
Area D	Greenspace East of East Parking Lot	soil
Area E	Greenspace West of Main Gazebo	soil
Area F	Greenspace West of Main Beach	soil
Area G	Play Structures North of Hospital	play sand
Area H	Greenspace around Area G	soil
Area I	Greenspace South of First Aid Station	soil
Area J	Greenspace North of Swings (Area N)	soil
Area K	Swings North of Hospital	play sand
Area L	Greenspace North of Ramsey Airways	soil
Area M	Main Play Structure South of North Parking Lot	bark chips
Area N	Swings South of Main Play Structure	bark chips
Area O	Treed Area West of Parking Lot, West of Paris St. & North of York St.	soil
Area P	Treed Area West of Parking Lot, West of Paris St. & South of York St.	soil
Beach A	Beach on Southeast end of Park, South of Amphitheatre	beach sand
Beach B	Beach located East of Flower Garden, North of Amphitheatre	beach sand
Beach C	Beach North of Beach B and South of Main Gazebo	beach sand
Beach D	Beach Just South of Old Canoe Club	beach sand
Beach E	Main Beach South of North Parking Lot off of John Street	beach sand

## C2.2 Copper Cliff (Nickel) Park & Gerry Mills Memorial Ball Park School Street, Copper Cliff

Copper Cliff (Nickel) Park and Gerry Mills Memorial Ball Park were sampled on September 17, 2001. Figure C2.1 details the sampling locations at this property. Samples were taken from six areas on the park properties. Areas A and B correspond to the baseball diamond infield and outfield, respectively, of Copper Cliff (Nickel) Park. Areas C and D correspond to the north and west grassed greenspace, respectively, of the same park. Areas E and F correspond to the baseball diamond infield and outfield, respectively, of Gerry Mills Memorial Ball Park, which was also sampled as part of Copper Cliff Public School (Appendix B). All soil samples were collected with a soil corer at depth, 0-5 cm, 5-10 cm and 10-20 cm, except Area A baseball diamond infield where it was only possible to collect the 0-5 cm layer due to compaction. All data were compared with the MOE Table F Ontario Soil Background Criteria and Table A Effects Based Soil Criteria.

Nickel (Ni) and copper (Cu) concentrations were elevated above the MOE Table A Effects Based Soil Criteria for all samples from these properties. Arsenic (As), cobalt (Co) and selenium (Se) were also elevated above the Table A Effects Based Soil Criteria at selected sites, while antimony (Sb), cadmium (Cd) and lead (Pb) exceeded the Table F Ontario Soil Background Criteria at fewer sites.

The highest nickel (Ni), copper (Cu), cobalt (Co) and arsenic (As) concentrations, 3649, 3400, 100 and 101 ppm, respectively, occurred in the 0-5 cm or 5-10 cm soil layer of the baseball diamond outfield of Gerry Mills Memorial Ball Park (Area F). Soil results for previous sampling of this baseball diamond, as part of Copper Cliff Public School (Appendix B), were substantially lower with nickel and copper concentrations as high as 1700 and 2000 ppm, respectively, for the surface soil layer of the baseball diamond outfield. The highest nickel and copper concentrations found at Copper Cliff Public School (Appendix B) were 2500 and 2900 ppm, respectively, from the green space just west of the baseball diamond. These concentrations are much higher than those found in green space Areas C and D of the Copper Cliff (Nickel) Park. These results give an indication of how variable metals concentrations can be within the soils of Copper Cliff.

Aside from Area A, depth samples were collected and for all areas except Area D, nickel (Ni) and copper (Cu) concentrations were highest at the surface and decreased with increasing depths. This observation is indicative of atmospheric deposition. All other metals listed, as well as aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), manganese (Mn) and strontium (Sr) which are not listed, were below the MOE Table F Ontario Soil Background Criteria.

The soil metal results for Area F are higher than those reported historically, whereas the remaining soil samples are similar to historic findings. Previous MOE sampling of undisturbed soils approximately 1 km north, 1 km east southeast and 1 km southeast of Copper Cliff (Nickel) Park and Gerry Mills Memorial Ball Park, Stations 87, 96 and 106, respectively, of the MOE Sudbury 2000 Report for the City of Greater Sudbury (MOE 2001), indicated soil nickel (Ni) and copper (Cu) levels as high as 2125 and 2800 ppm, respectively. The majority of samples collected from these parks are within the concentration ranges found historically. The nickel (Ni) concentration range from historic sampling was 180 - 2125 ppm. Copper (Cu) concentrations ranged from 240 - 2800 ppm. Cobalt (Co) concentrations ranged from 14 - 63 and the arsenic (As) concentration range was 3.8 - 69 ppm. Historic MOE sampling in the Sudbury area was of undeveloped surface soils, which may not be representative of all of the materials sampled on this property.

**Figure C2.2:** Copper Cliff (Nickel) Park & Gerry Mills Memorial Ball Park, Copper Cliff - 2001.

### C2.3 Falconbridge Ball Fields & Centennial Park 63 Edison Street, Falconbridge

Falconbridge Ball Fields and Centennial Park were sampled on September 18, 2001. Samples were collected from eight areas on the park properties, Figure C2.3. Areas A and B correspond to sand samples collected from beneath the swings and slide beside the tennis courts, respectively, in Centennial Park. These play areas were also sampled as part of Teddy Bear Daycare (see Appendix B). Due to the constant mixing and homogeneous nature of the sanded area, samples were collected with hand trowels to represent the 0-15 cm depth. Areas C and D correspond to the west and east green spaces, respectively, in Centennial Park. Areas E and F correspond to the west baseball diamond infield and outfield, respectively. Areas G and H correspond to the east baseball diamond infield and outfield, respectively. These two ball diamonds belong to the Falconbridge Ball Fields. It was possible to sample all three depths, 0-5 cm, 5-10 cm and 10-20 cm, for all soil samples at both parks. All data were compared with the MOE Table F Ontario Soil Background Criteria and Table A Effects Based Soil Criteria.

Metal concentrations were not elevated in the sand from beneath the slide and swings. Similar results were found when these play areas were sampled as part of Teddy Bear Daycare #3 (Appendix B). The sand present is not likely native to the park property and is believed to have been introduced when the play areas were constructed. Thus, the sand was not expected to have elevated metal concentrations. Nickel (Ni), copper (Cu) and arsenic (As) concentrations were elevated above the MOE Table A Effects Based Soil Criteria for all other samples from Centennial Park and for the majority of those from the Falconbridge Ball Fields. Antimony (Sb), cadmium (Cd), chromium (Cr), lead (Pb), molybdenum (Mo) and selenium (Se) concentrations exceeded the Table F Ontario Soil Background Criteria at selected sites. The highest nickel (Ni), copper (Cu), cobalt (Co) and arsenic (As) concentrations, 2500, 1800, 130 and 101 ppm, respectively, occurred in the 0-5 cm or 5-10 cm soil layer of the west green space of Centennial Park (Area C). All other sampling areas on this property have substantially lower nickel, copper, cobalt and arsenic concentrations with average values of approximately 460, 390, 23 and 59 ppm, respectively. All other metals listed, as well as aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), manganese (Mn) and strontium (Sr) which are not listed, were below the MOE Table F Ontario Soil Background Criteria.

The soil metal results for Area C are higher than those reported historically, whereas the remaining soil samples are within the concentration ranges found historically. Previous MOE sampling of undisturbed soils approximately 0.5 km north, 0.5 km northeast and 0.5 km southwest of Centennial Park and Falconbridge Ball Fields, Stations 23, 22 and 36, respectively, of the MOE Sudbury 2000 Report for the City of Greater Sudbury (MOE 2001), found nickel (Ni) and copper (Cu) surface soil concentration ranges of 68 to 1100 and 148 to 1300 ppm, respectively. The cobalt (Co) concentration range was 6 to 60 ppm and arsenic (As) concentrations ranged from 31 to 510. Historic MOE sampling in the Sudbury area was of undeveloped surface soils, which may not be representative of all of the materials sampled on this property.

## 5. PARK SAMPLING MAPS

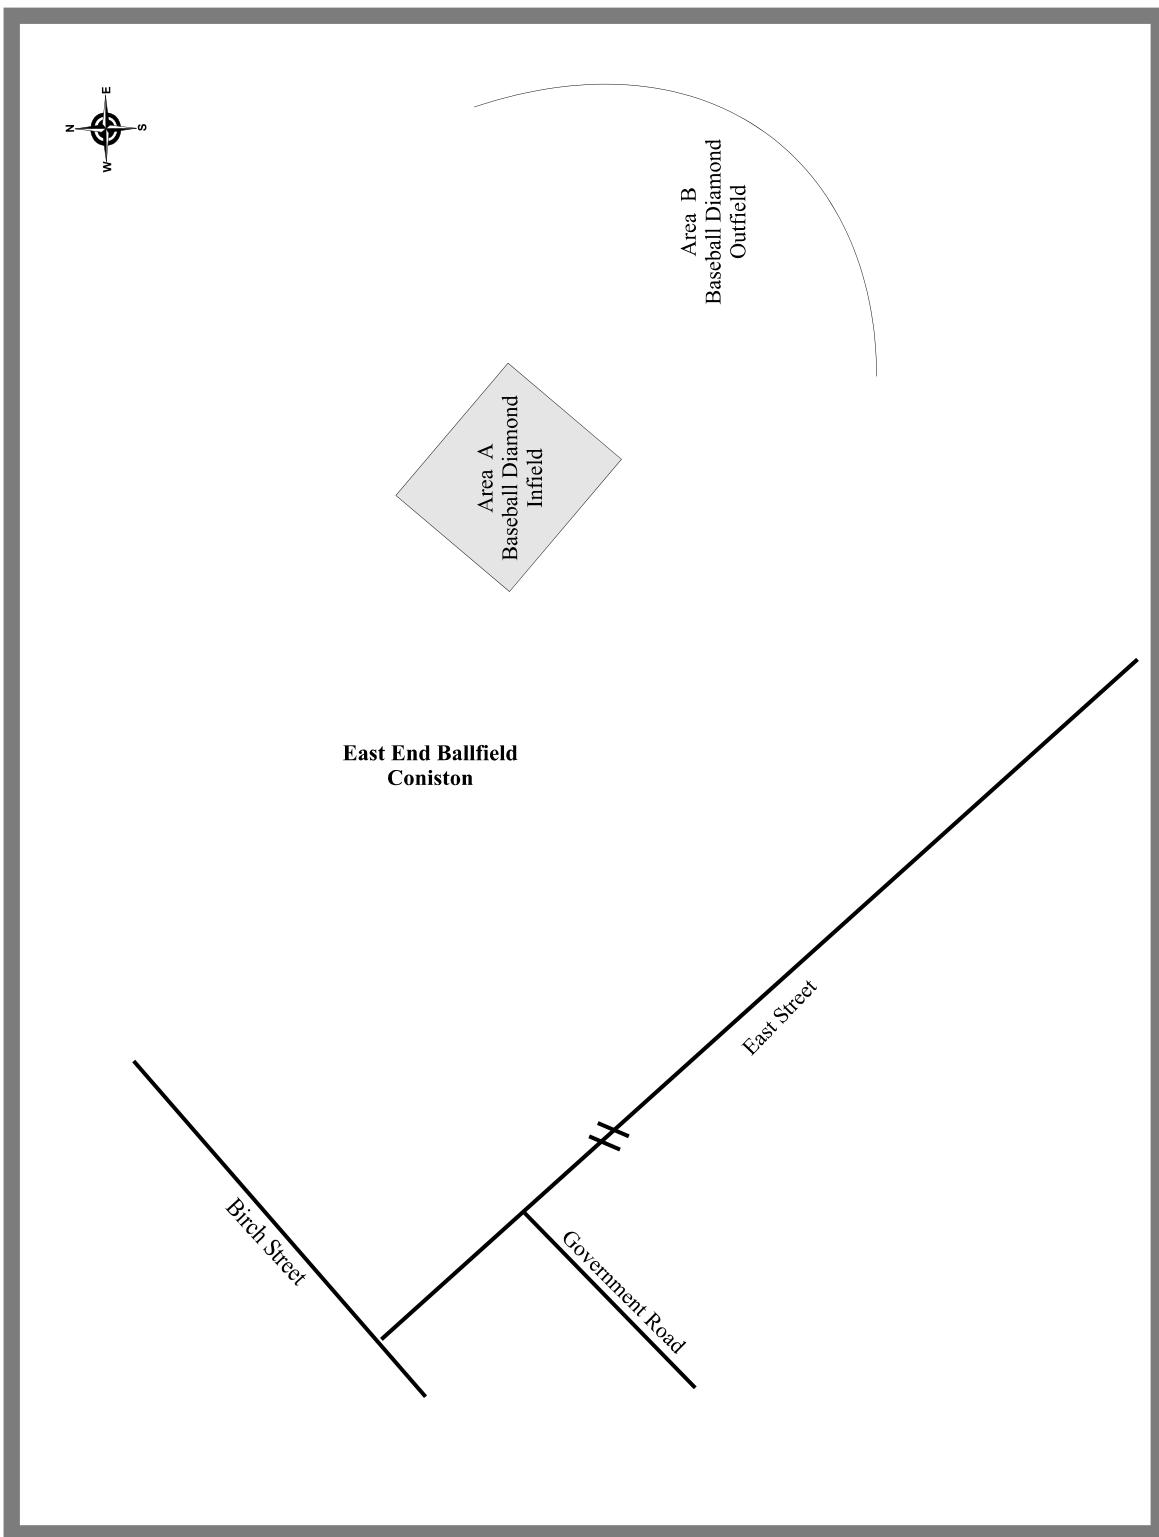

### 5.1 Coniston Park Maps

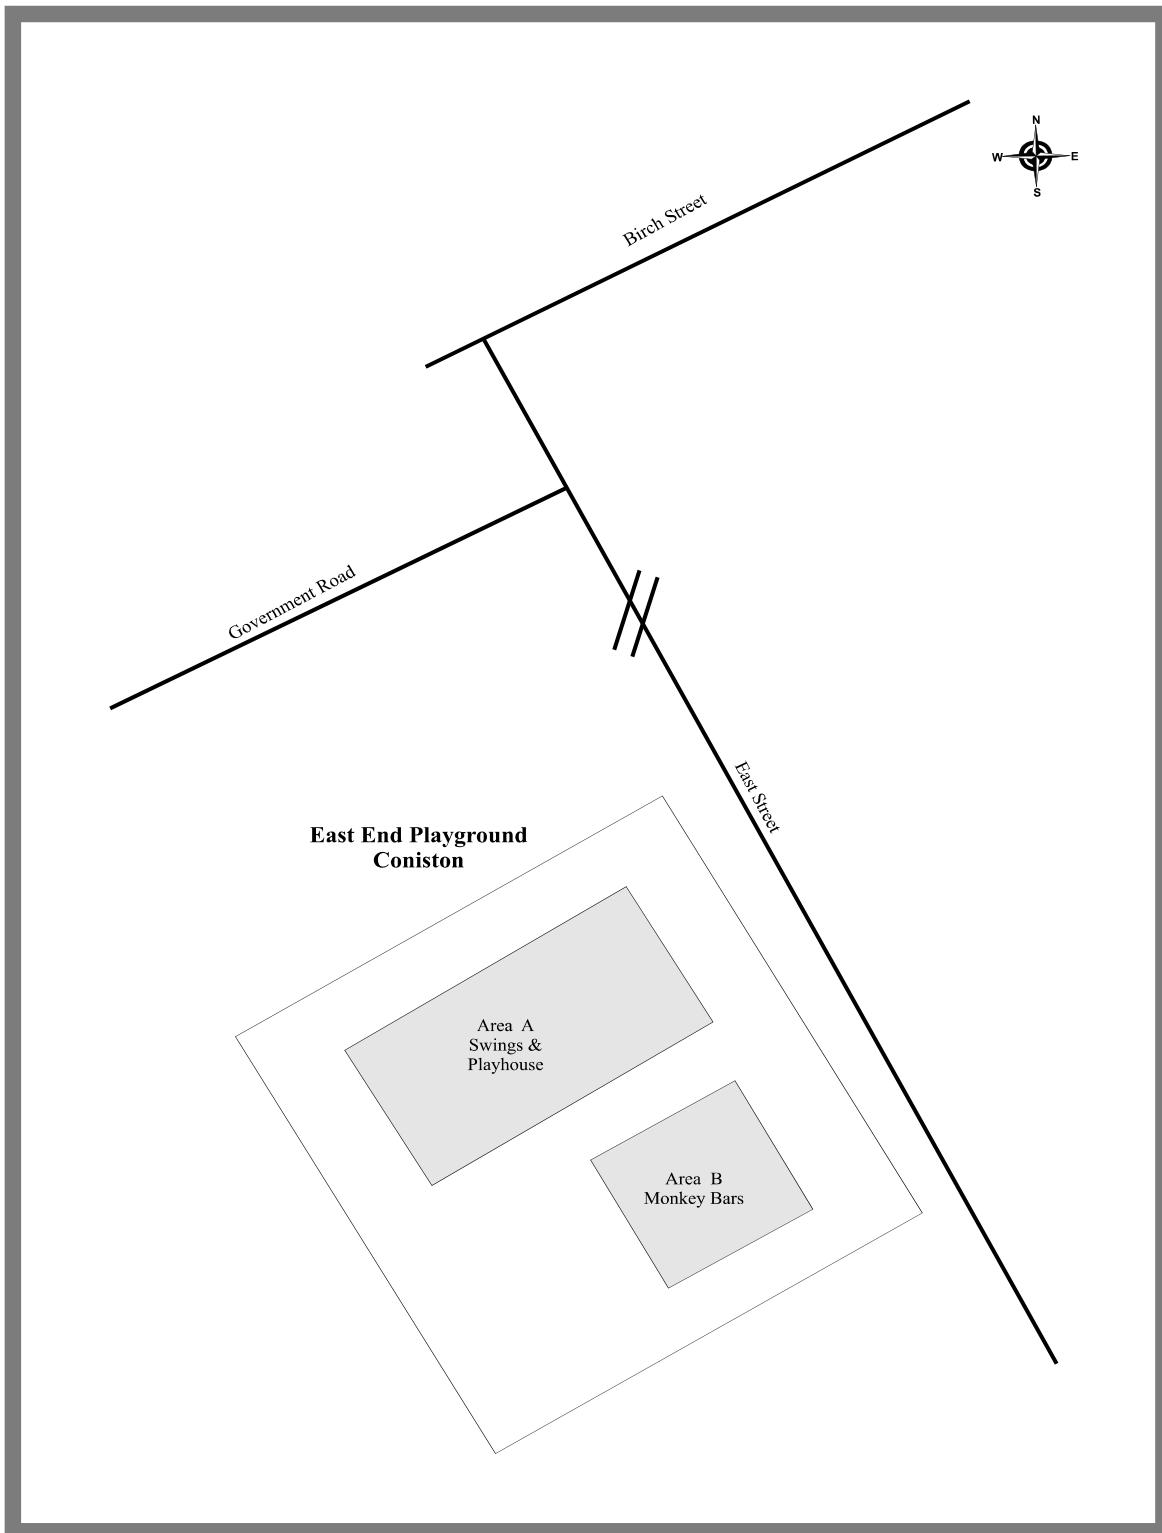

**Map C5.1.1:** Centennial Playground, Coniston - 2001.

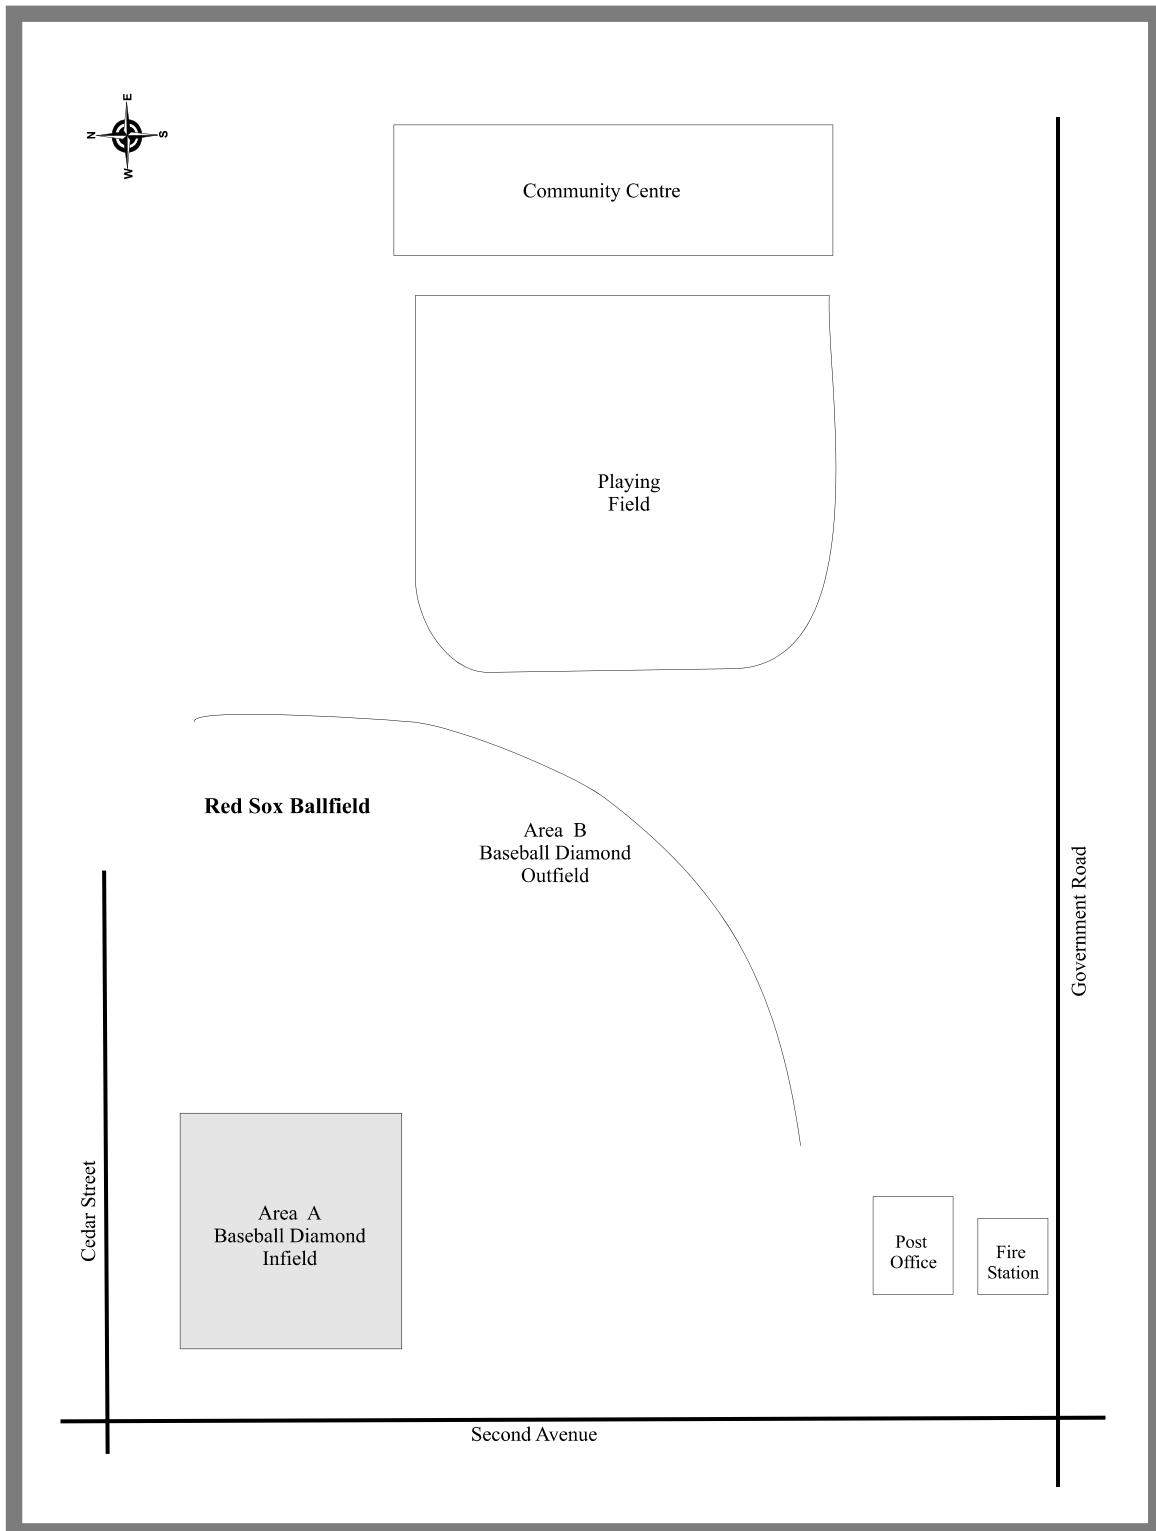

**Map C5.1.2:** Community Centre Field, Coniston - 2001.

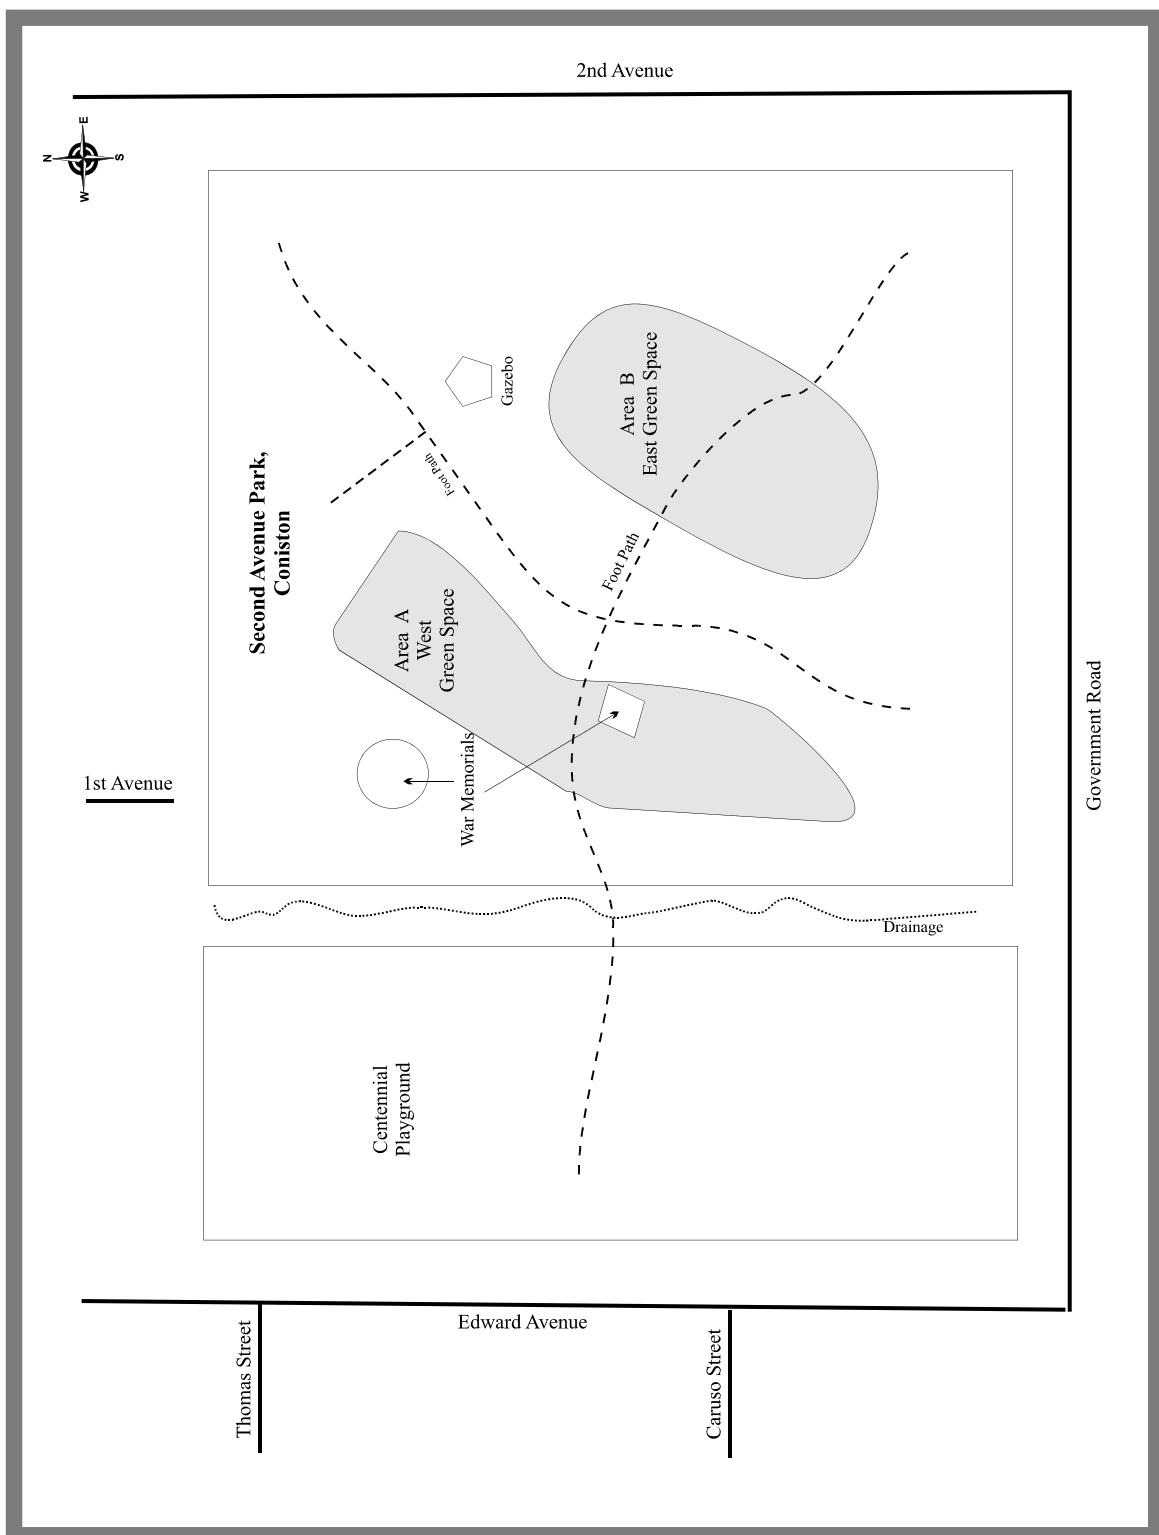

**Map C5.1.3:** East End Ballfield, Coniston - 2001.

**Map C5.1.4:** East End Playground, Coniston - 2001.

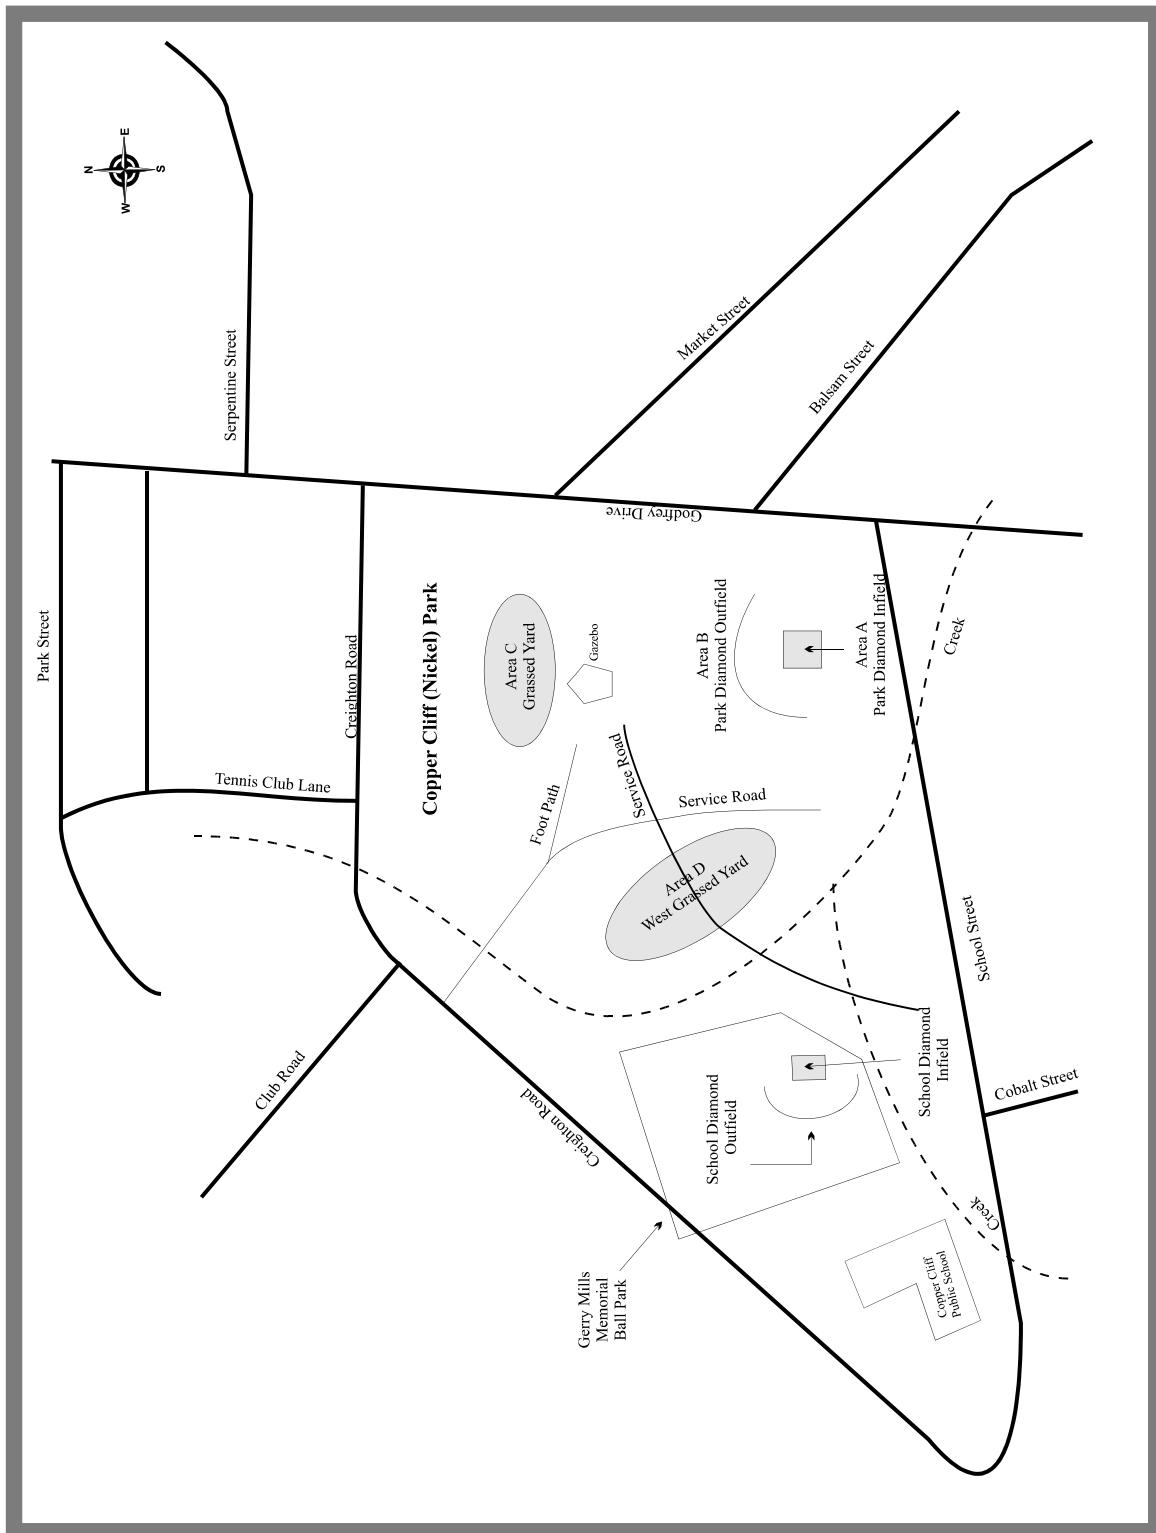

**Map C5.1.5:** Red Sox Ballfield, Coniston - 2001.

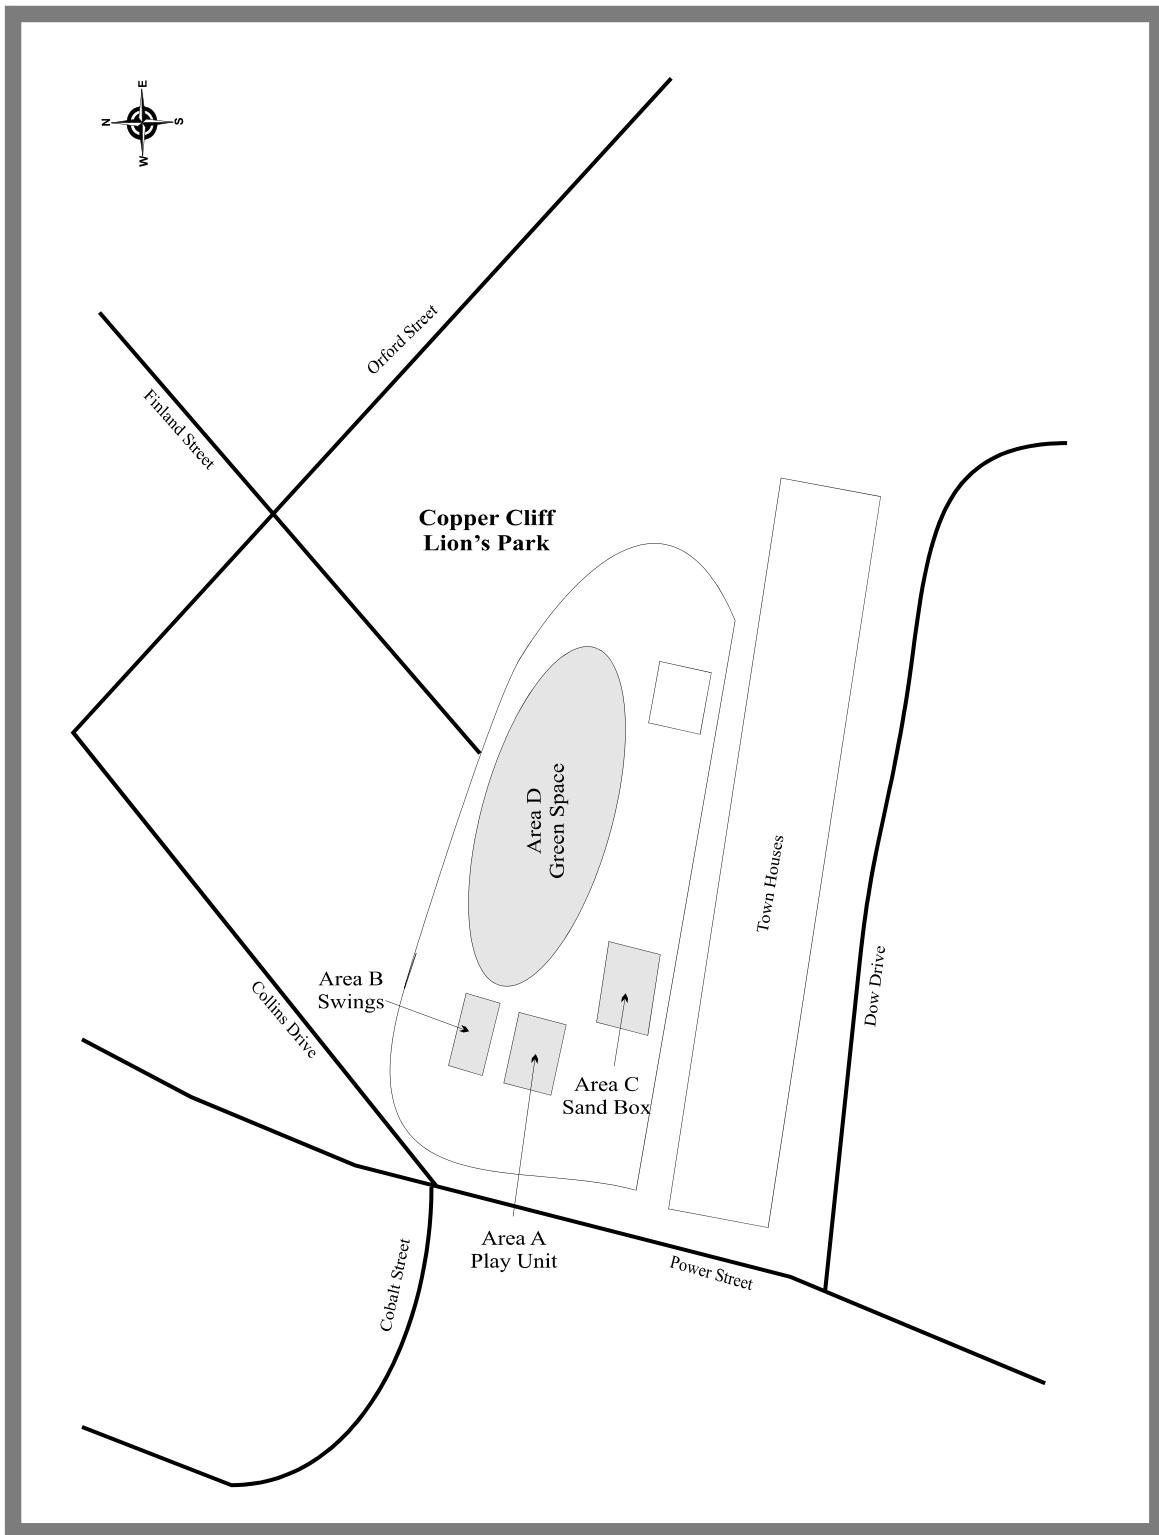

**Map C5.1.6:** Second Avenue Park, Coniston - 2001.

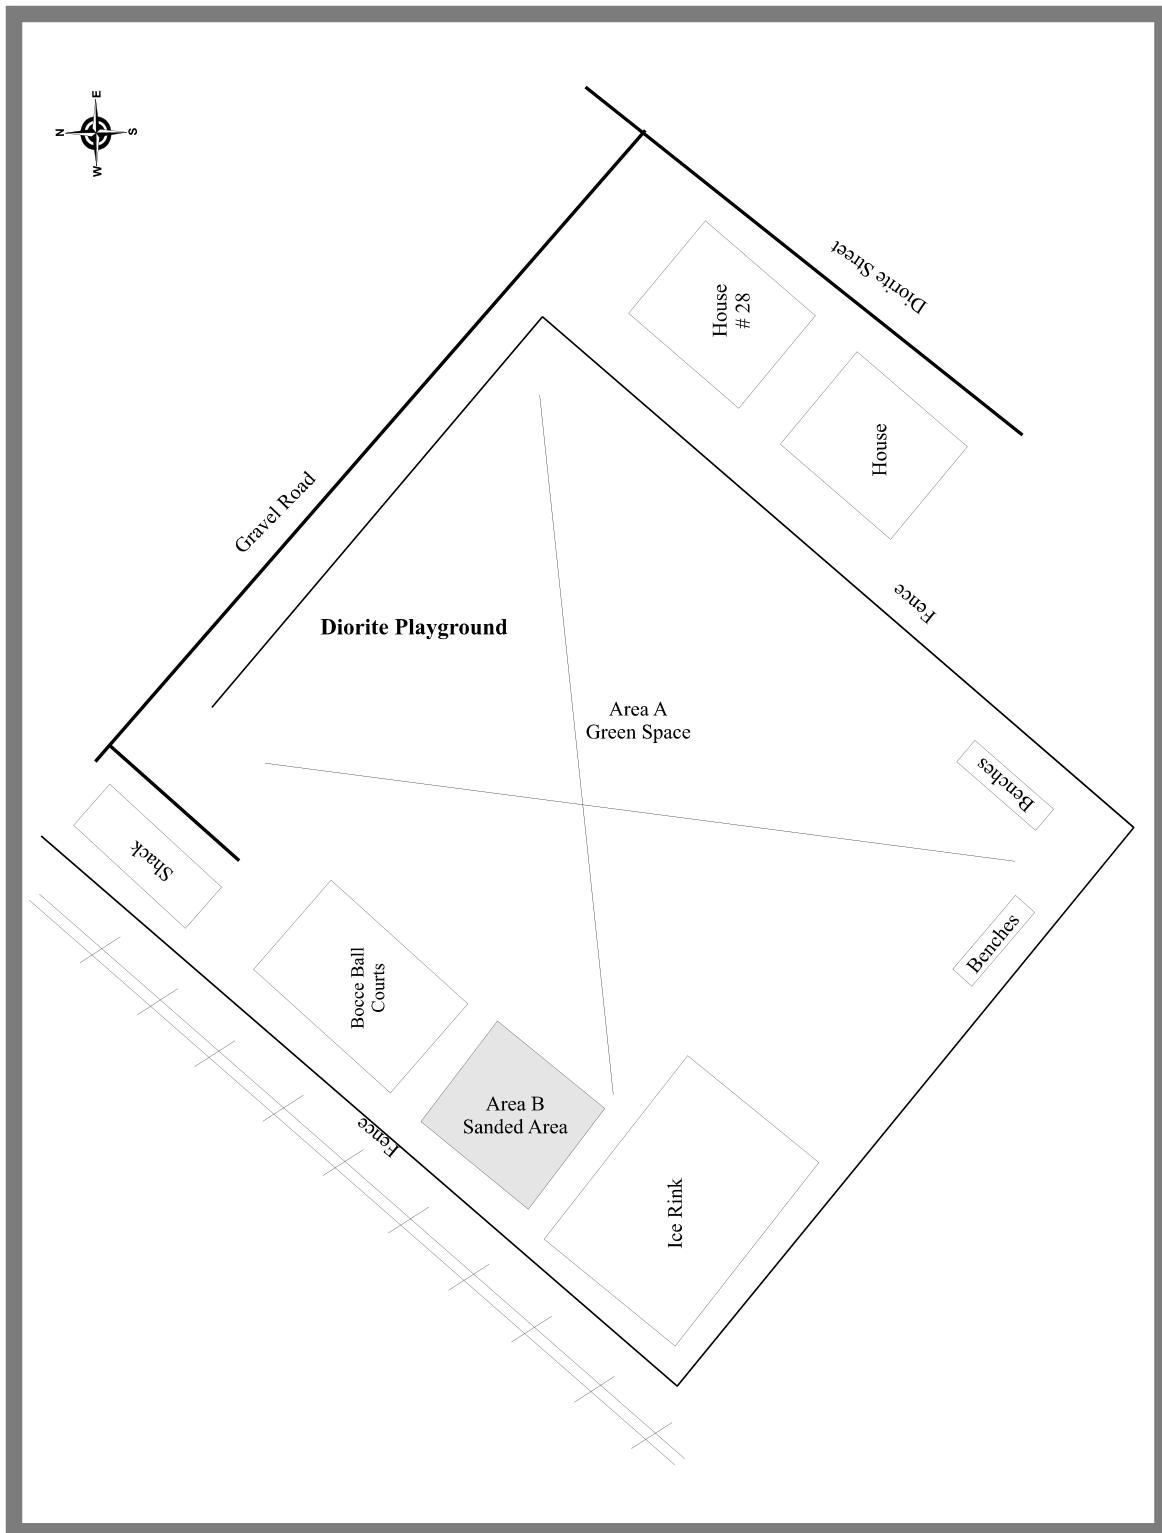

## 5.2 Copper Cliff Park Maps

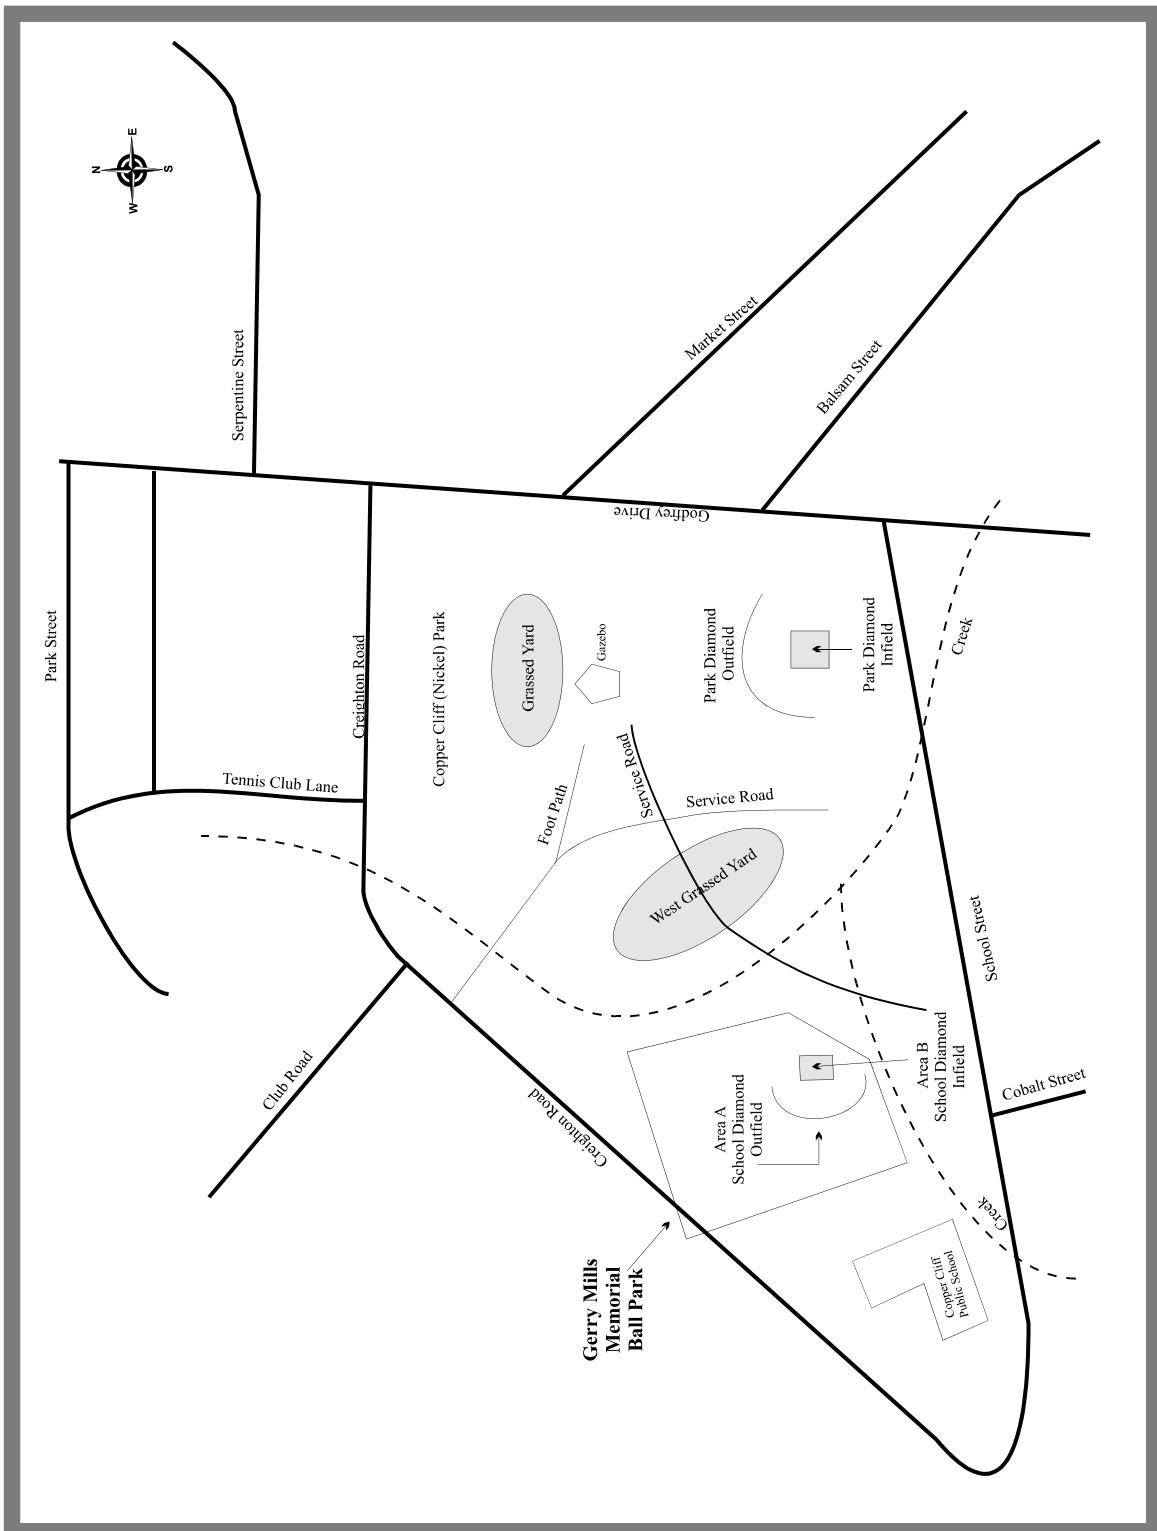

**Map C5.2.1: Copper Cliff (Nickel) Park, Copper Cliff - 2001.**

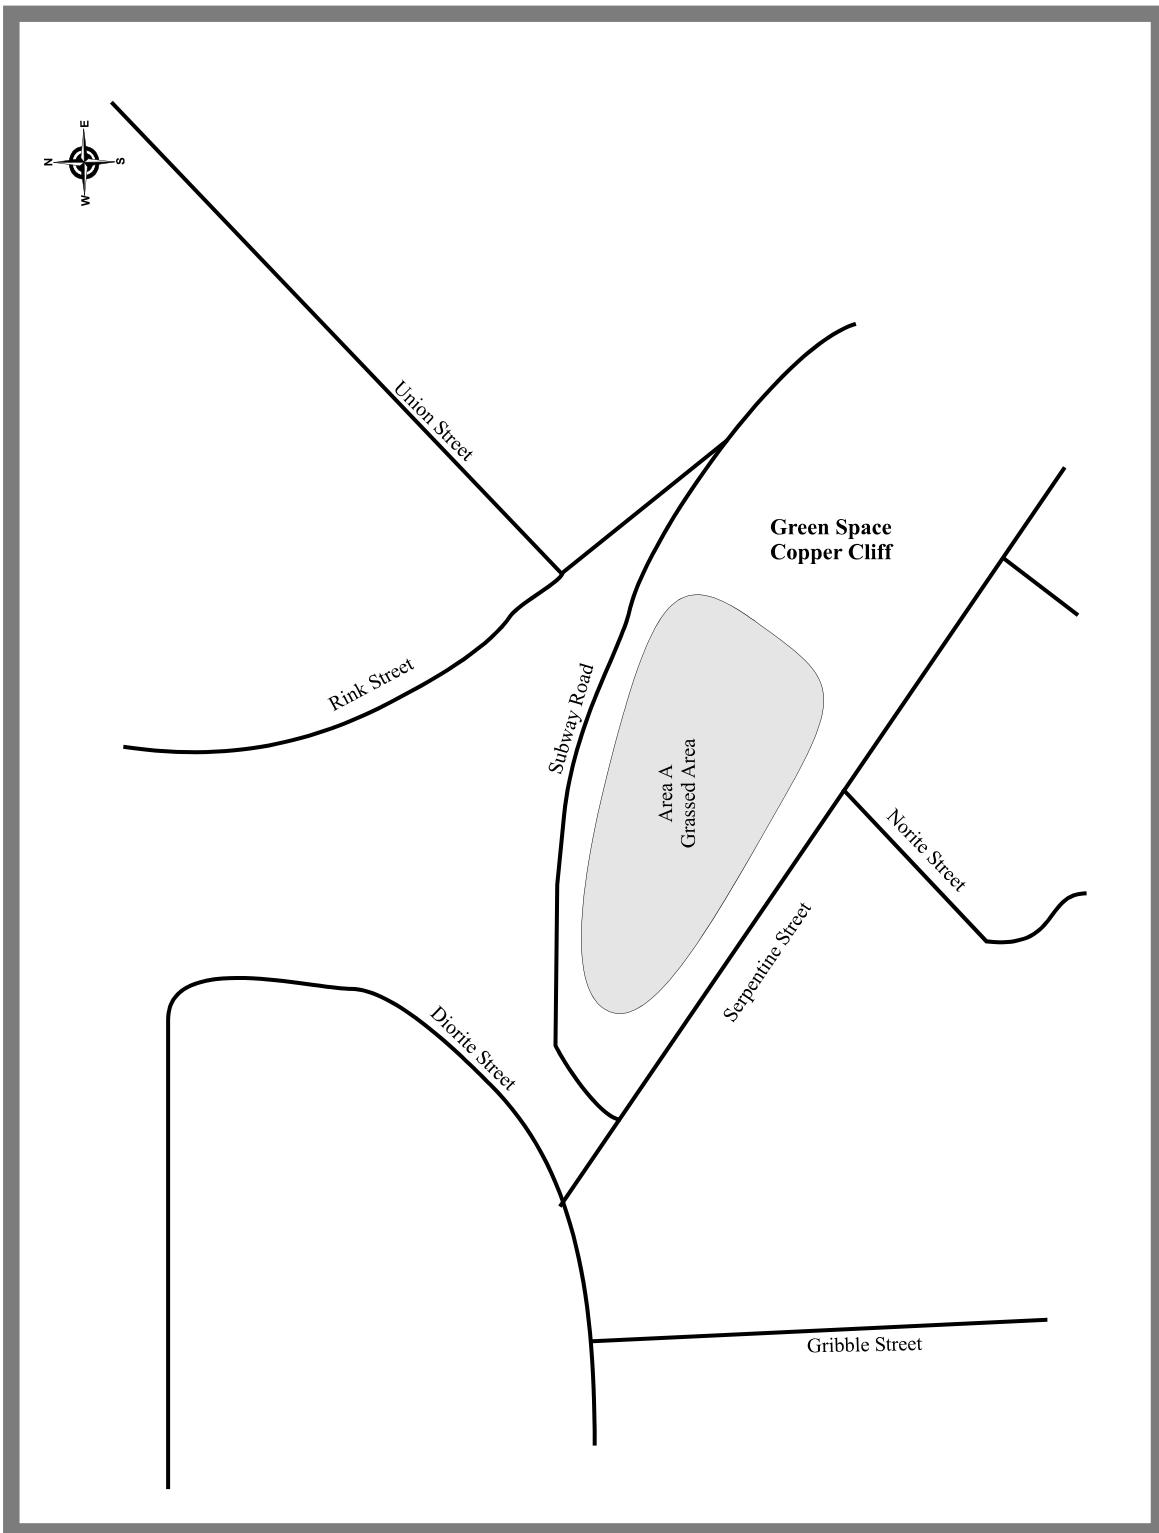

**Map C5.2.2:** Copper Cliff Lion's Park, Copper Cliff - 2001.

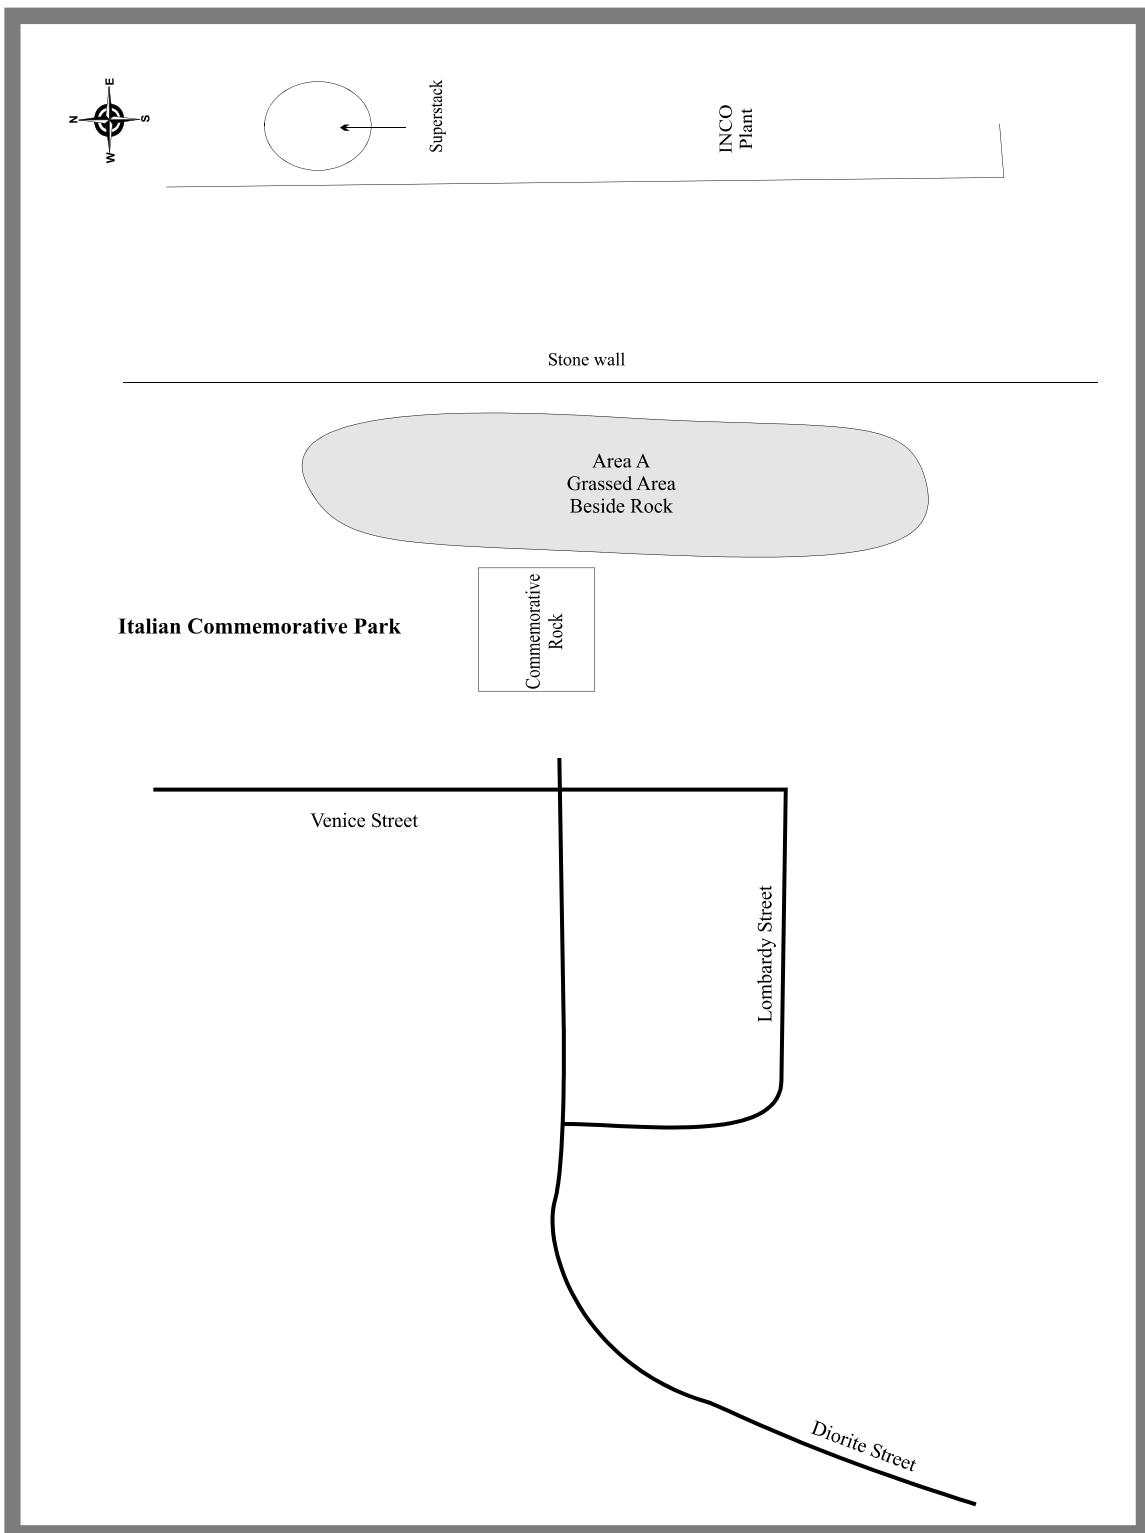

**Map C5.2.3:** Diorite Playground, Copper Cliff - 2001.

**Map C5.2.4:** Gerry Mills Memorial Ball Park, Copper Cliff - 2001.

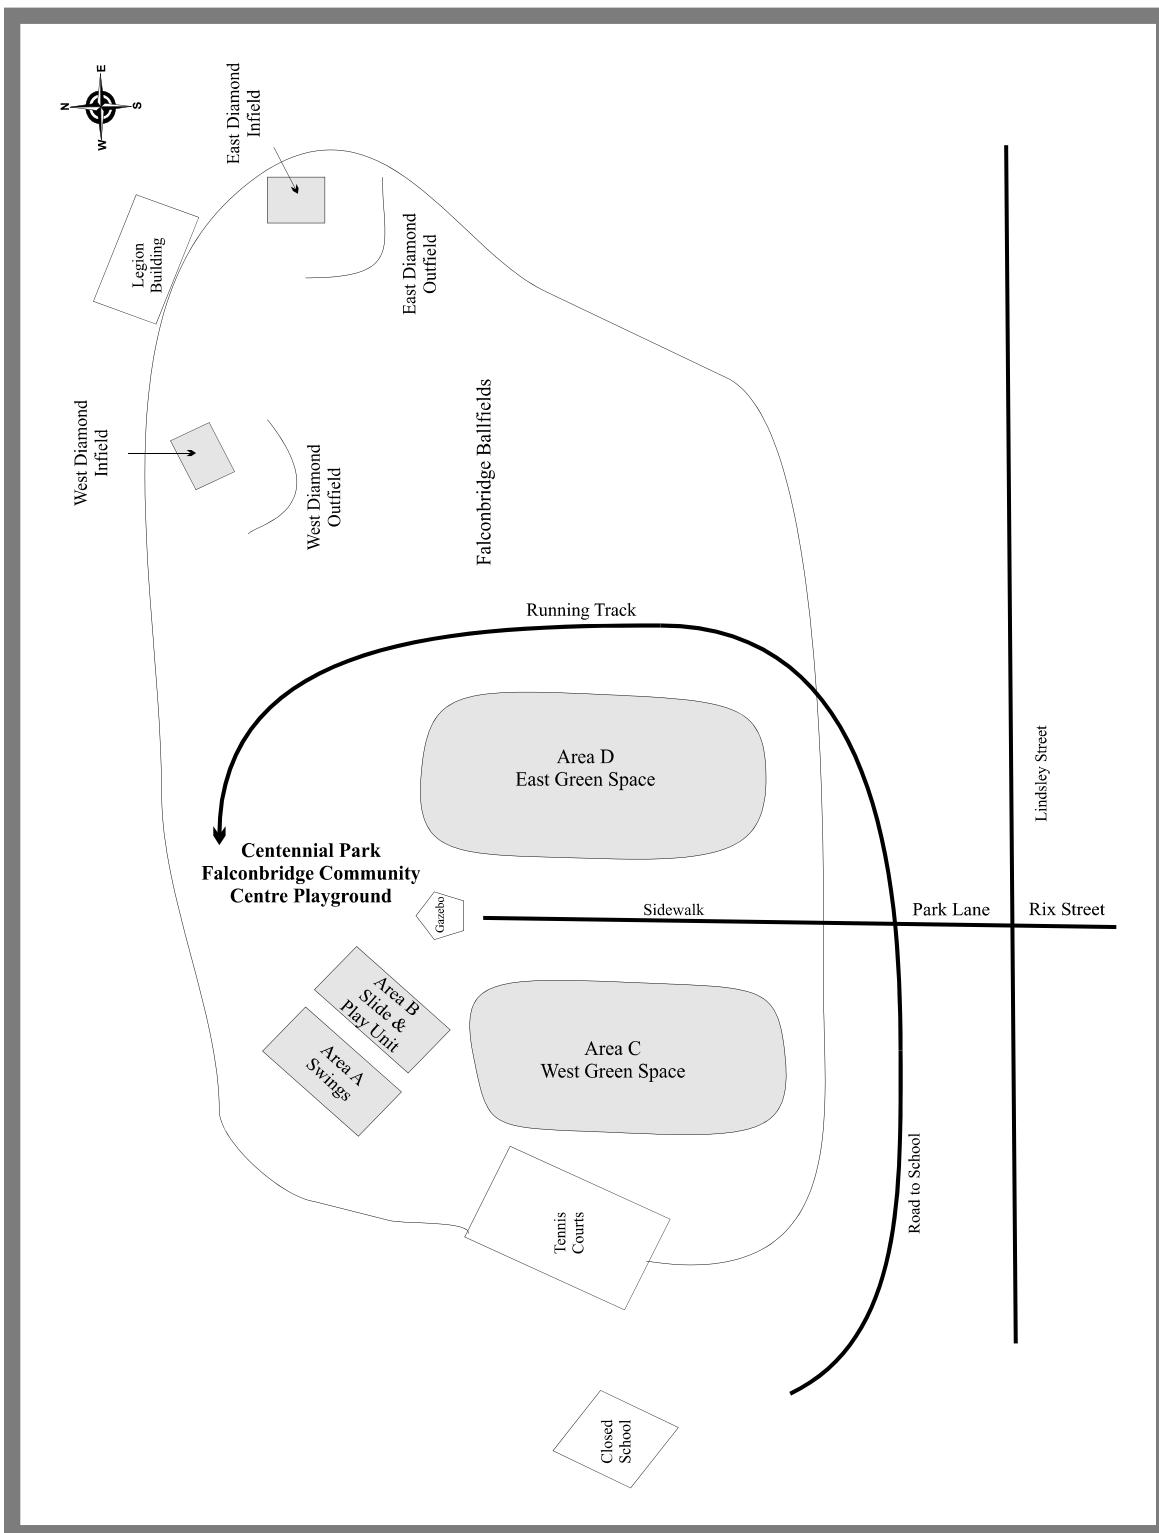

**Map C5.2.5:** Green Space Park, Copper Cliff - 2001.

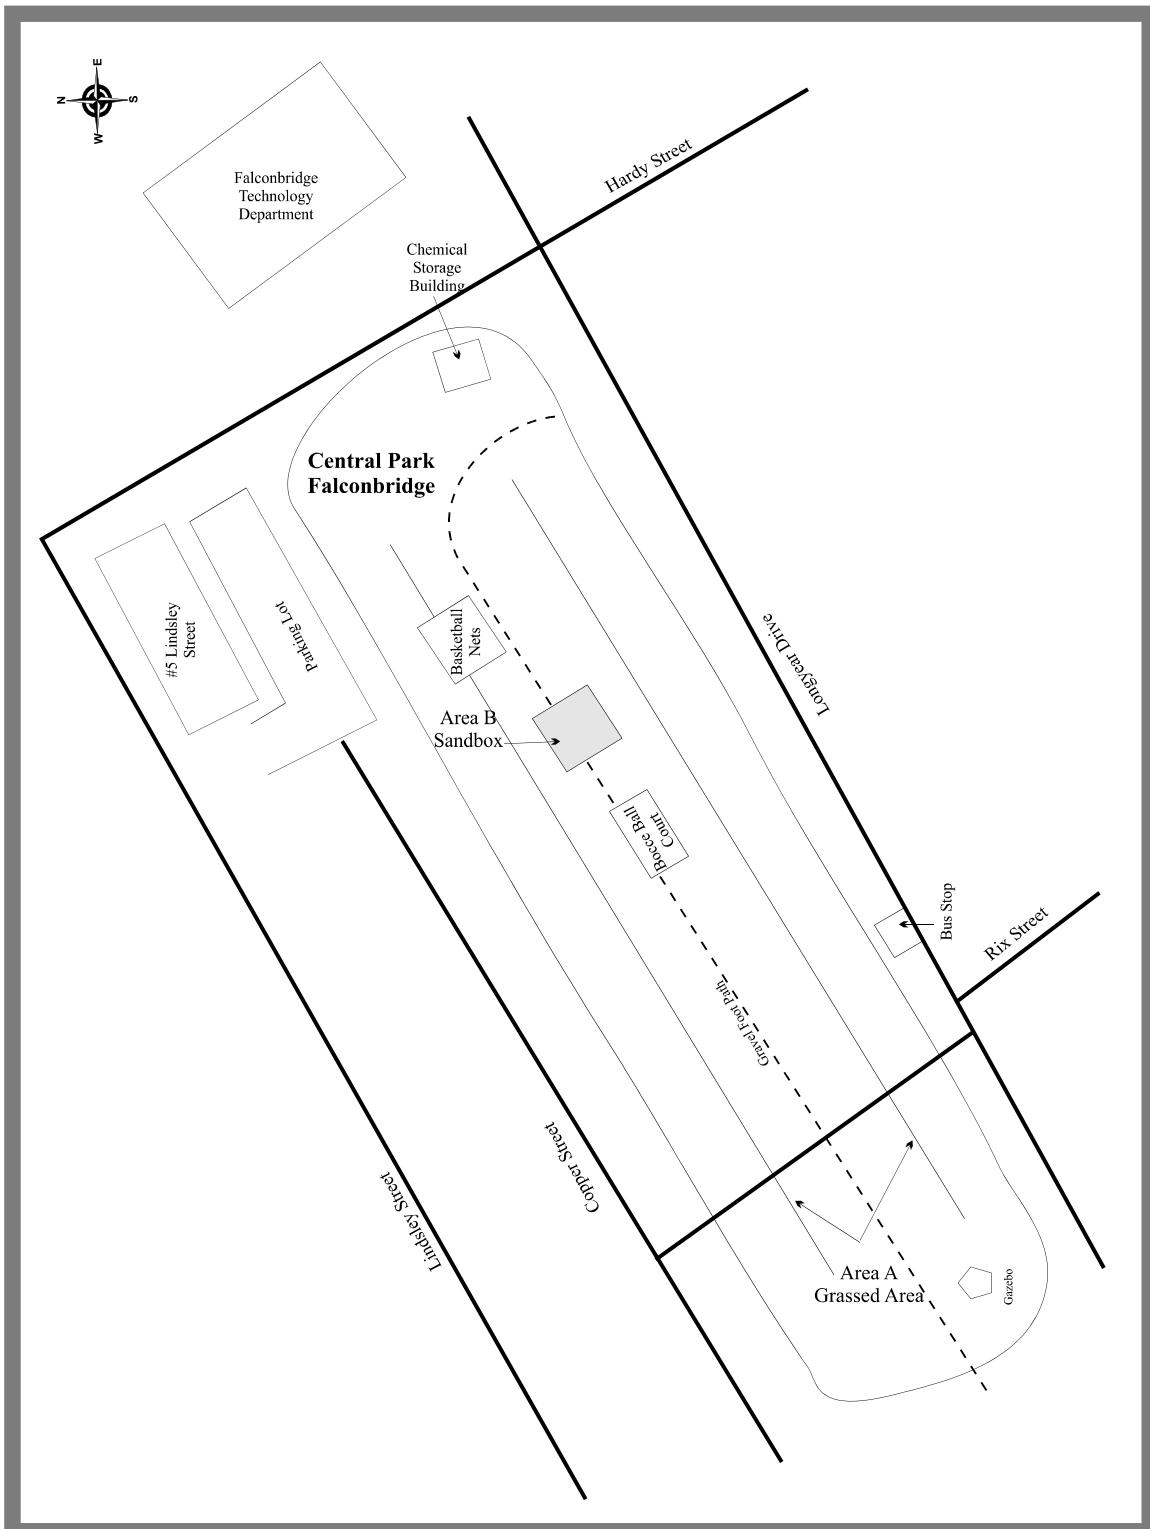

**Map C5.2.6:** Italian Commemorative Park, Copper Cliff - 2001.

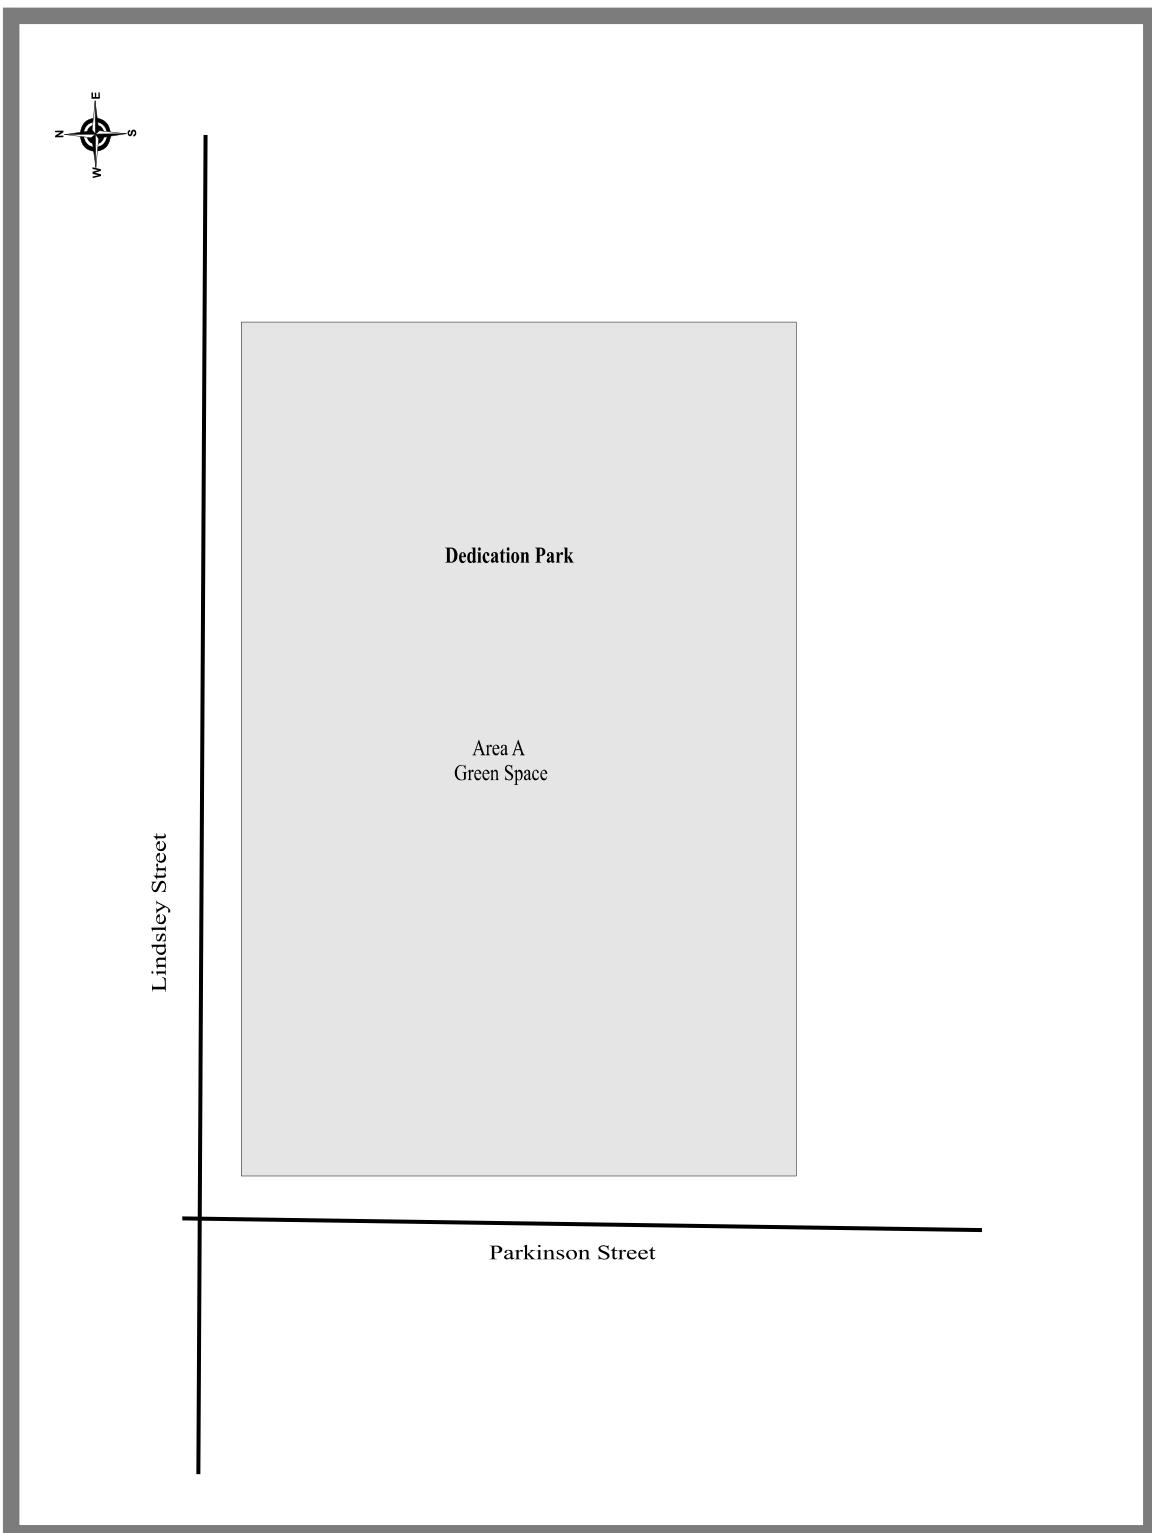

### 5.3 Falconbridge Park Maps

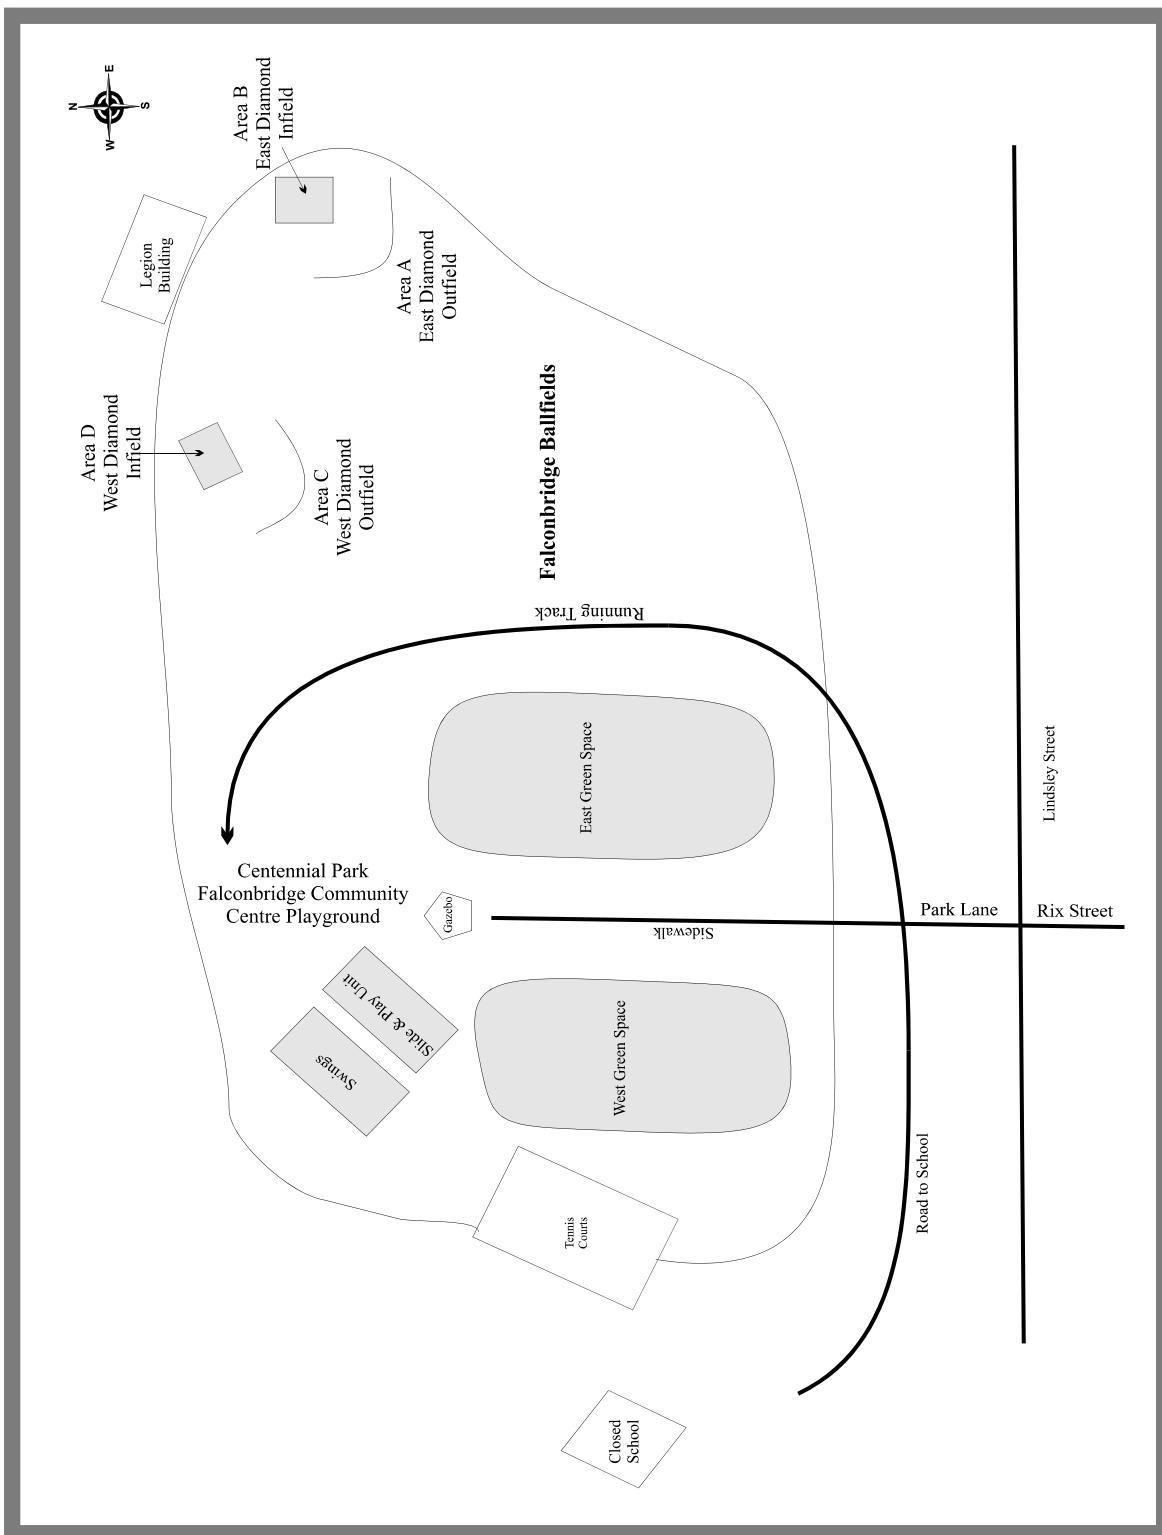

**Map C5.3.1:** Centennial Park, Falconbridge - 2001.

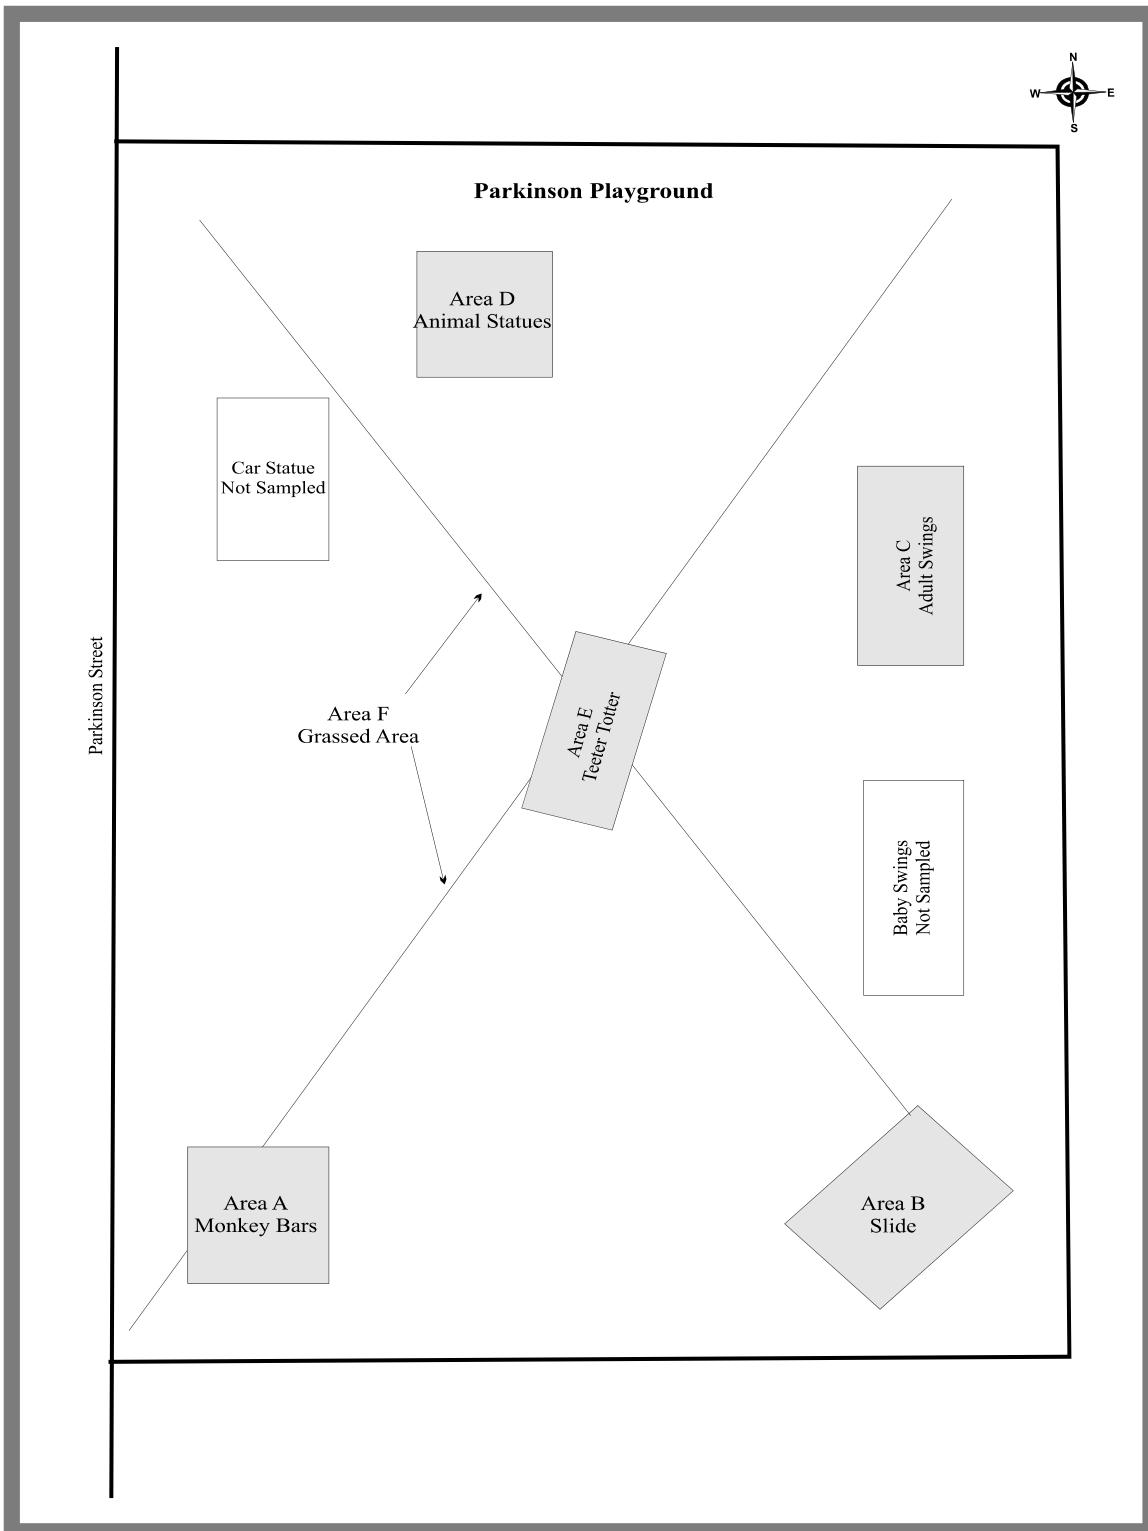

**Map C5.3.2: Central Park, Falconbridge - 2001.**

**Map C5.3.3:** Dedication Park, Falconbridge - 2001.

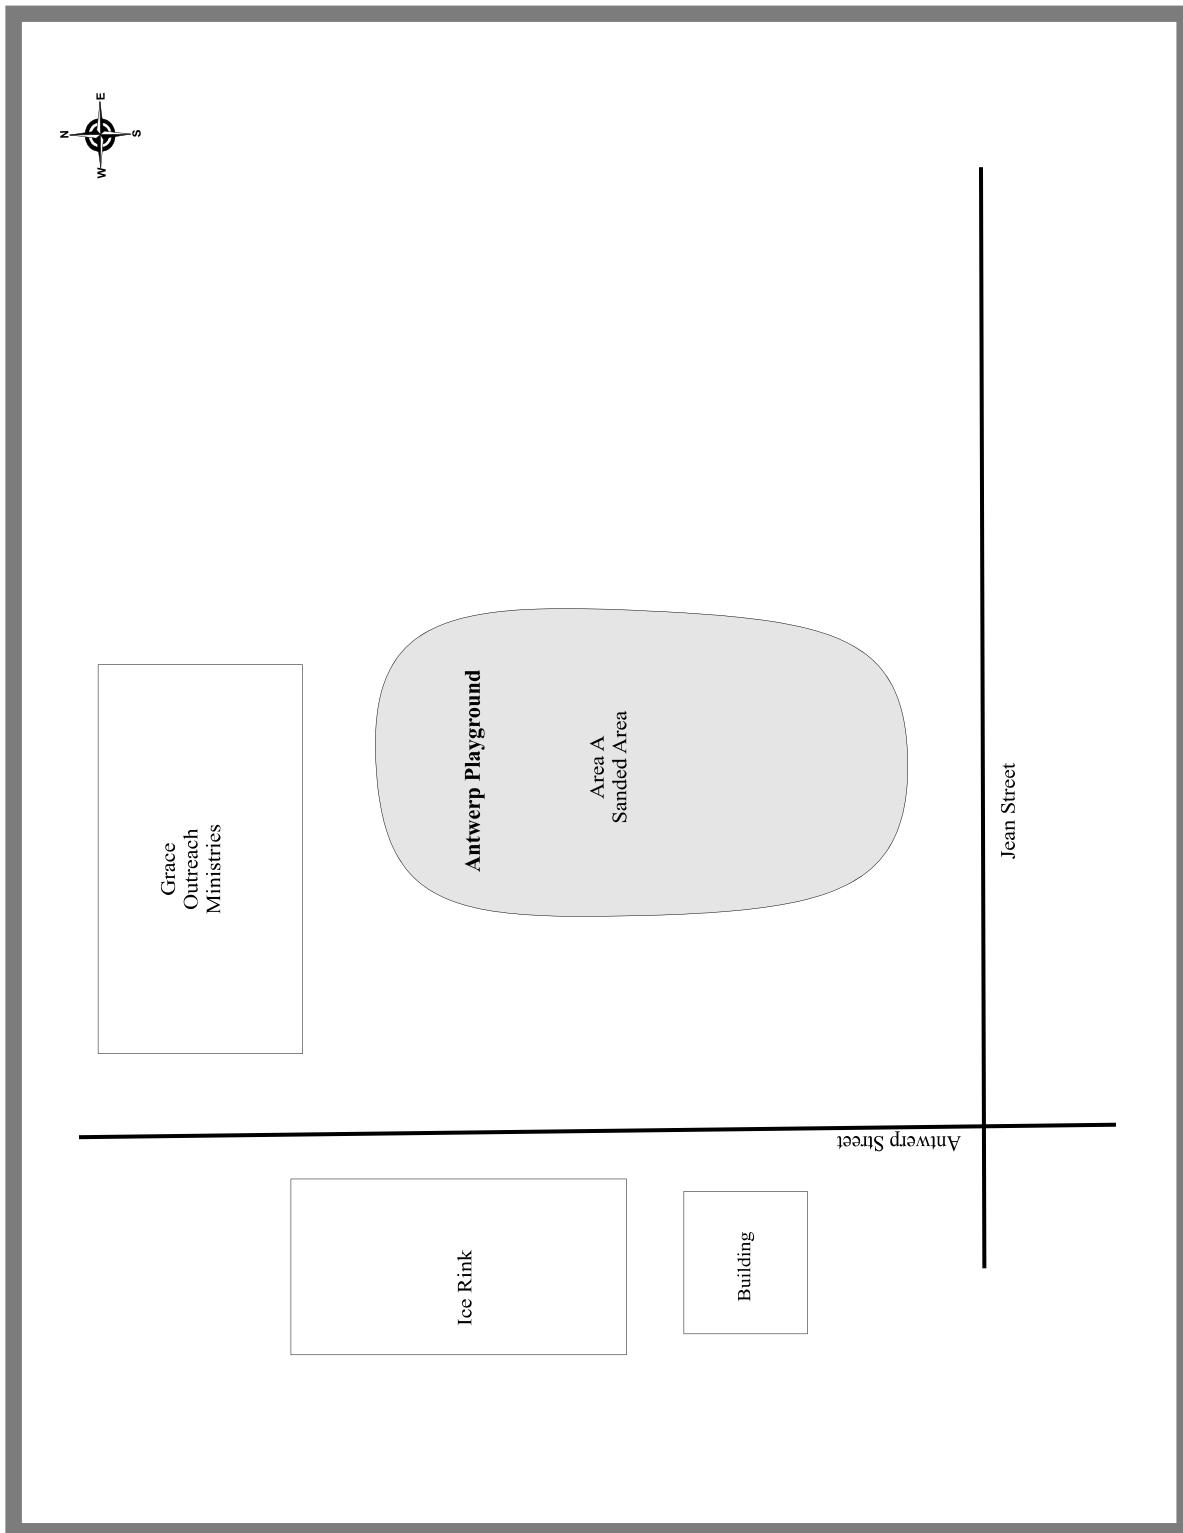

**Map C5.3.4: Falconbridge Ballfields, Falconbridge - 2001.**

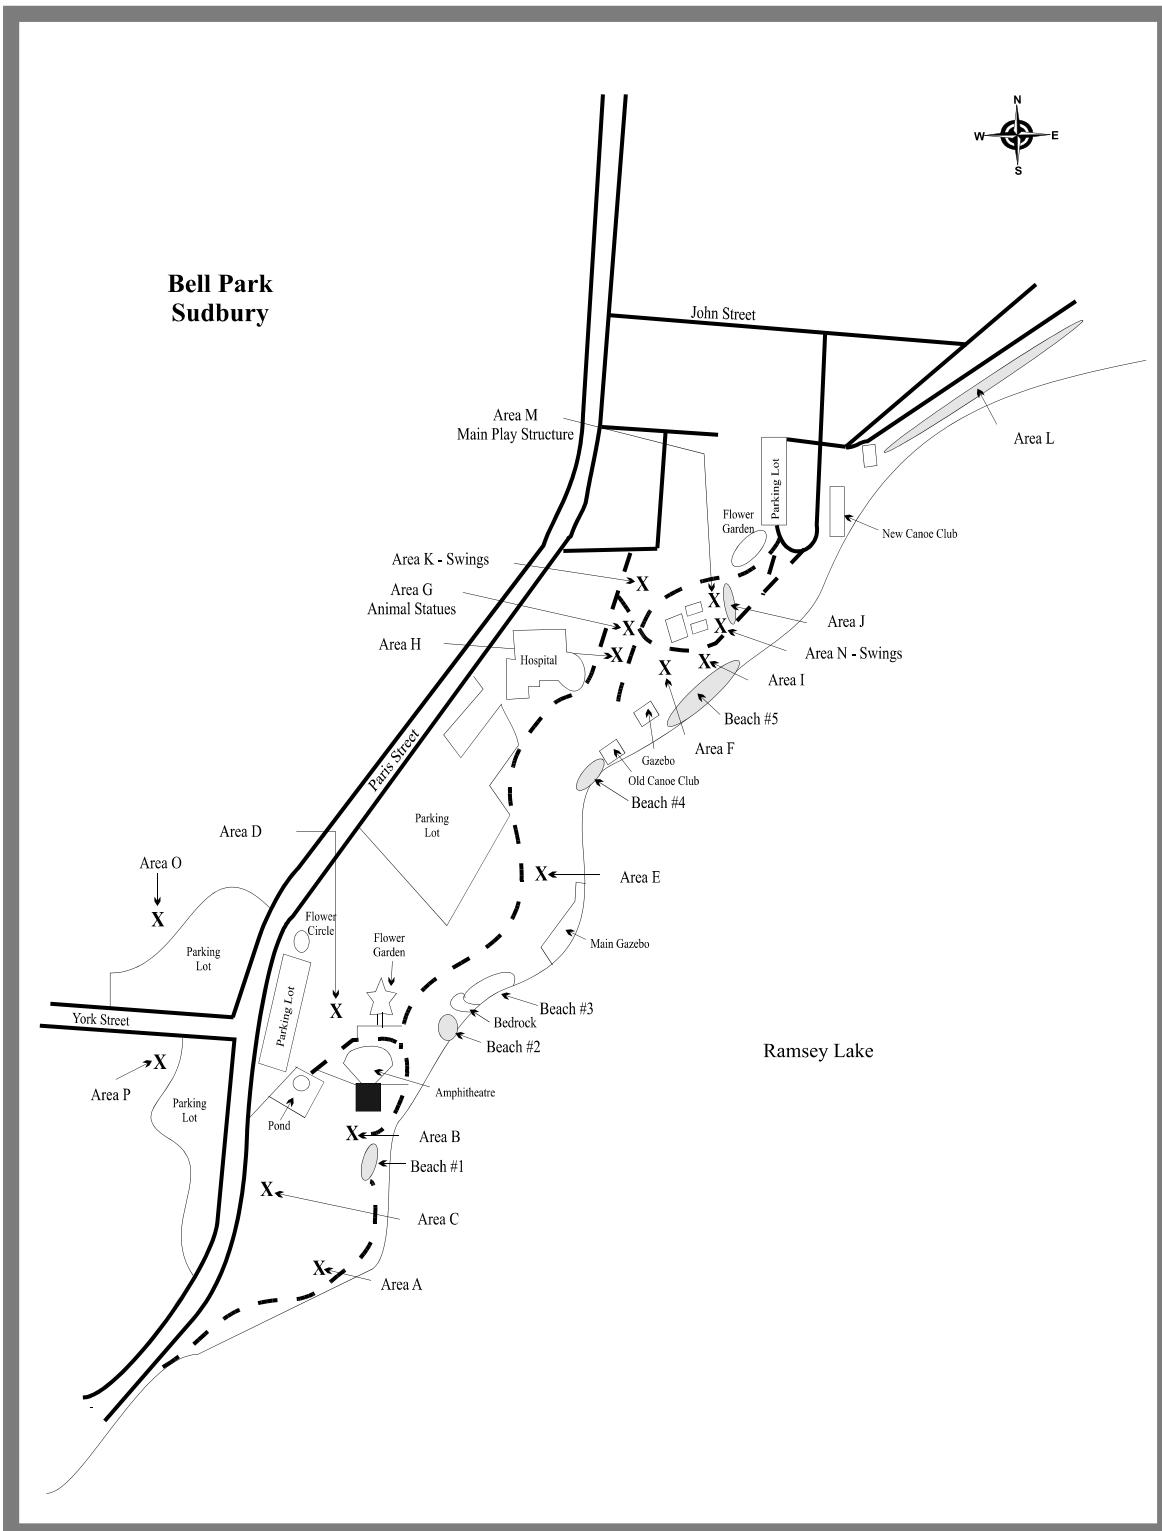

**Map C5.3.5:** Parkinson Playground, Falconbridge - 2001.

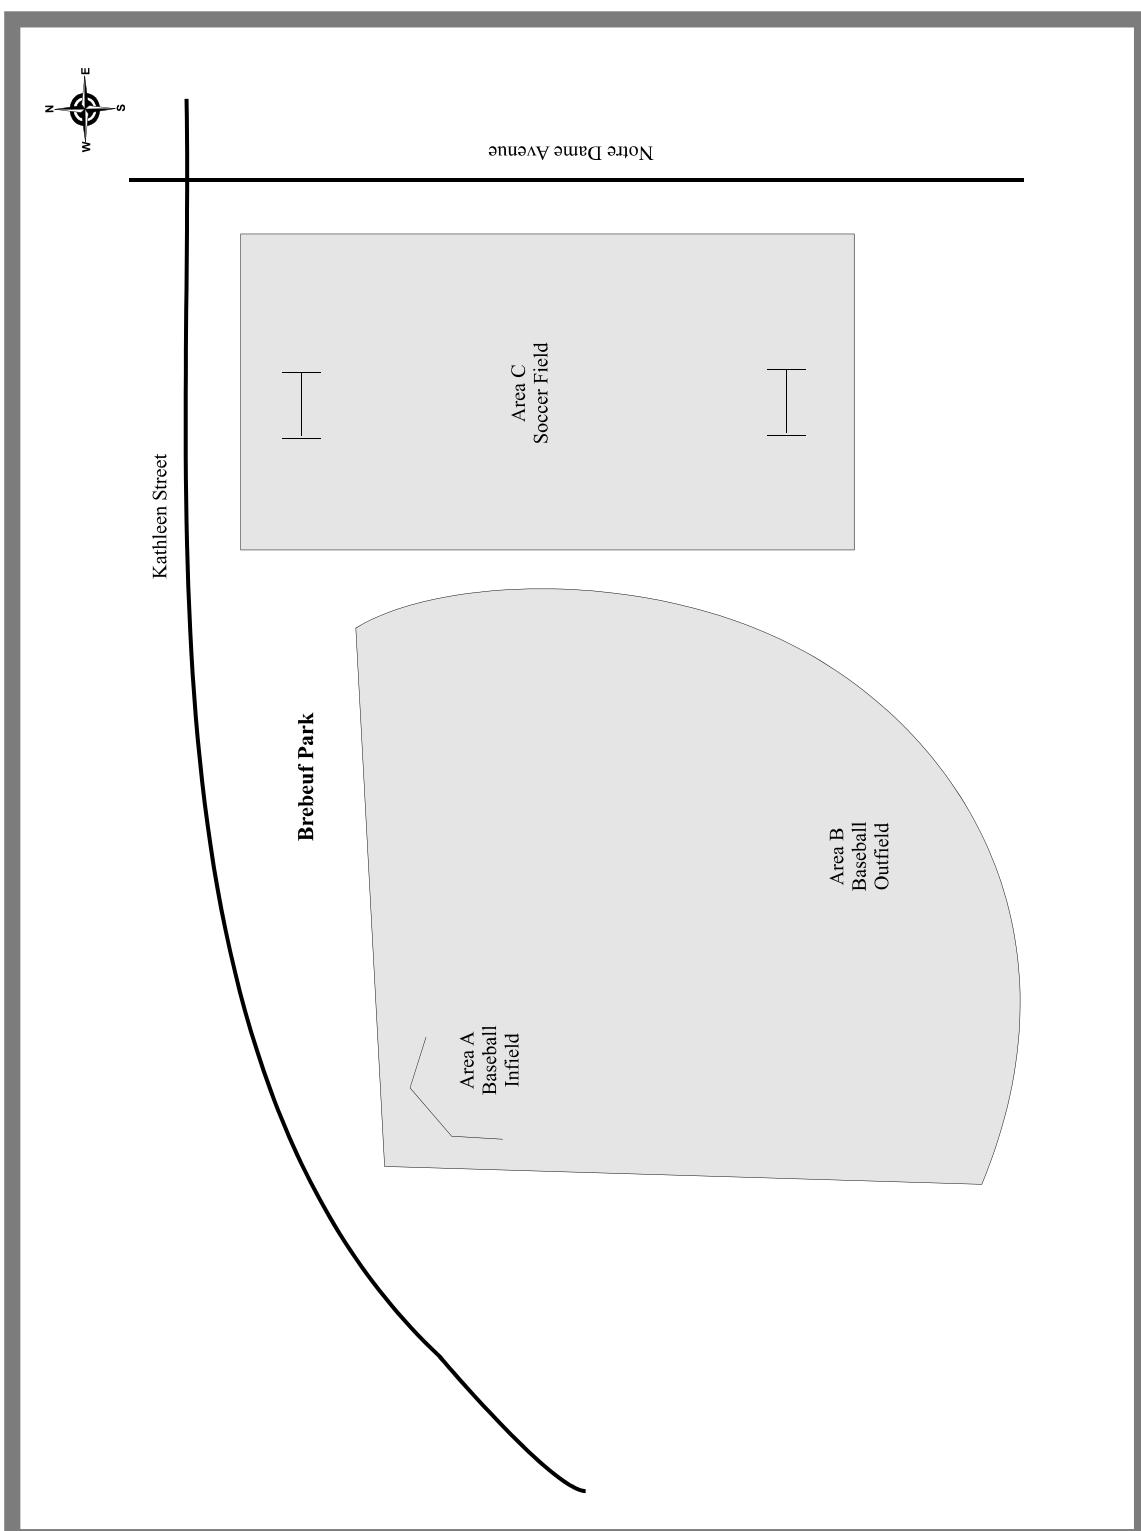

### 5.3 Sudbury Core Park Maps

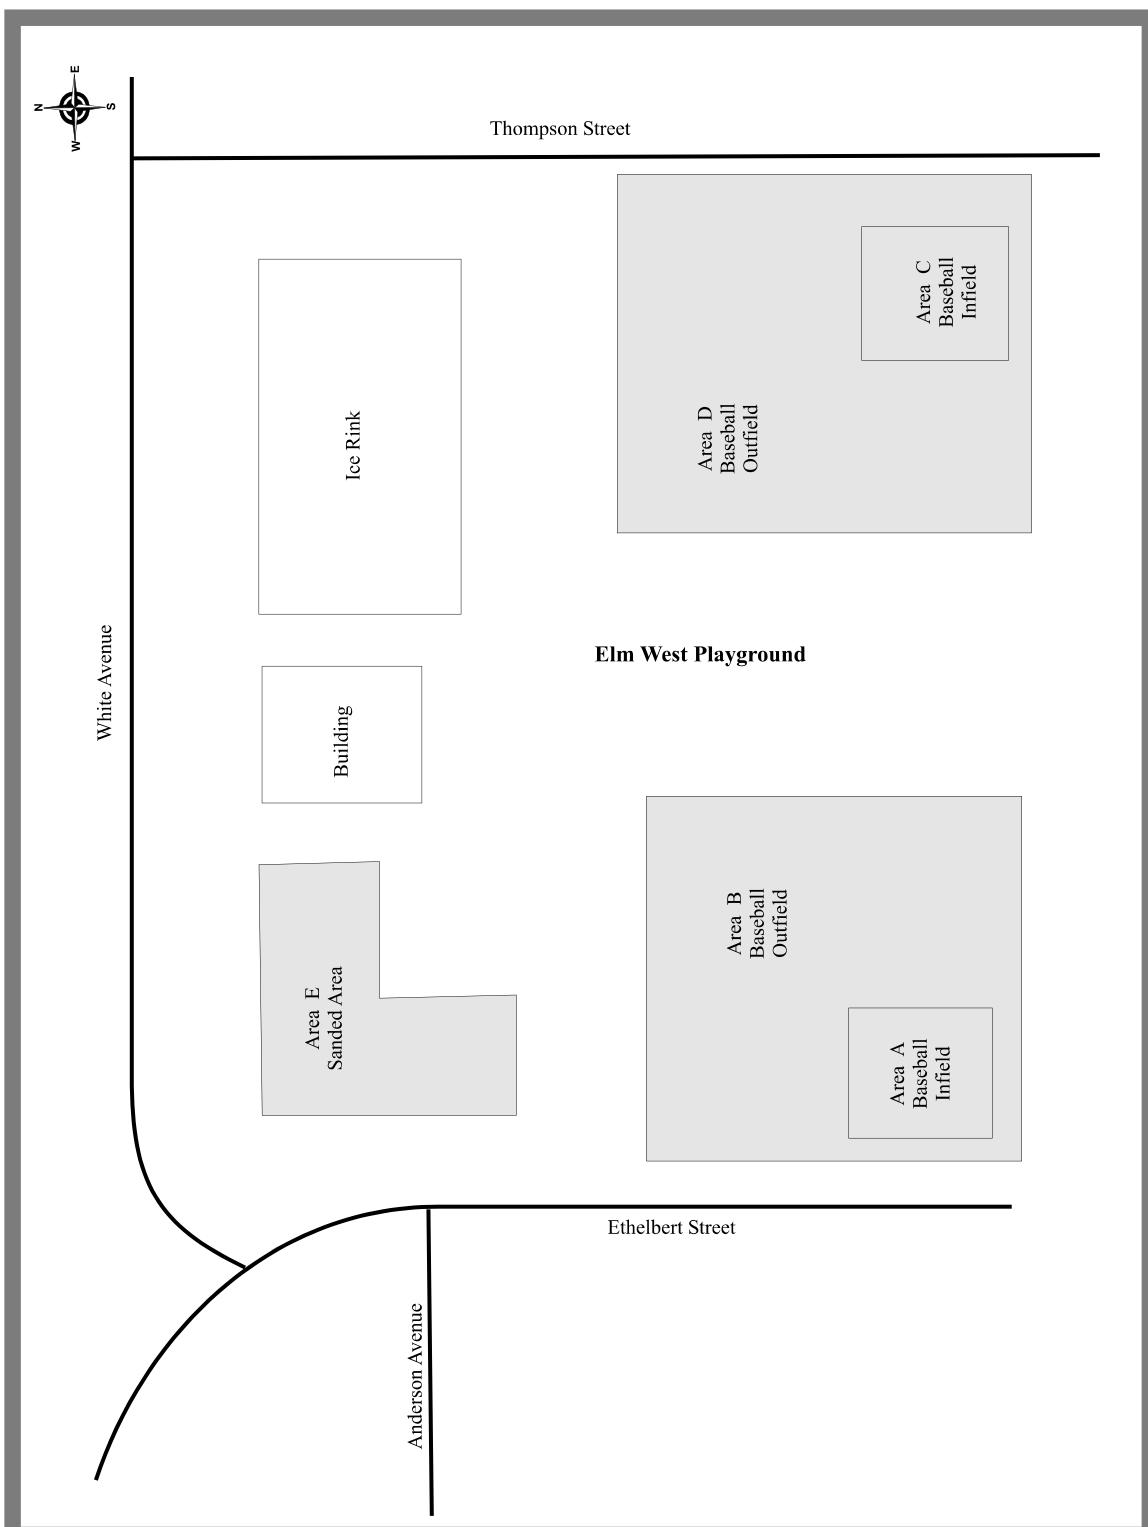

**Map C5.4.1:** Antwerp Playground, Sudbury Core- 2001.

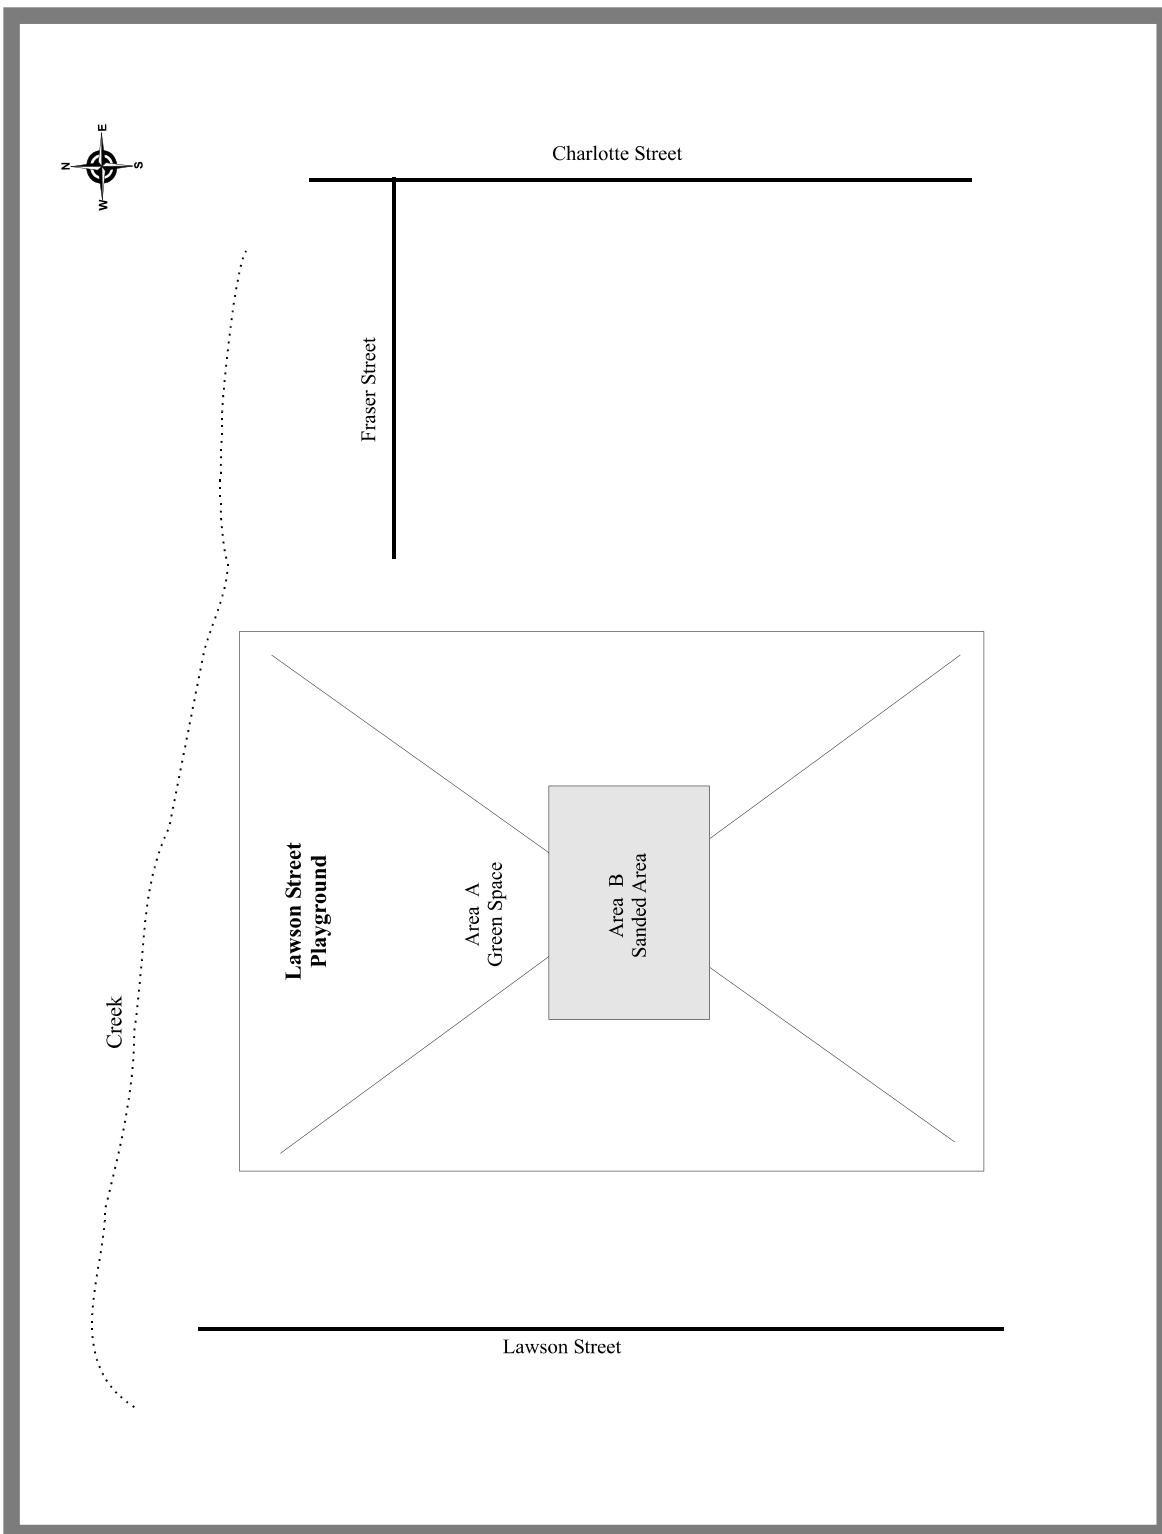

**Map C5.4.2:** Bell Park, Sudbury Core - 2001.

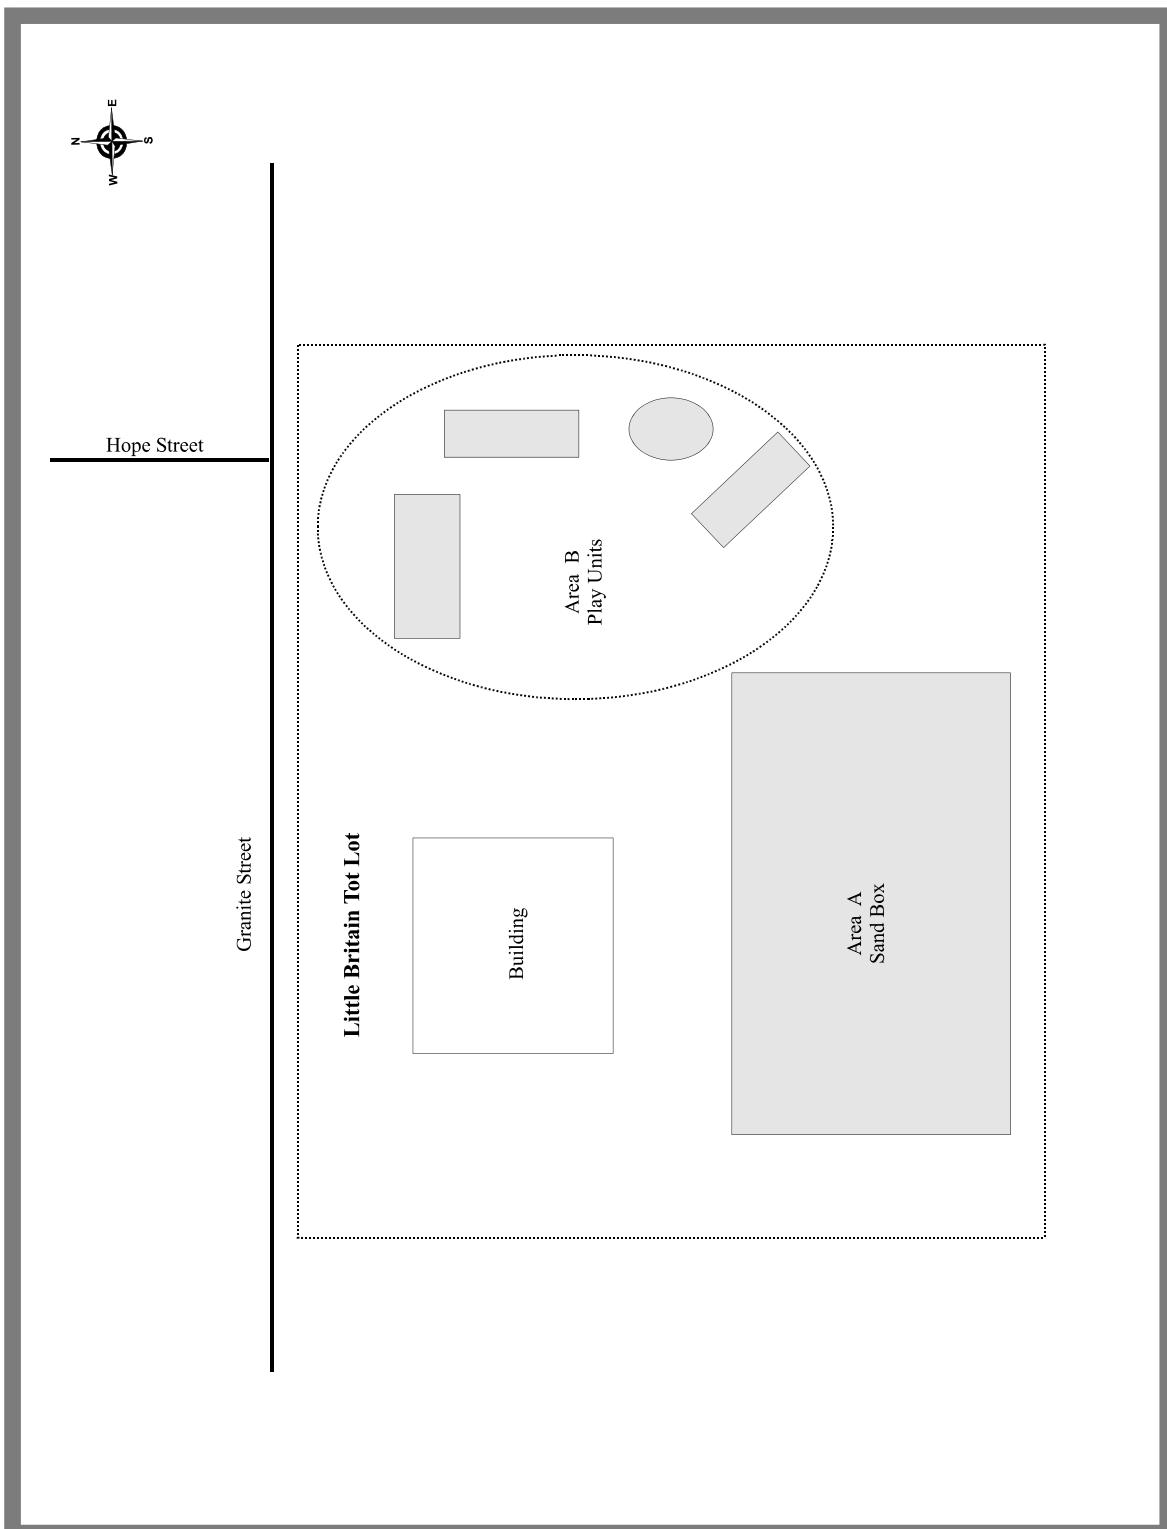

**Map C5.4.3:** Brebeuf Park, Sudbury Core - 2001.

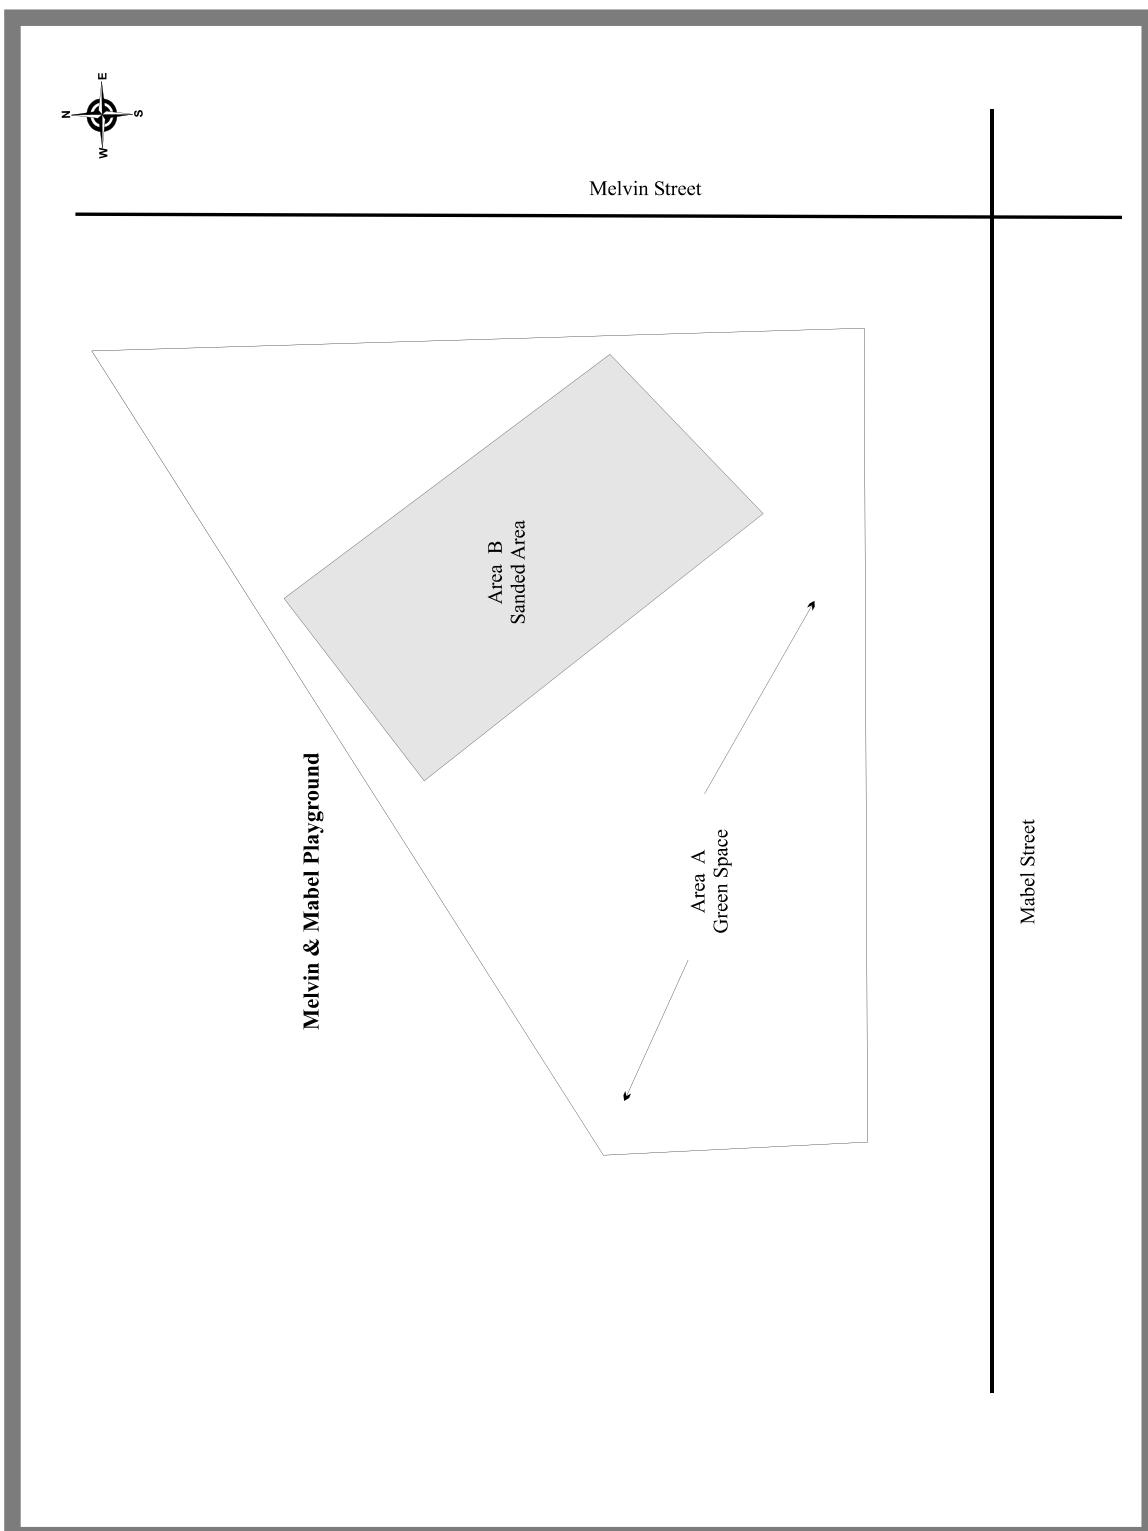

**Map C5.4.4:** Elm West Playground, Sudbury Core - 2001.

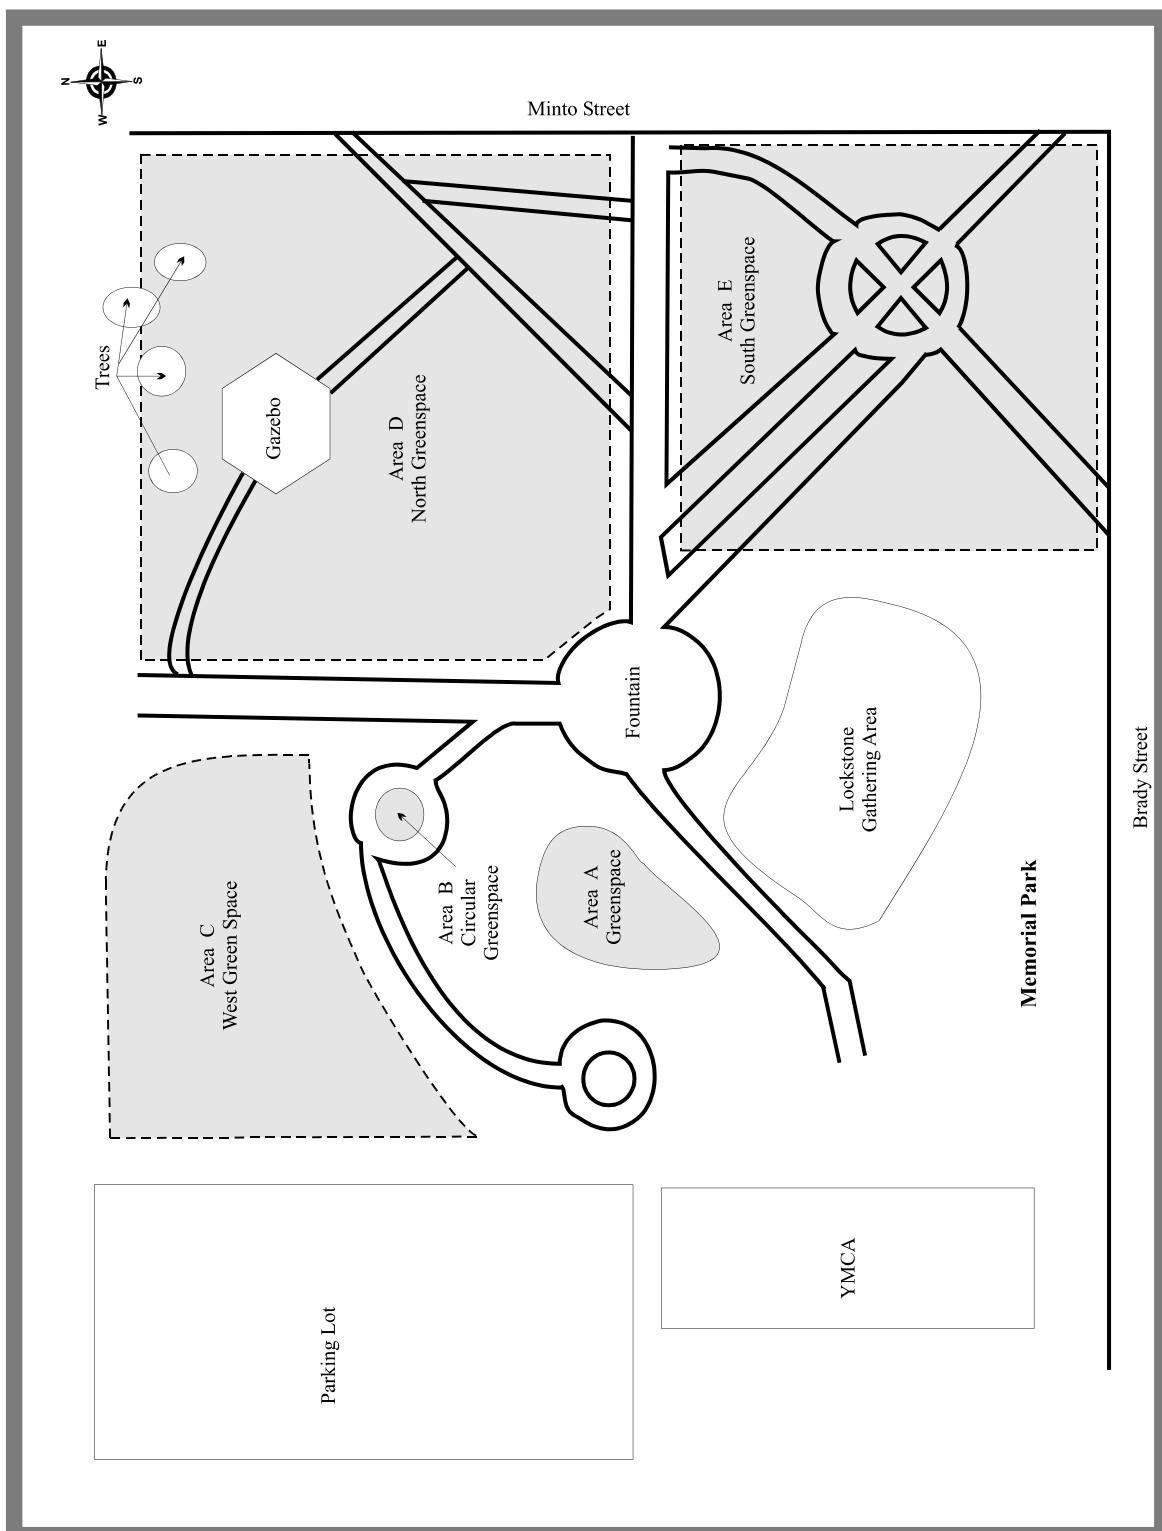

**Map C5.4.5:** Lawson Street Playground, Sudbury Core - 2001.

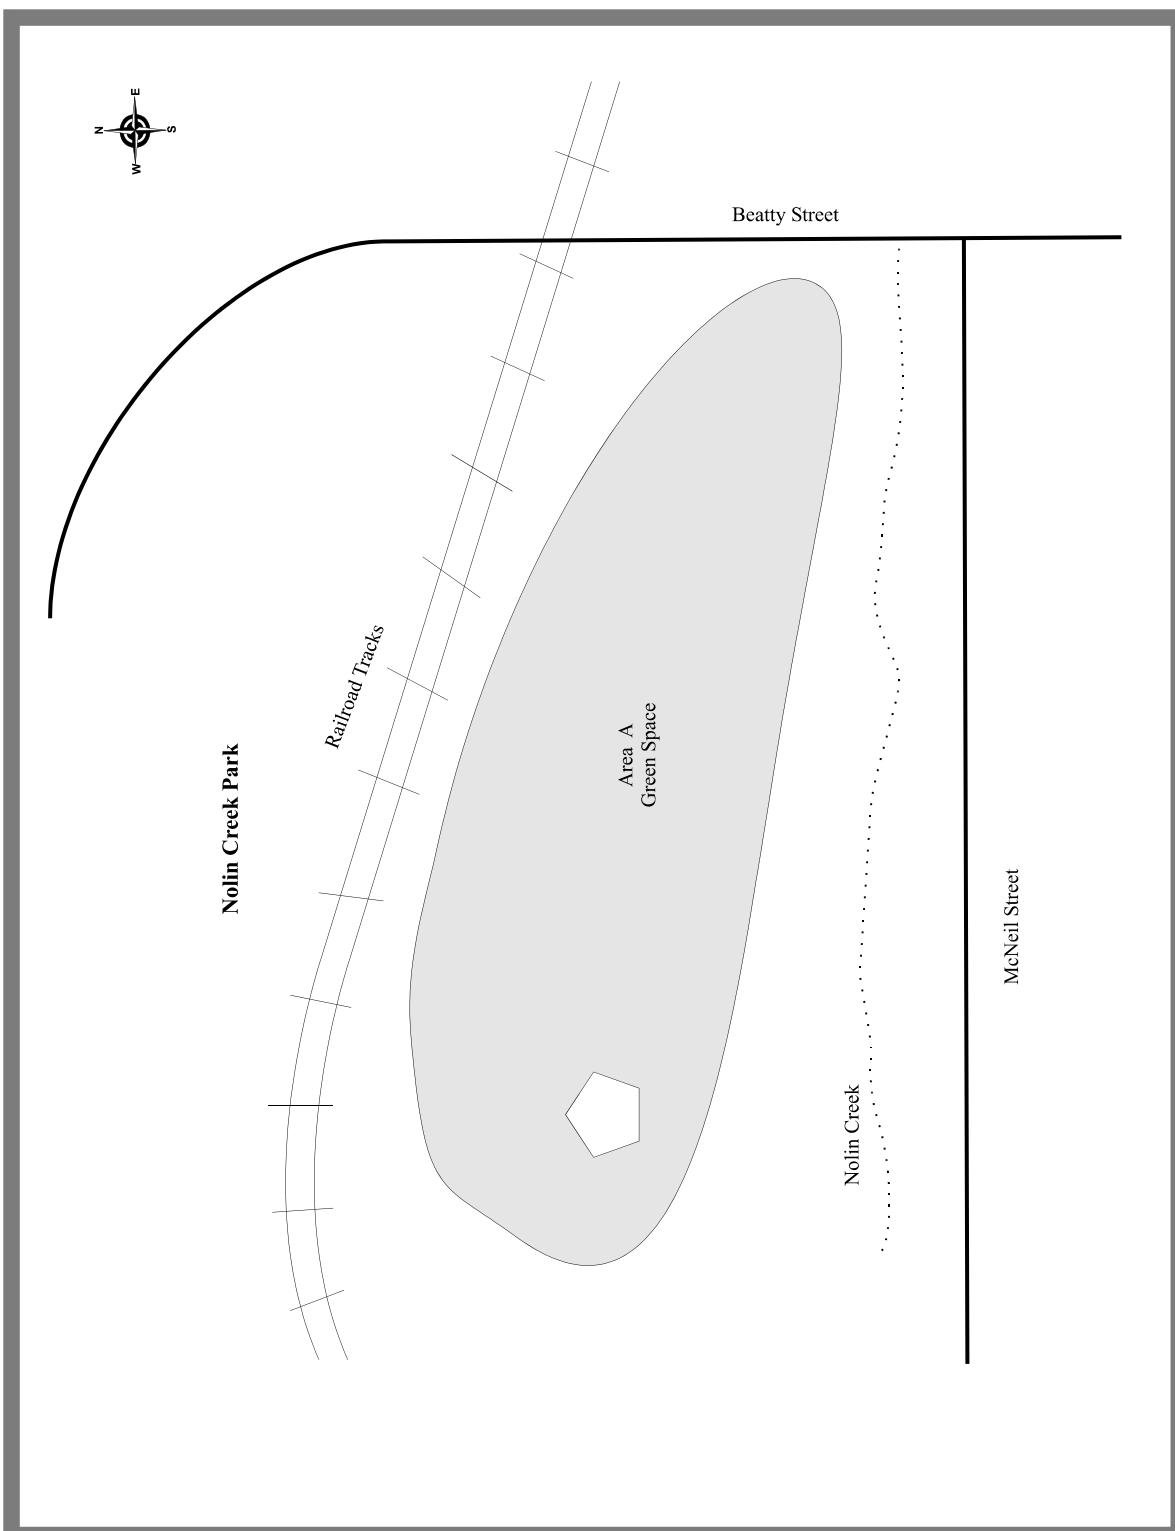

**Map C5.4.6:** Little Britain Tot Lot, Sudbury Core - 2001.

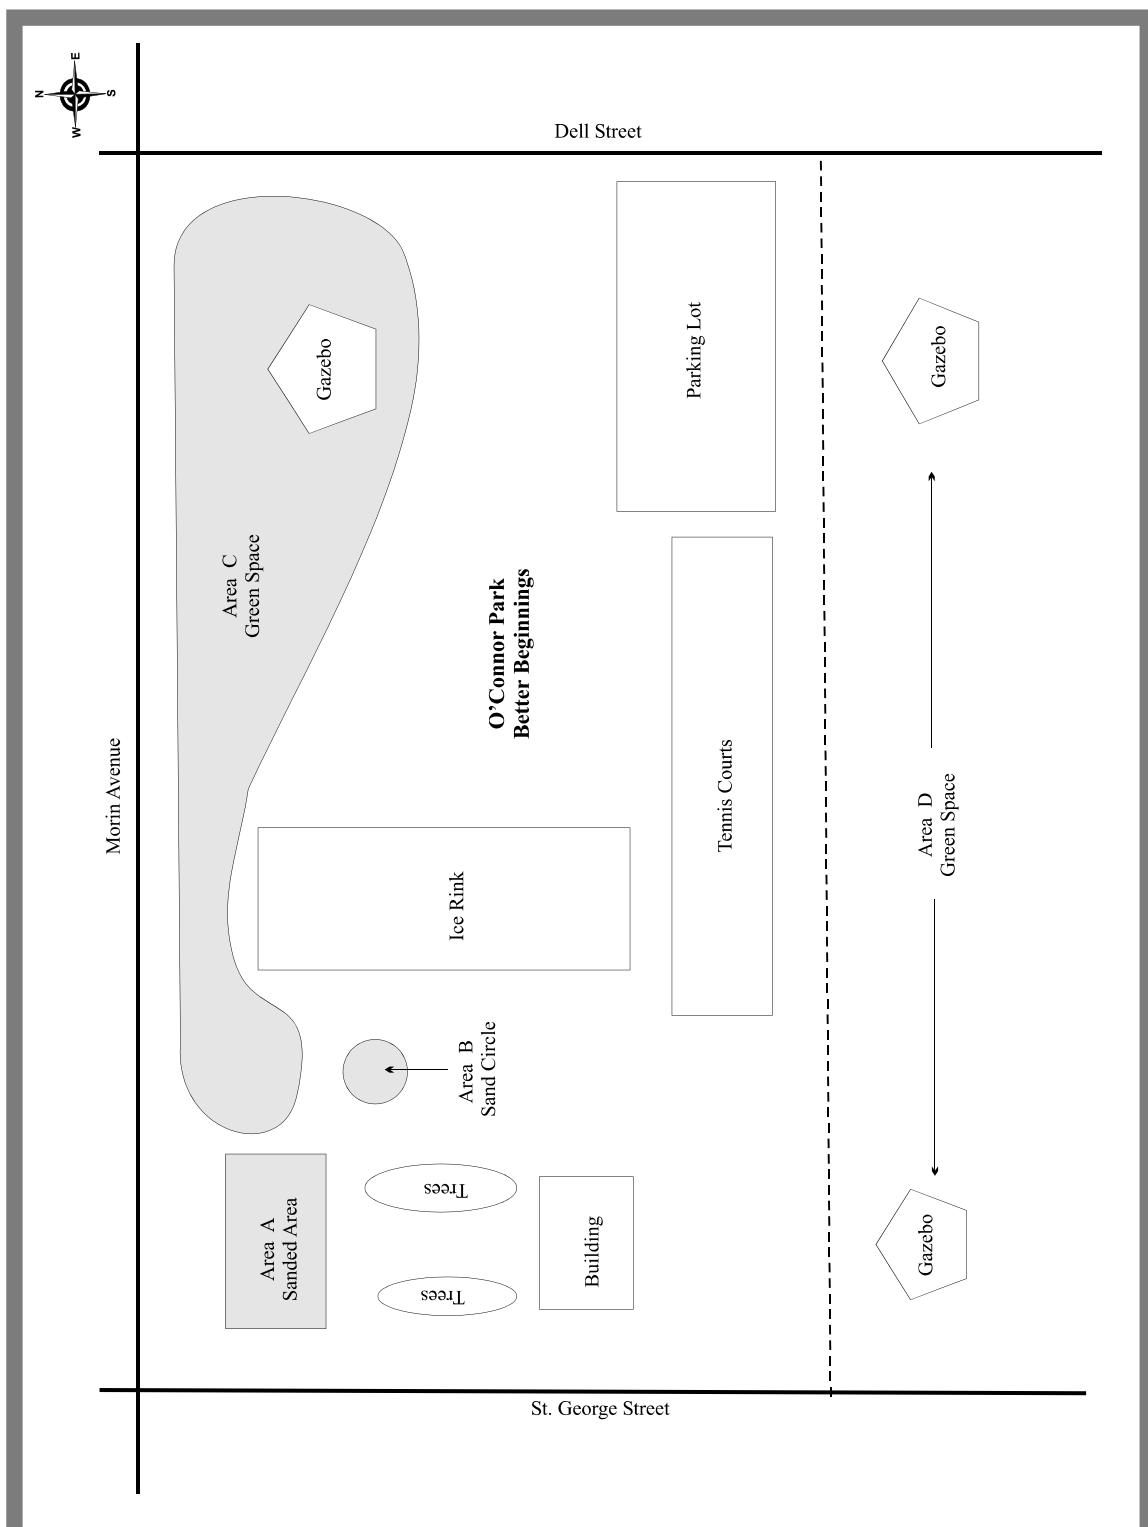

**Map C5.4.7:** Melvin and Mabel Streets Playground, Sudbury Core - 2001.

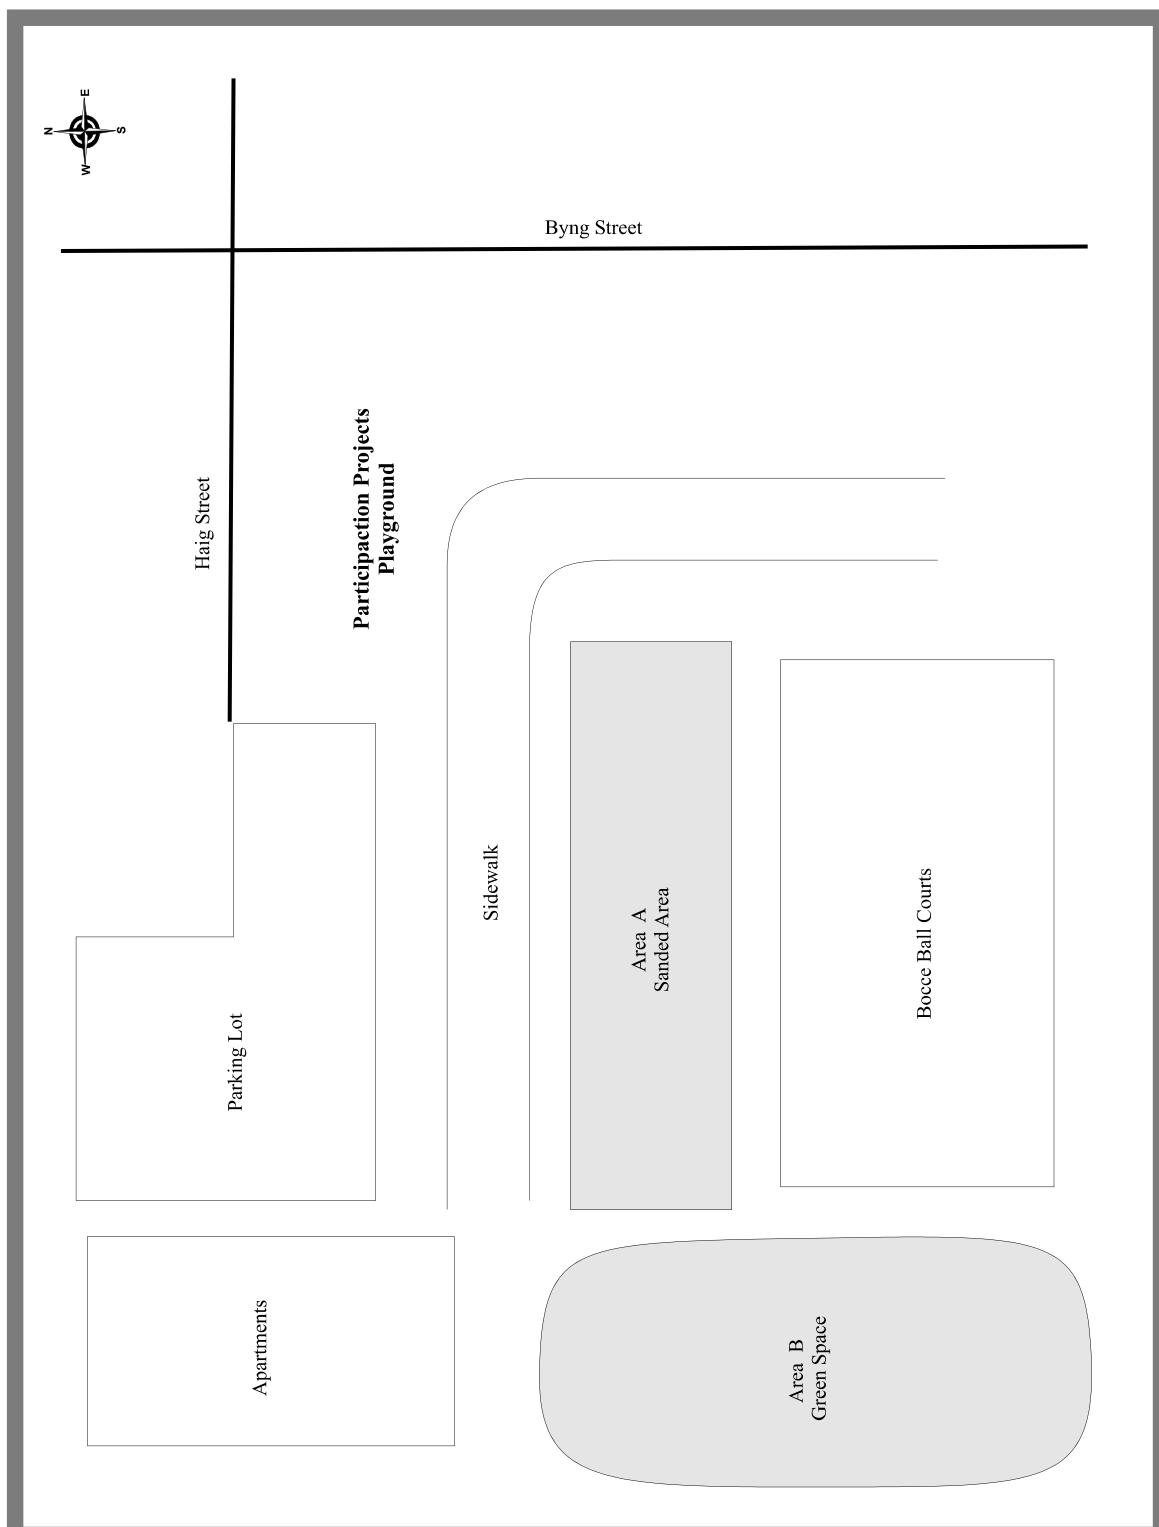

**Map C5.4.8:** Memorial Park, Sudbury Core - 2001.

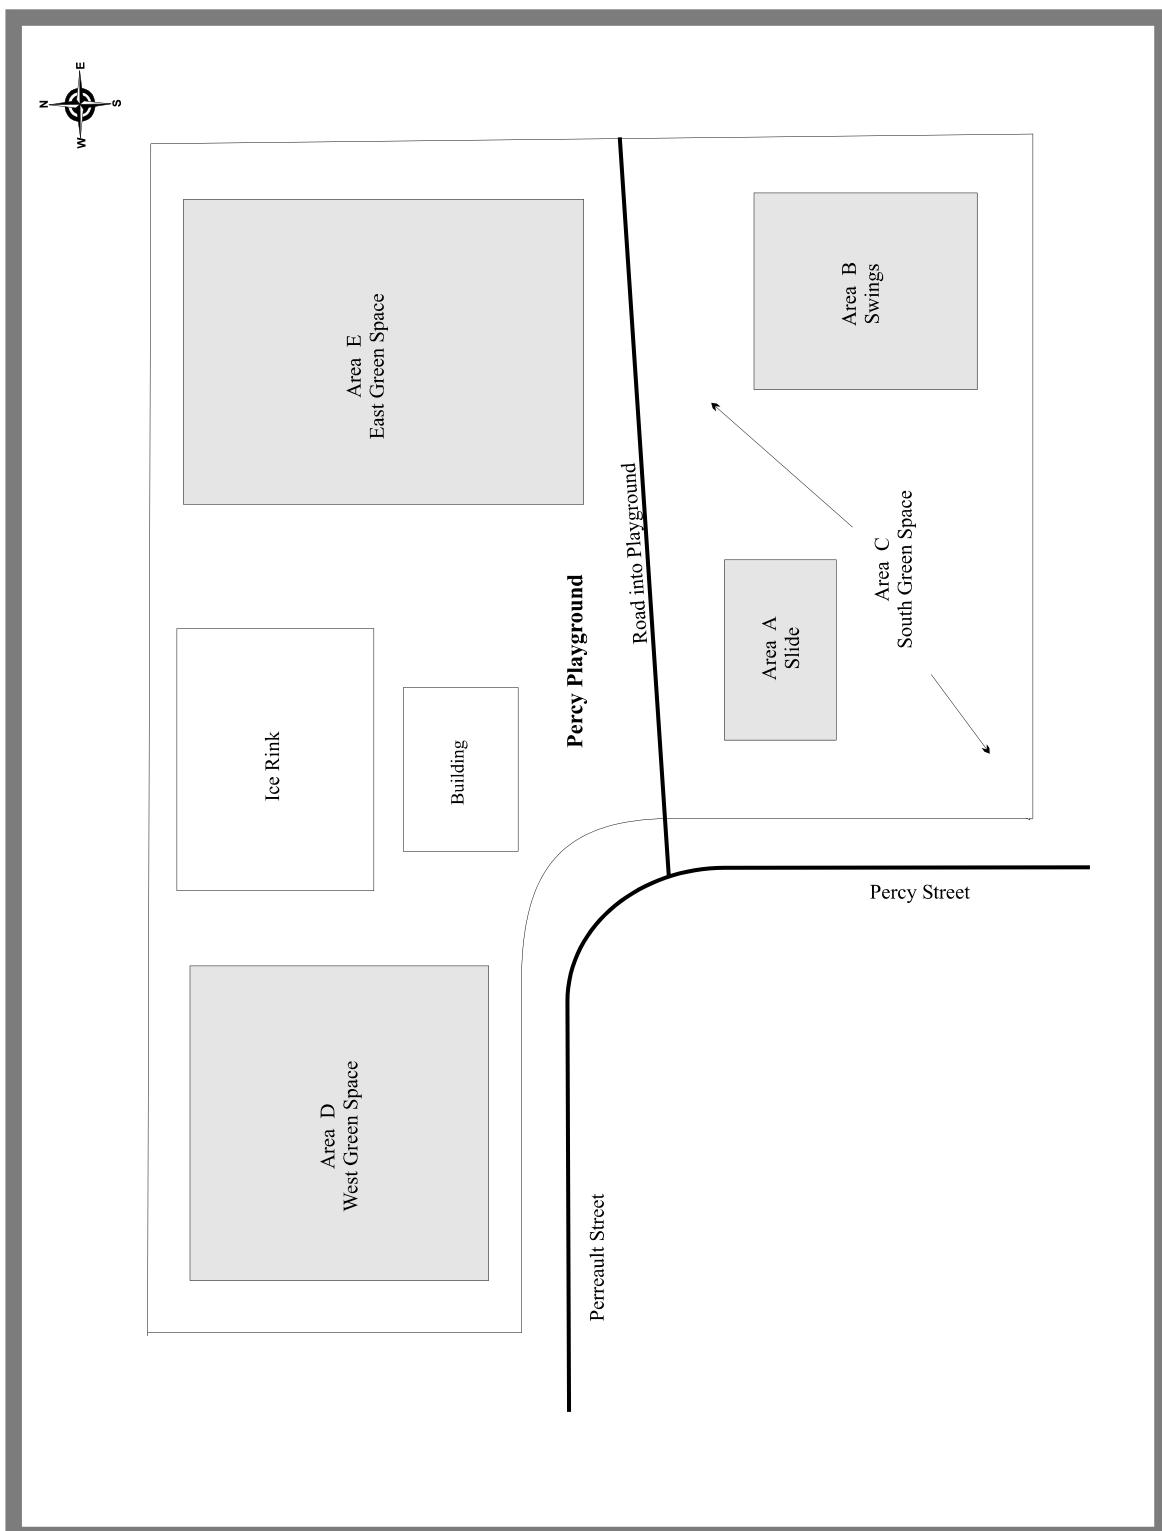

**Map C5.4.9:** Nolin Creek Park, Sudbury Core - 2001.

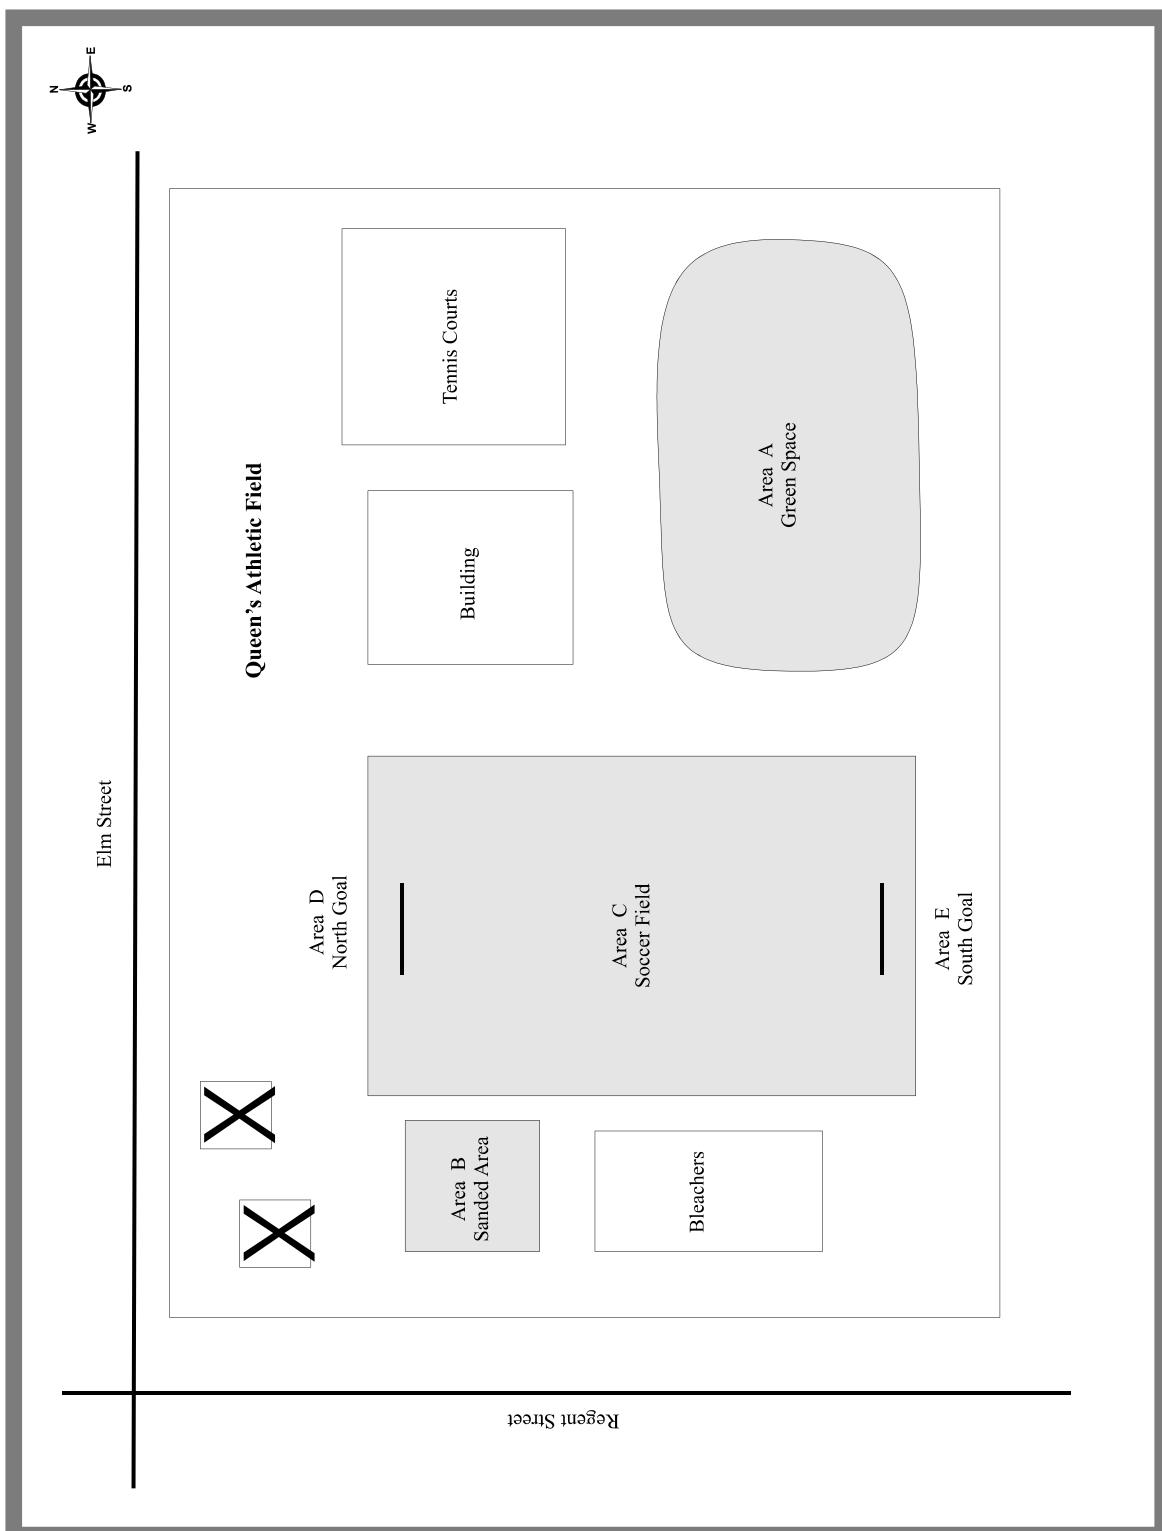

**Map C5.4.10:** O'Connor Park (Better Beginnings), Sudbury Core - 2001.

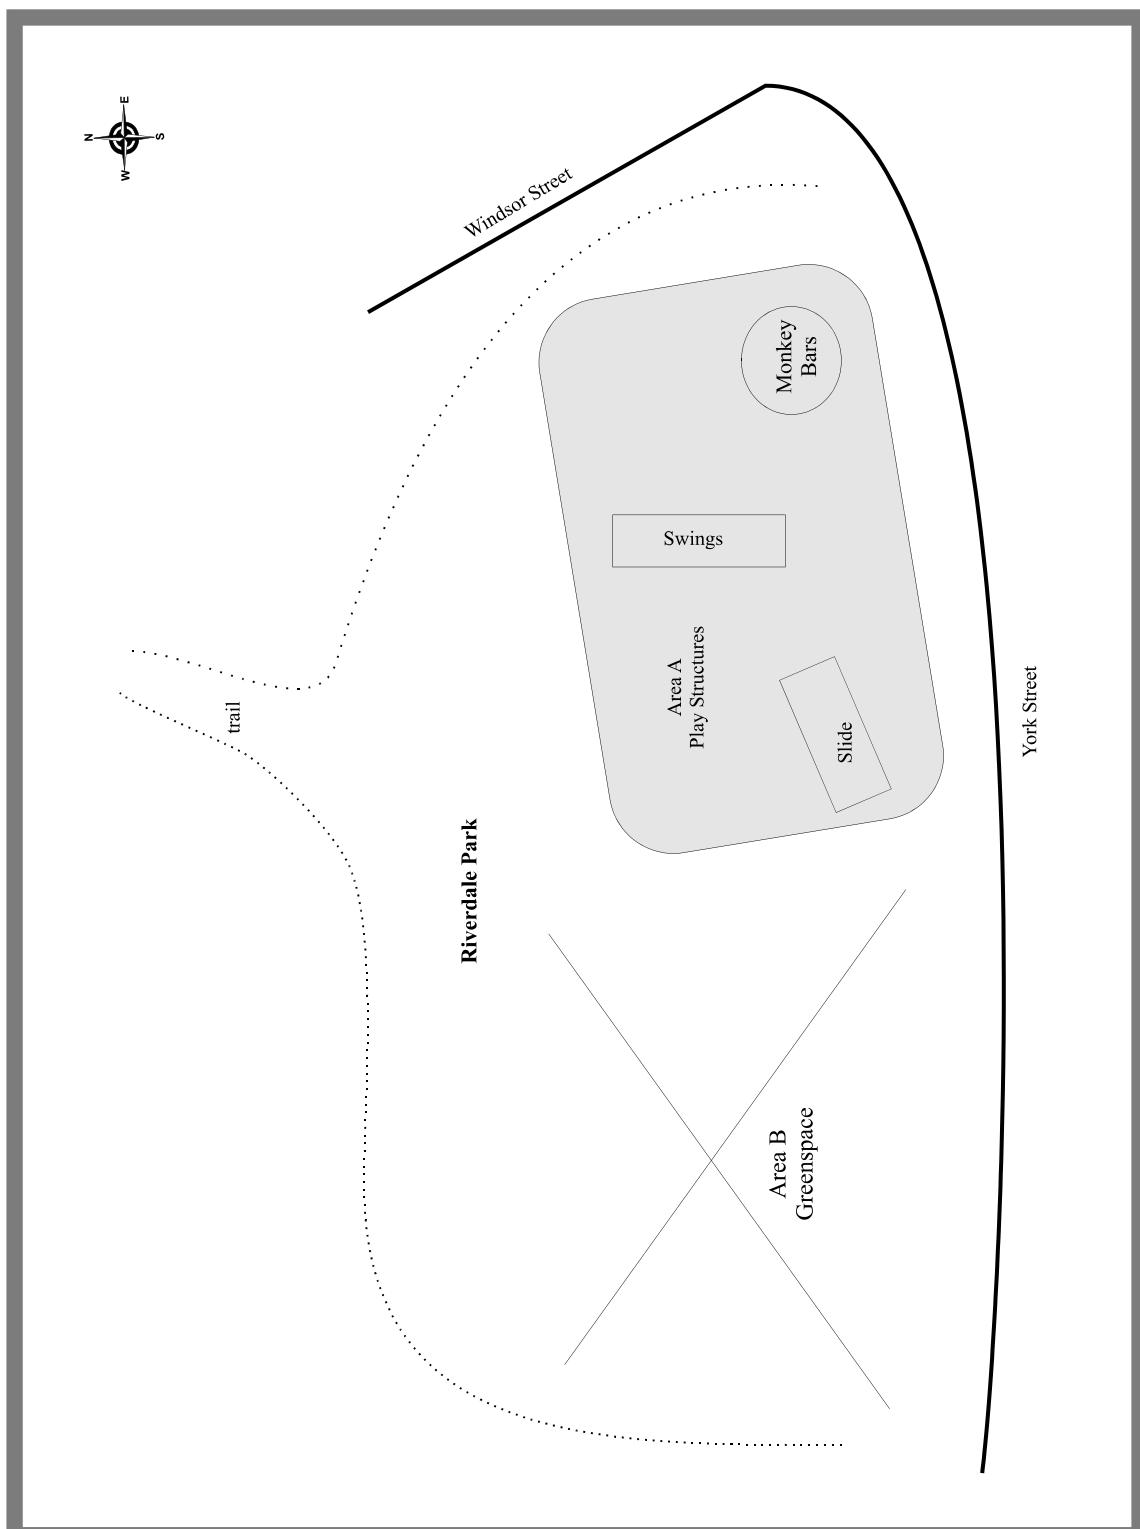

**Map C5.4.11:** Participation Projects Playground, Sudbury Core - 2001.

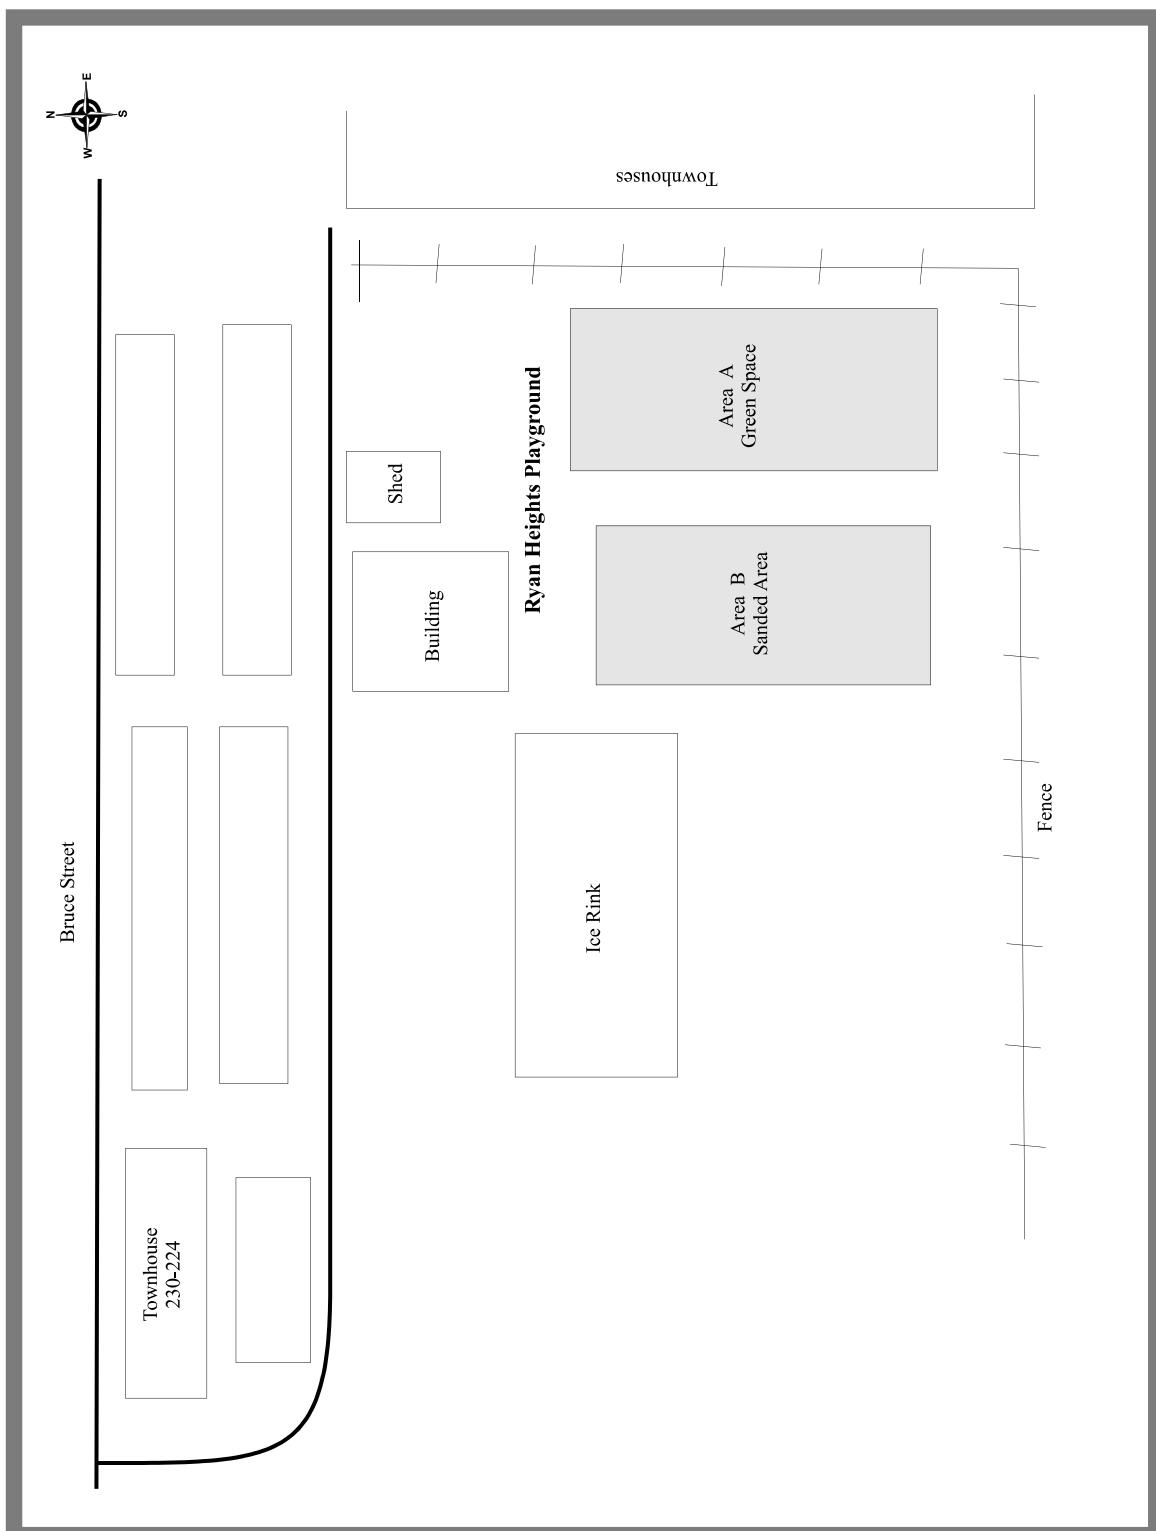

**Map C5.4.12:** Percy Playground, Sudbury Core - 2001.

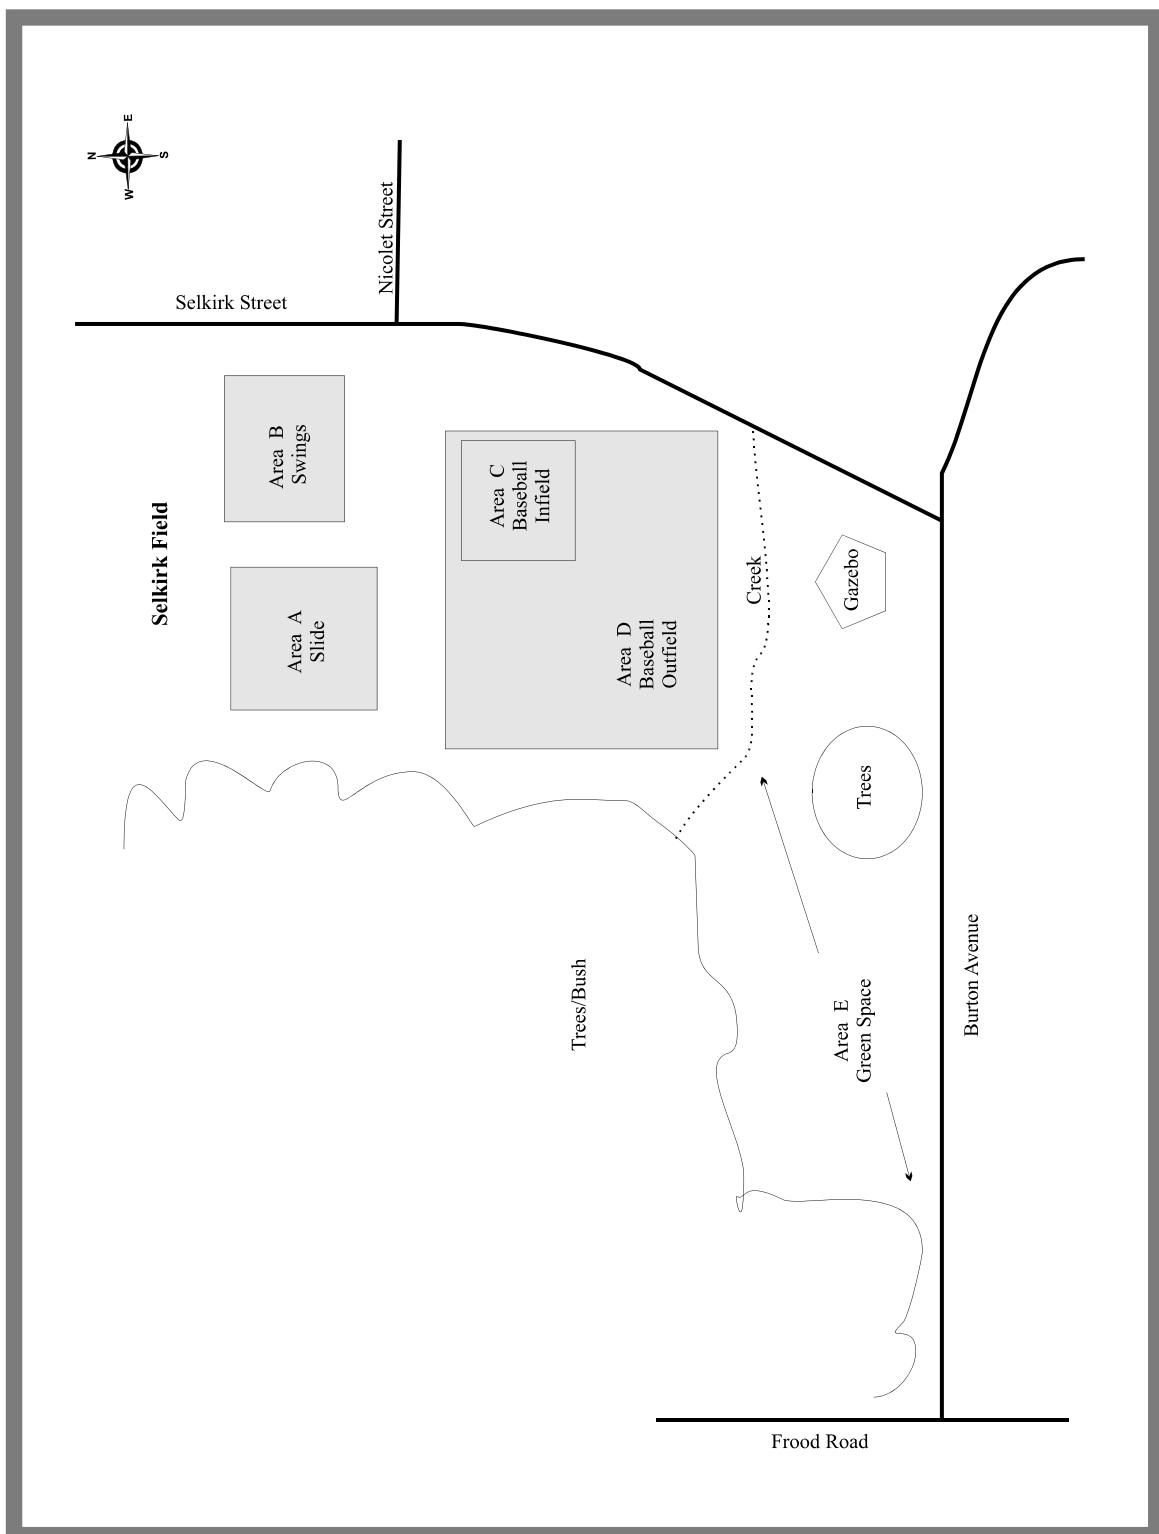

**Map C5.4.13:** Queen's Athletic Field, Sudbury Core - 2001.

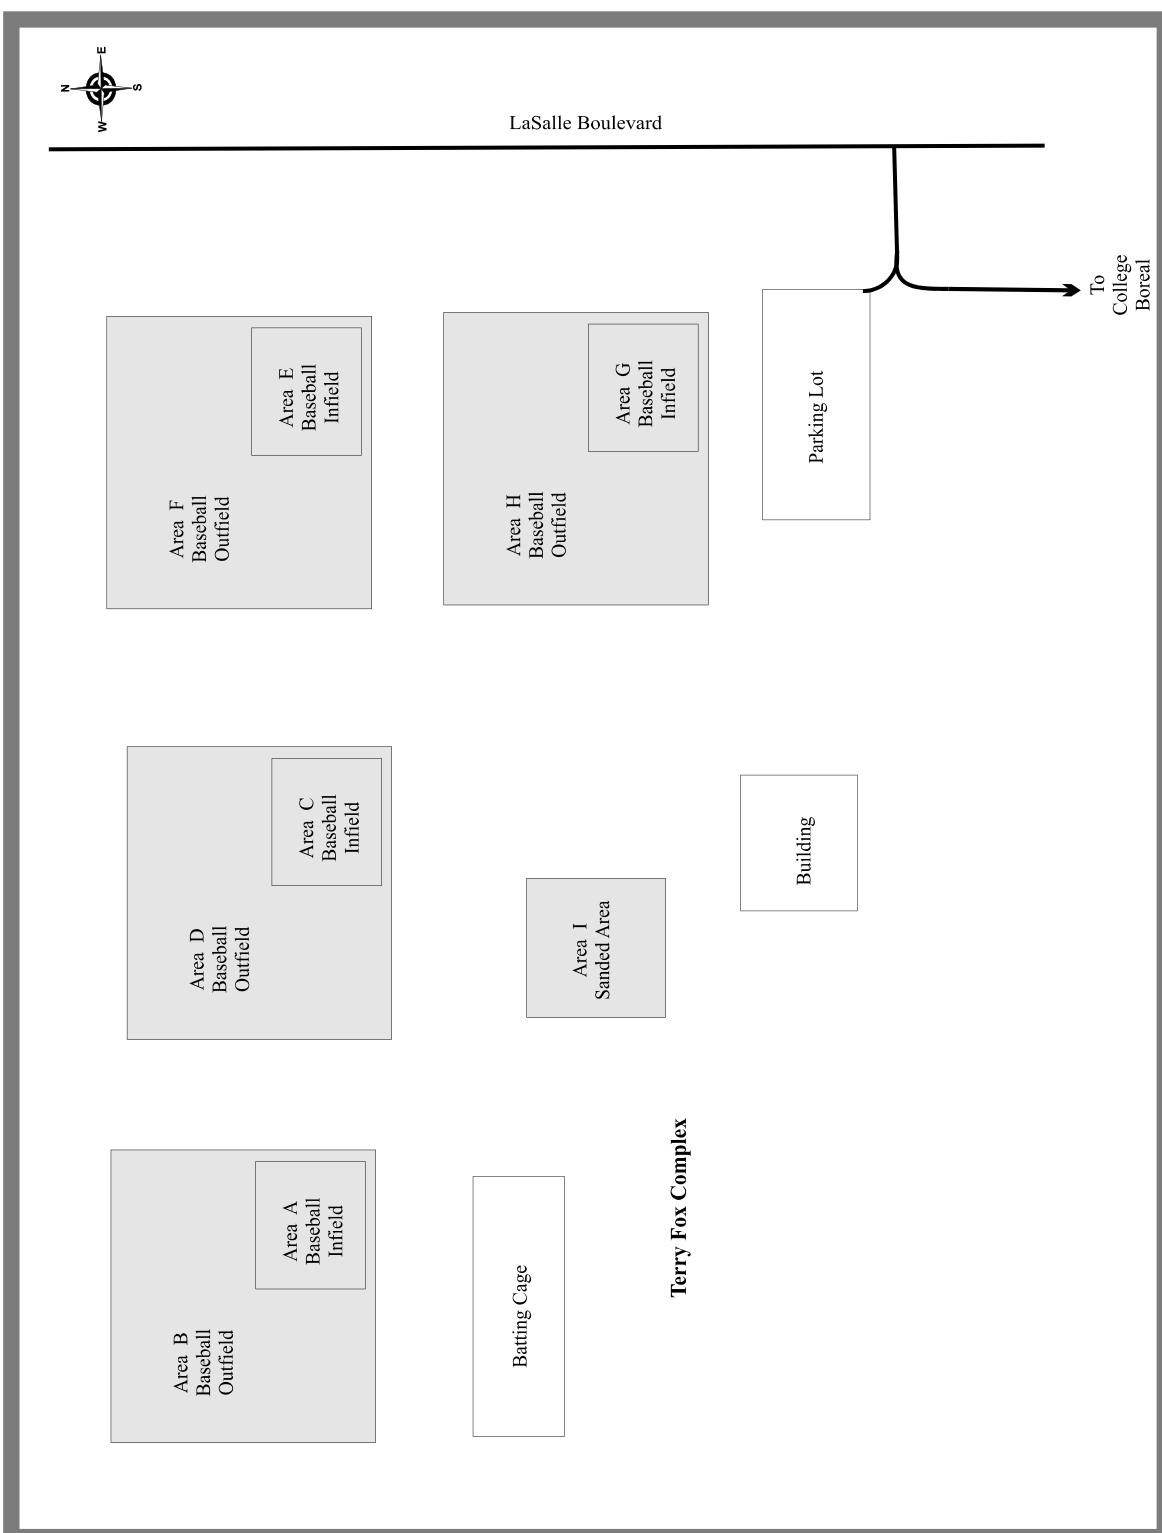

**Map C5.4.14:** Riverdale Park, Sudbury Core - 2001.

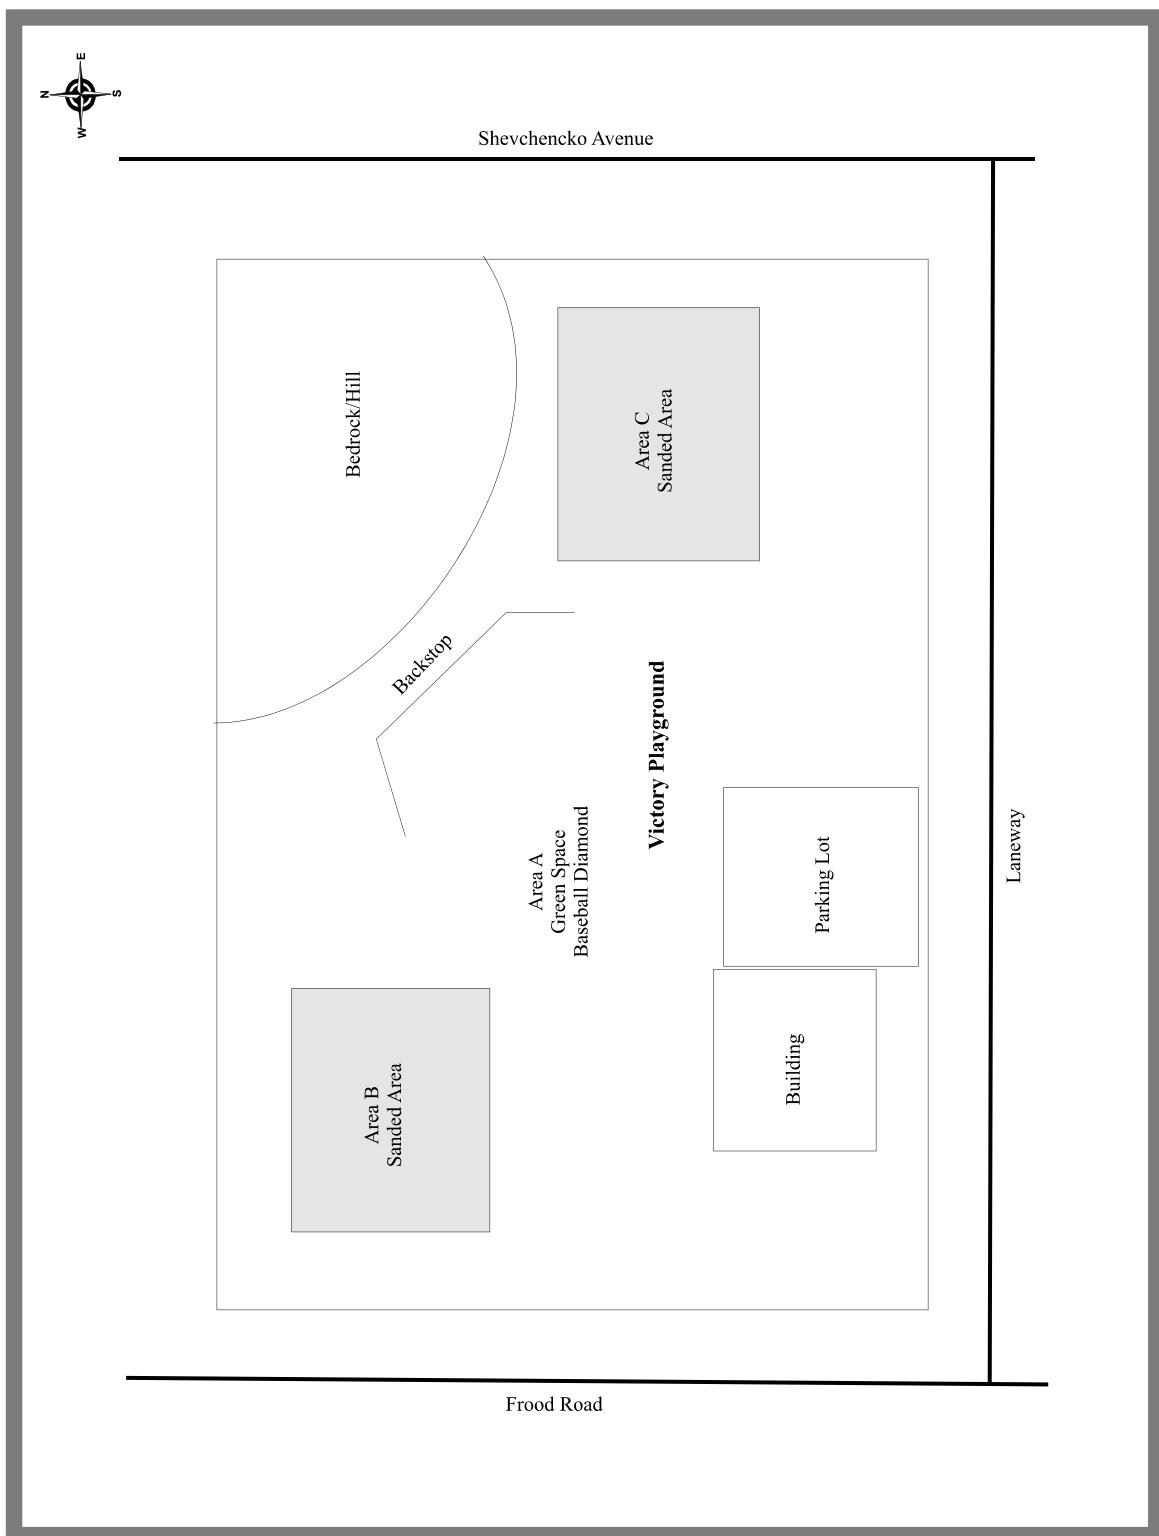

**Map C5.4.15:** Ryan Heights Playground, Sudbury Core - 2001.

**Map C5.4.16:** Selkirk Field, Sudbury Core - 2001.

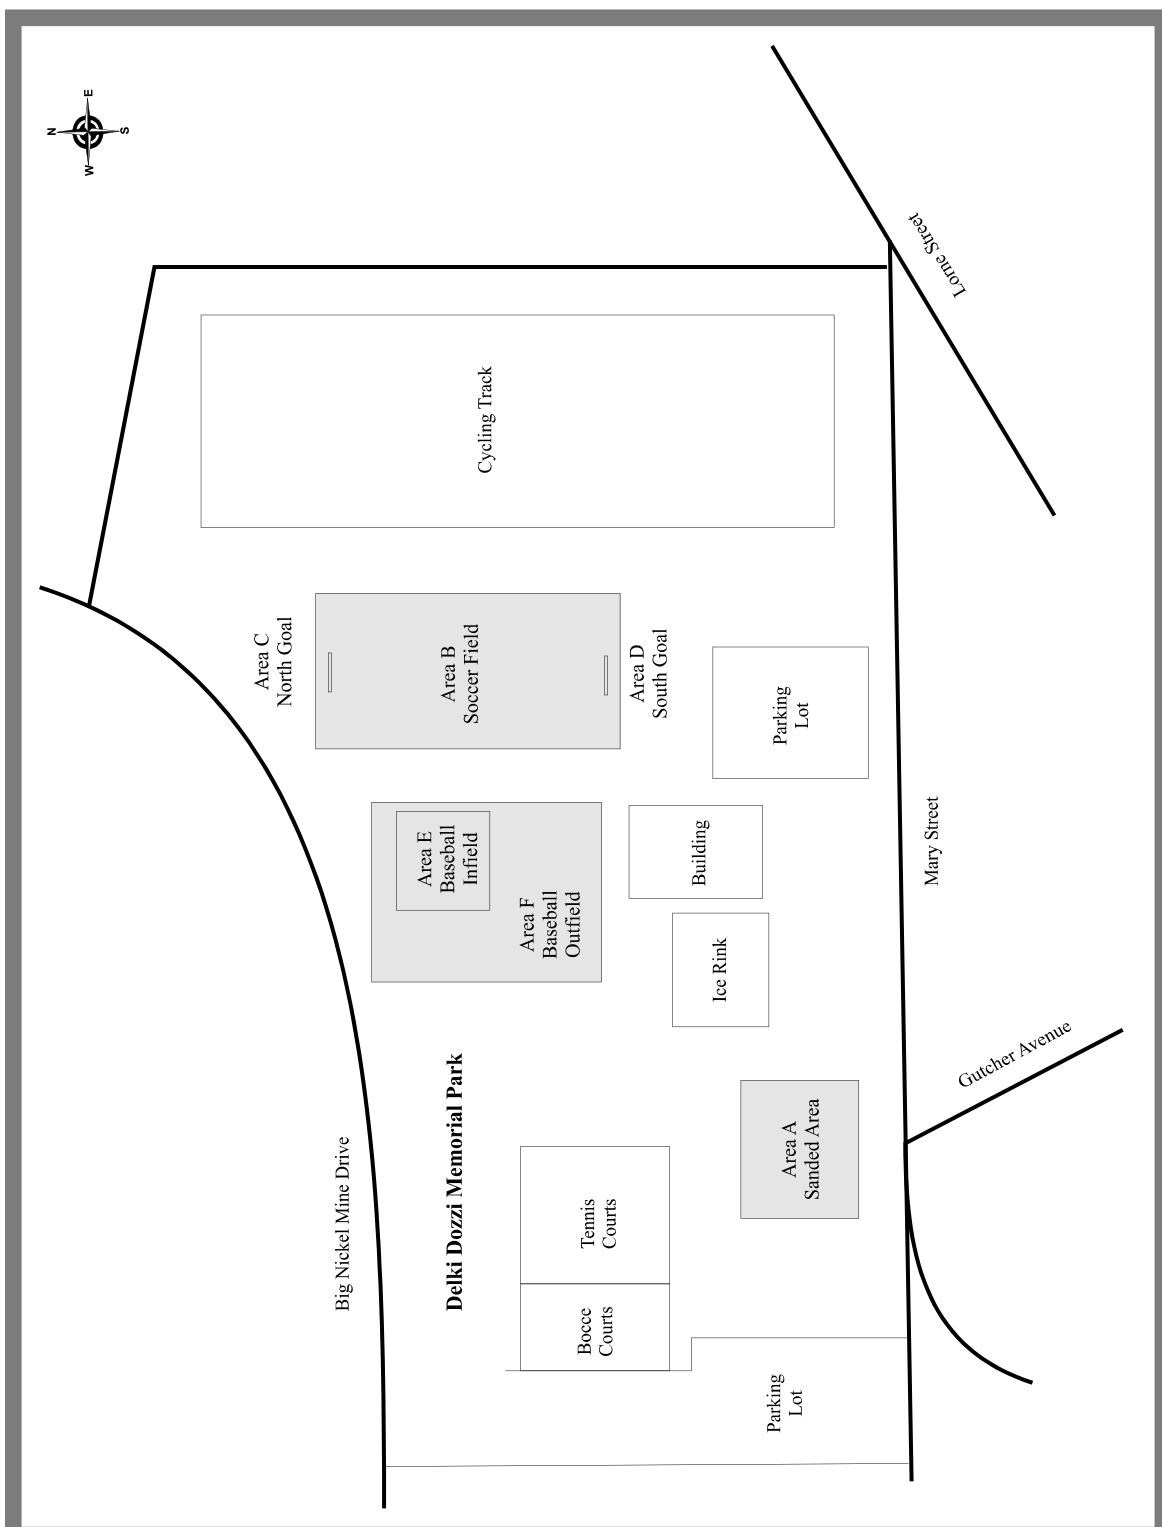

**Map C5.4.17:** Terry Fox Complex, Sudbury Core - 2001.

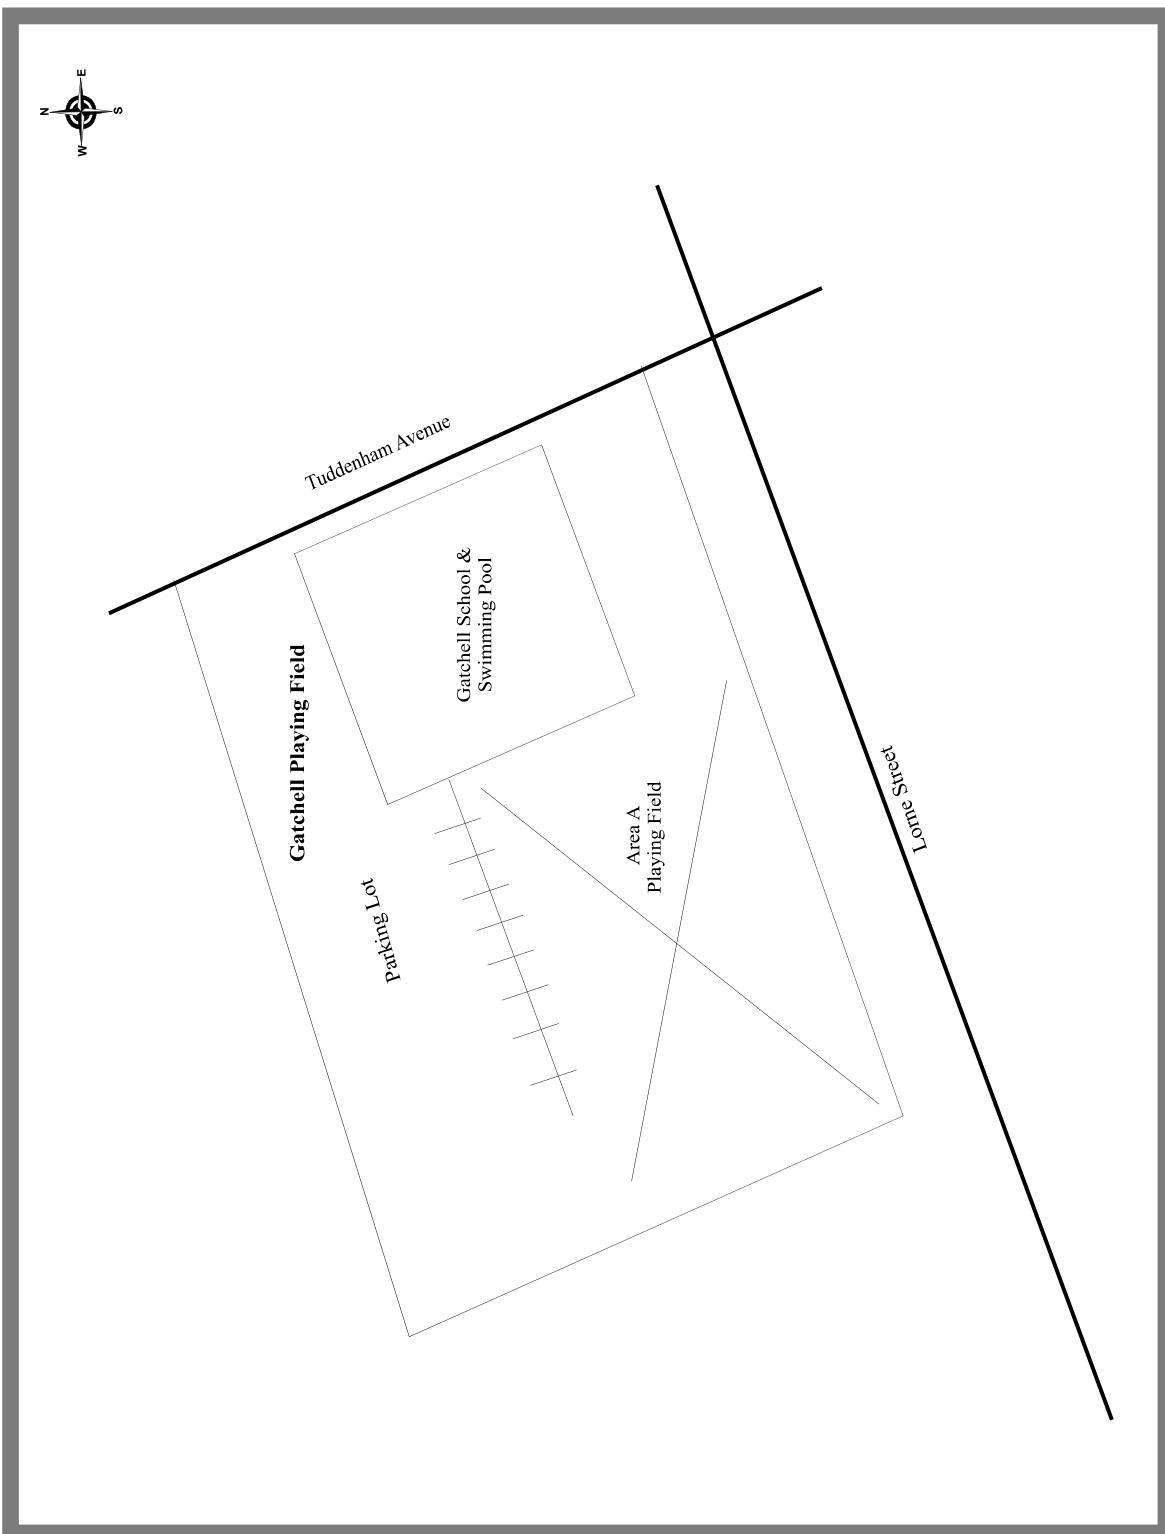

**Map C5.4.18:** Victory Playground, Sudbury Core - 2001.

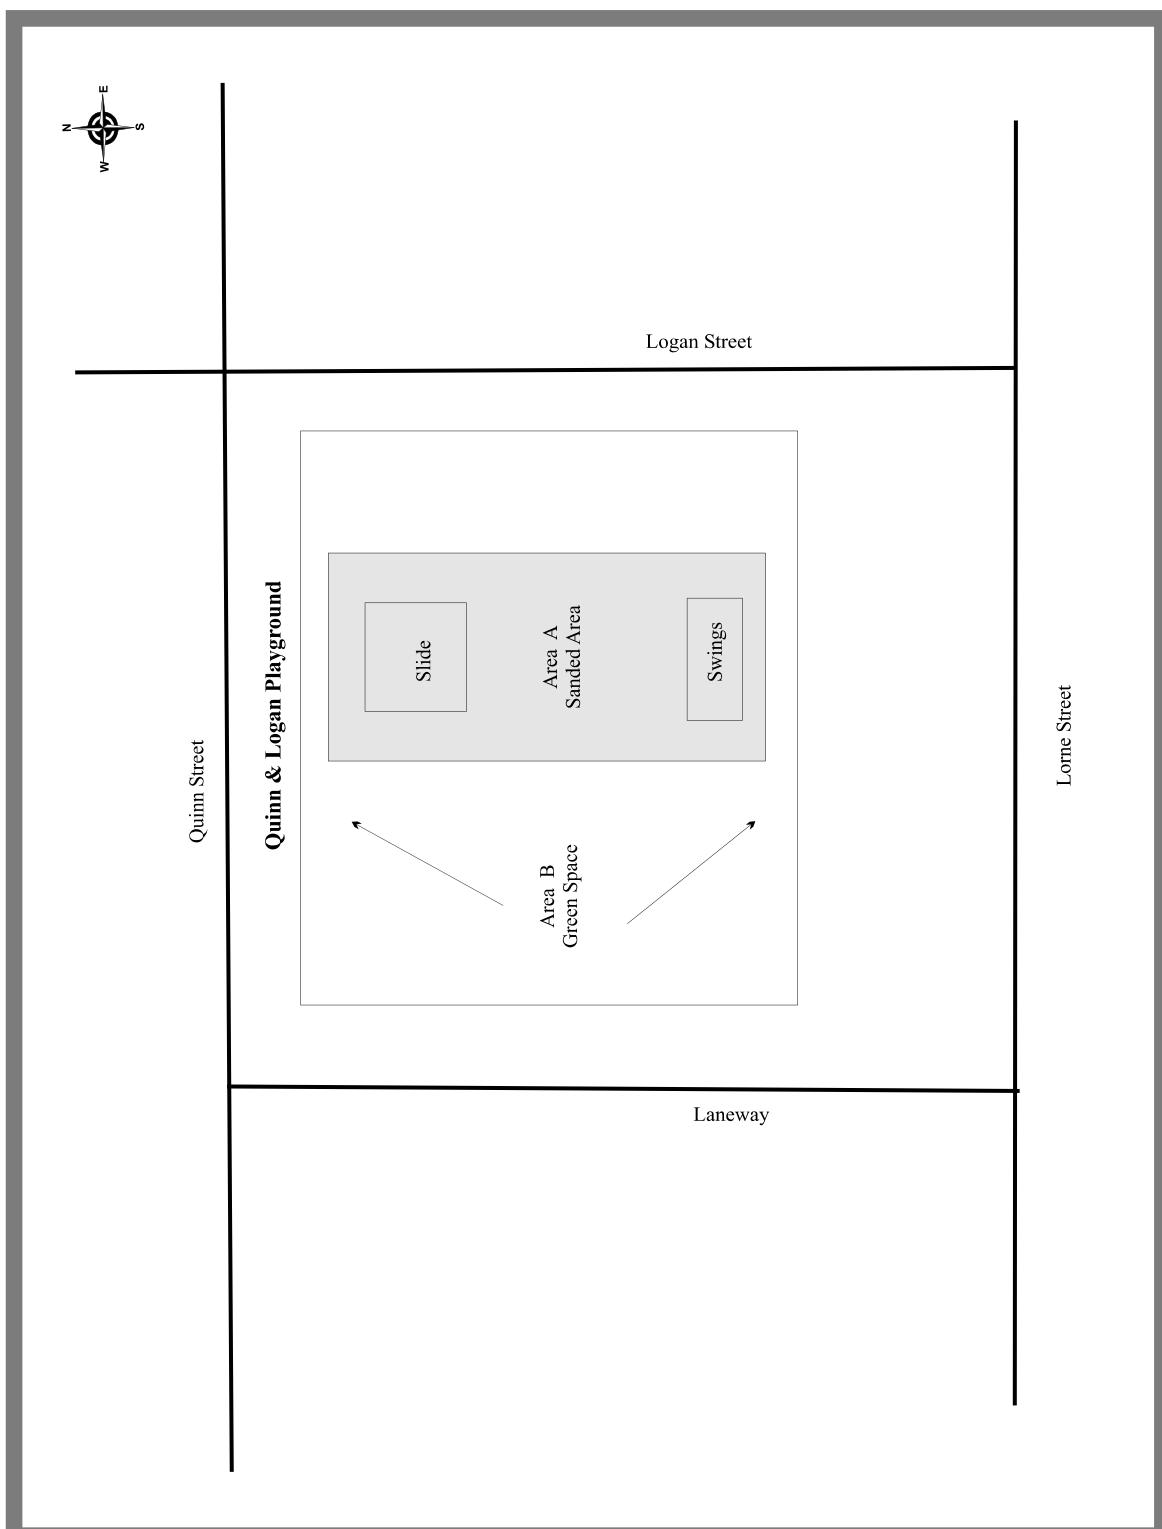

## 5.5 Gatchel Park Maps

**Map C5.4.19:** Delki Dozzi Athletic Field, Gatchell - 2001.

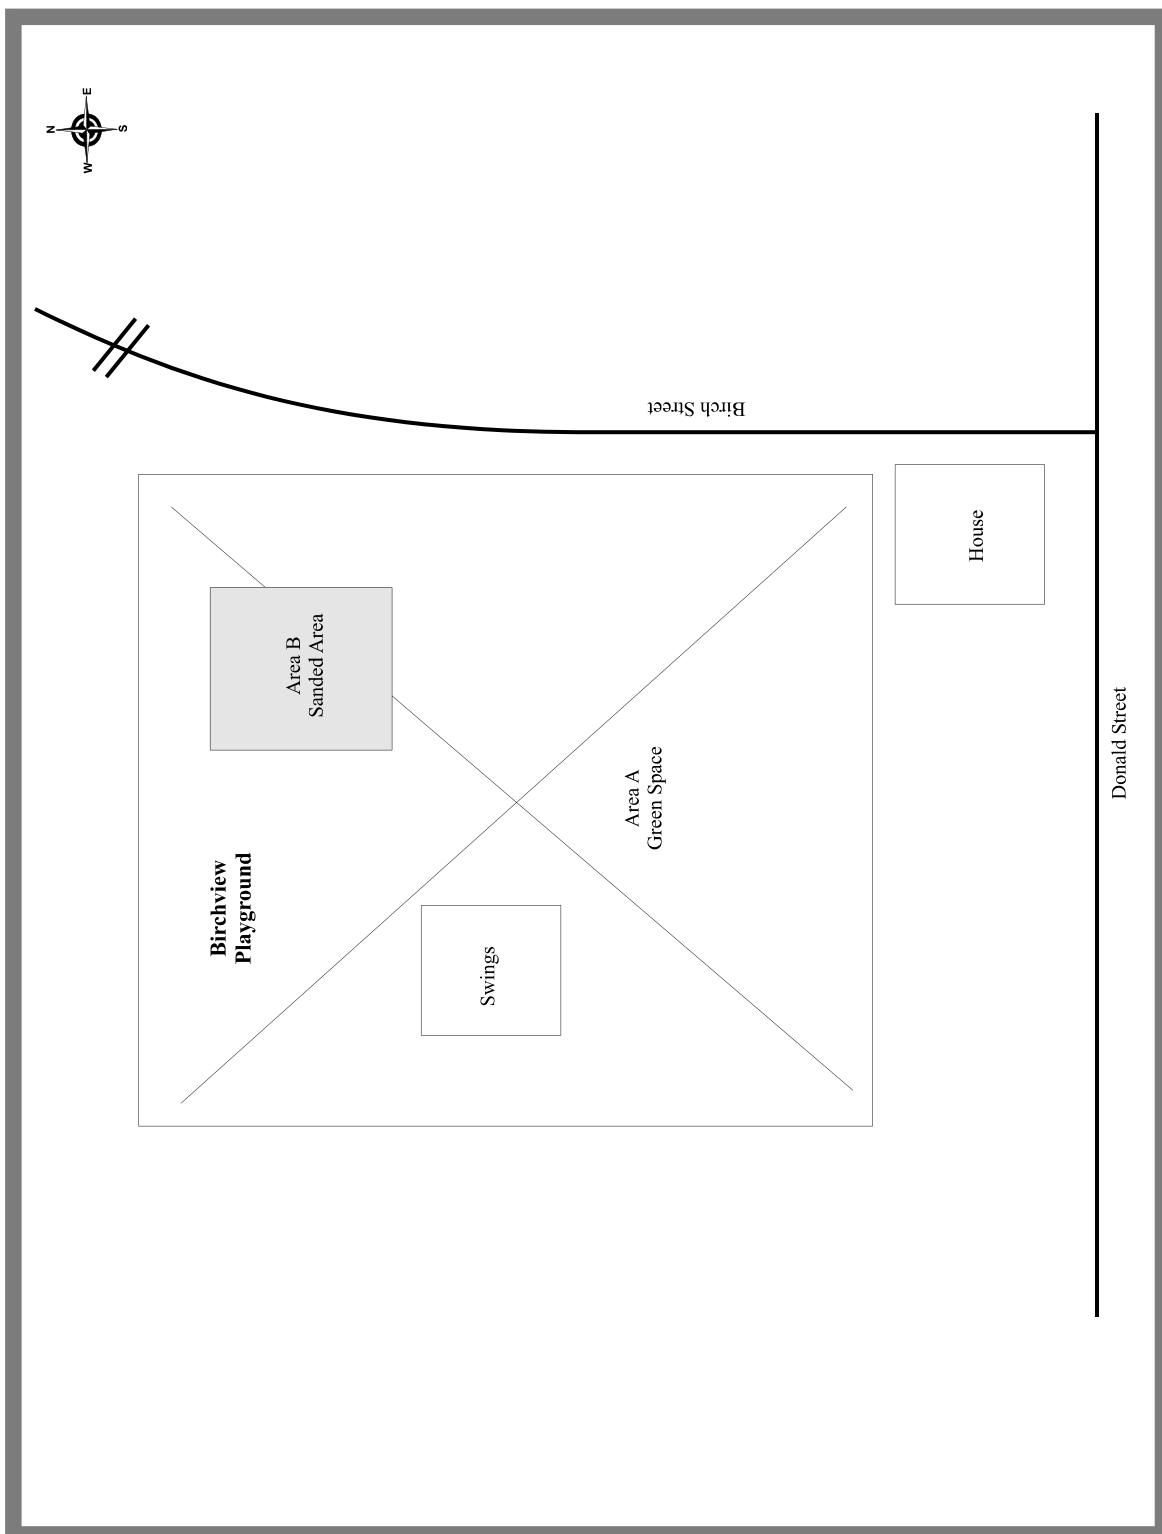

**Map C5.4.20:** Gatchell Pool Field, Gatchell - 2001.

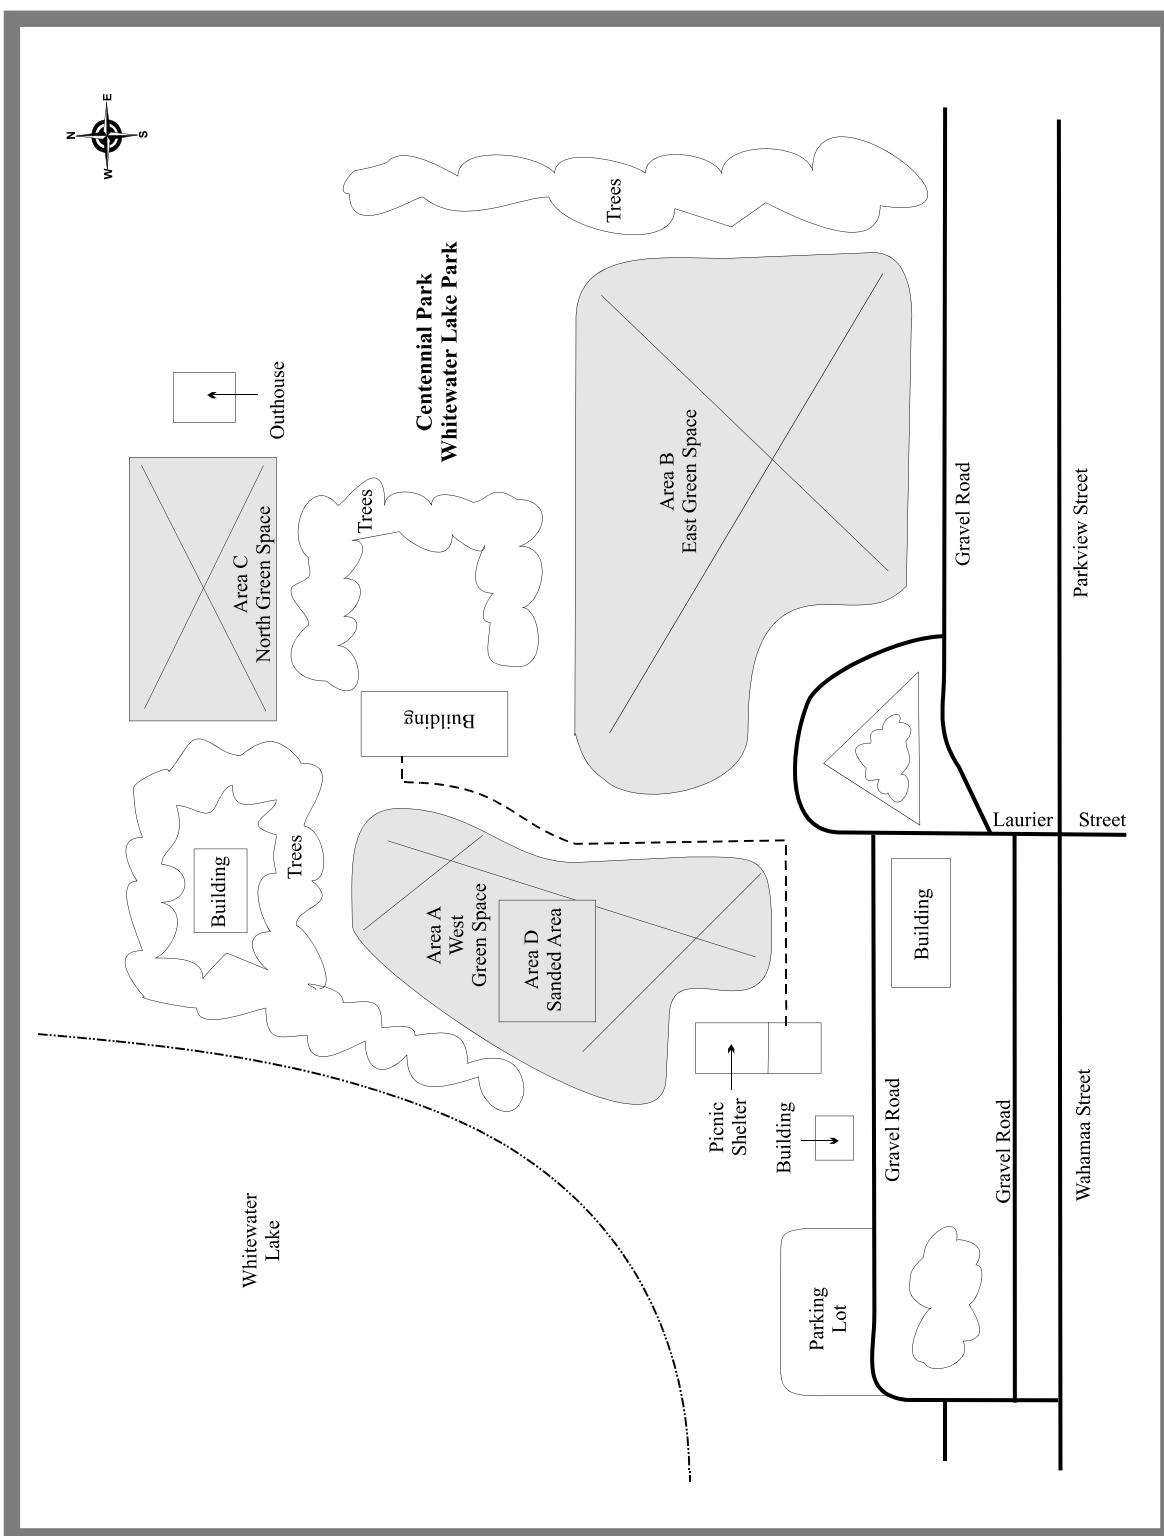

**Map C5.4.21:** Park located at the corner of Quinn and Logan Streets, Gatchell - 2001.

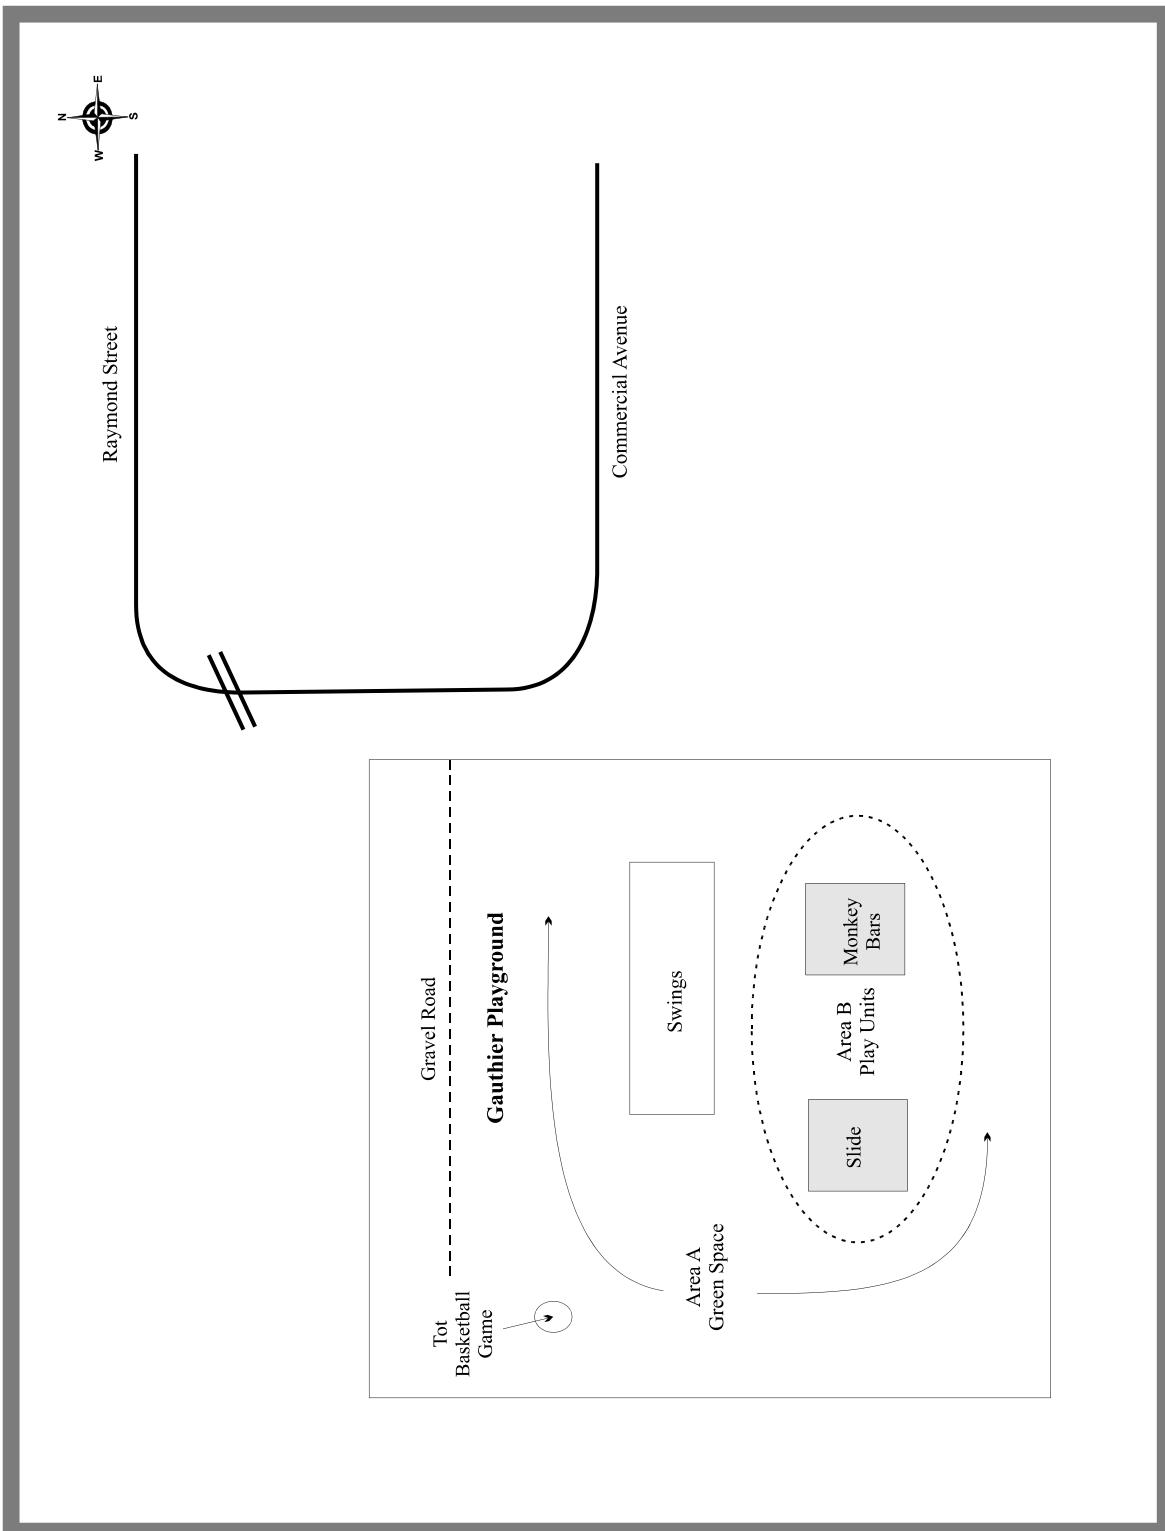

## 5.5 Azilda Park Maps

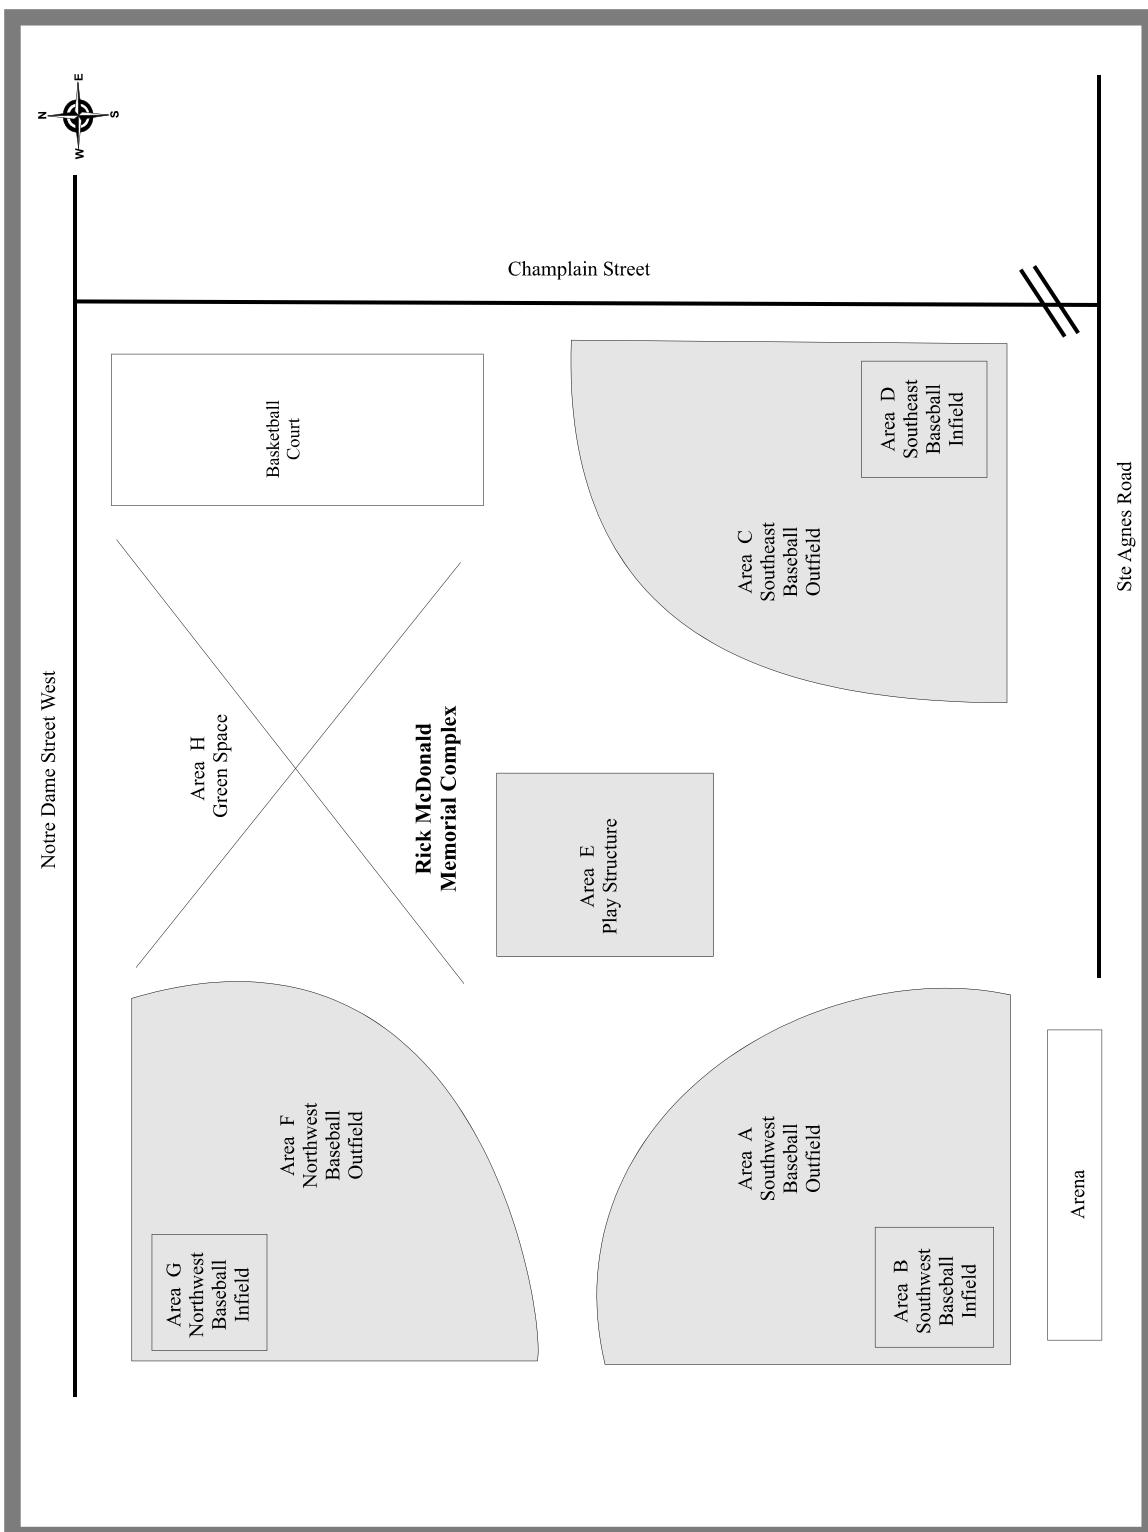

**Map C5.5.1:** Birchview Playground, Azilda - 2001.

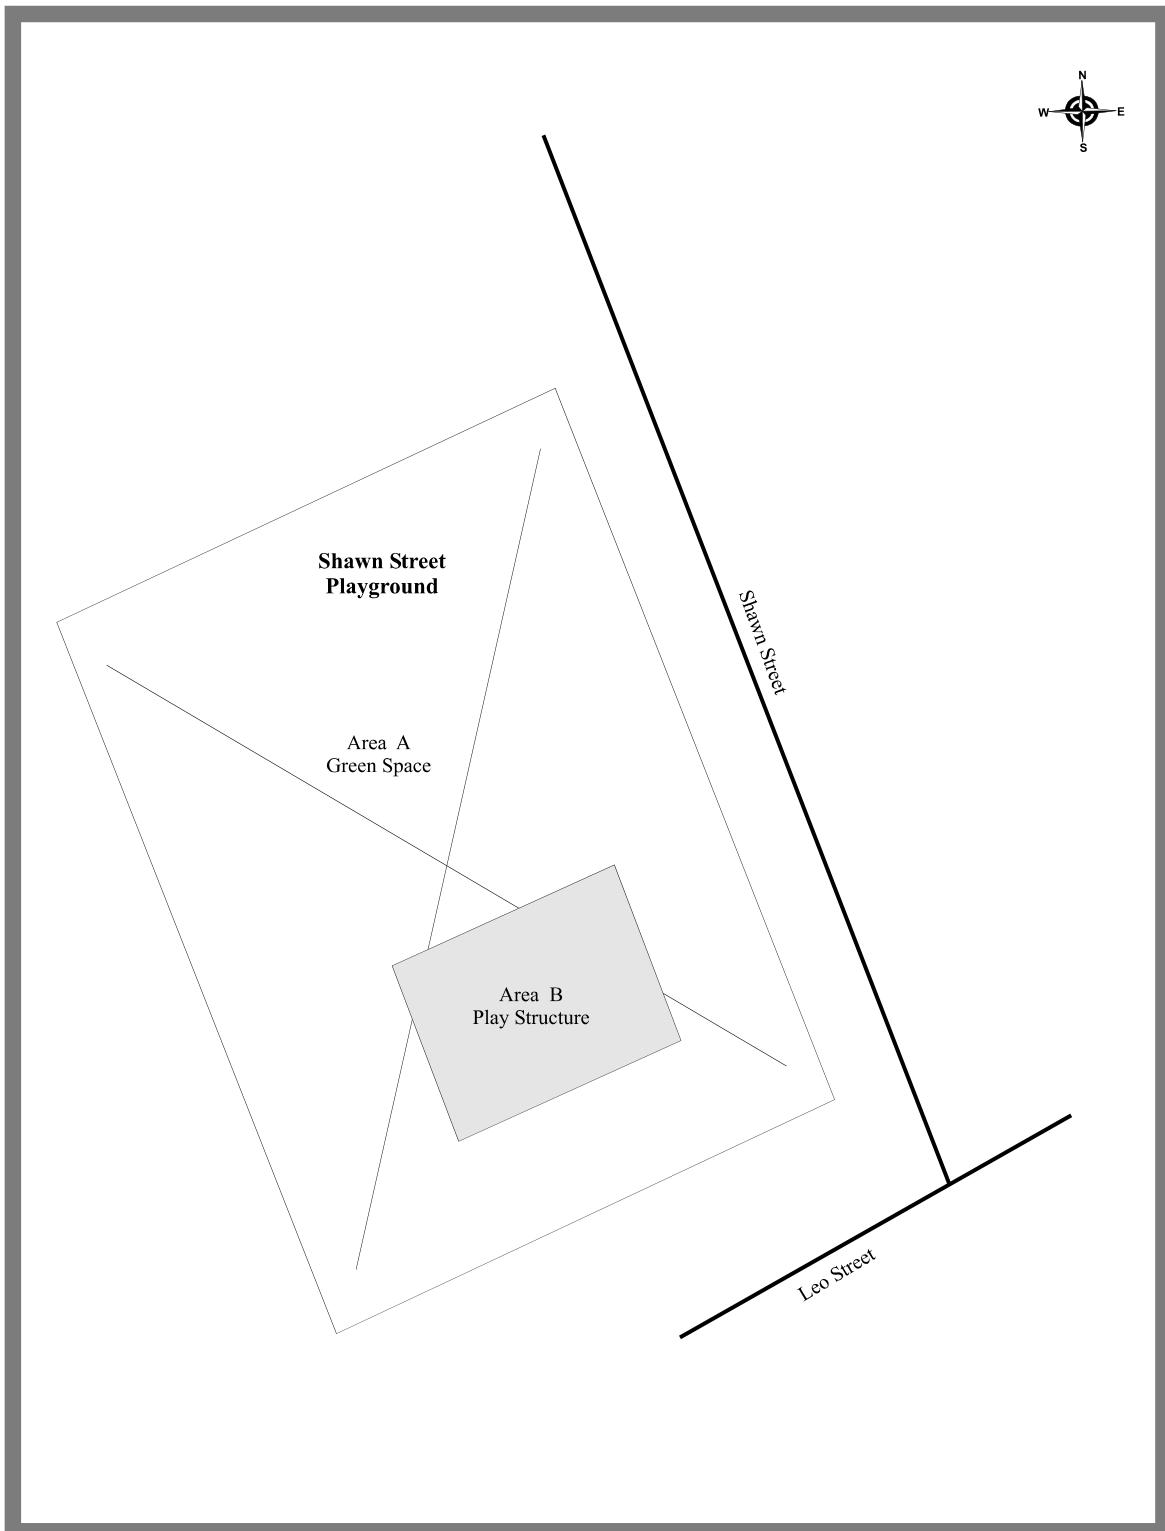

**Map C5.5.2: Centennial Park (Whitewater Lake Park), Azilda - 2001.**

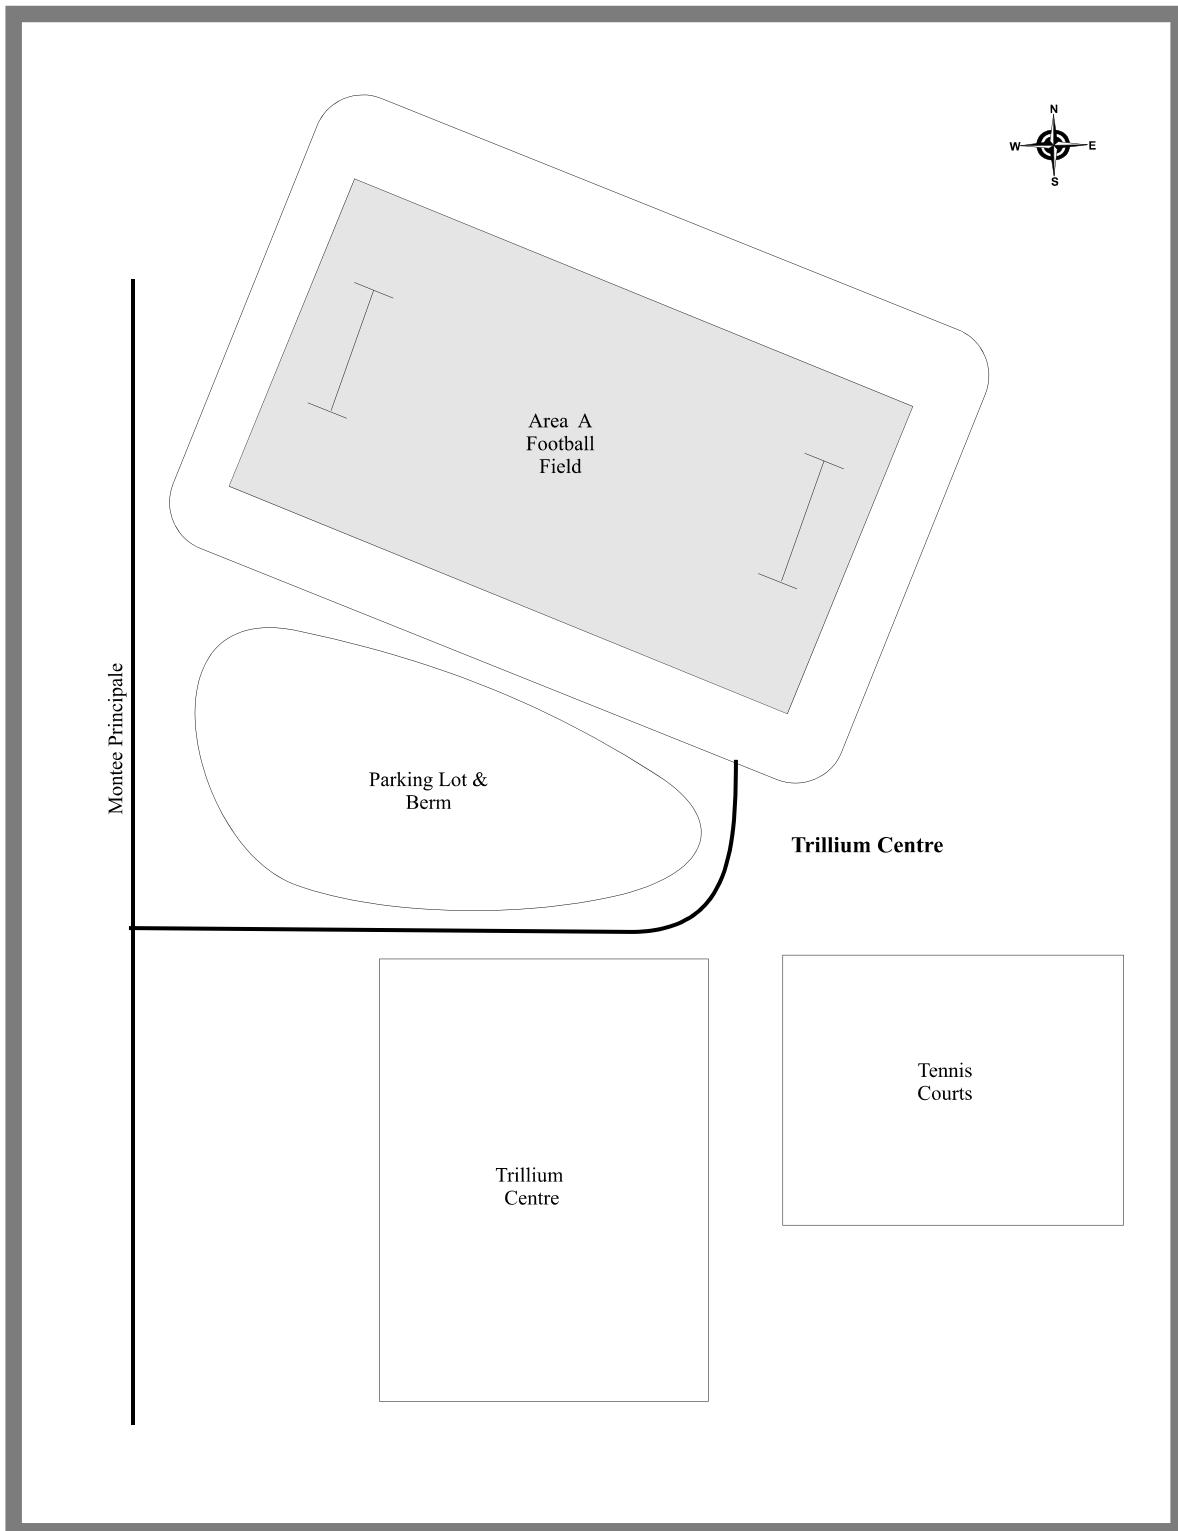

**Map C5.5.3:** Gauthier Playground (Commercial Playground), Azilda - 2001.

**Map C5.5.4:** Rick McDonald Memorial Complex (Champlain Fields), Azilda - 2001.

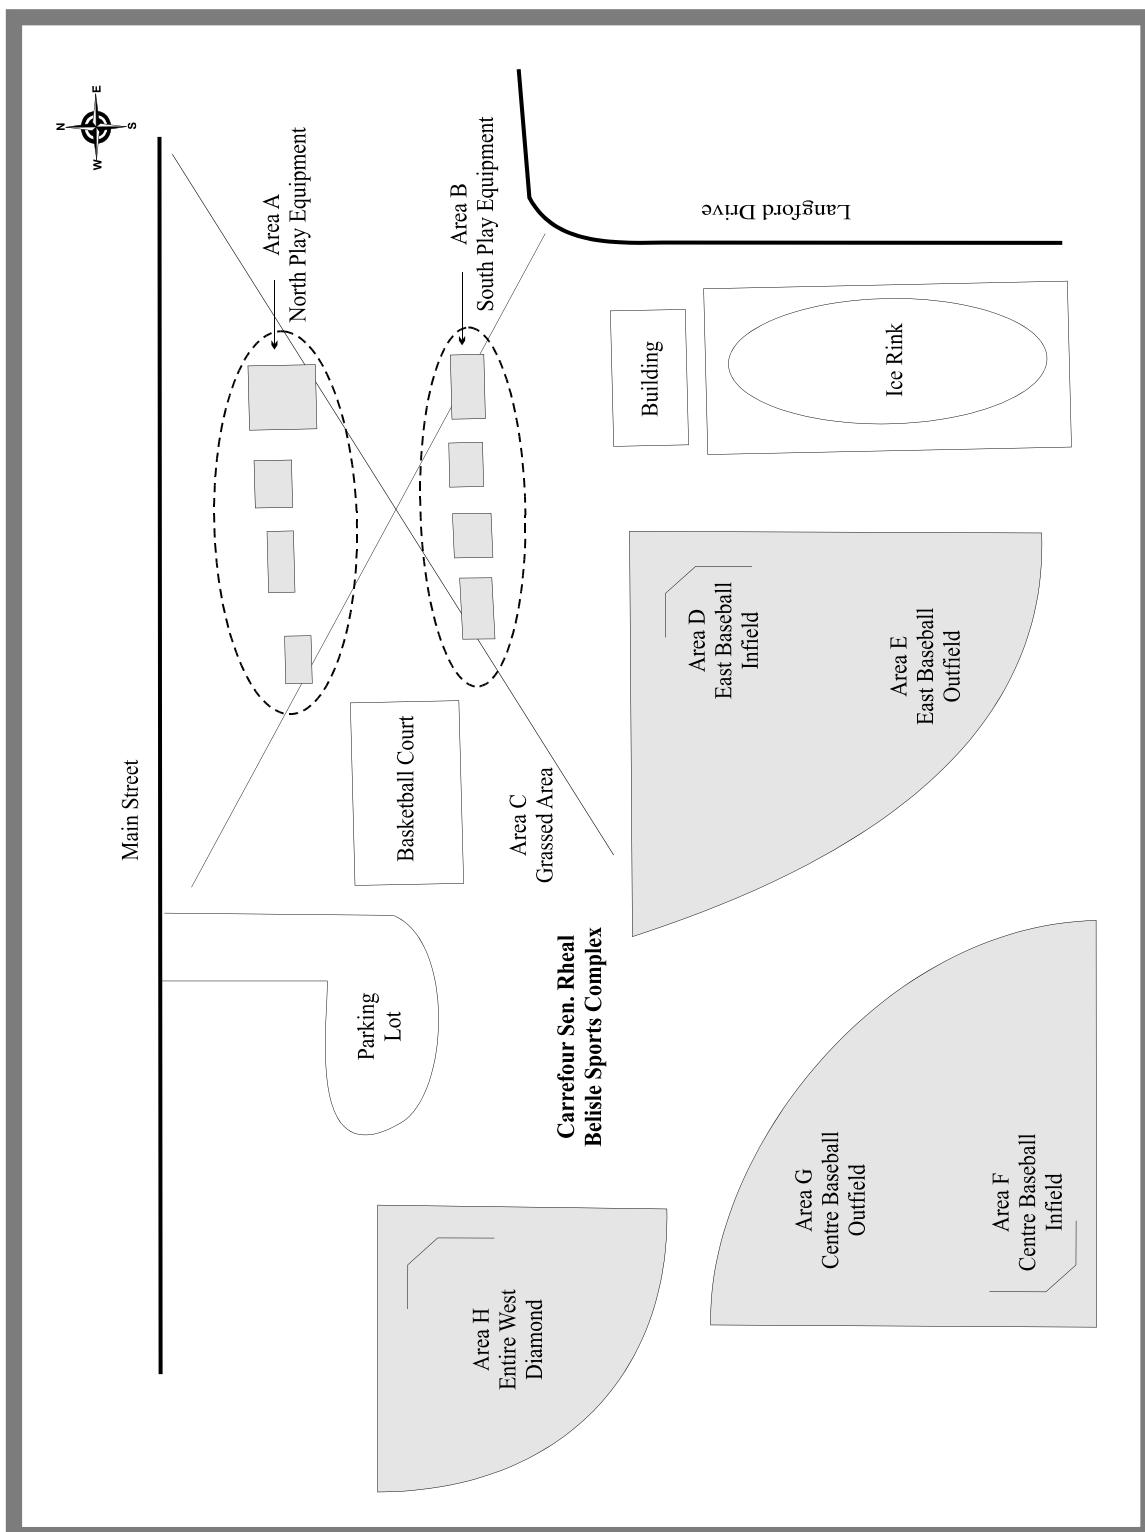

**Map C5.5.5:** Shawn Street Playground, Azilda - 2001.

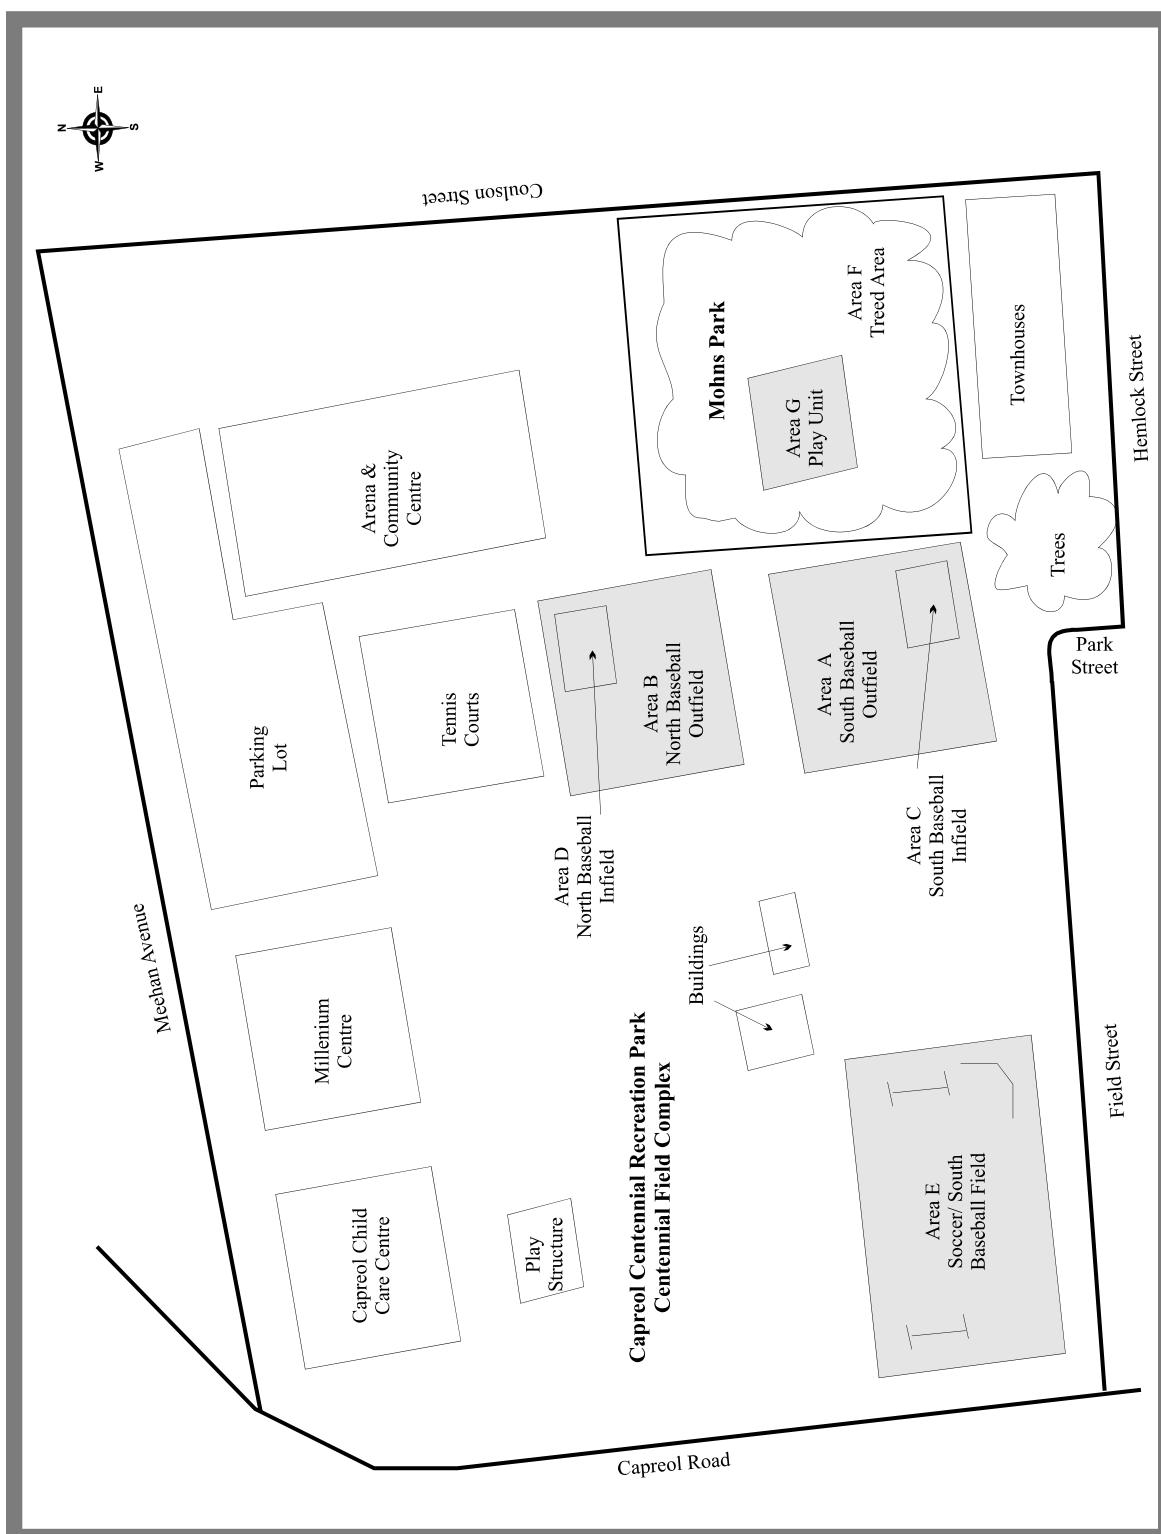

**Map C5.5.6:** Trillium Centre, Azilda - 2001.

## 5.6 Blezzard Valley Park Maps

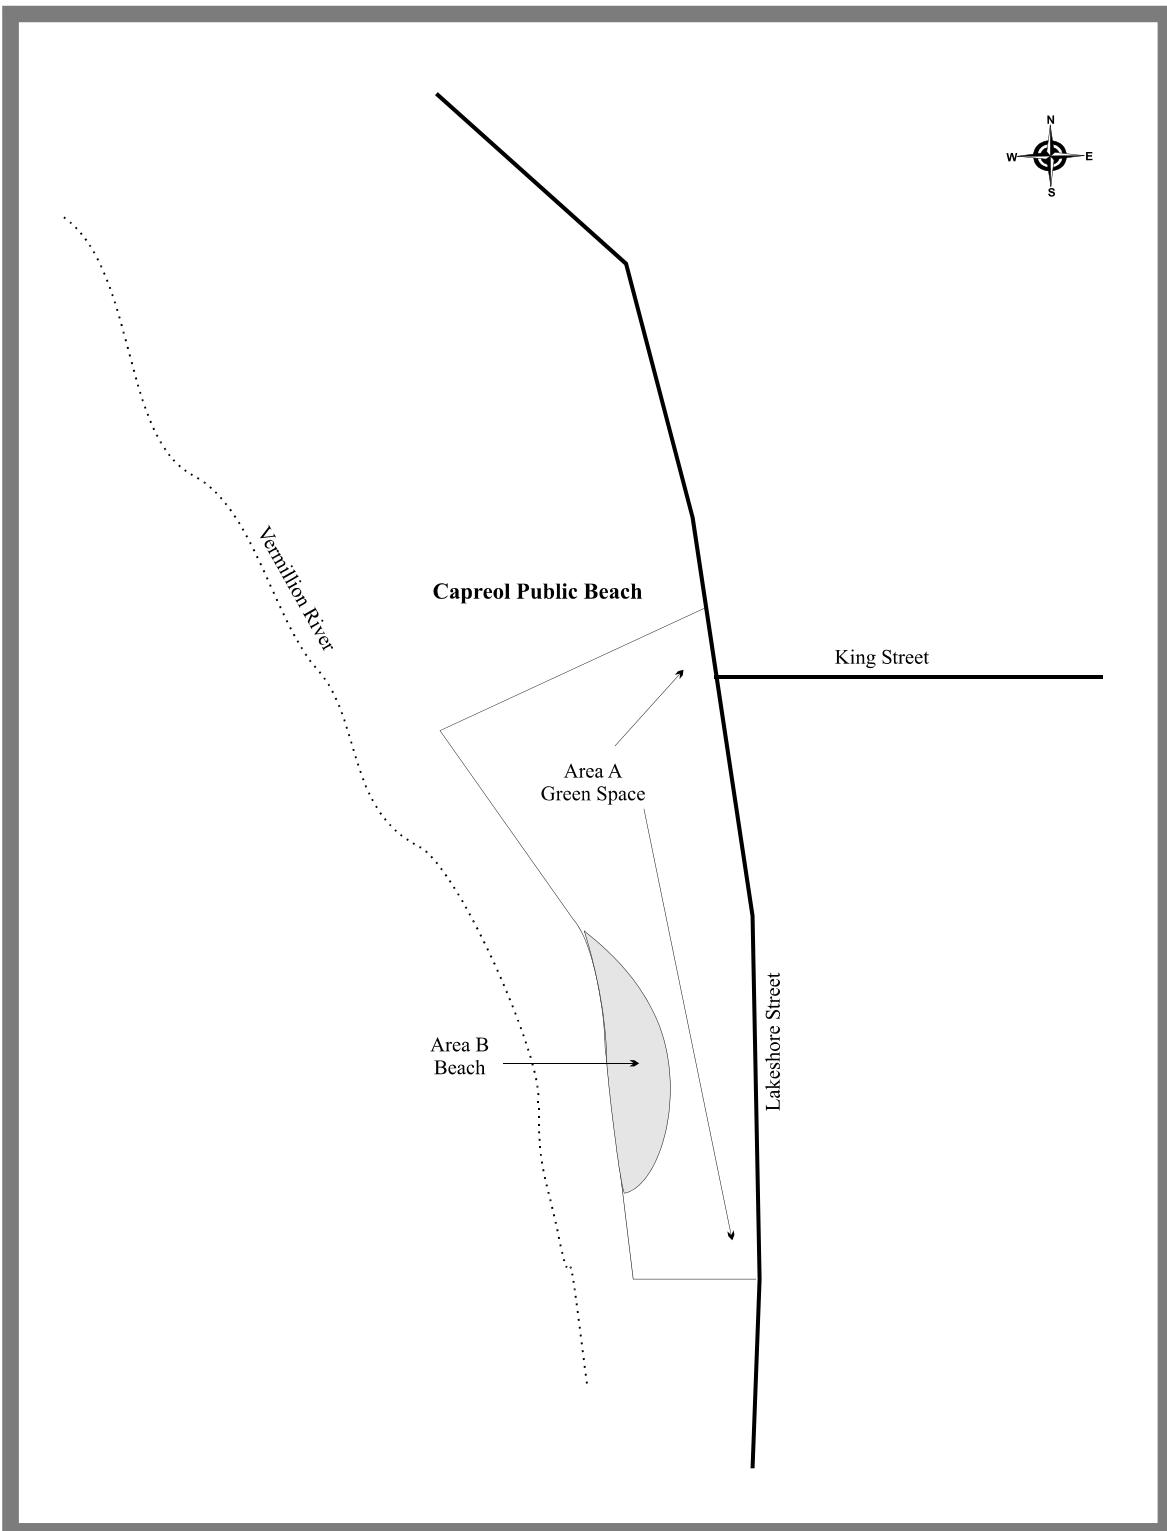

**Map C5.6.1:** Carrefour Sen. Rheal Belisle Sports Complex, Blezzard Valley - 2001.

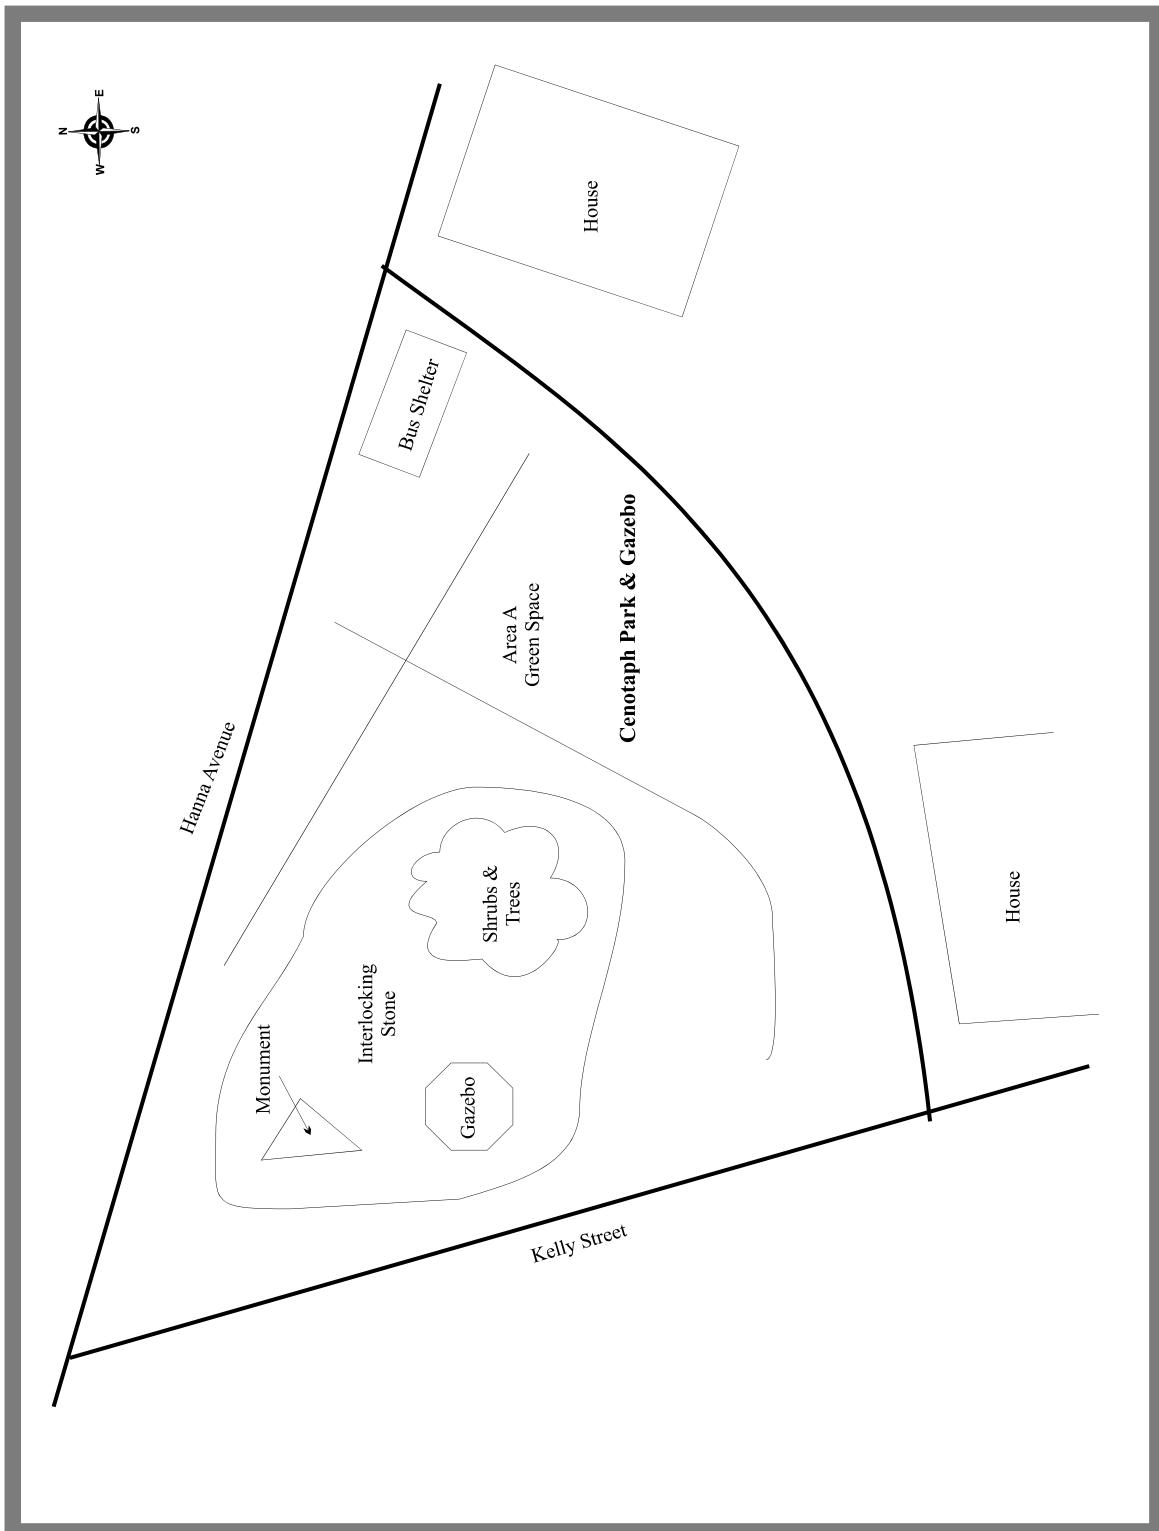

## 5.7 Capreol Park Maps

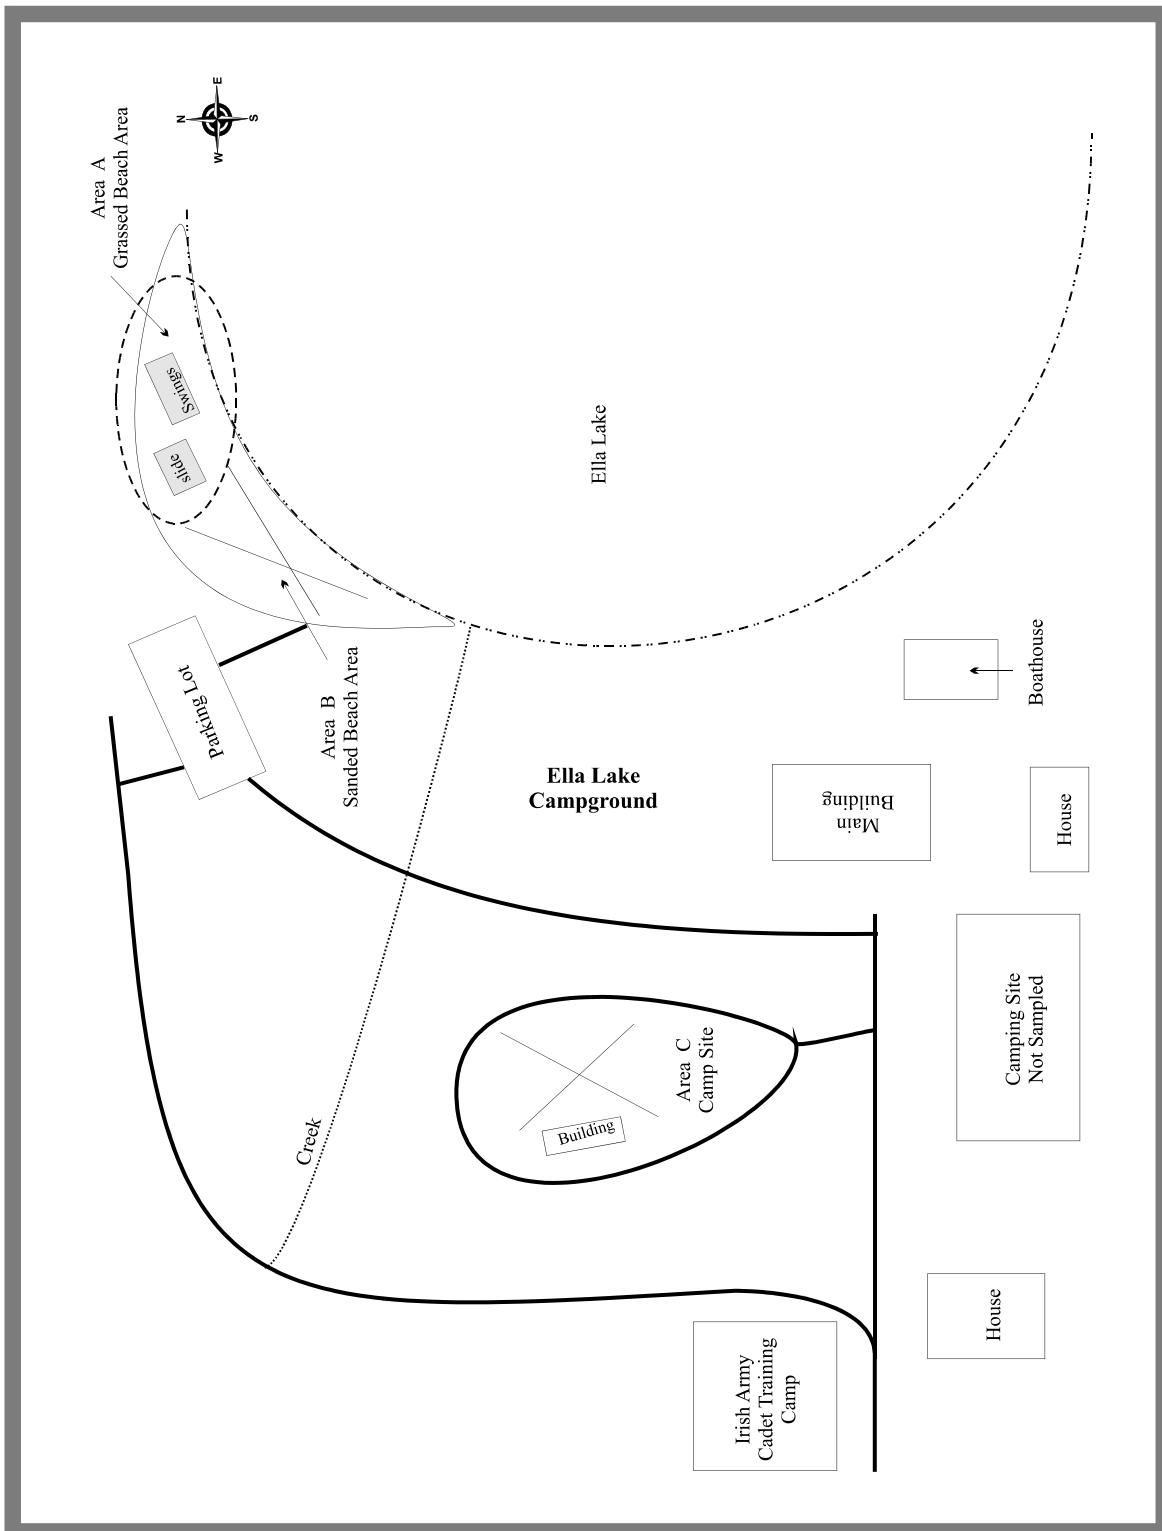

**Map C5.7.2: Capreol Public Beach, Capreol - 2001.**

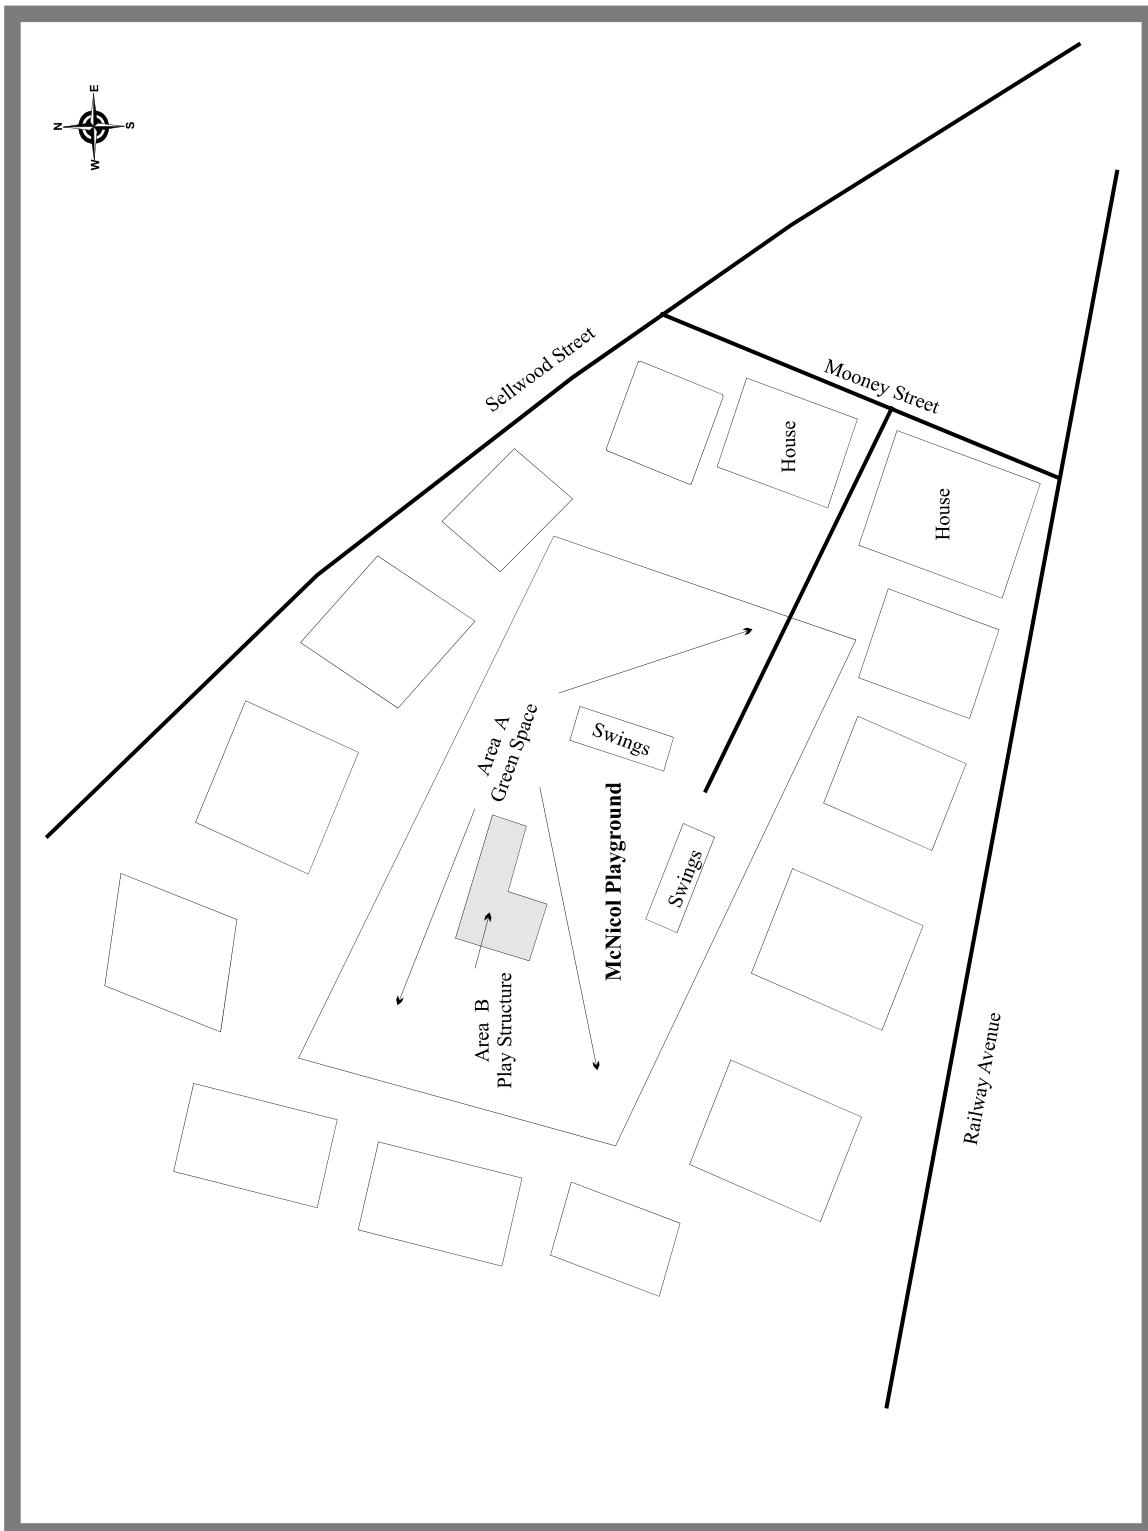

**Map C5.7.3:** Cenotaph Park, Capreol - 2001.

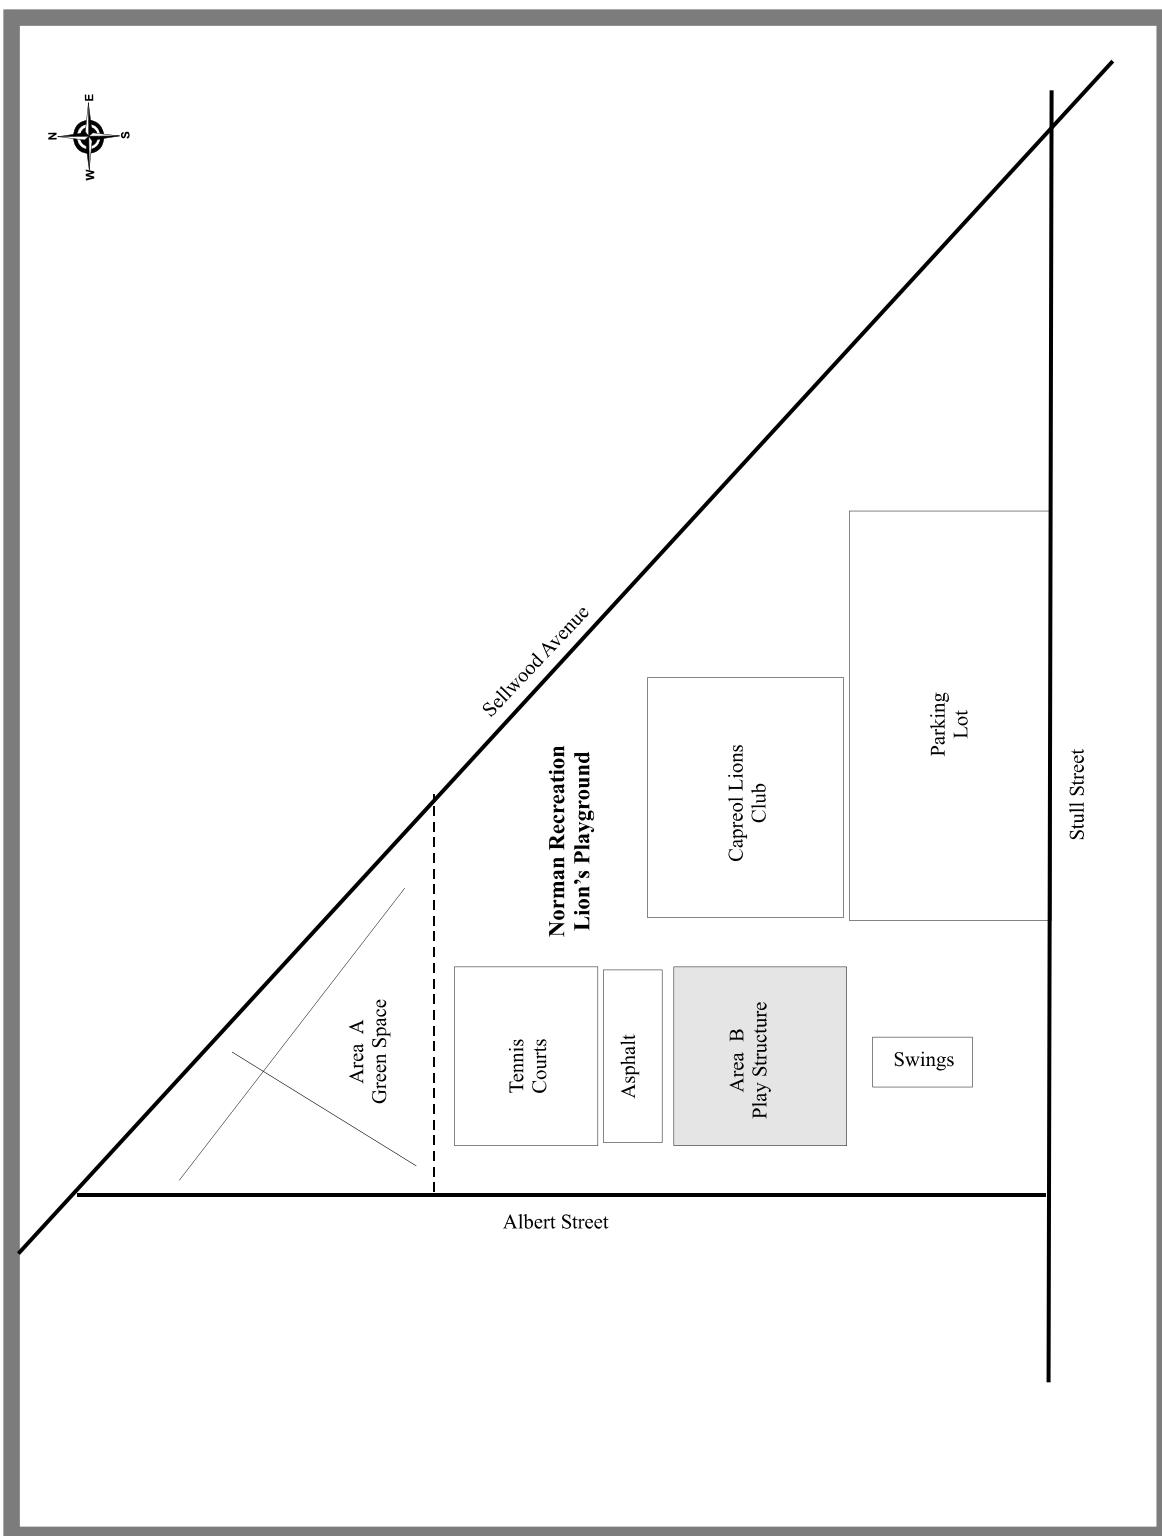

**Map C5.7.4:** Dunn Park, Capreol - 2001.

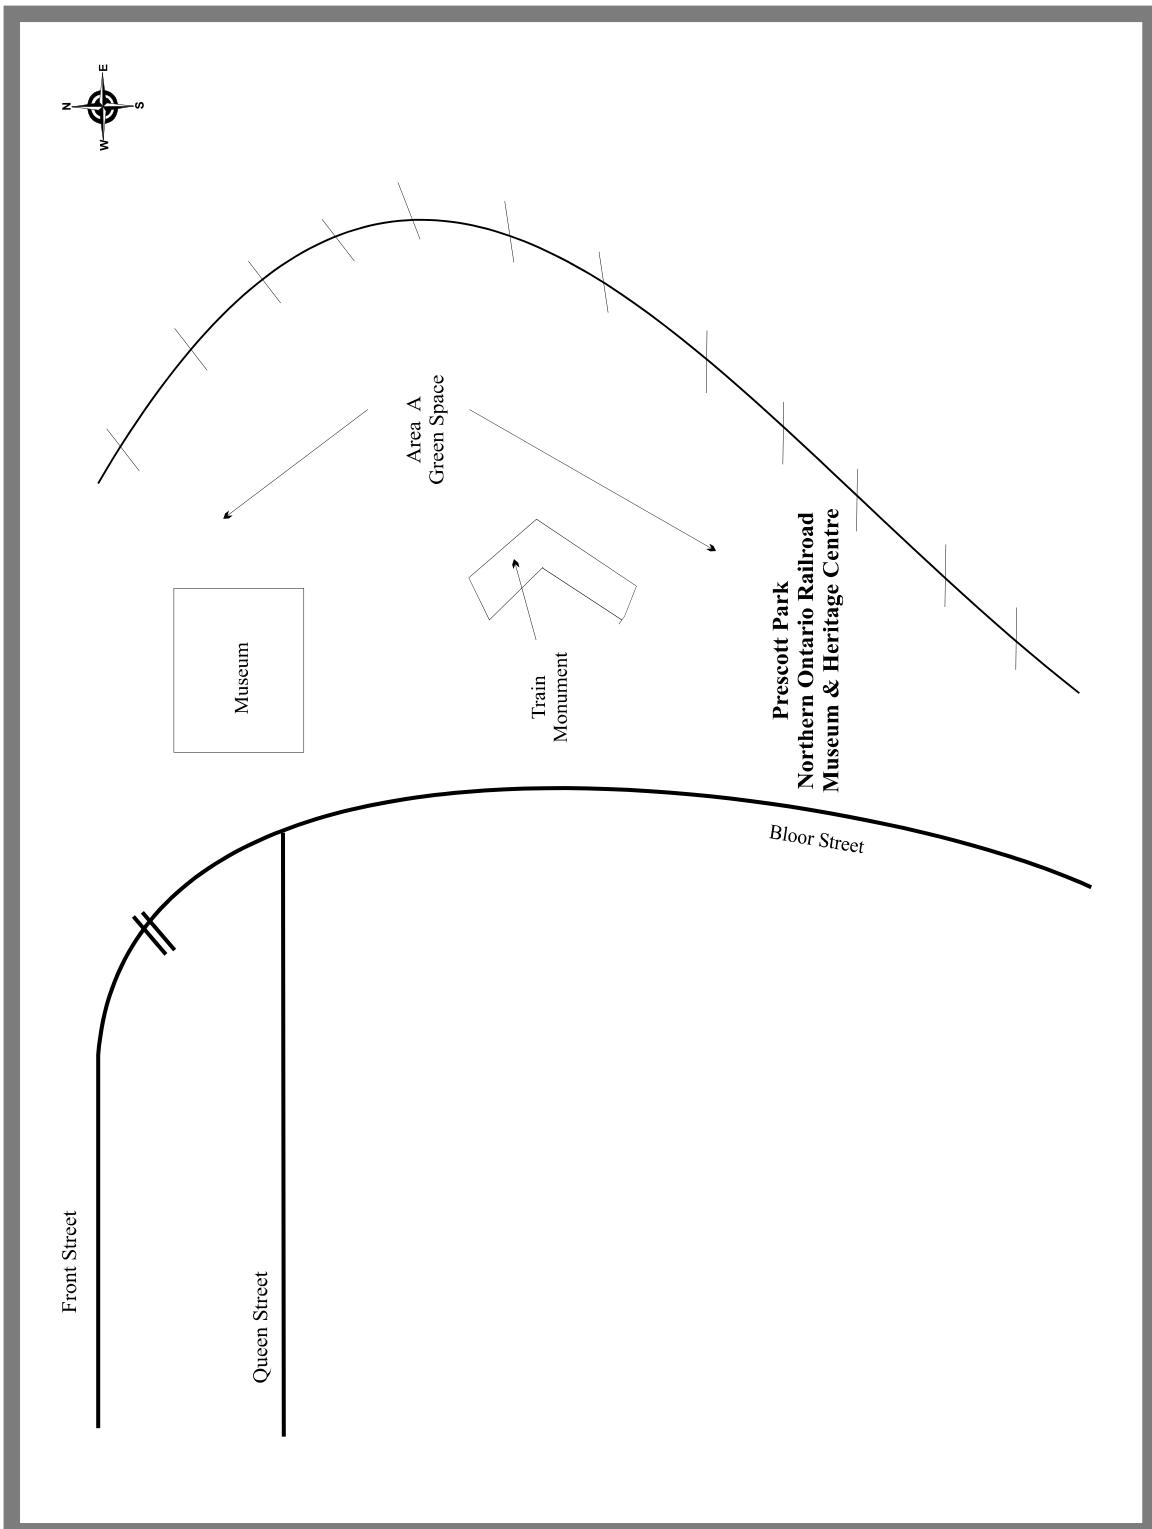

**Map C5.7.5: Ella Lake Campground, Capreol - 2001.**

**Map C5.7.6:** McNicol Playground, Capreol - 2001.

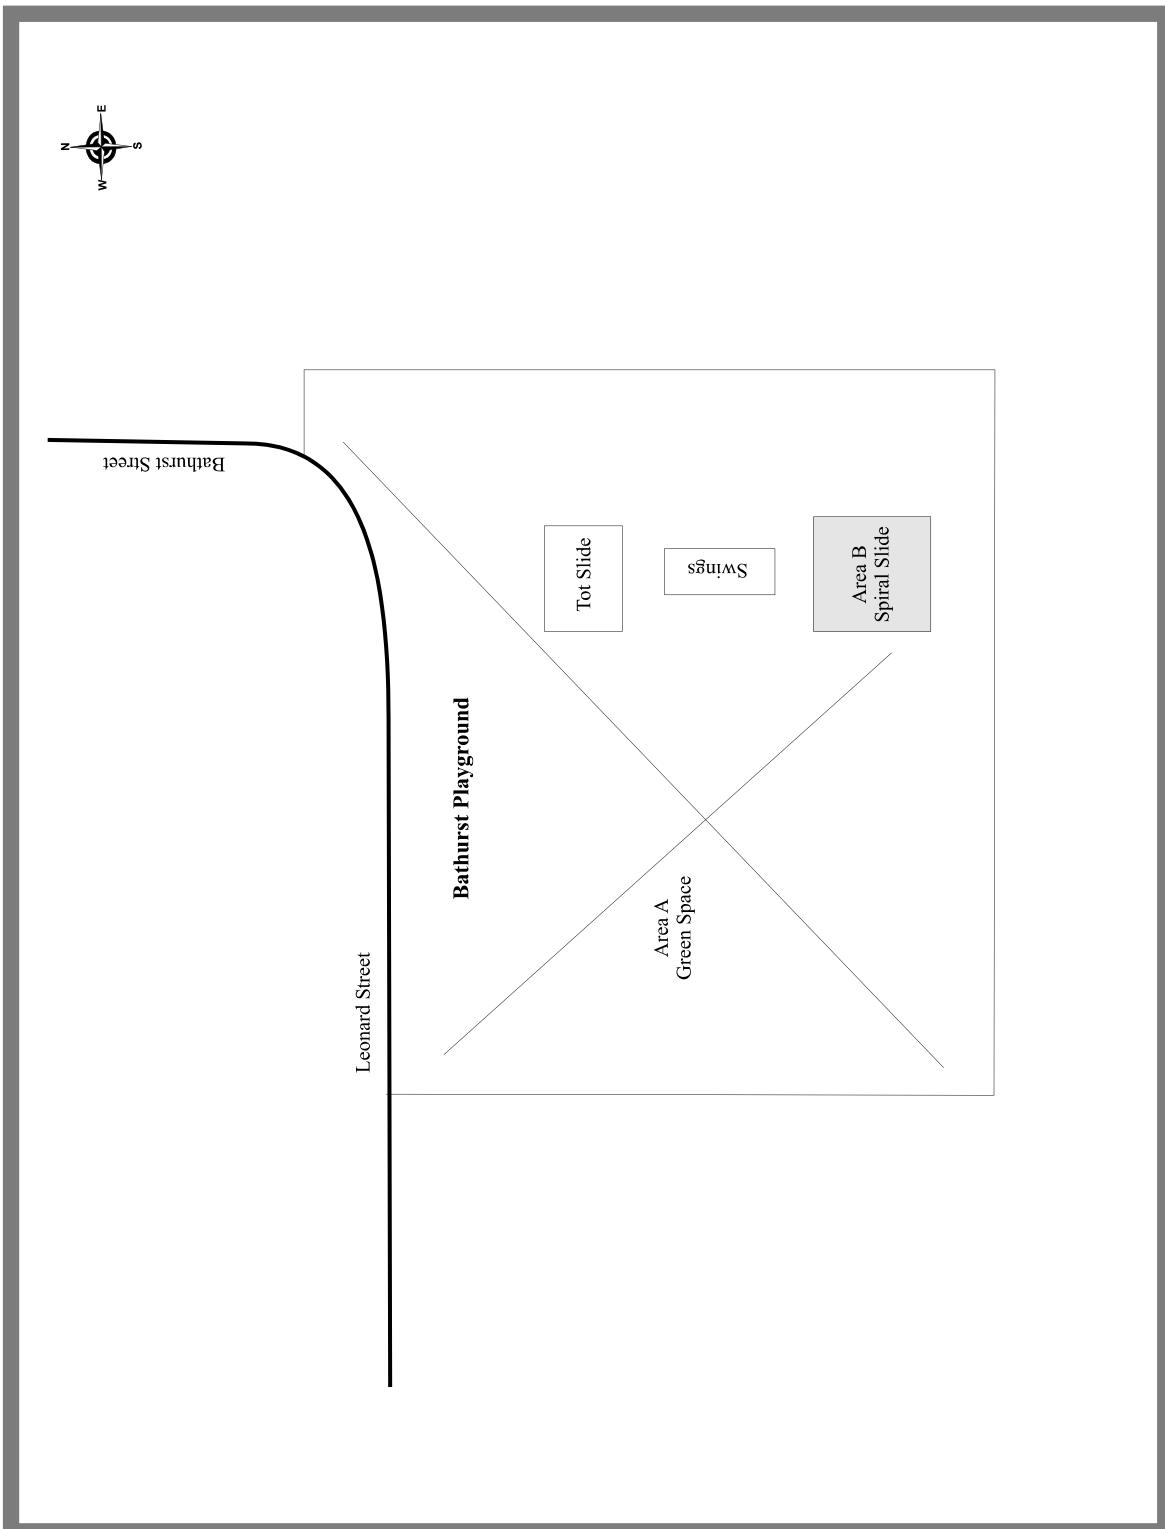

**Map C5.7.7:** Norman Rec. Lion's Playground (Capreol Lion's Den), Capreol - 2001.

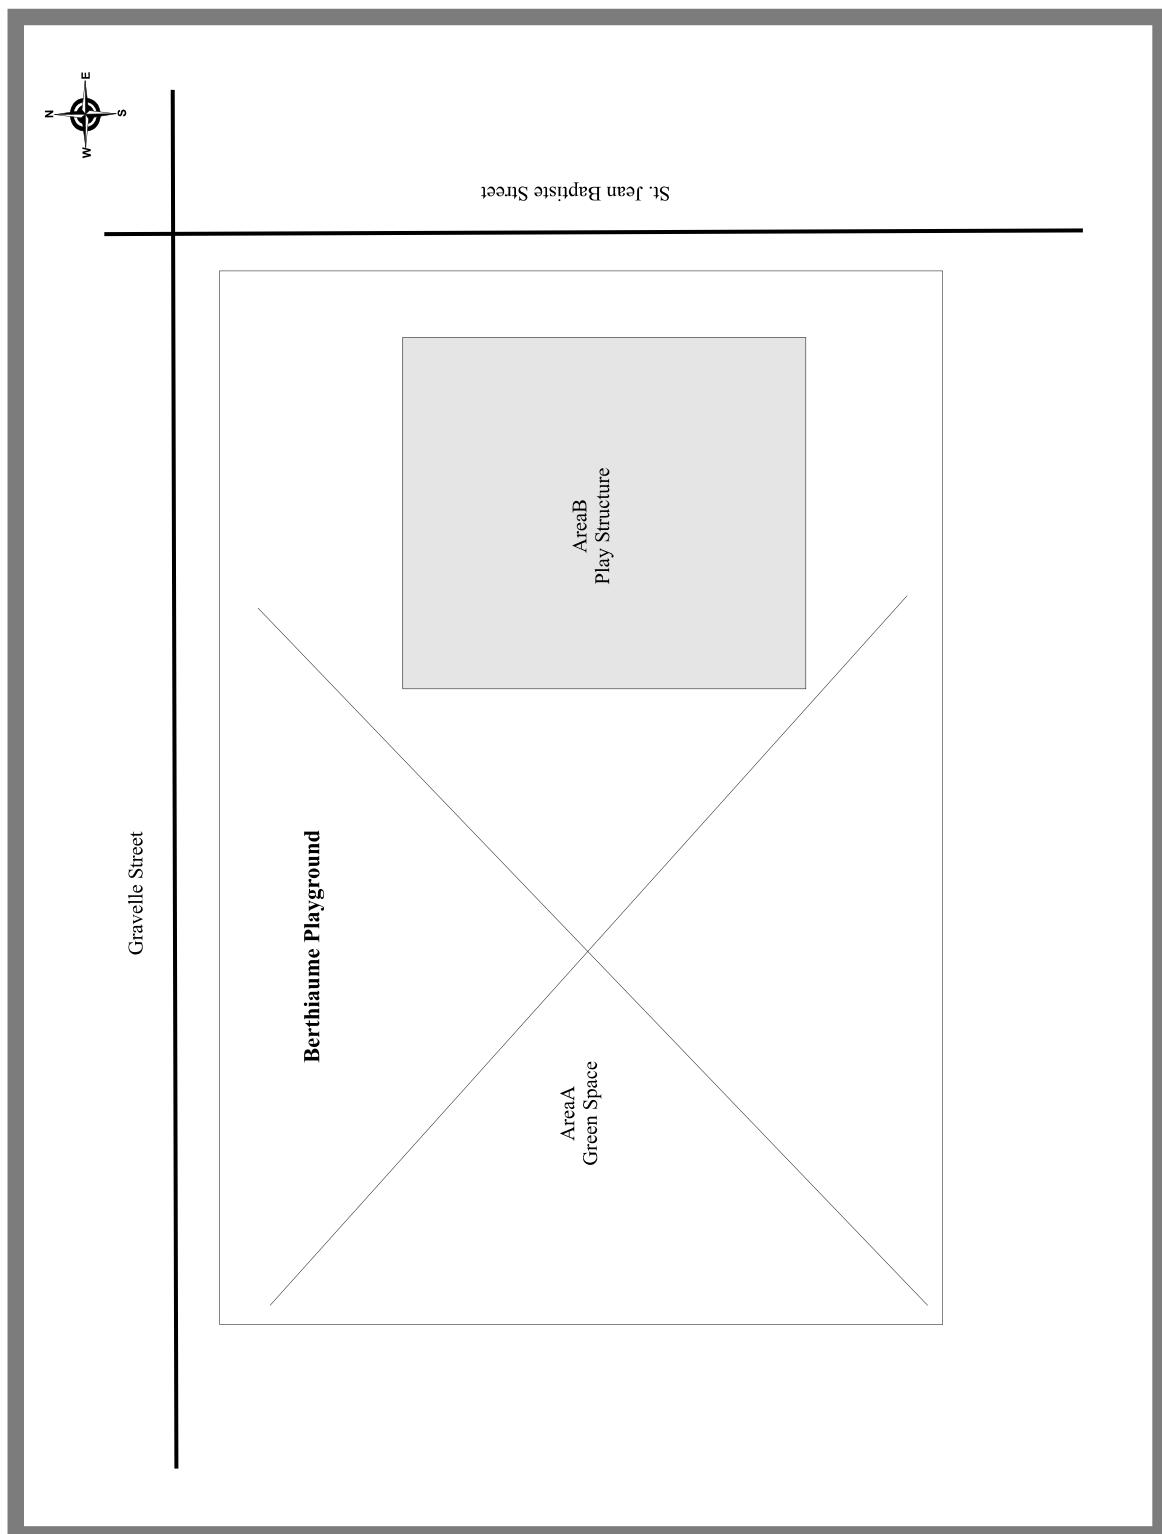

**Map C5.7.8:** Prescott Park, Capreol - 2001.

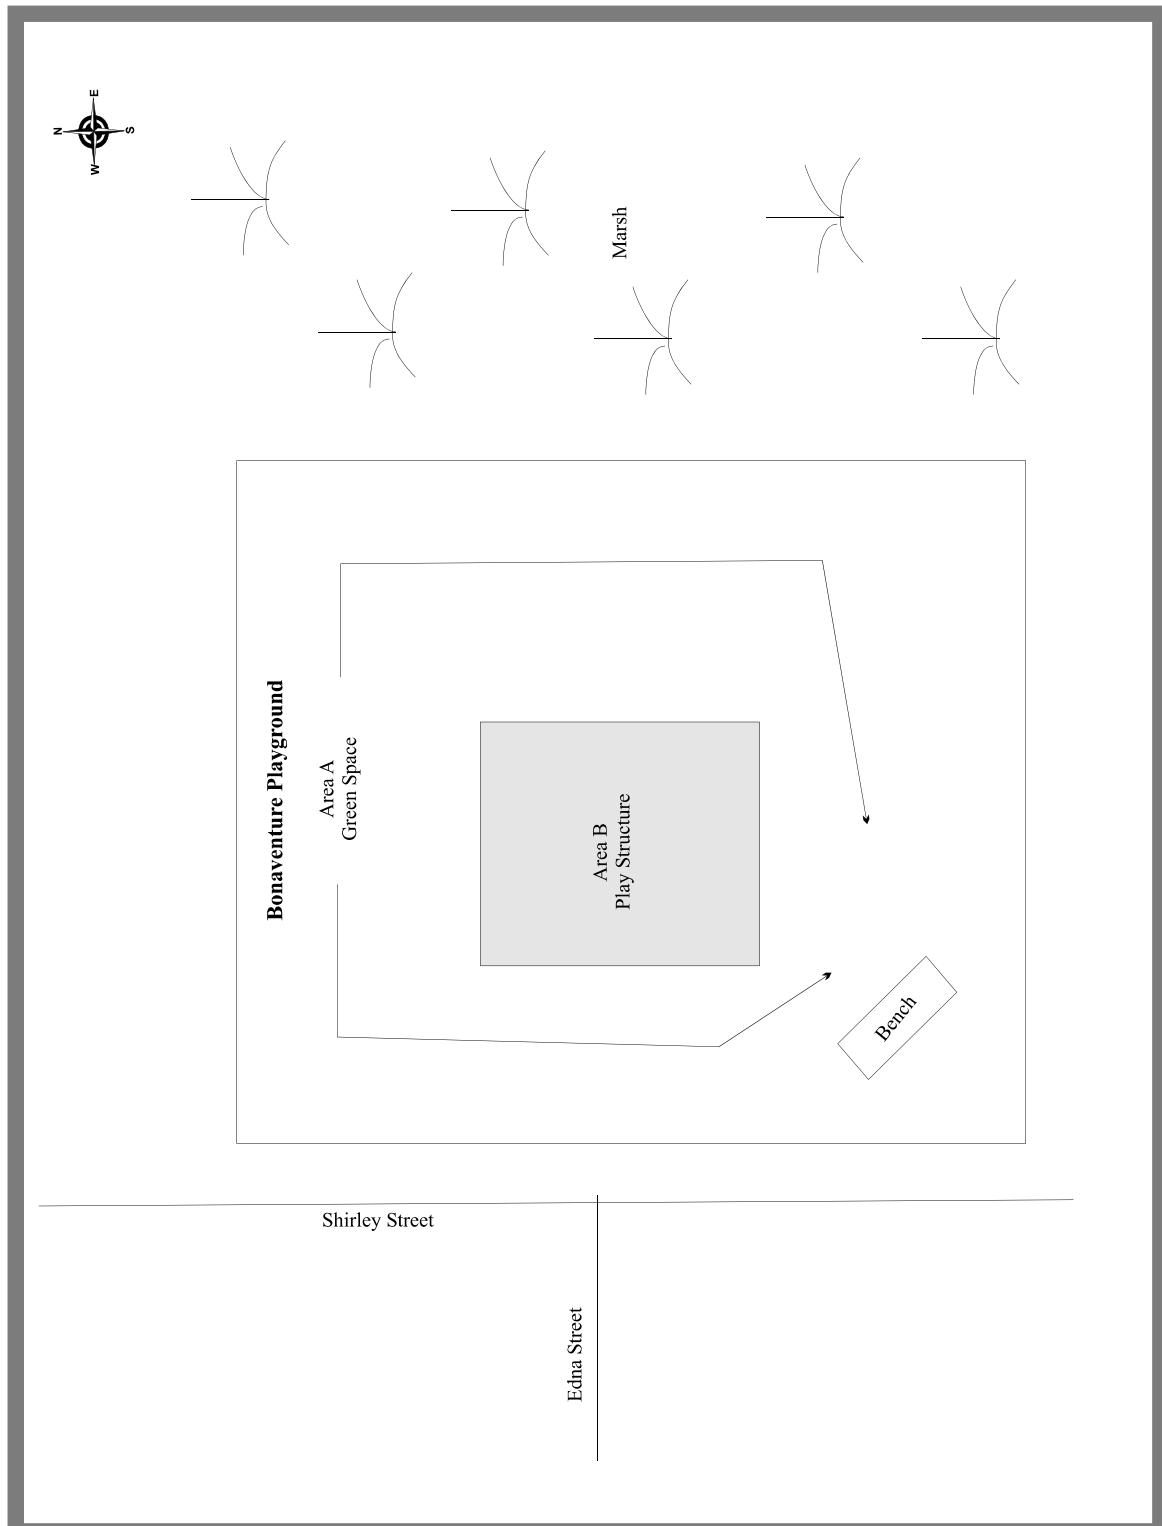

## 5.8 Chelmsford Park Maps

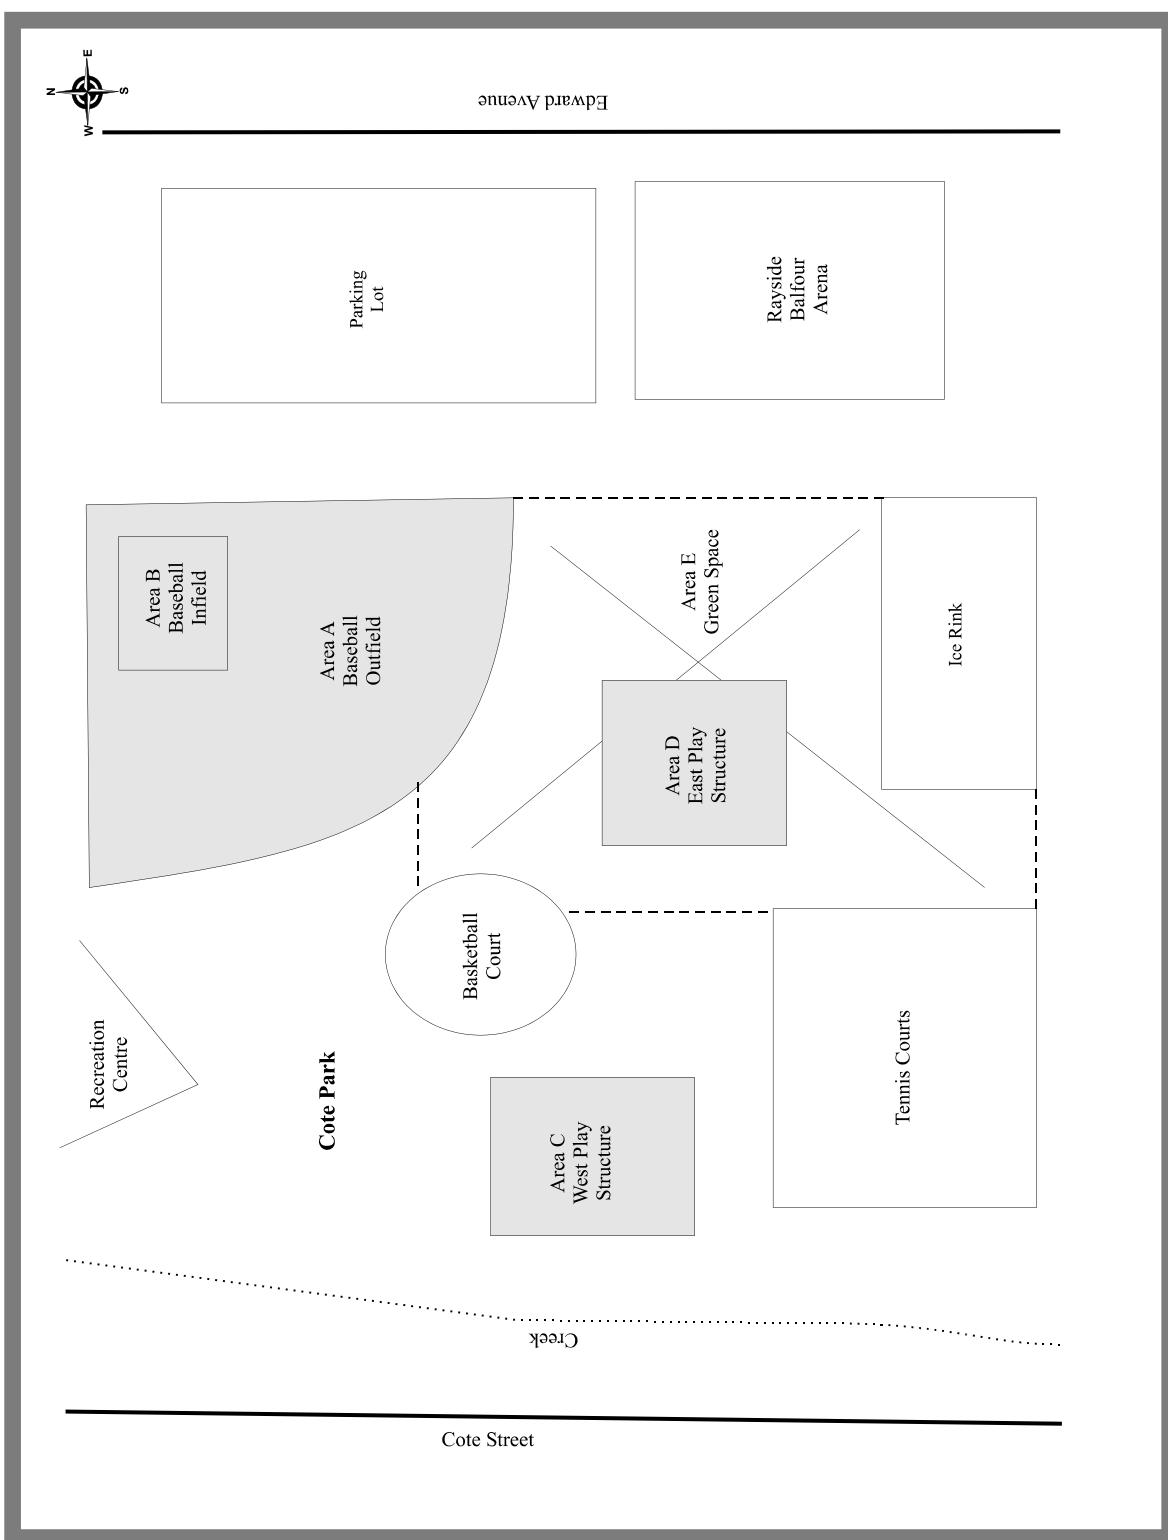

**Map C5.8.1:** Bathurst Playground, Chelmsford - 2001.

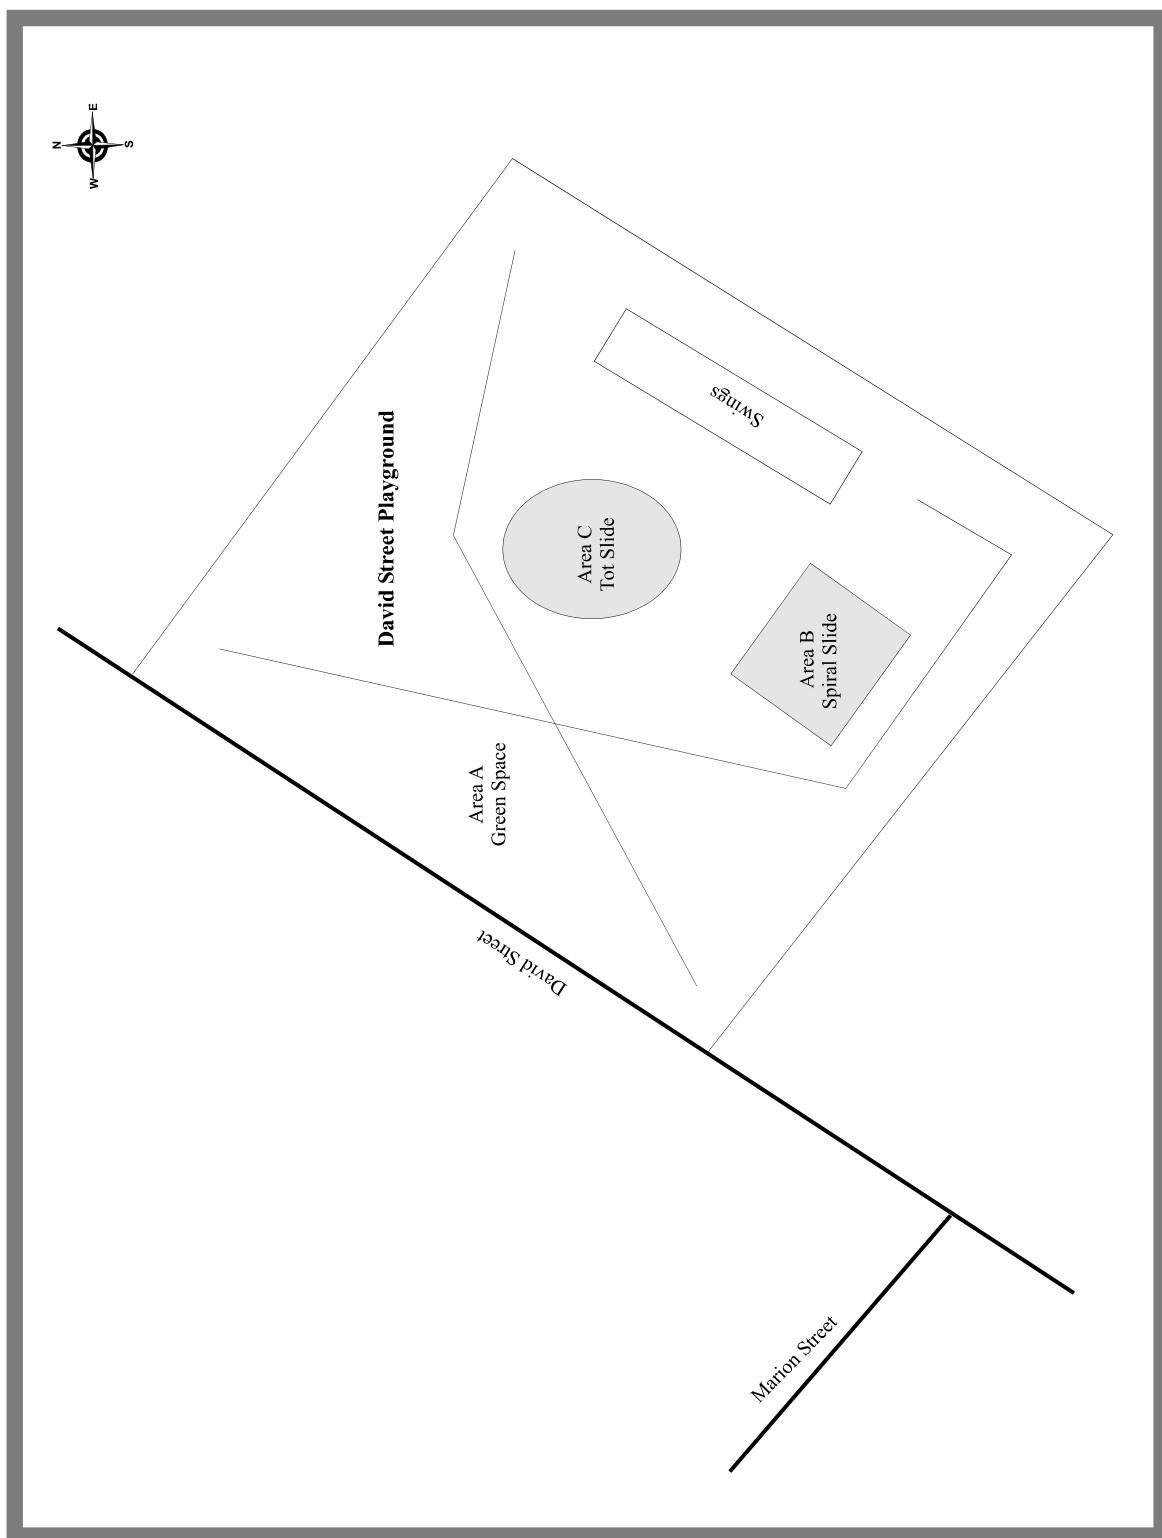

**Map C5.8.2:** Berthiaume Playground, Chelmsford - 2001.

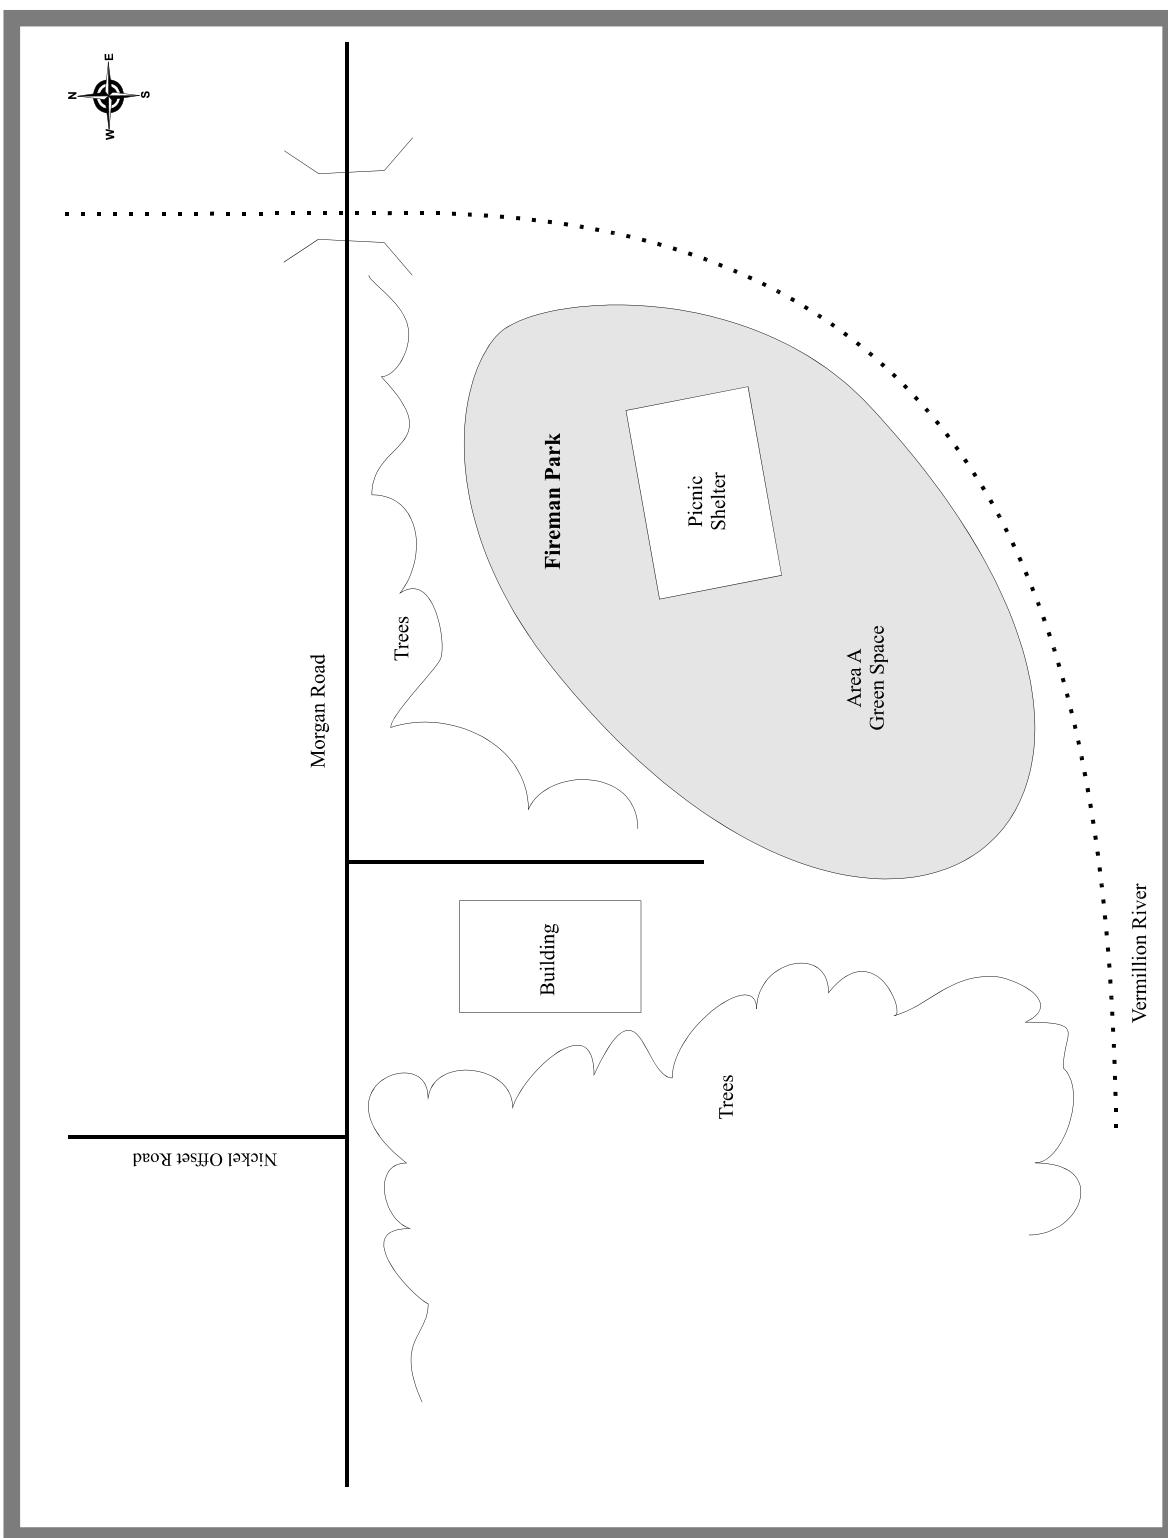

**Map C5.8.3:** Bonaventure Playground (Shirley Playground), Chelmsford - 2001.

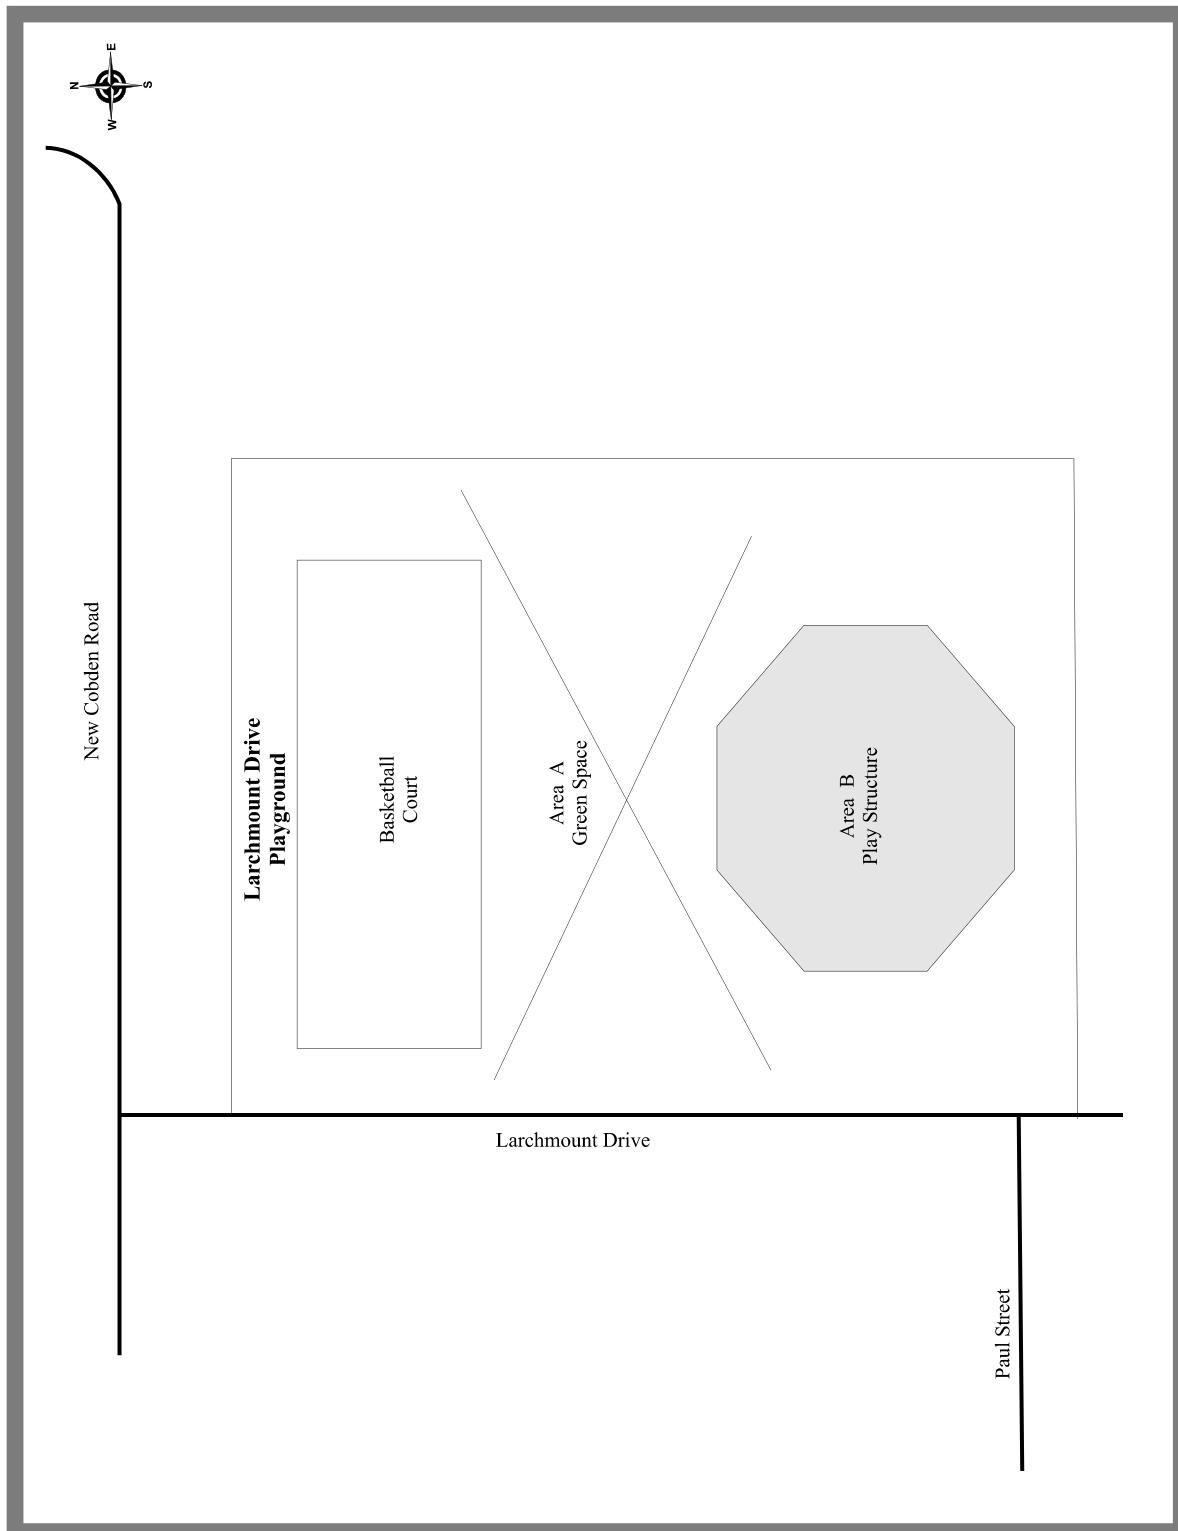

**Map C5.8.4: Cote Park, Chelmsford - 2001.**

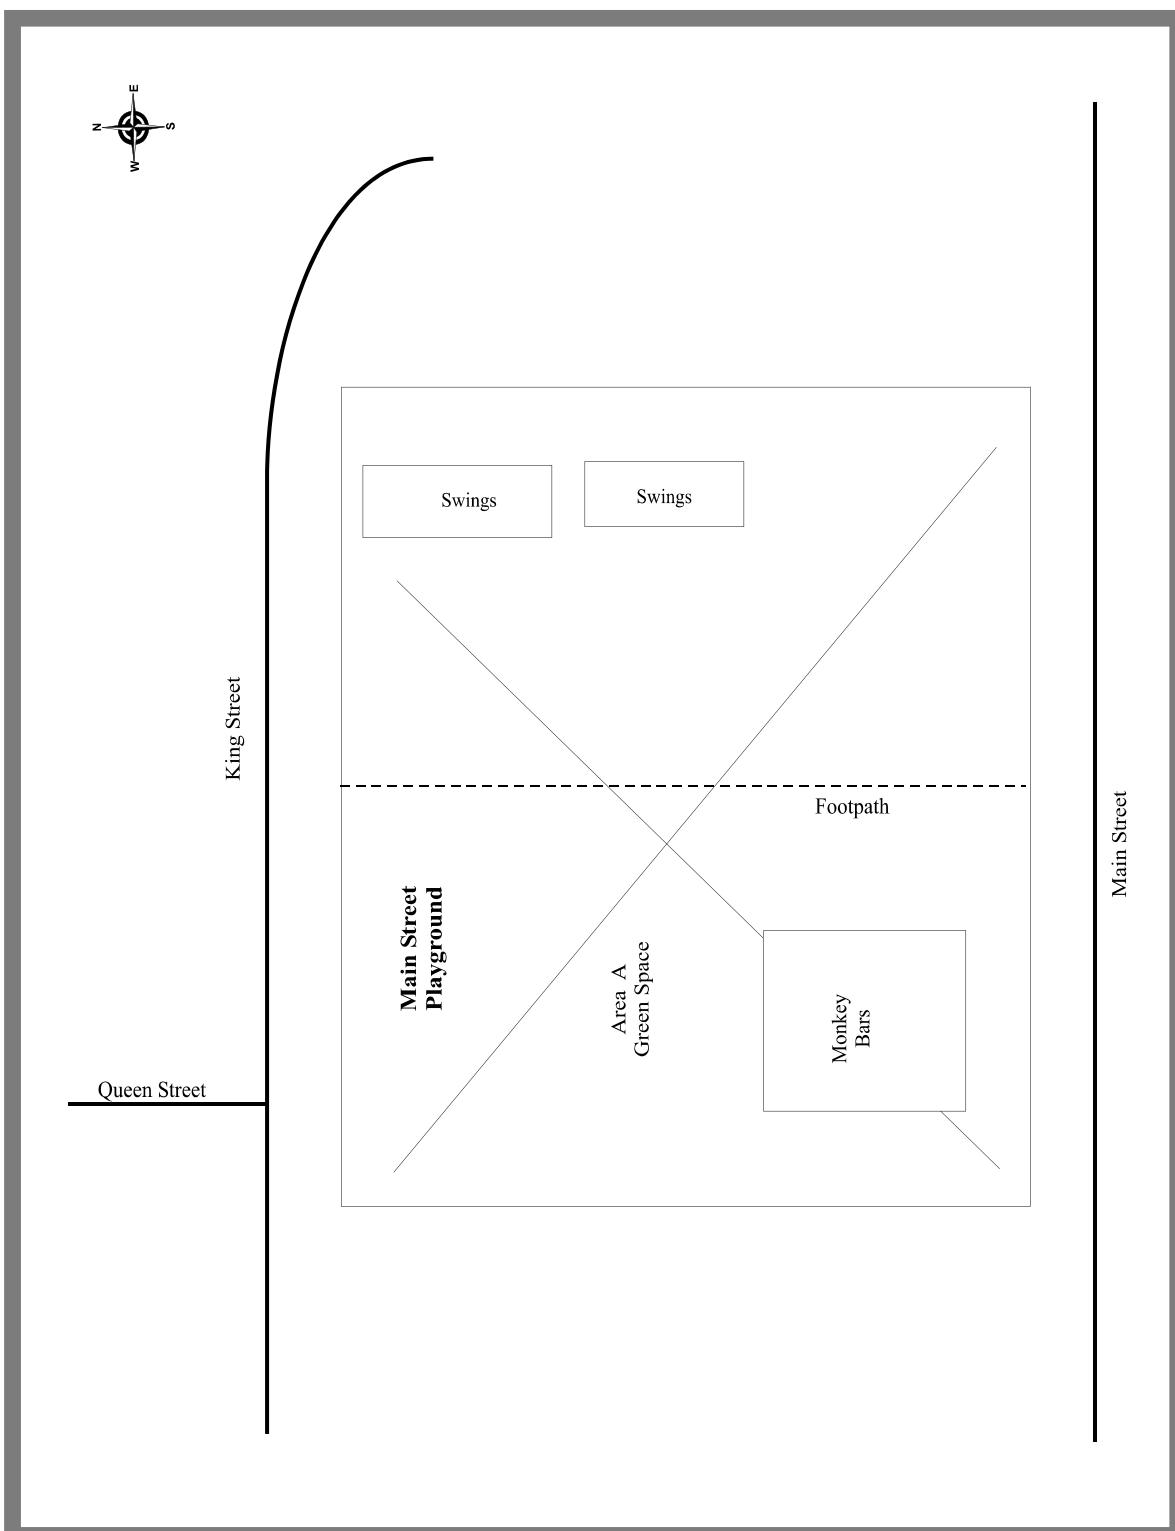

**Map C5.8.5:** David Street Playground, Chelmsford - 2001.

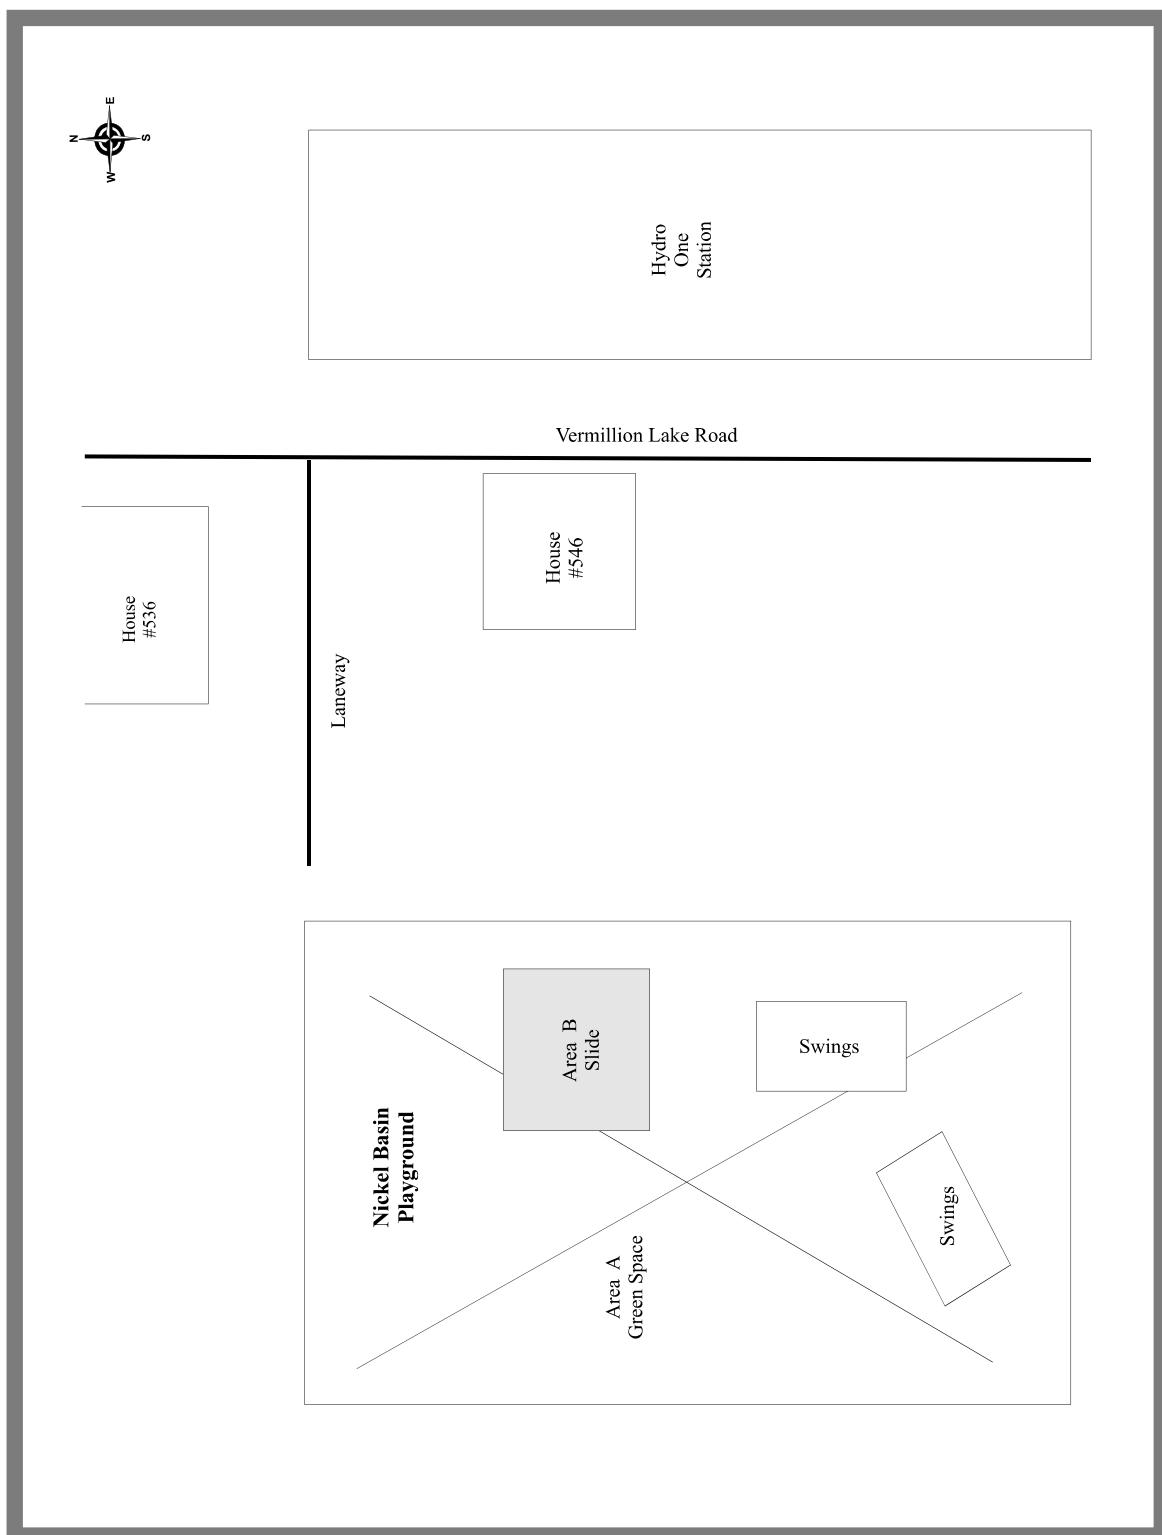

**Map C5.8.6:** Fireman Park, Chelmsford - 2001.

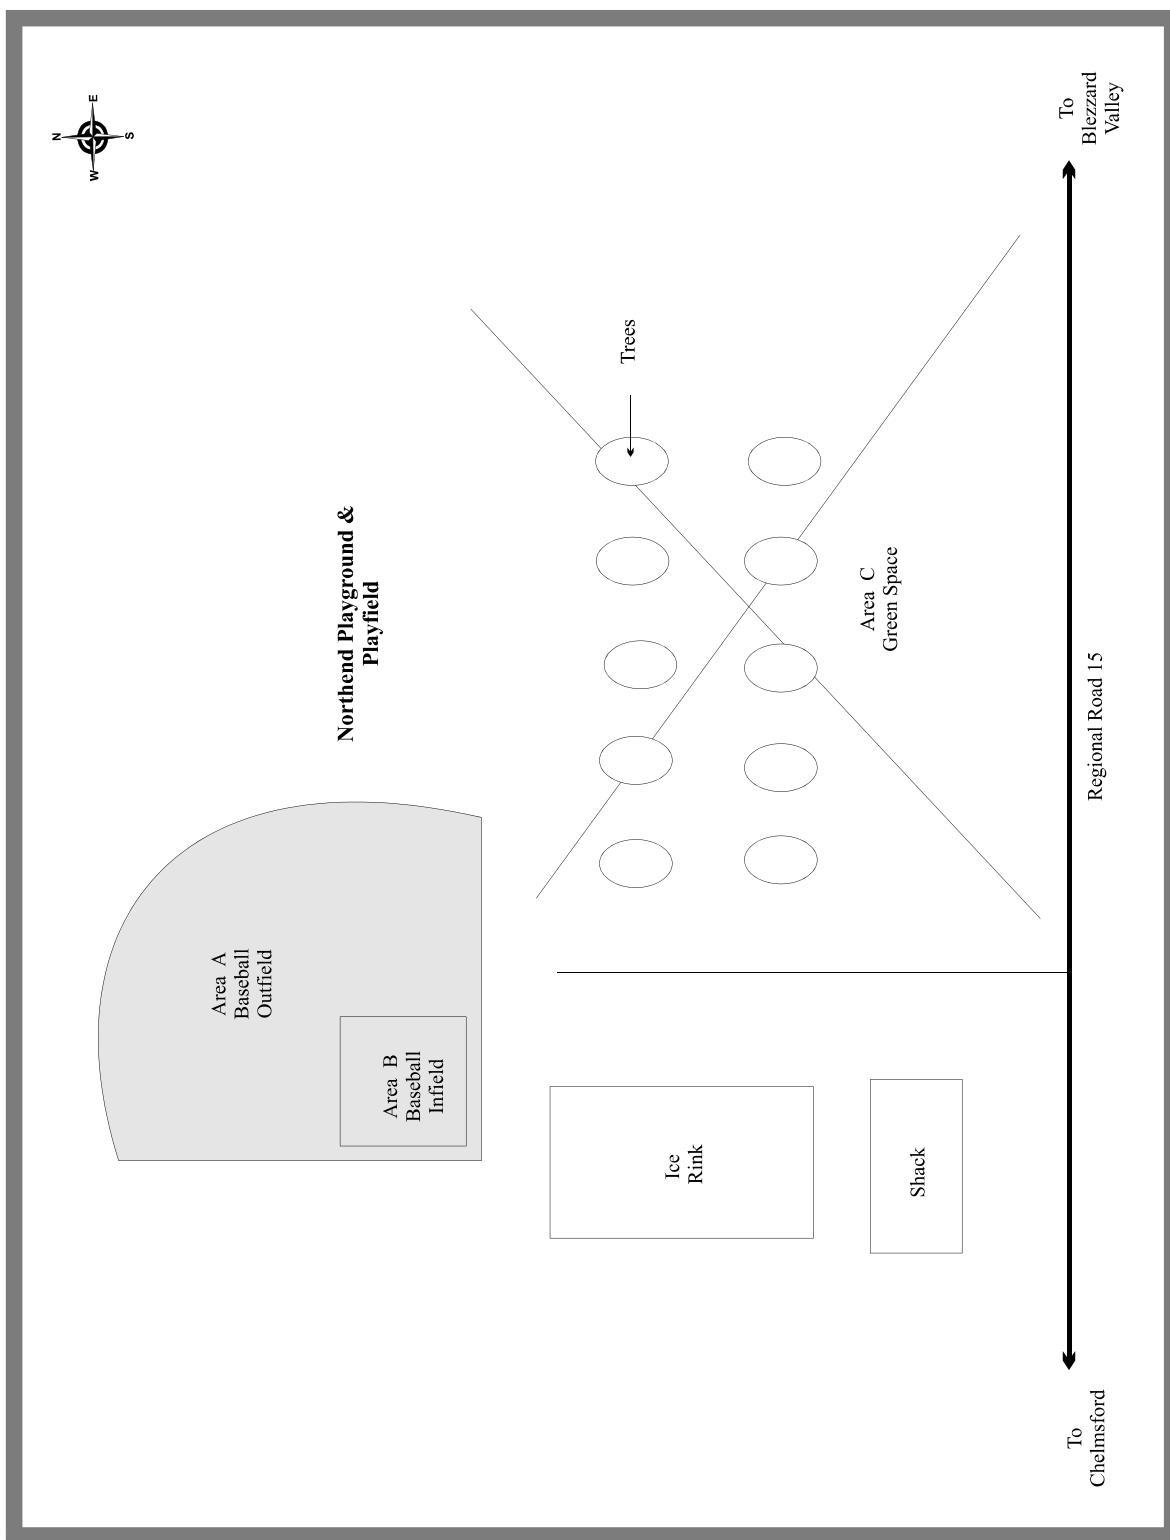

**Map C5.8.7: Larchmount Drive Playground, Chelmsford - 2001.**

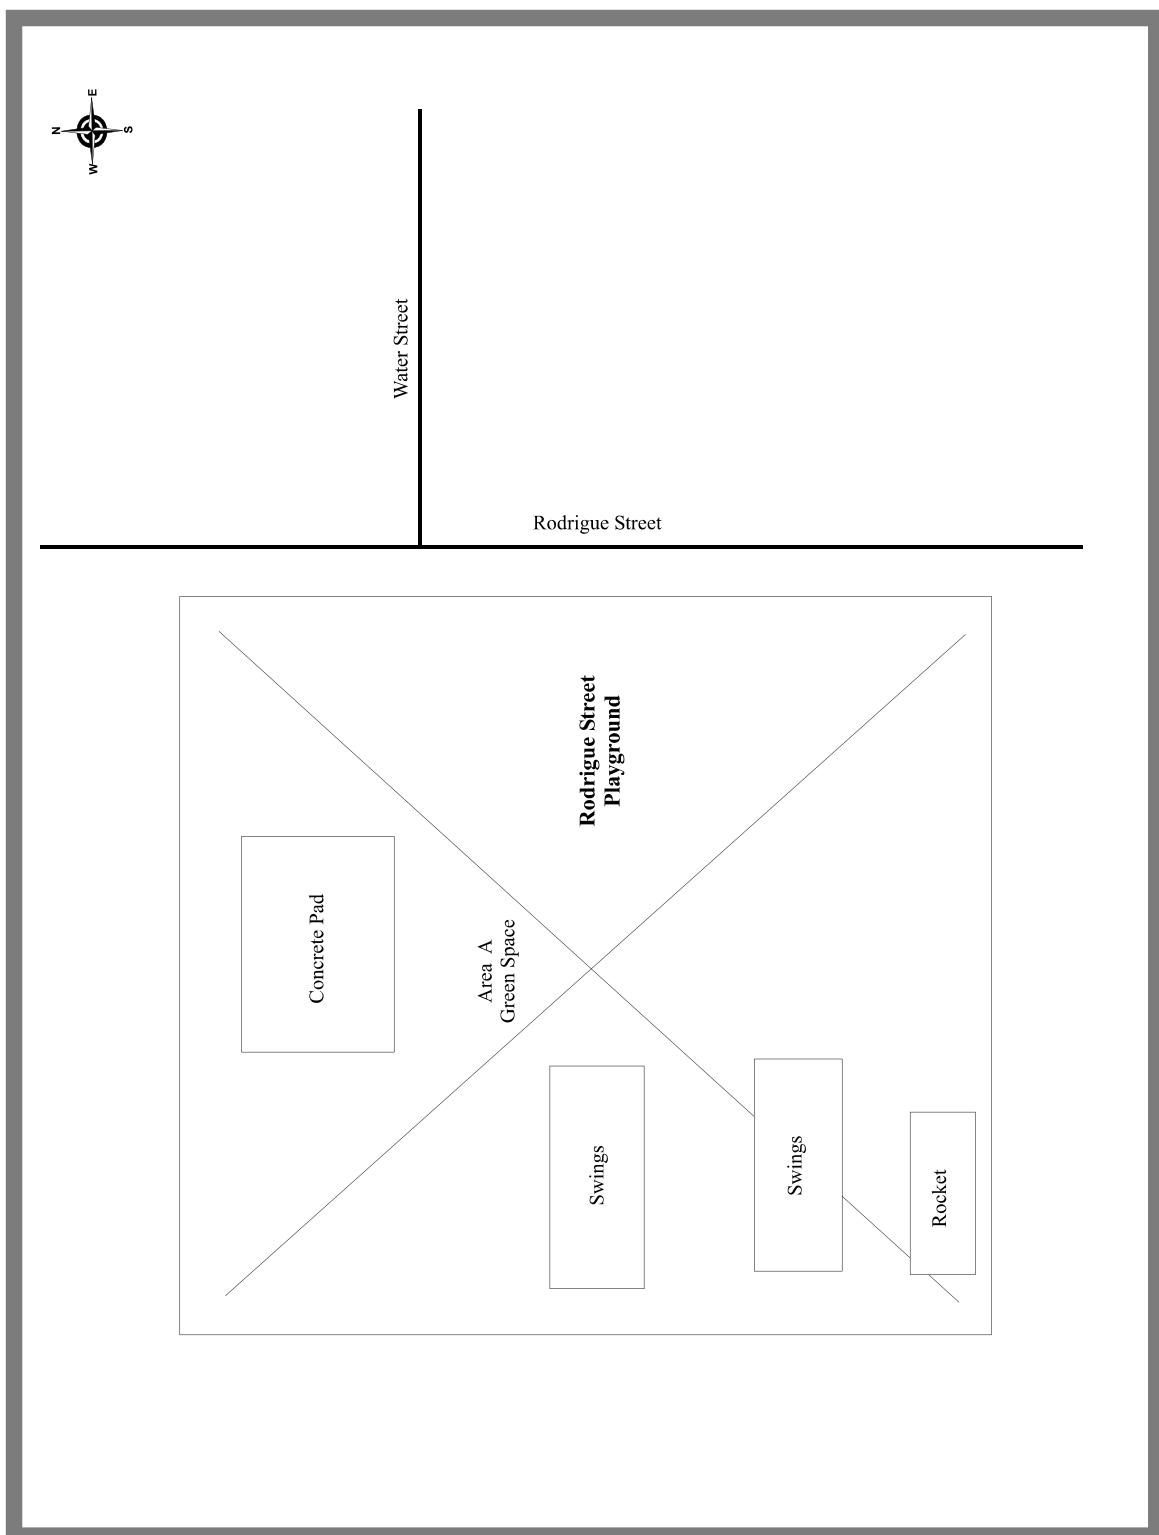

**Map C5.8.8:** Main Street Playground, Chelmsford - 2001.

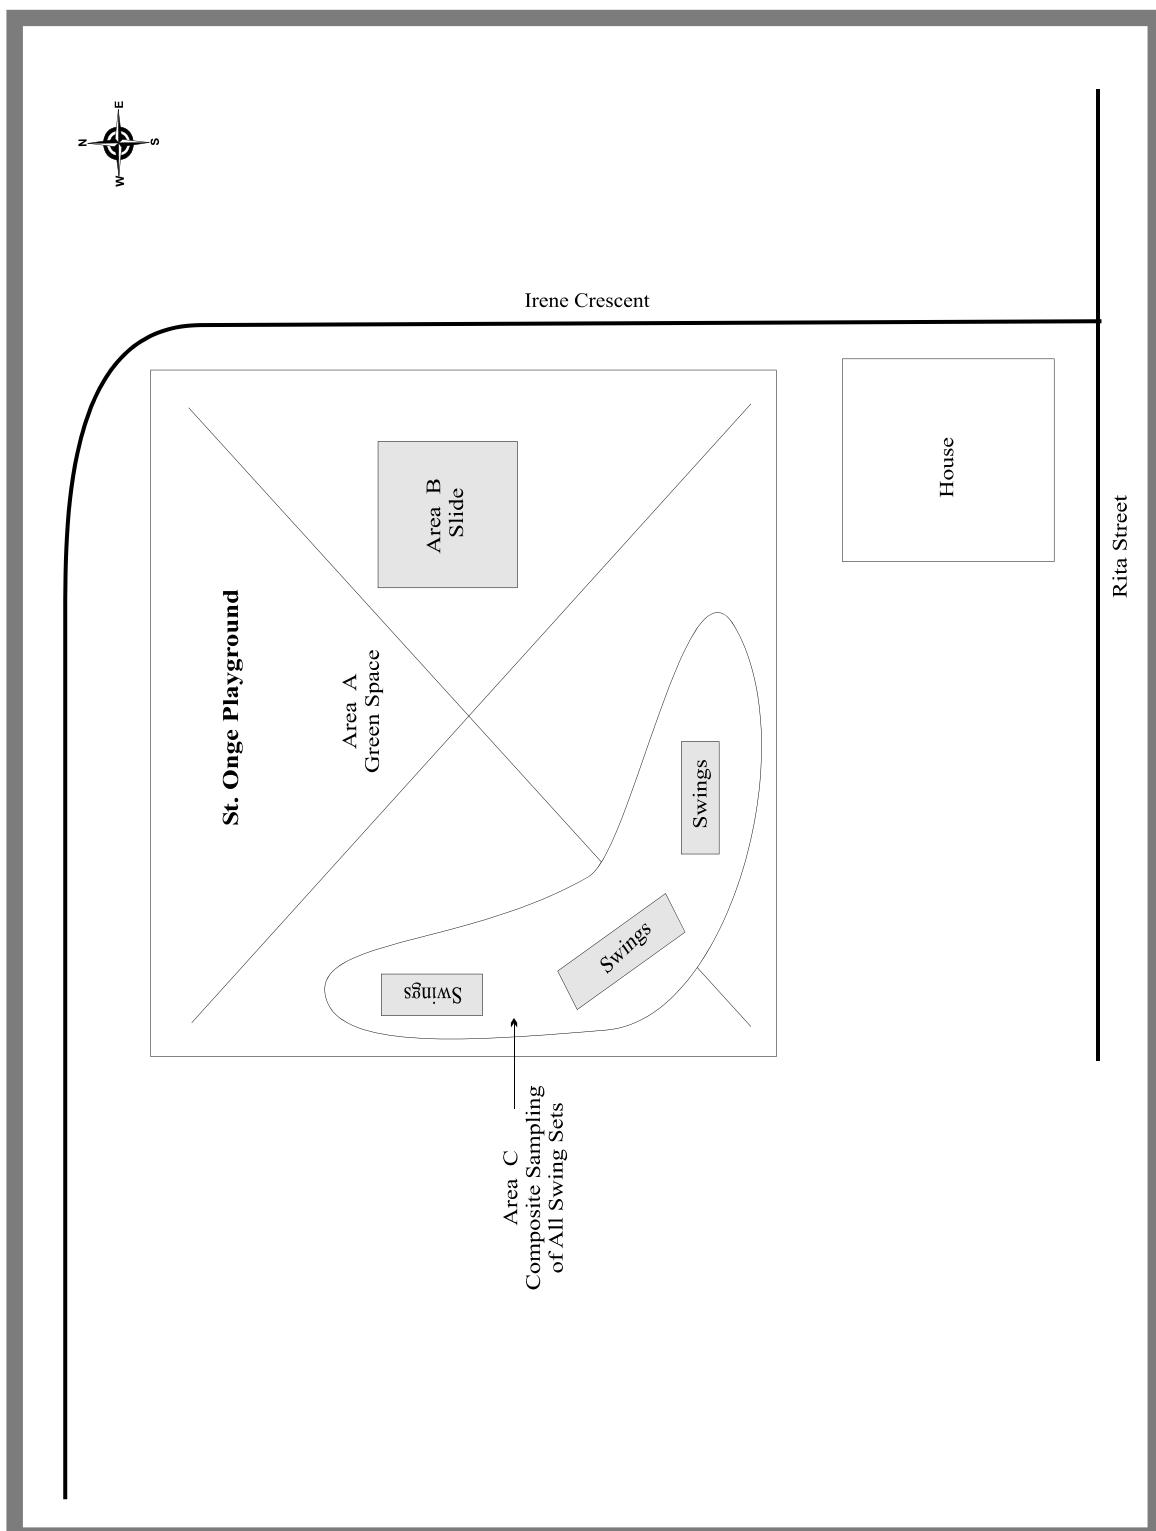

**Map C5.8.9:** Nickel Basin Playground, Chelmsford - 2001.

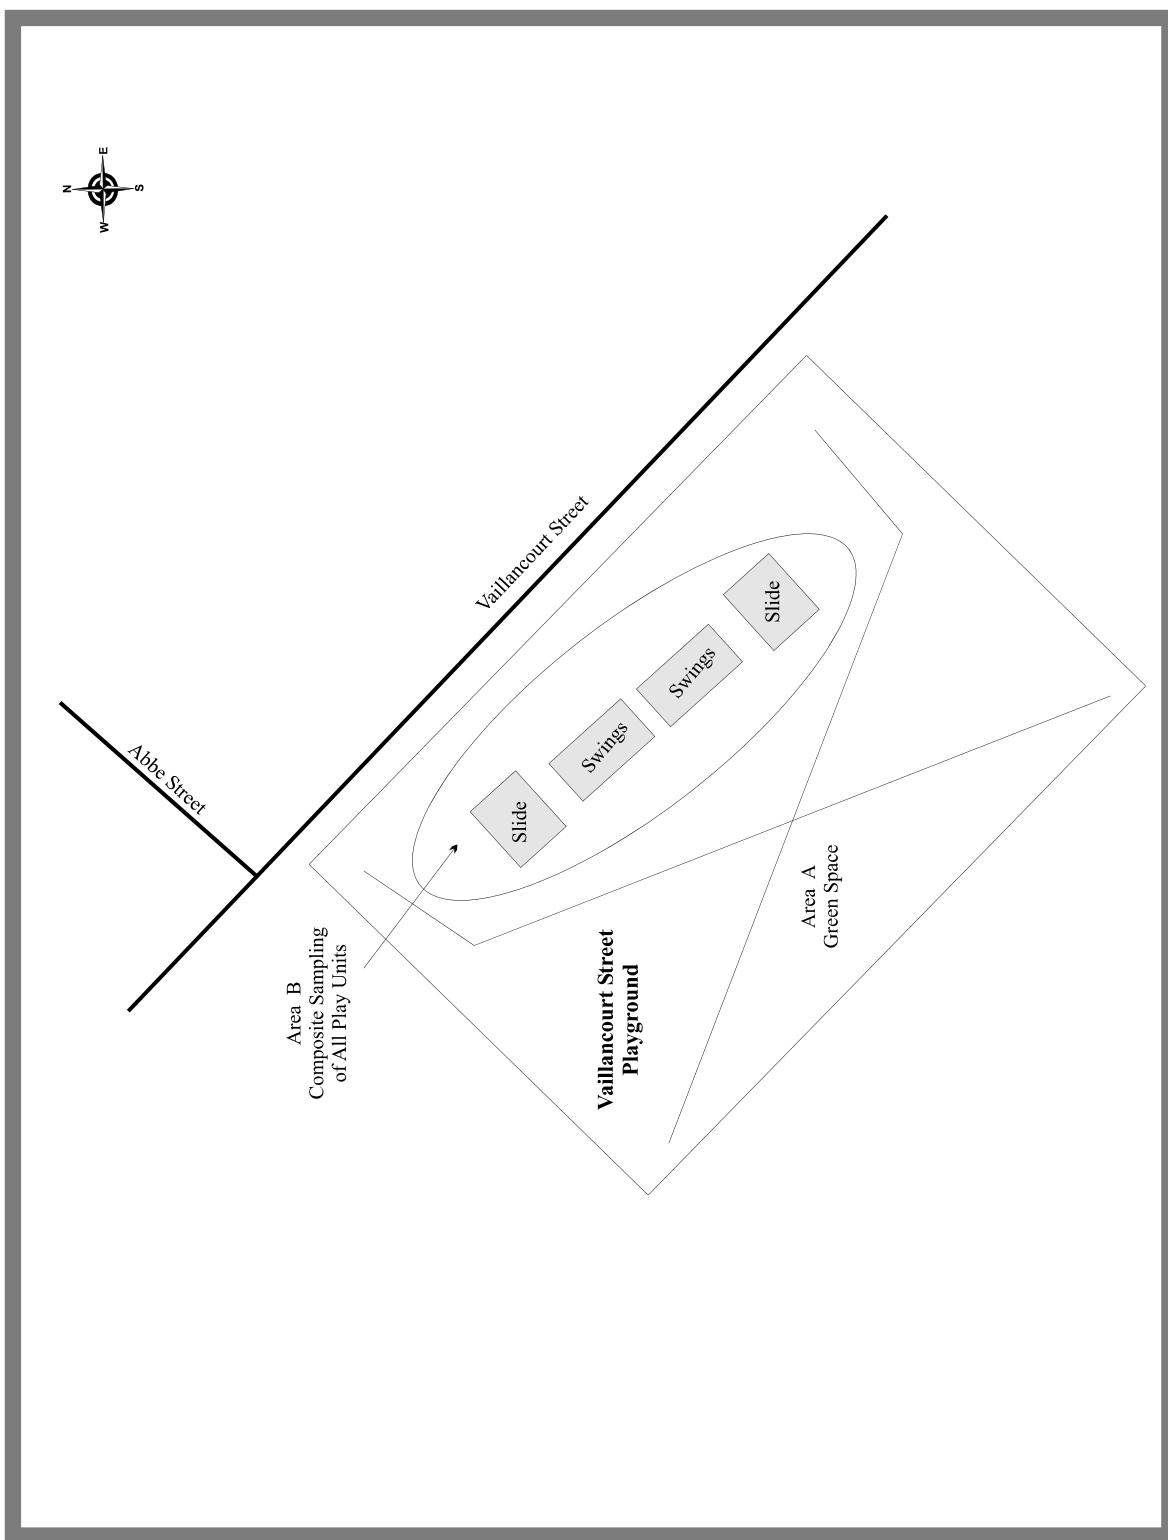

**Map C5.8.10:** Northend Playground and Playfields, Chelmsford - 2001.

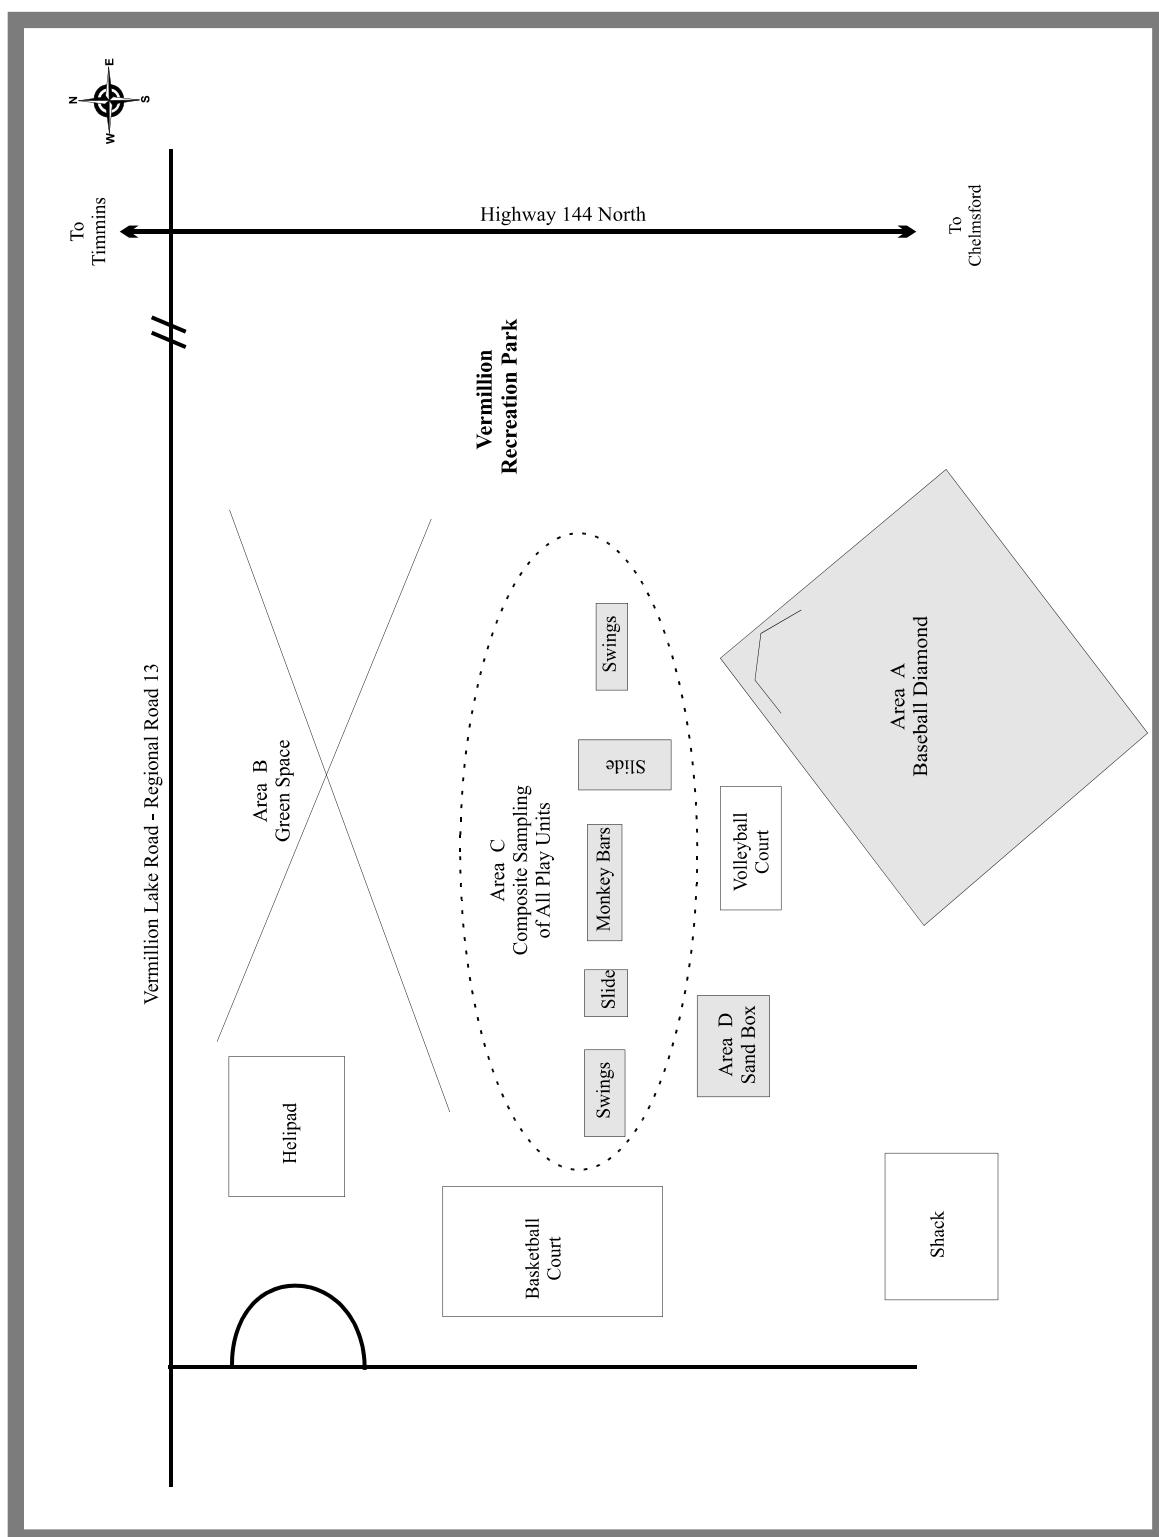

**Map C5.8.11:** Rodrigue Street Playground, Chelmsford - 2001.

**Map C5.8.12:** St. Onge Playground (Irene Crescent), Chelmsford - 2001.

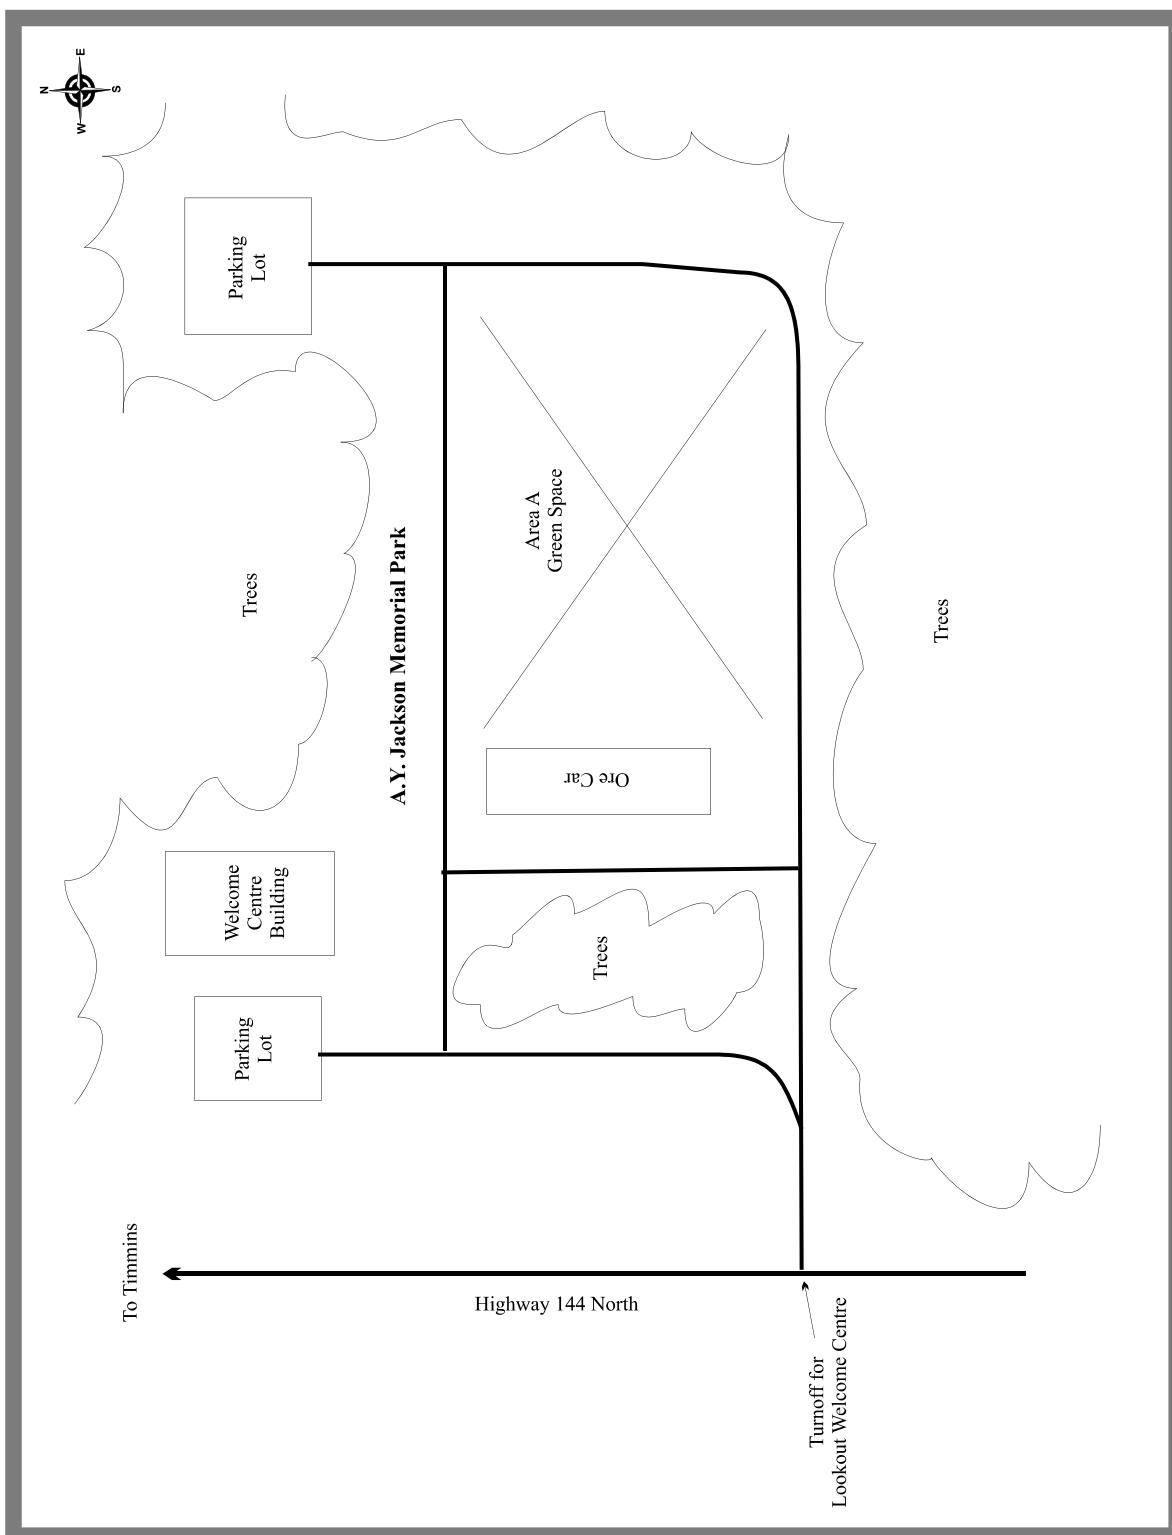

**Map C5.8.13:** Vaillancourt Street Playground, Chelmsford - 2001.

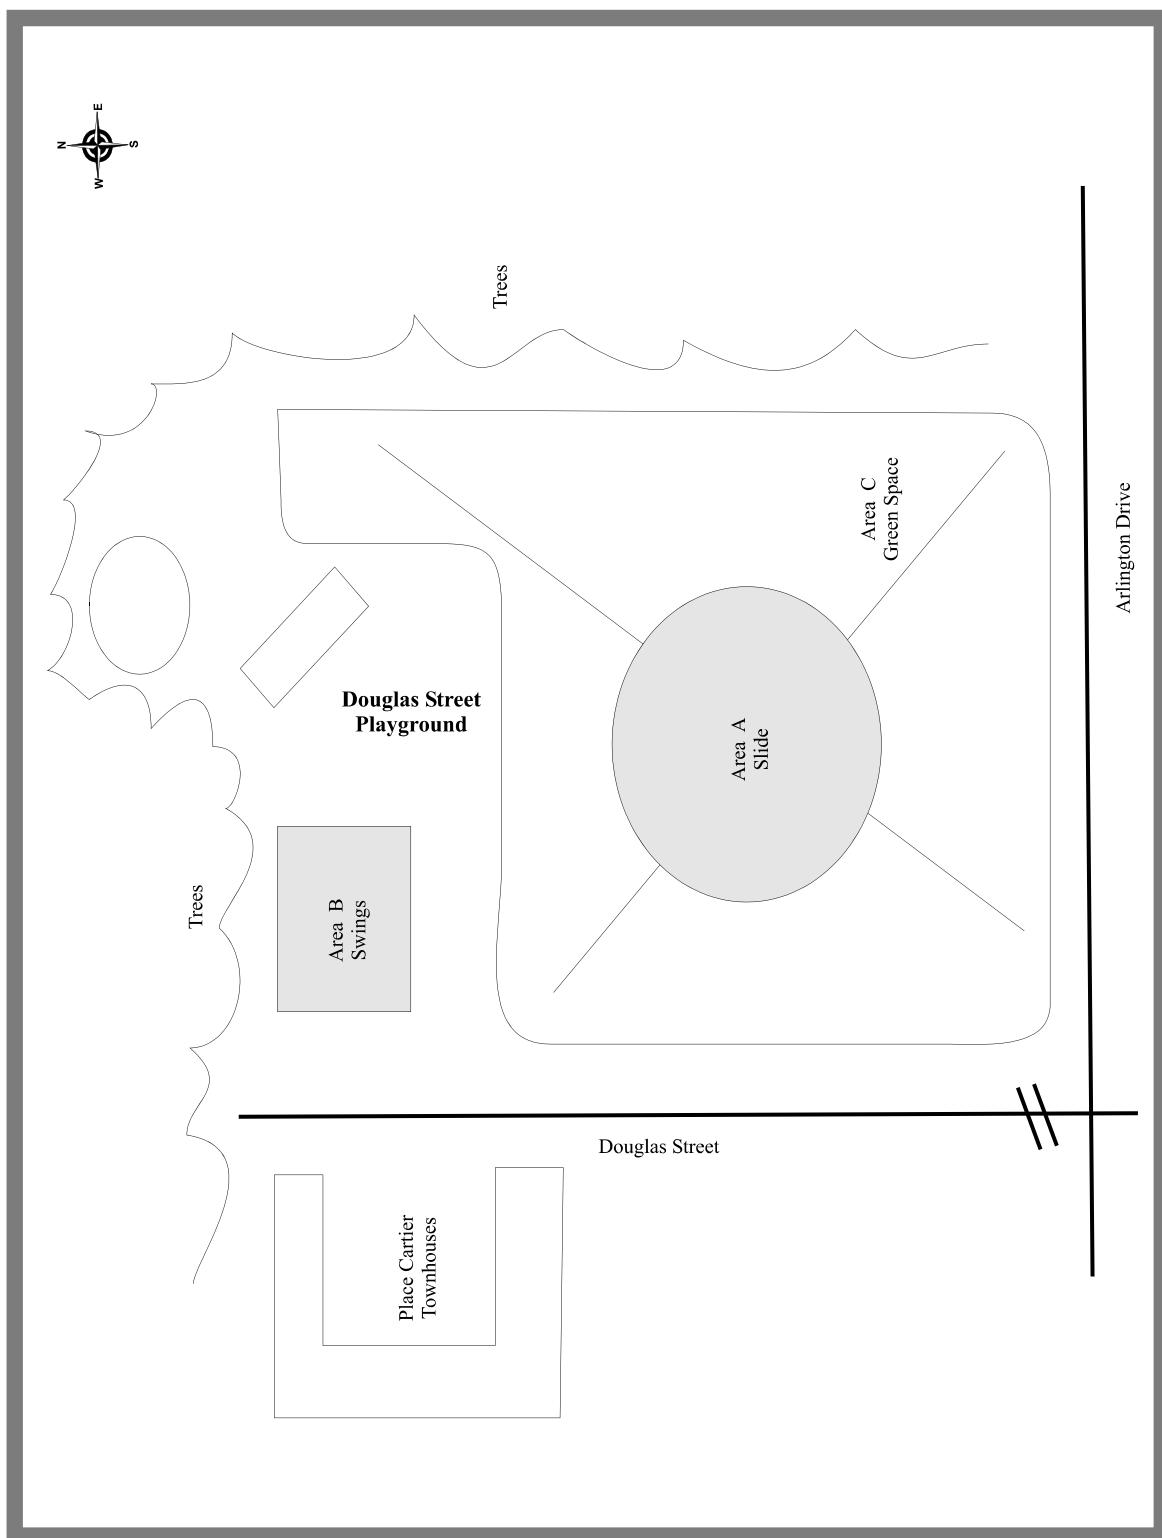

**Map C5.8.14:** Vermillion Lake Road Park, Chelmsford - 2001.

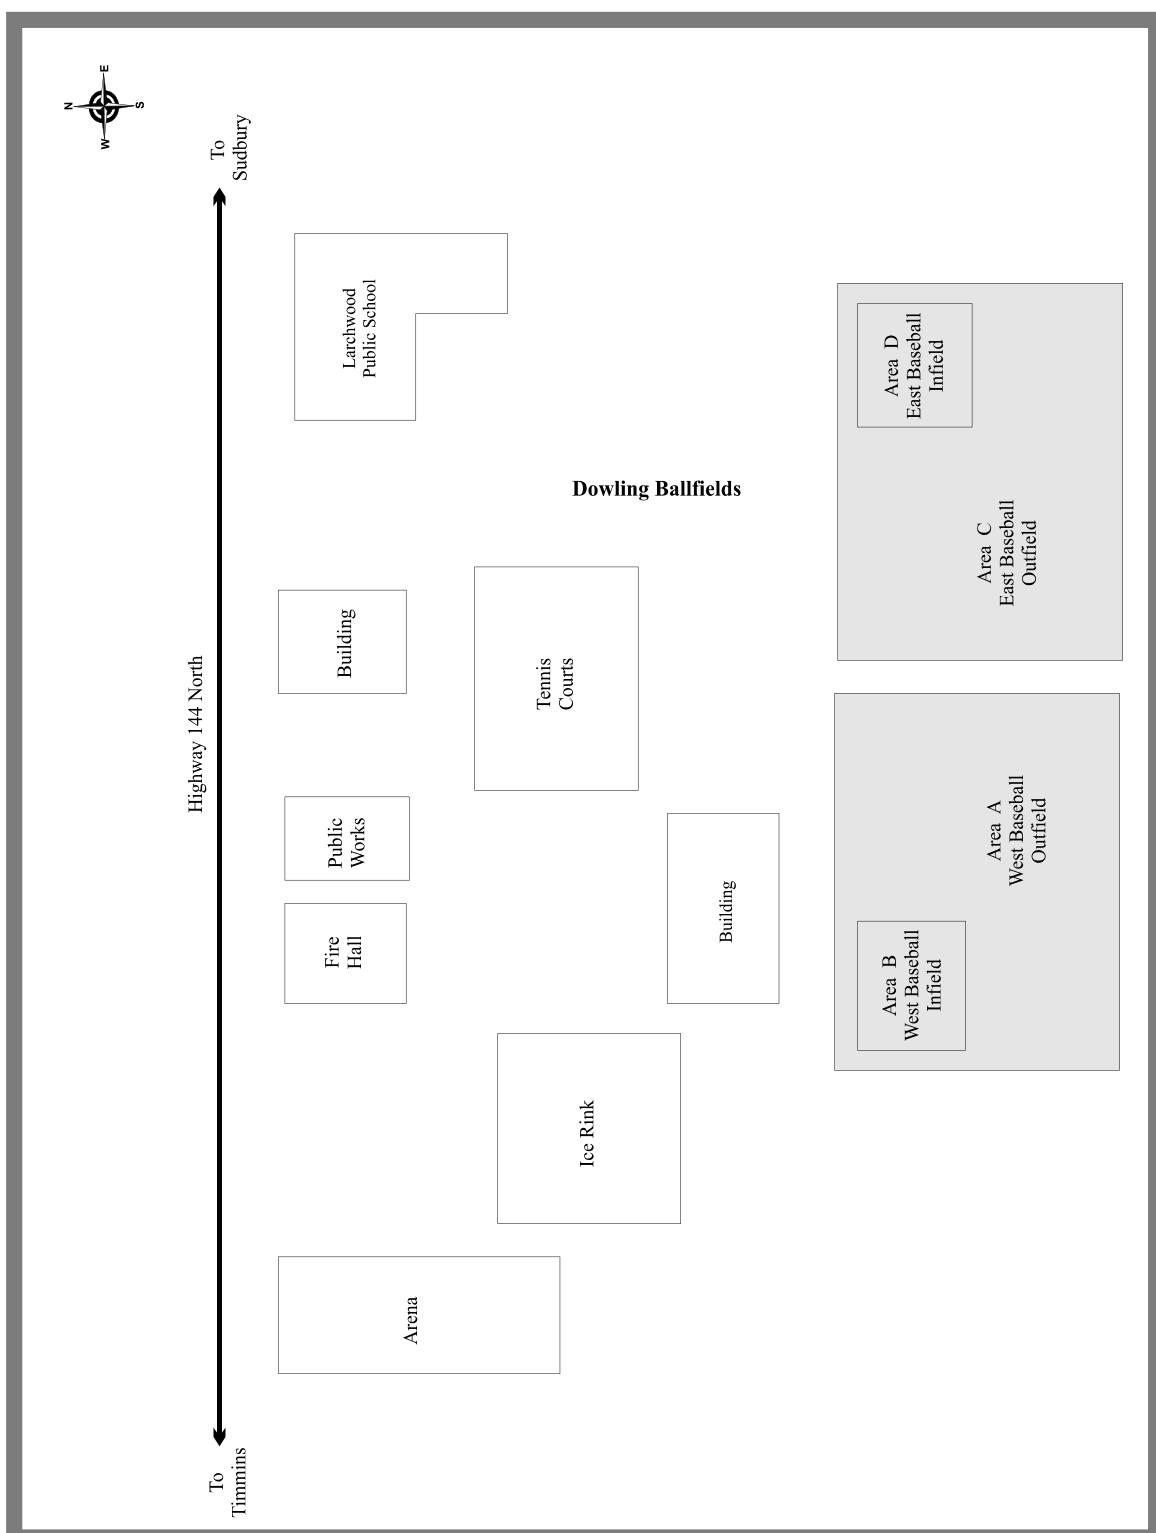

## 5.9 Dowling Park Maps

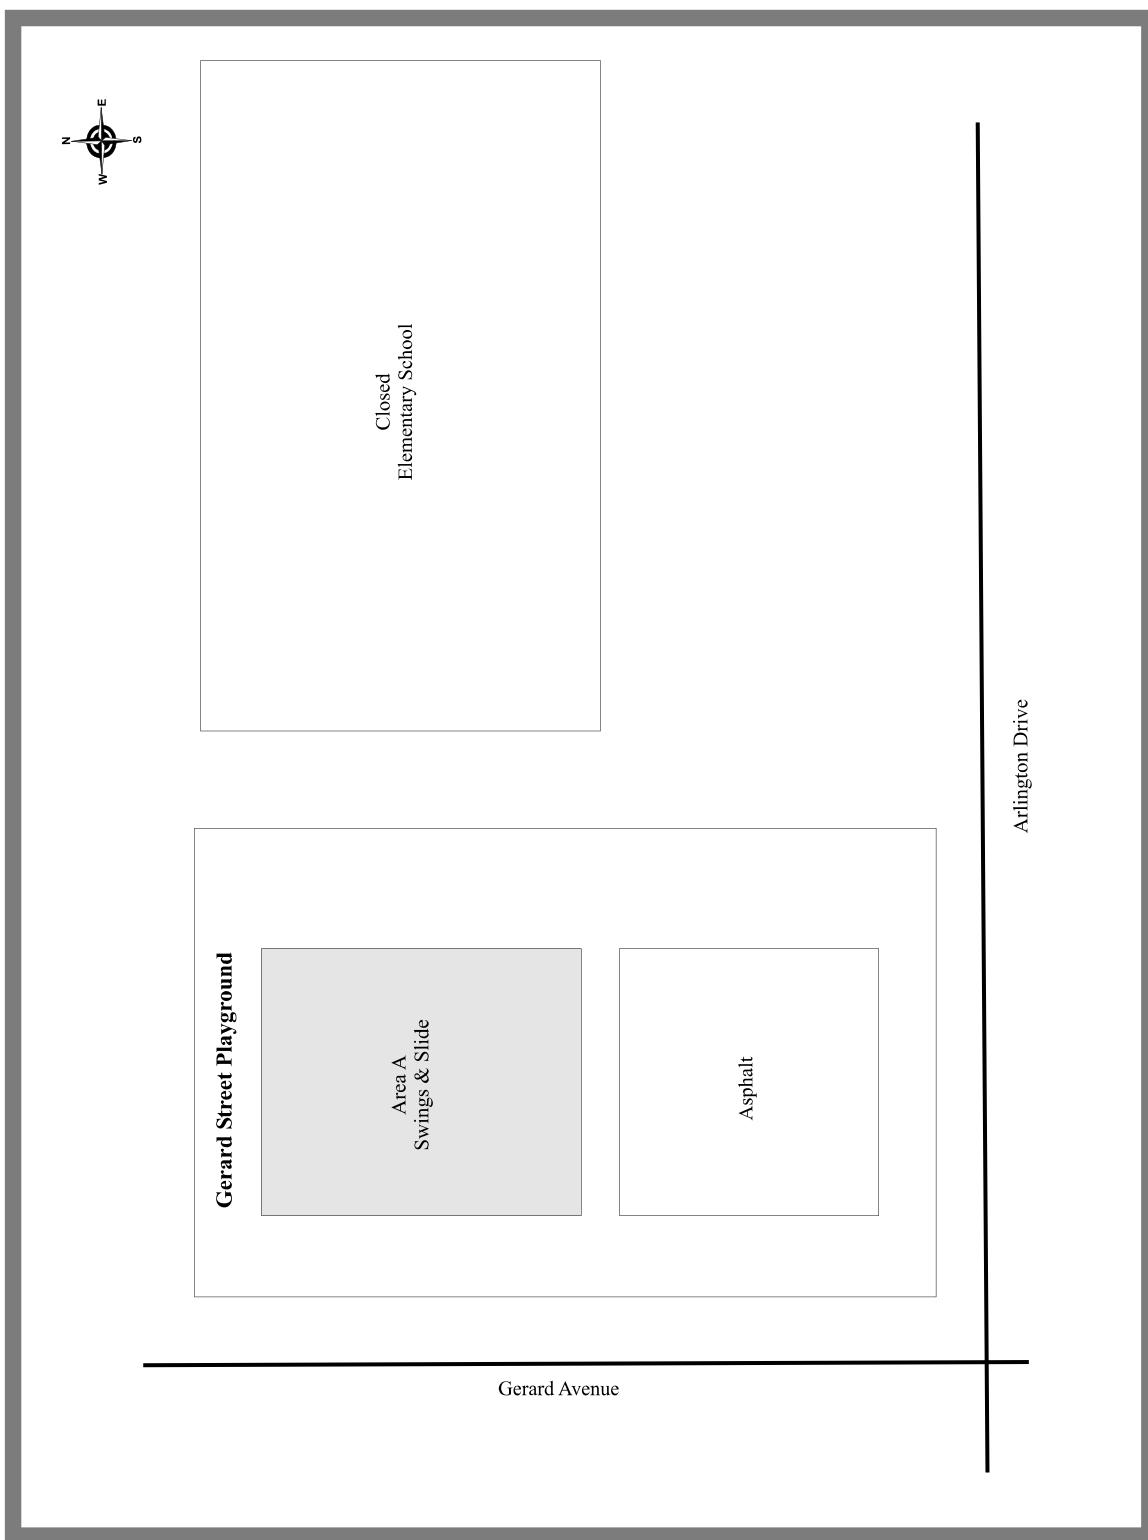

**Map C5.9.1: A.Y. Jackson Memorial Park, Dowling - 2001.**

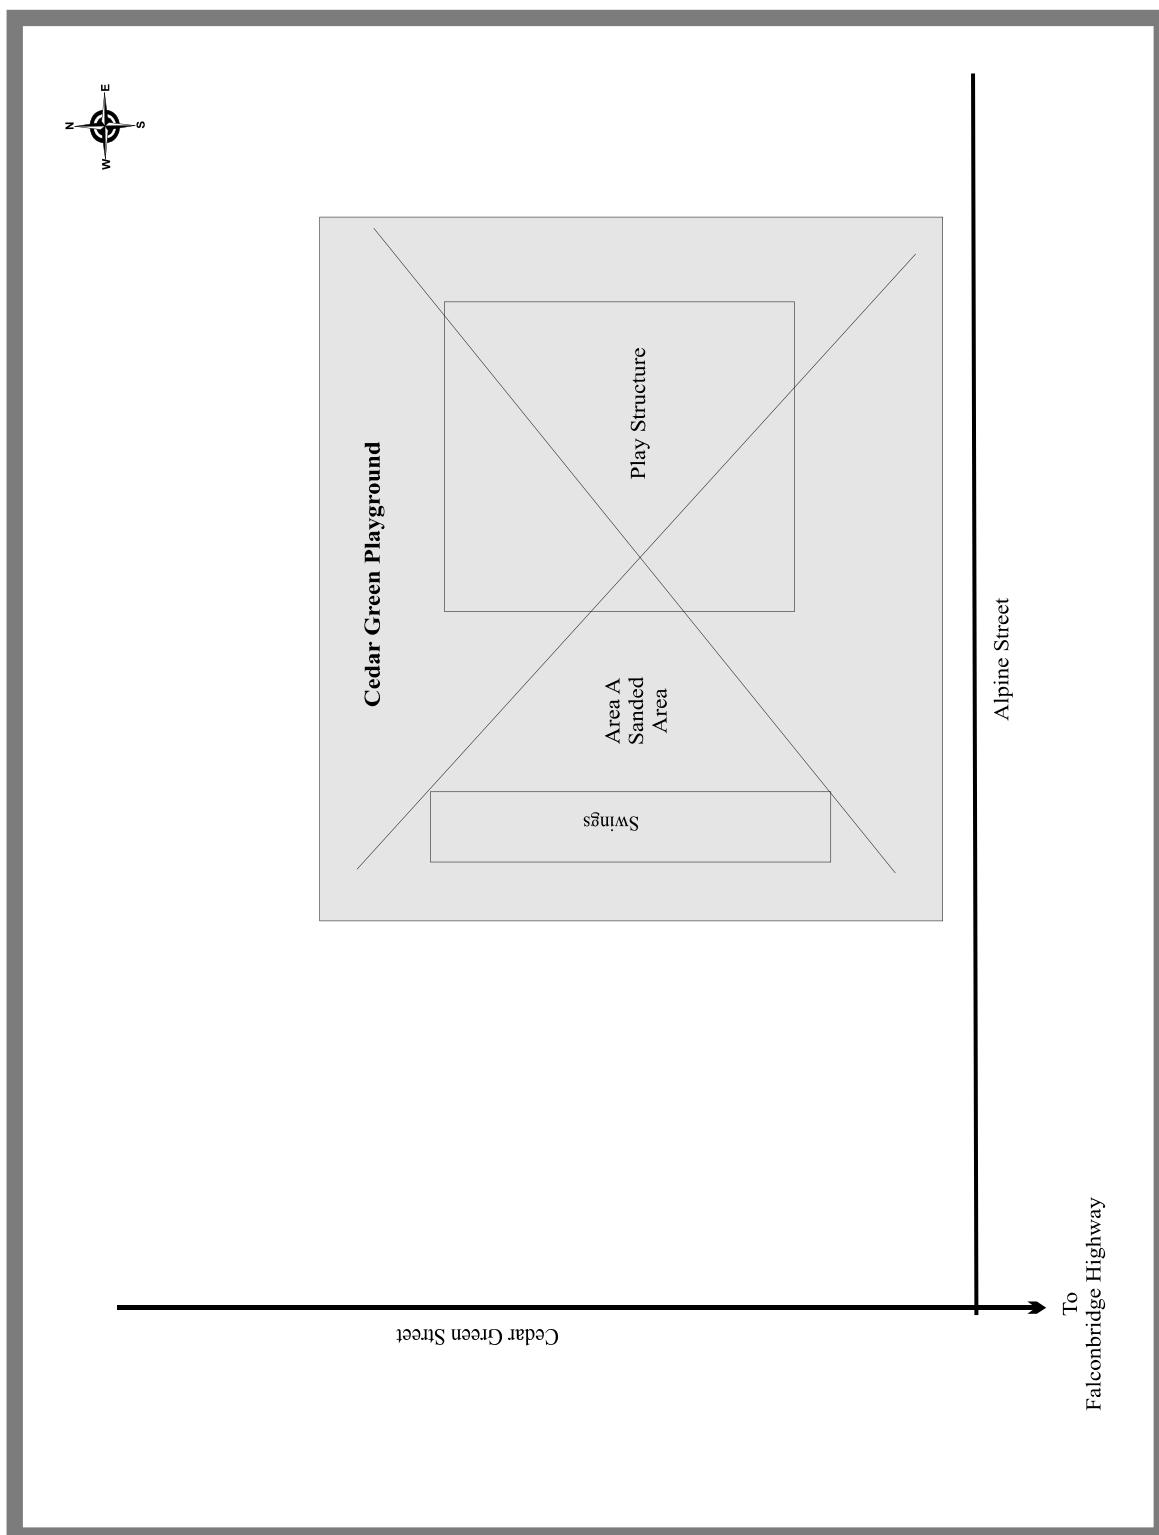

**Map C5.9.2:** Douglas Street Playground, Dowling - 2001.

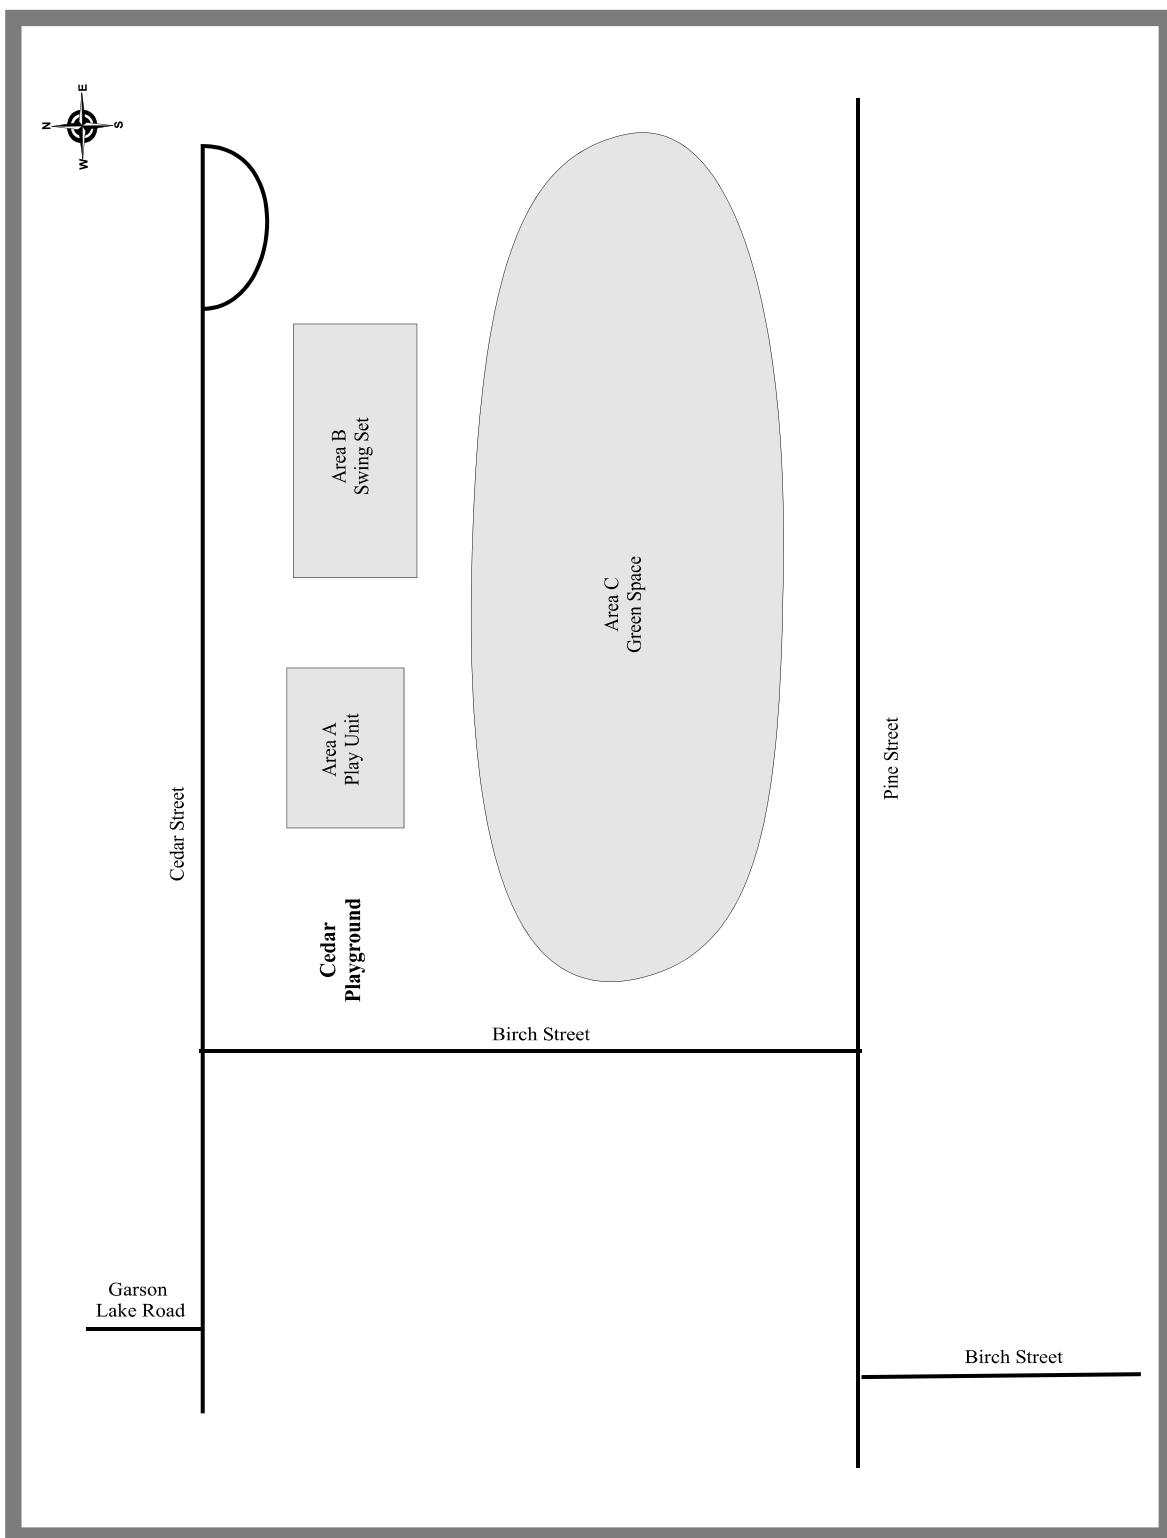

**Map C5.9.3: Dowling Ballfields, Dowling - 2001.**

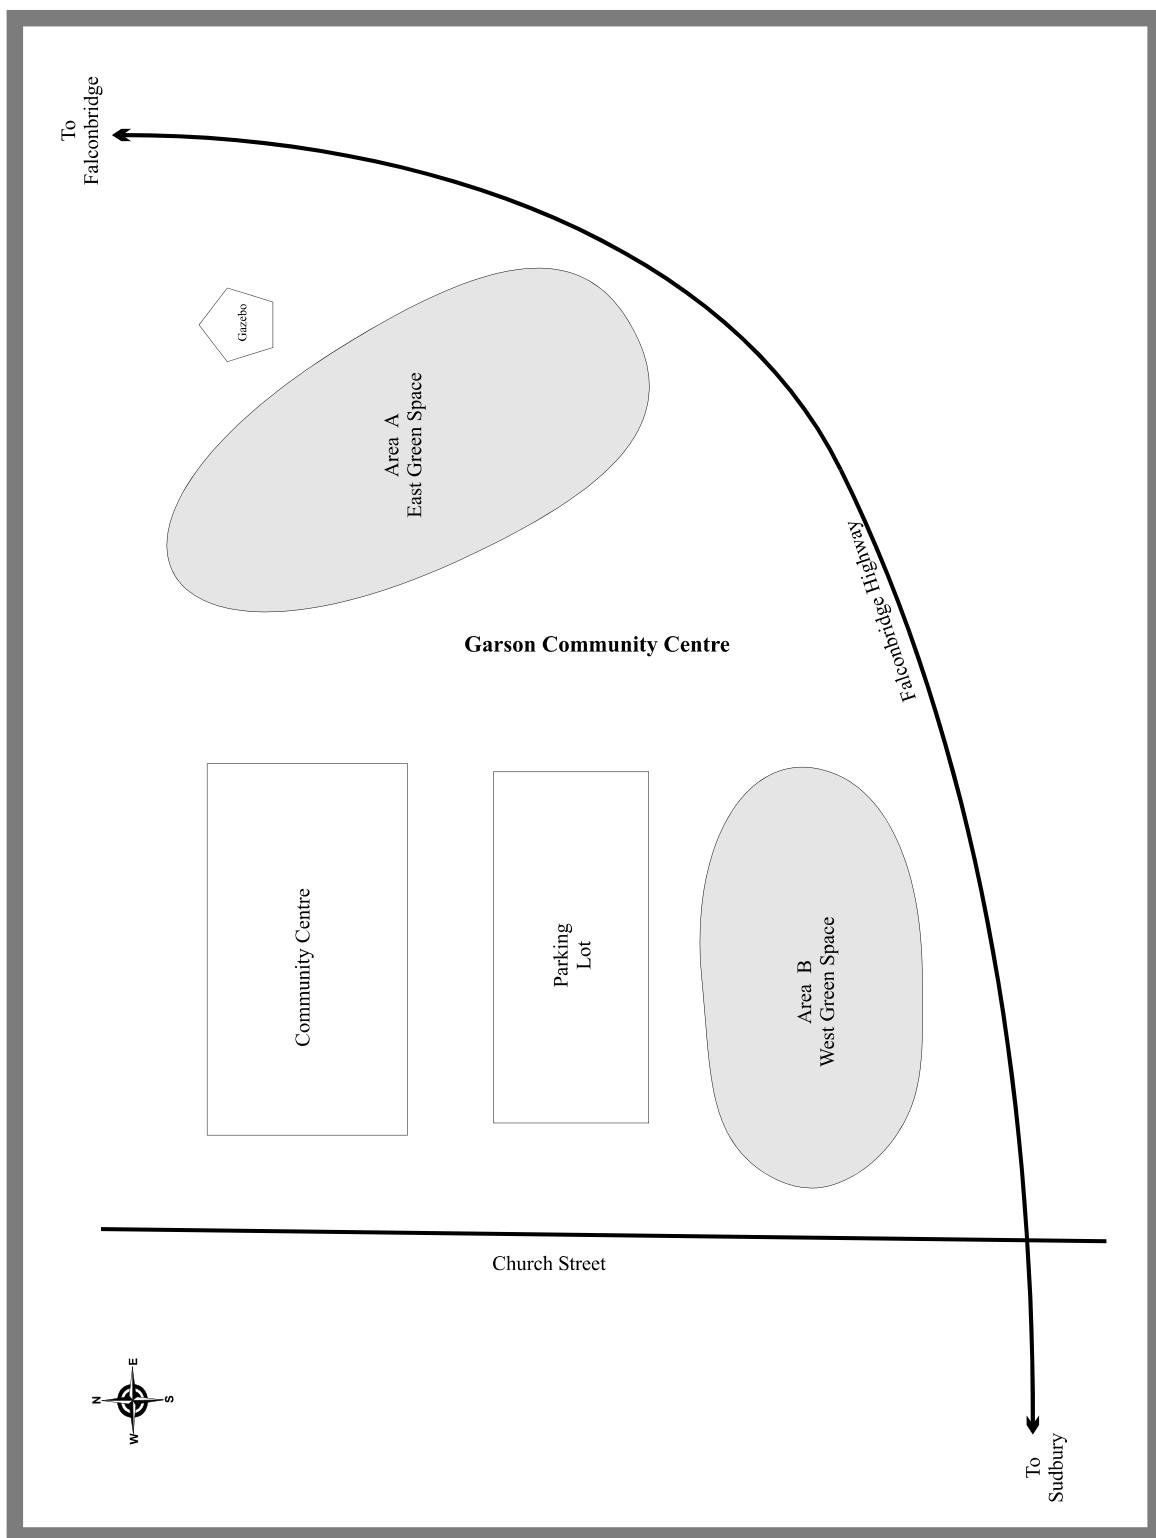

## 5.10 Garson Park Maps

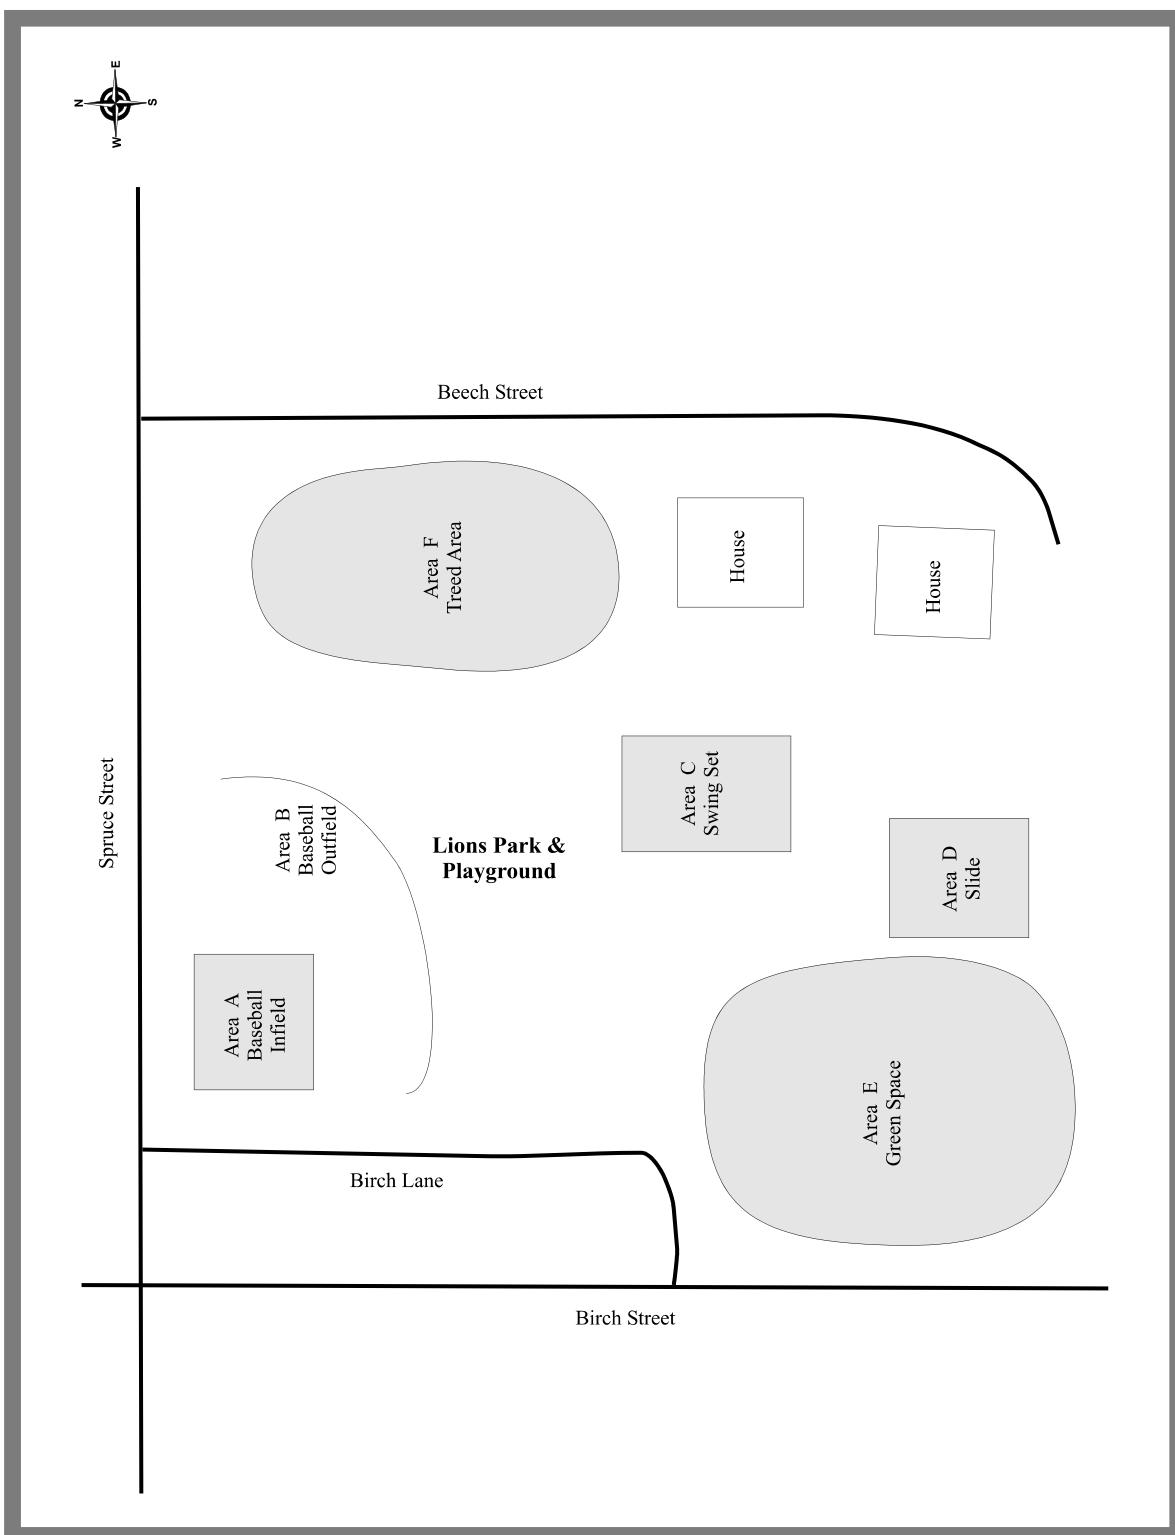

**Map C5.10.1:** Cedar Green Playground, Garson - 2001.

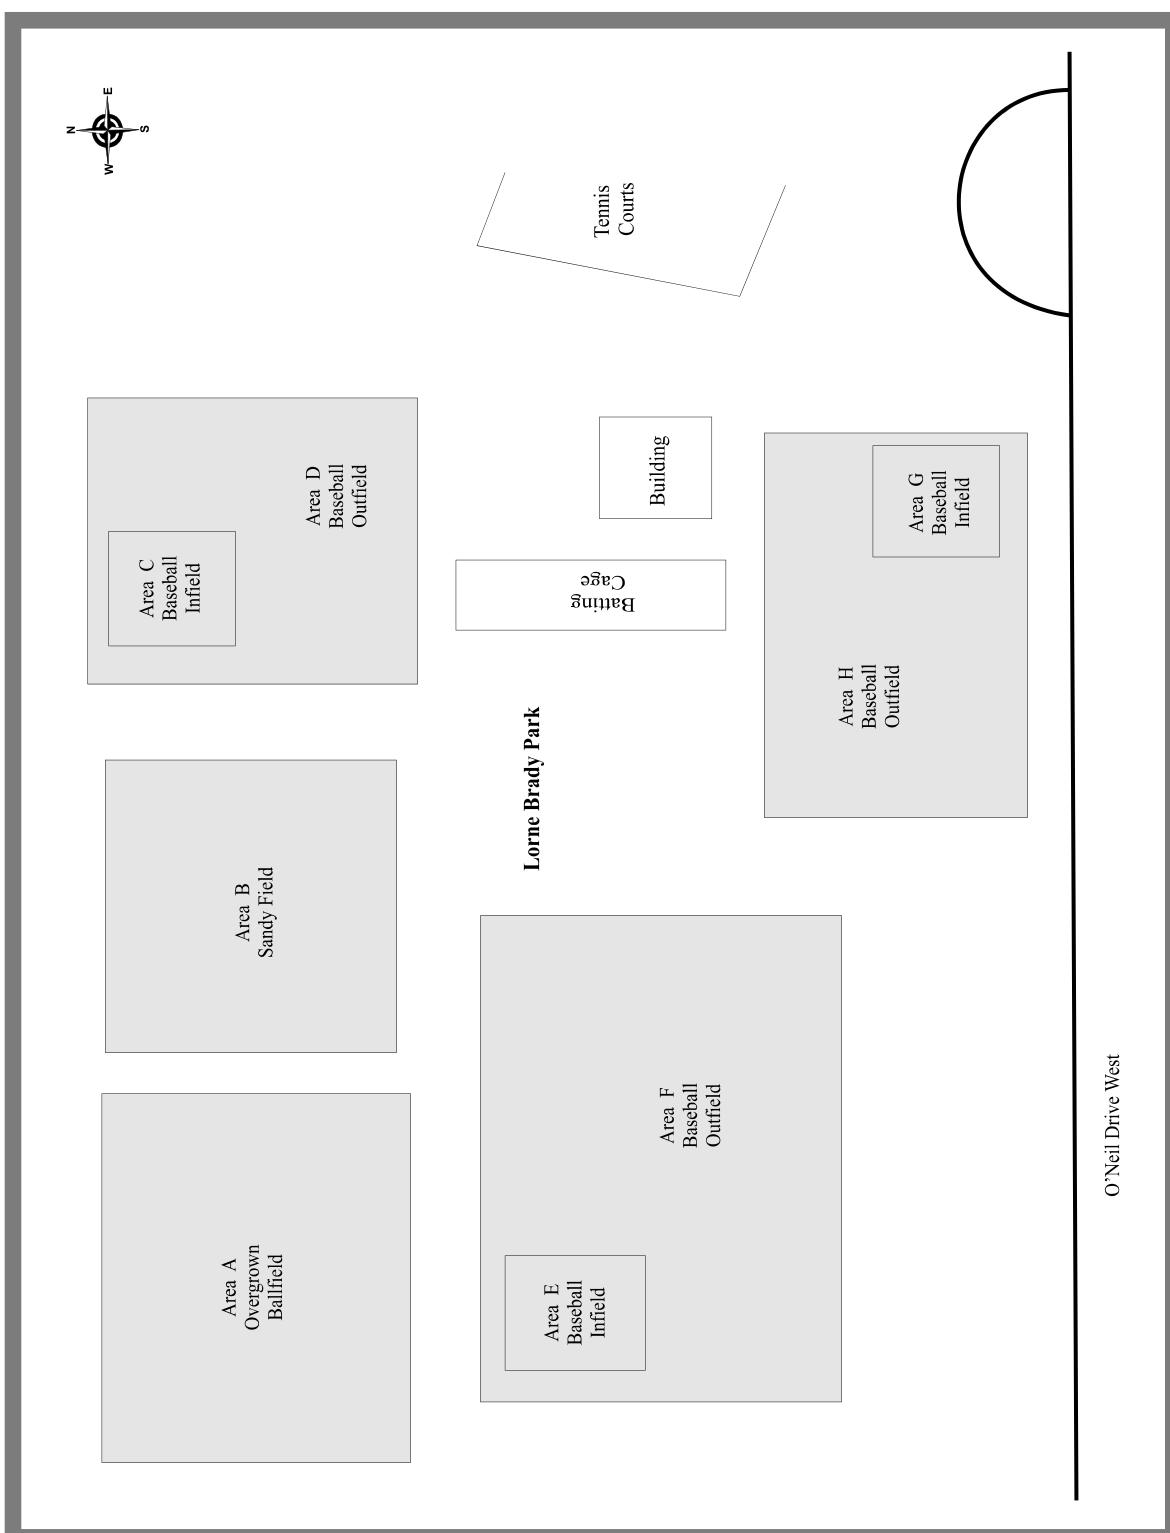

**Map C5.10.2:** Cedar Playground, Garson - 2001.

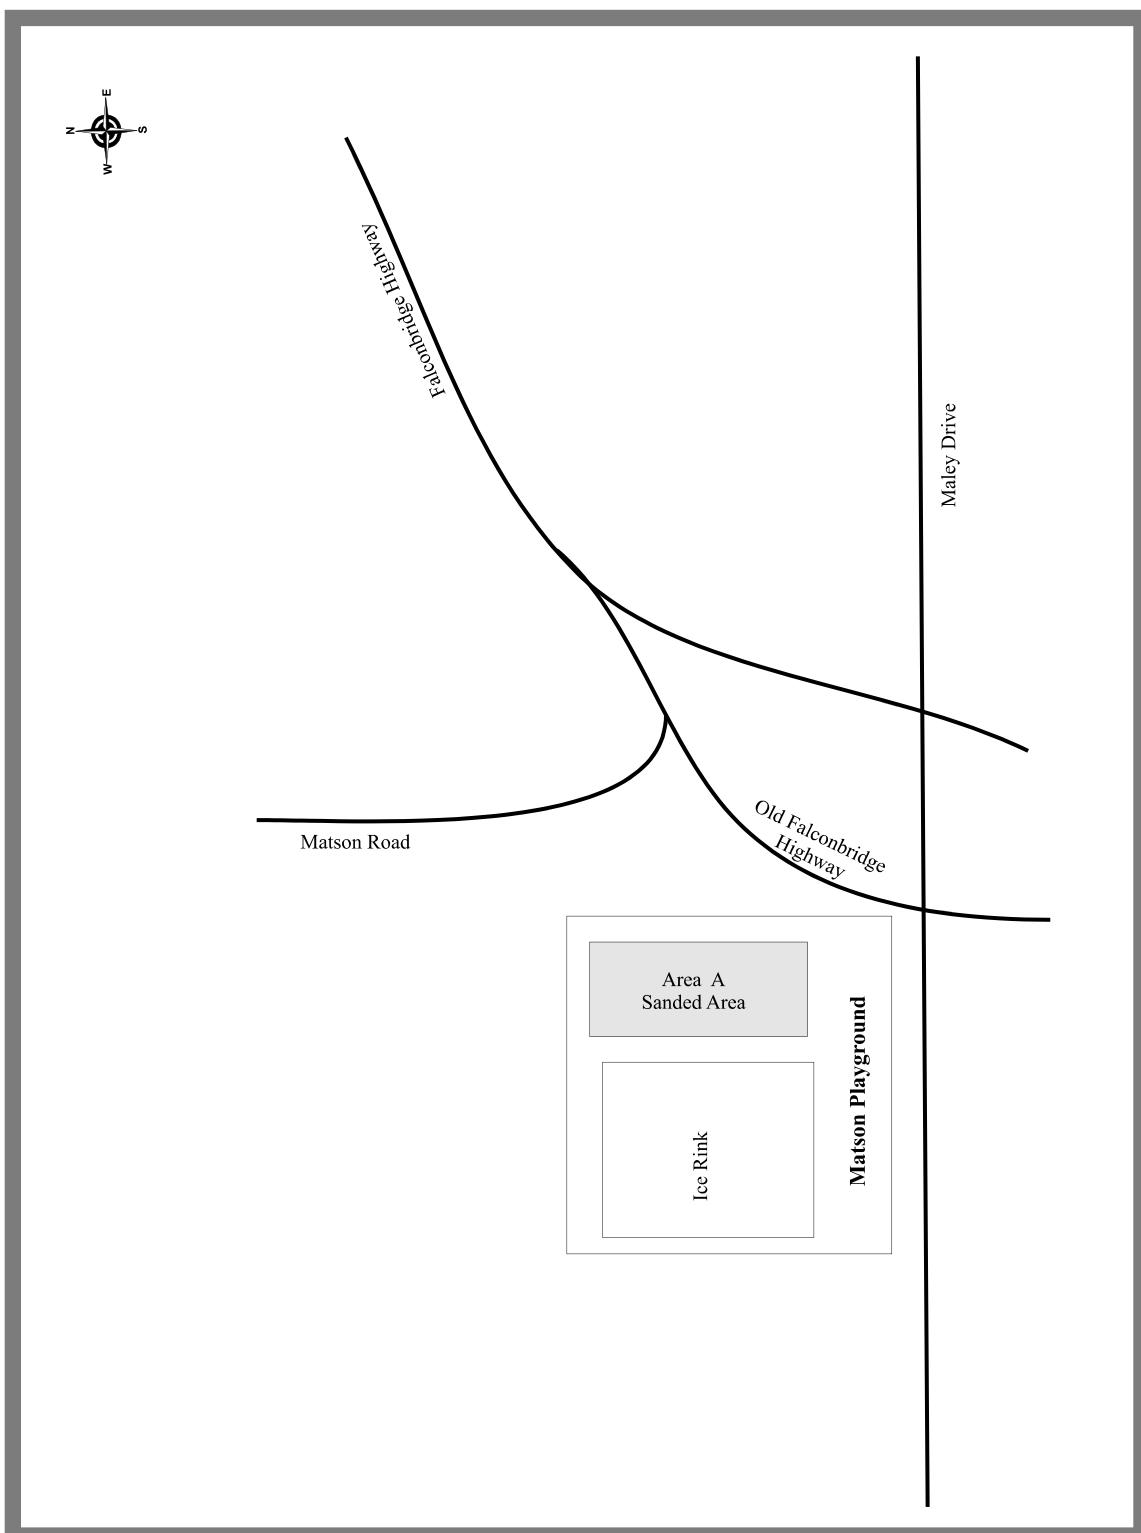

**Map C5.10.3:** Garson Community Centre, Garson - 2001.

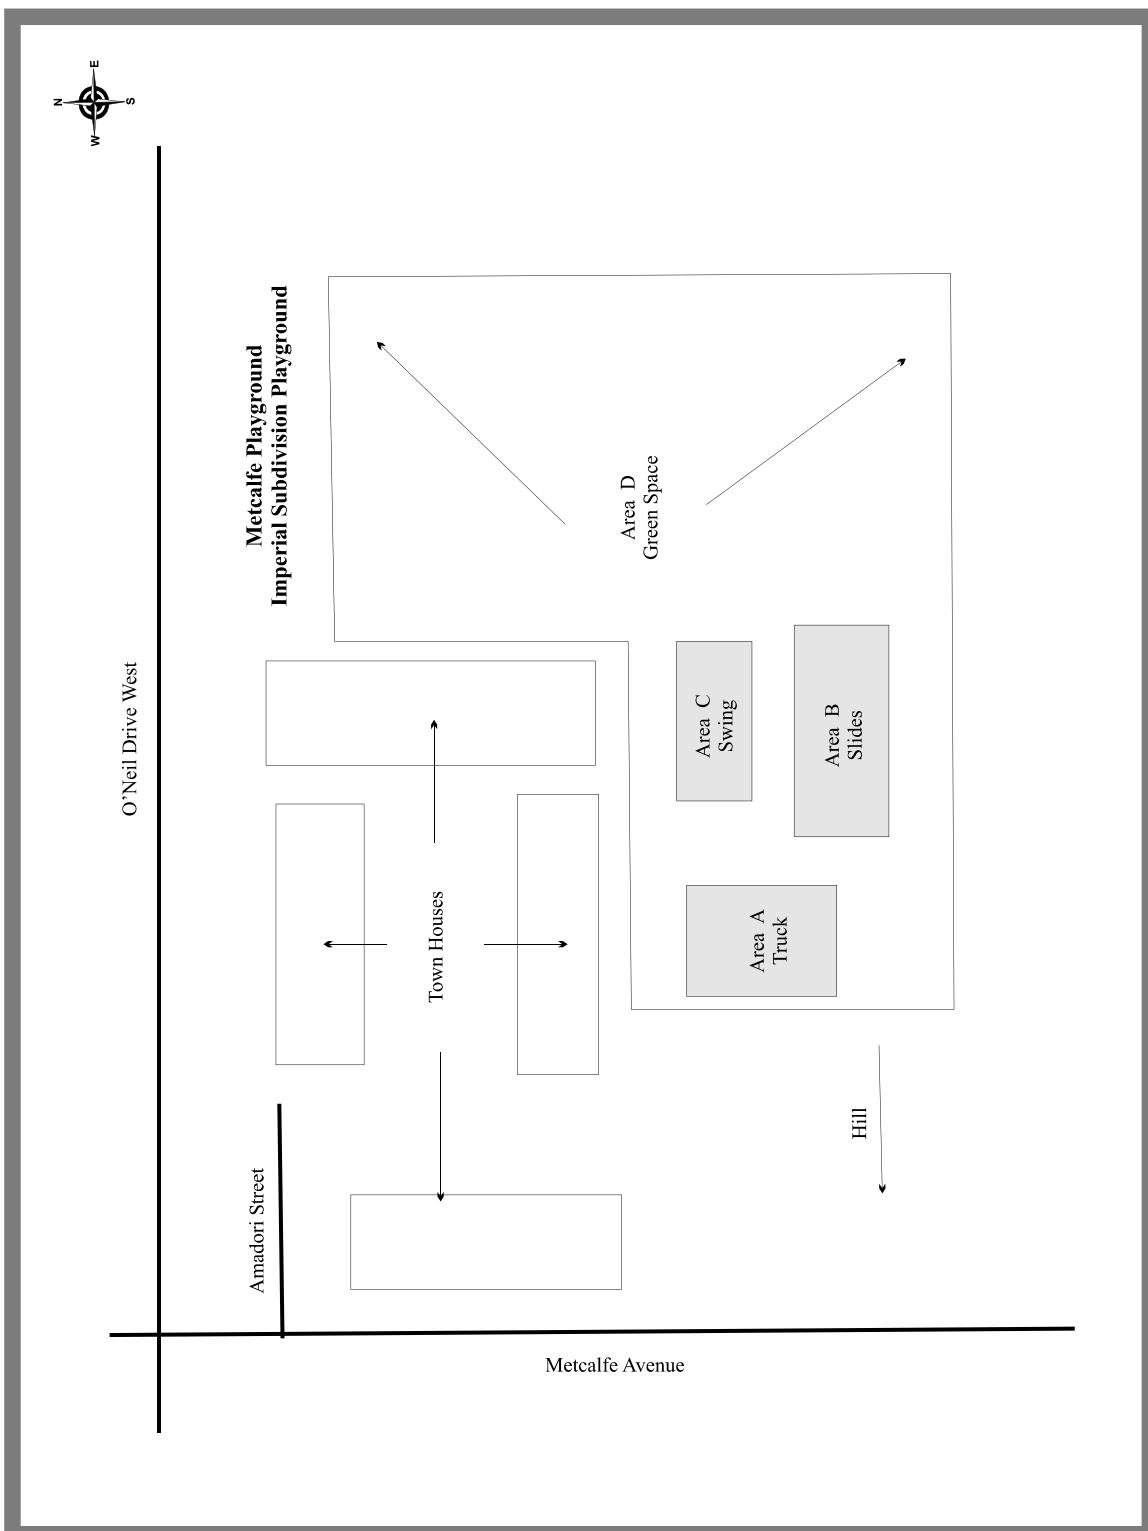

**Map C5.10.4:** Lion's Park & Playground, Garson - 2001.

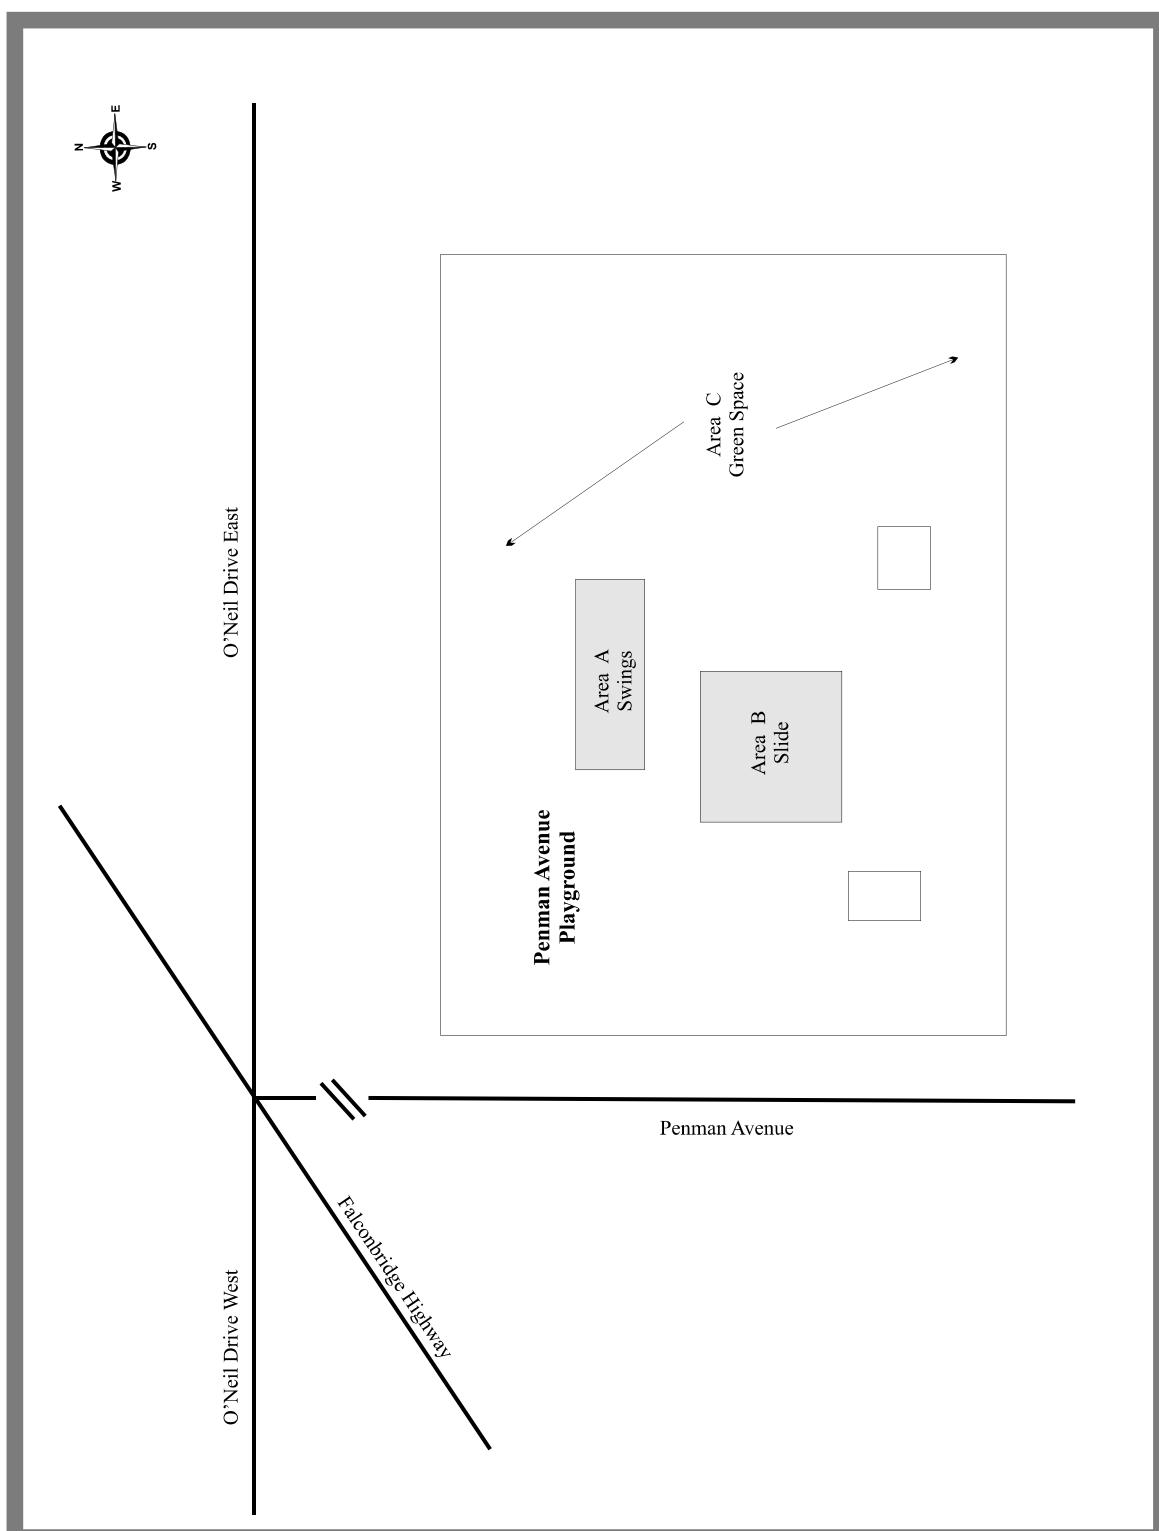

**Map C5.10.5:** Lorne Brady Park, Garson - 2001.

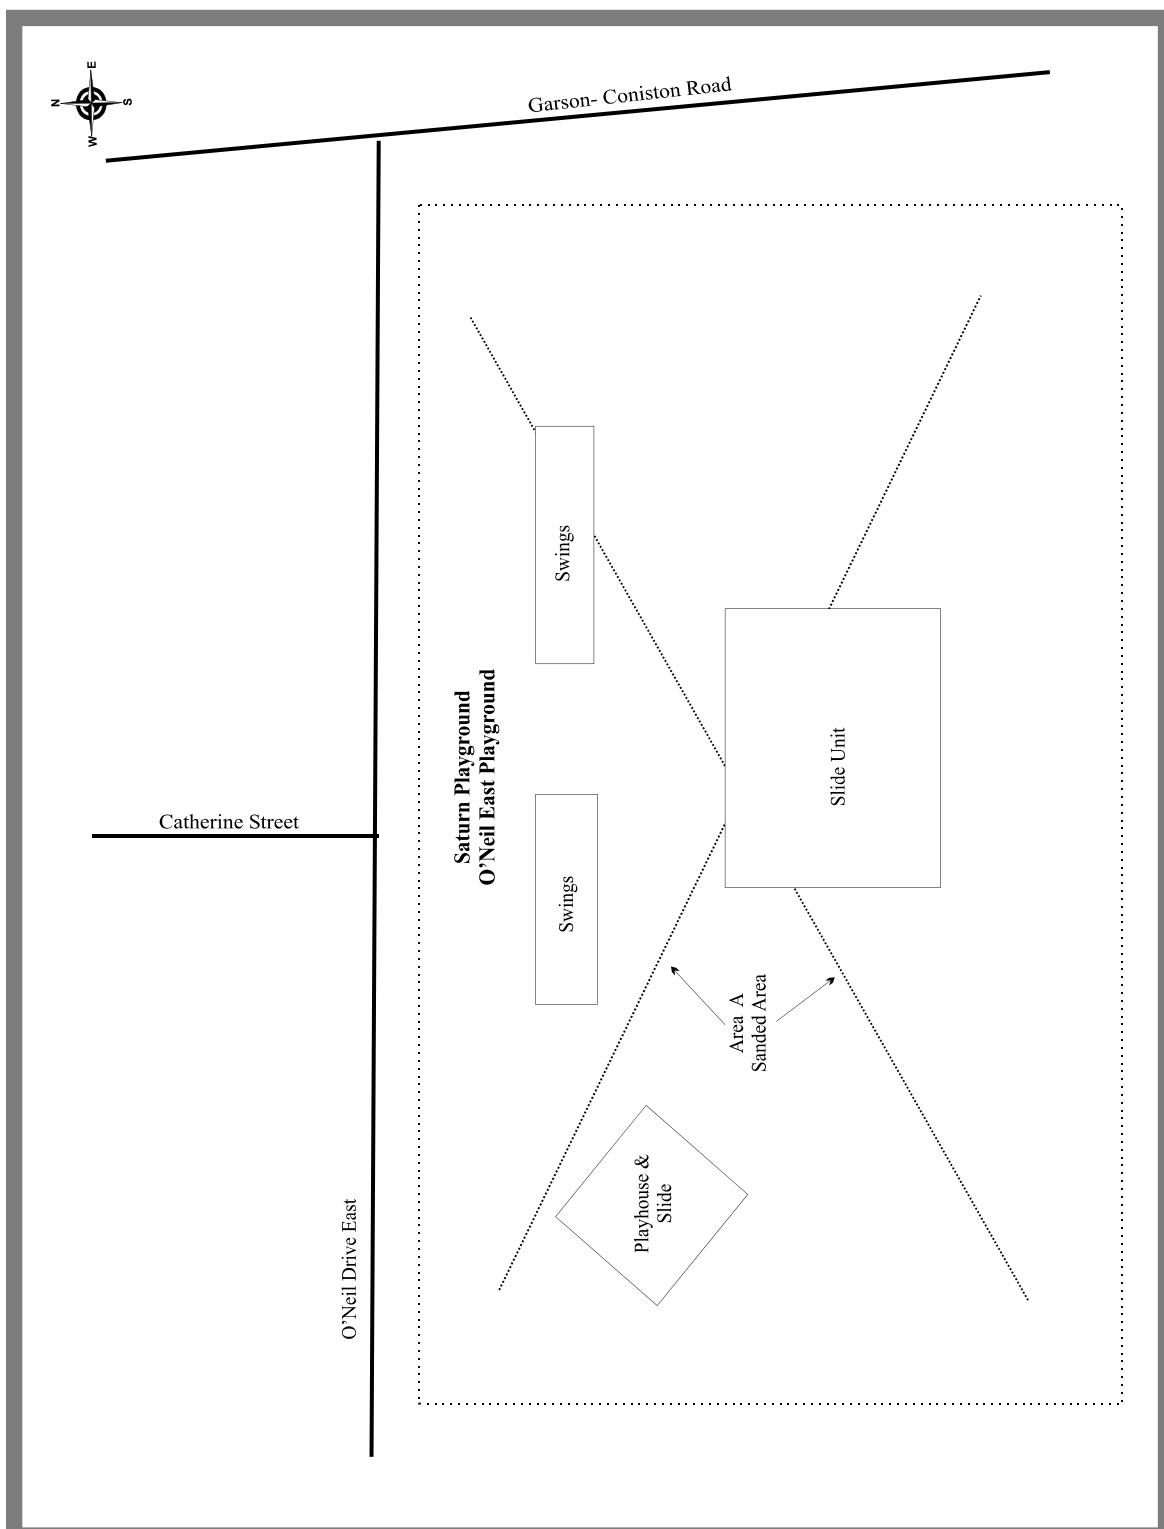

**Map C5.10.6:** Matson Playground, Garson - 2001.

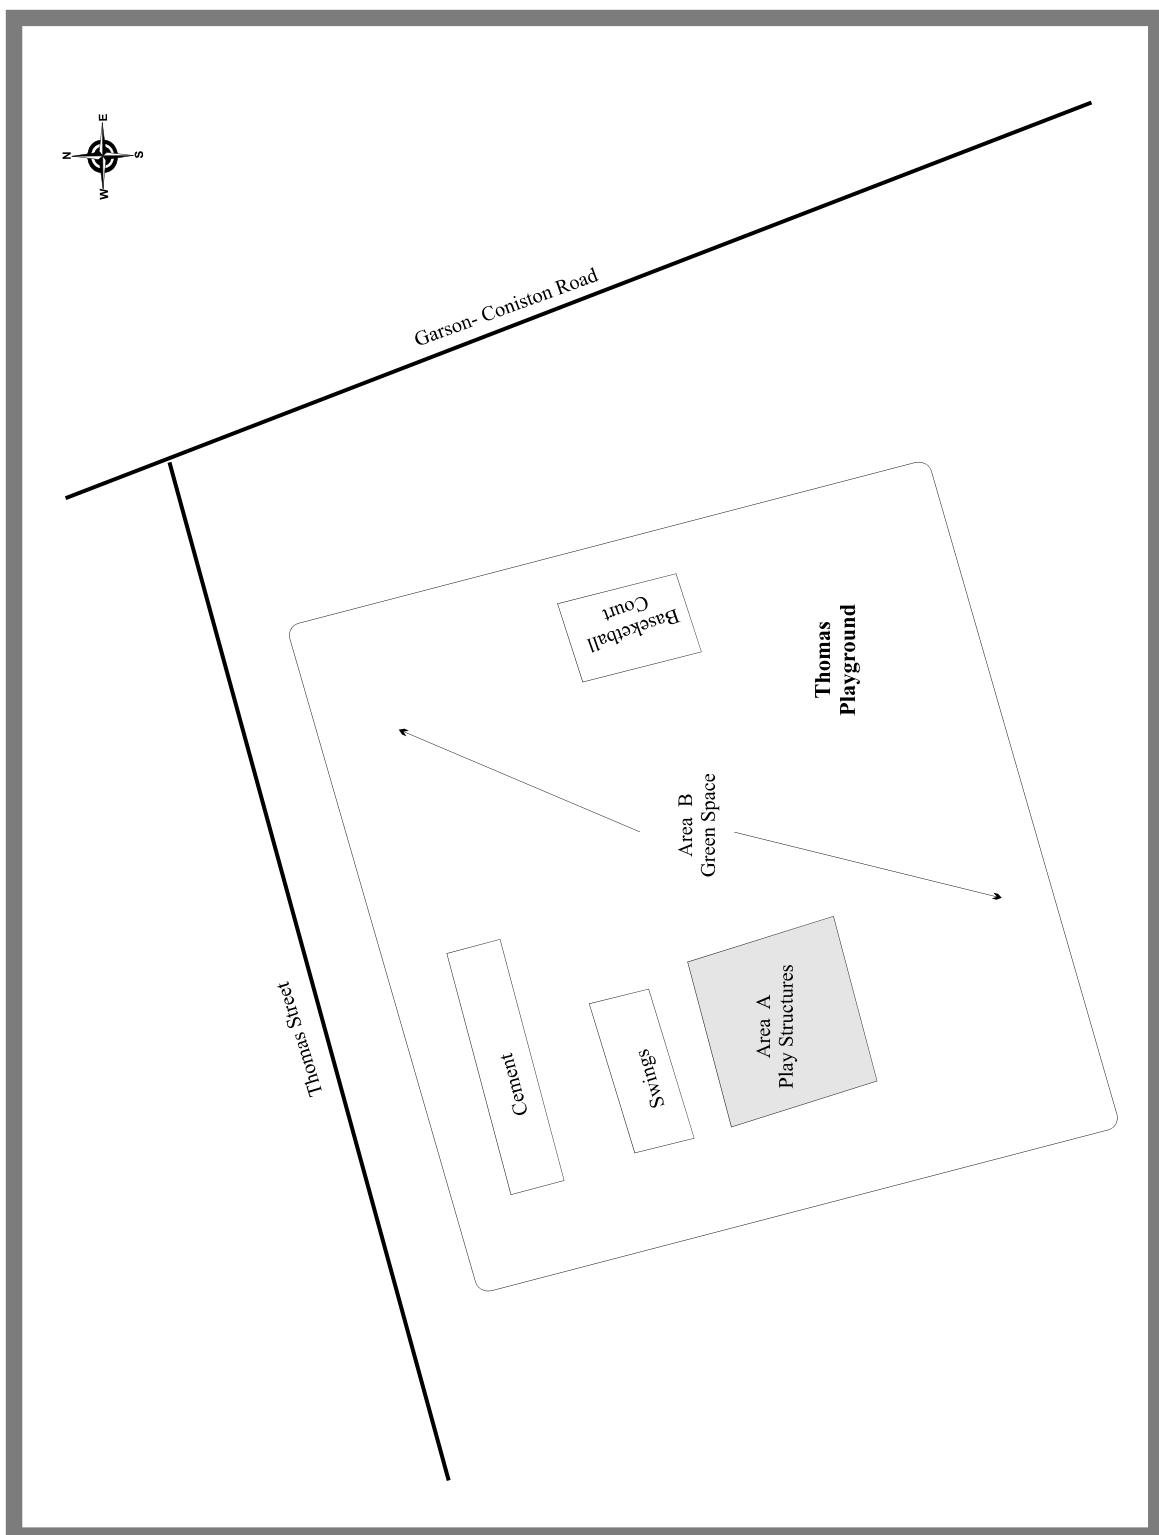

**Map C5.10.7:** Metcalfe Playground (Imperial Subdivision Playground), Garson - 2001.

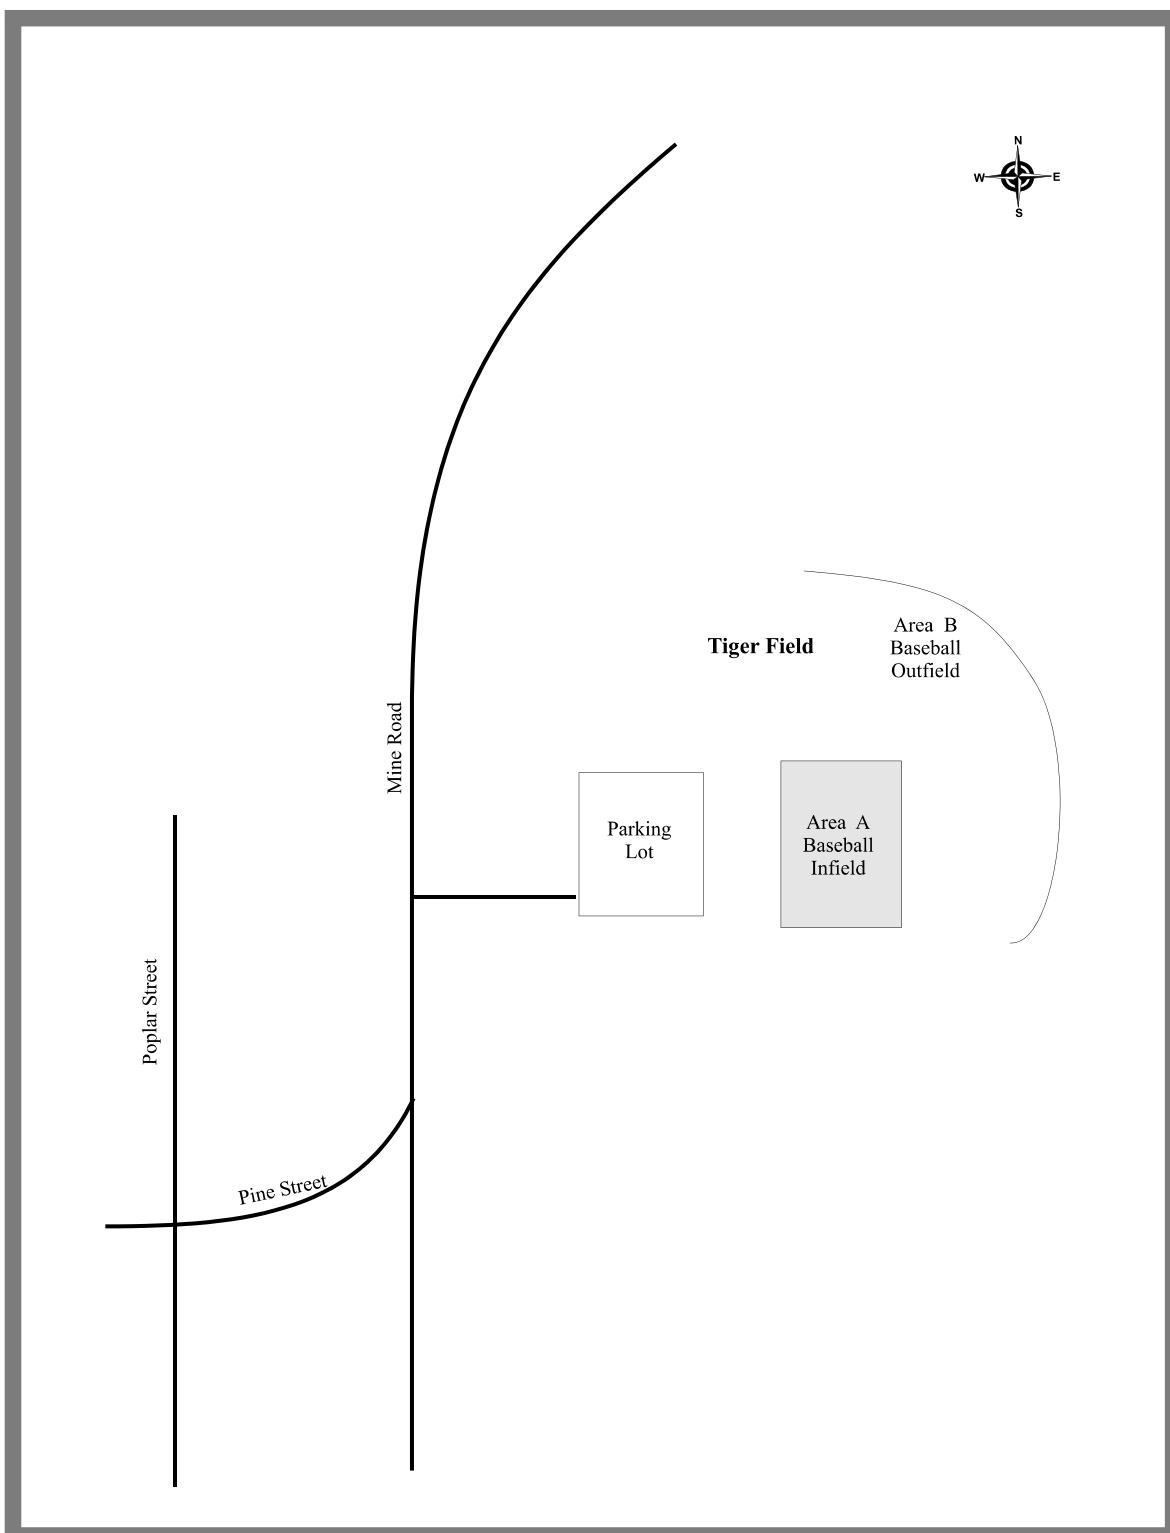

**Map C5.10.8:** Penman Avenue Playground, Garson - 2001.

**Map C5.10.9:** Saturn Playground, Garson - 2001.

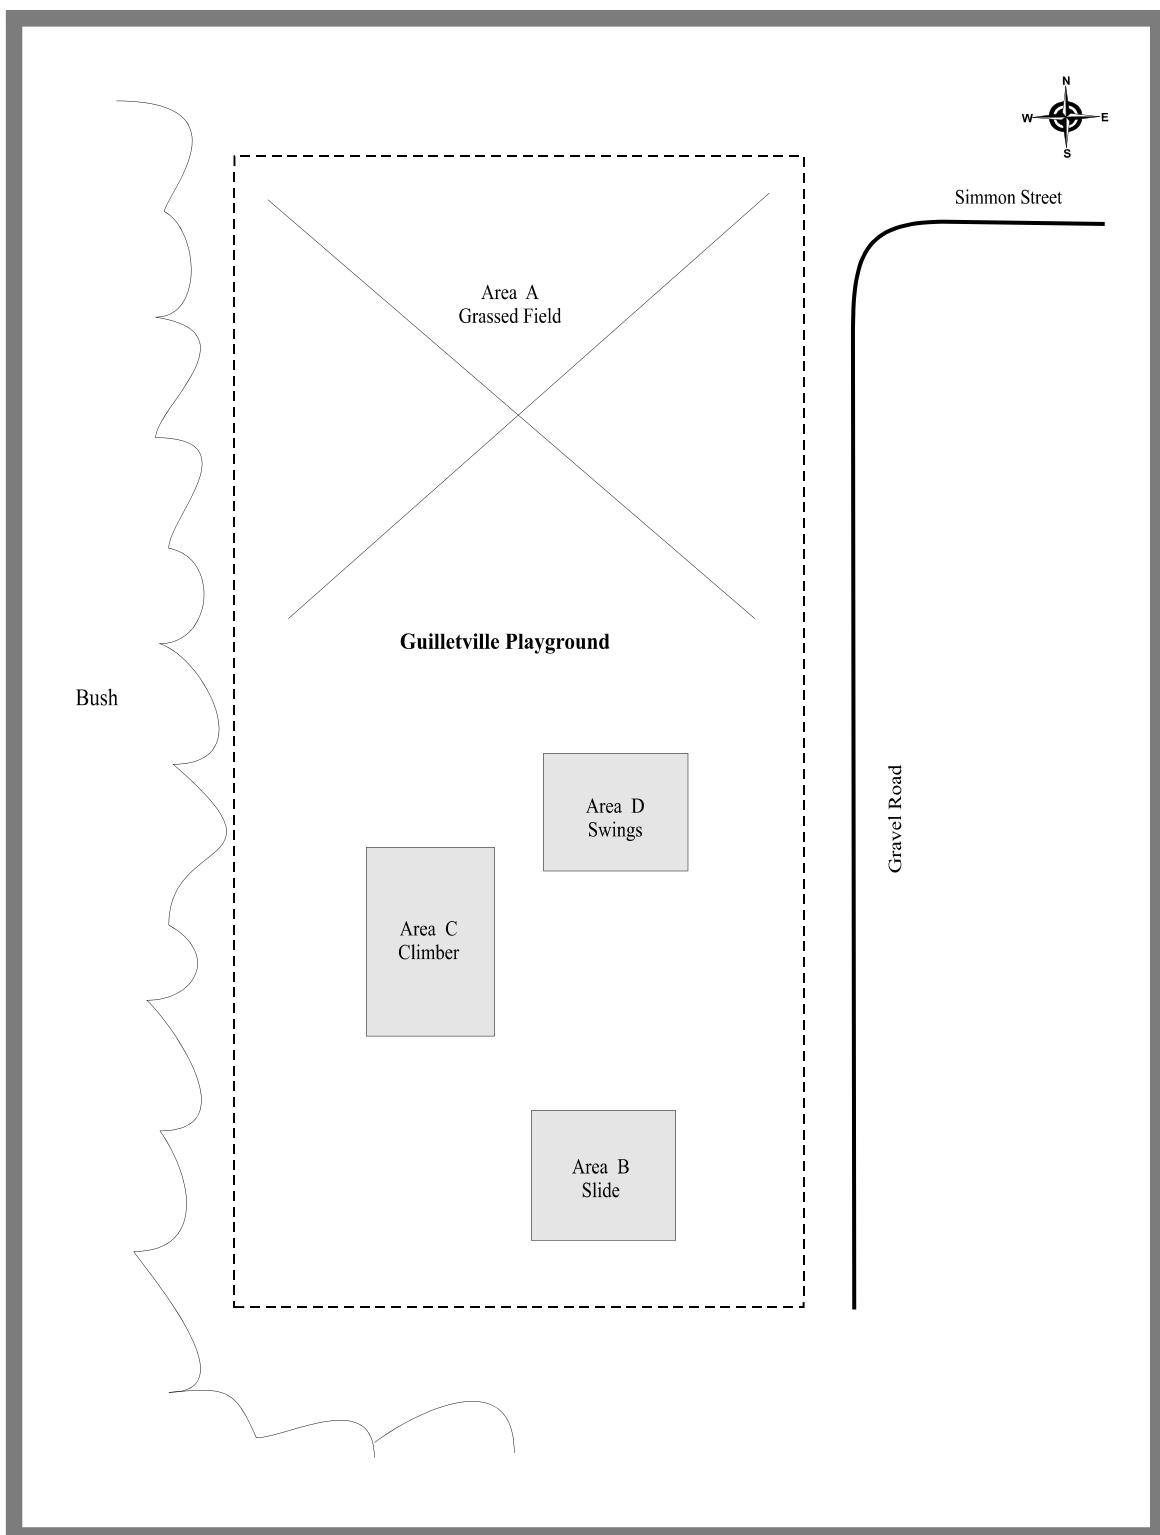

**Map C5.10.10:** Thomas Street Playground Tot Lot, Garson - 2001.

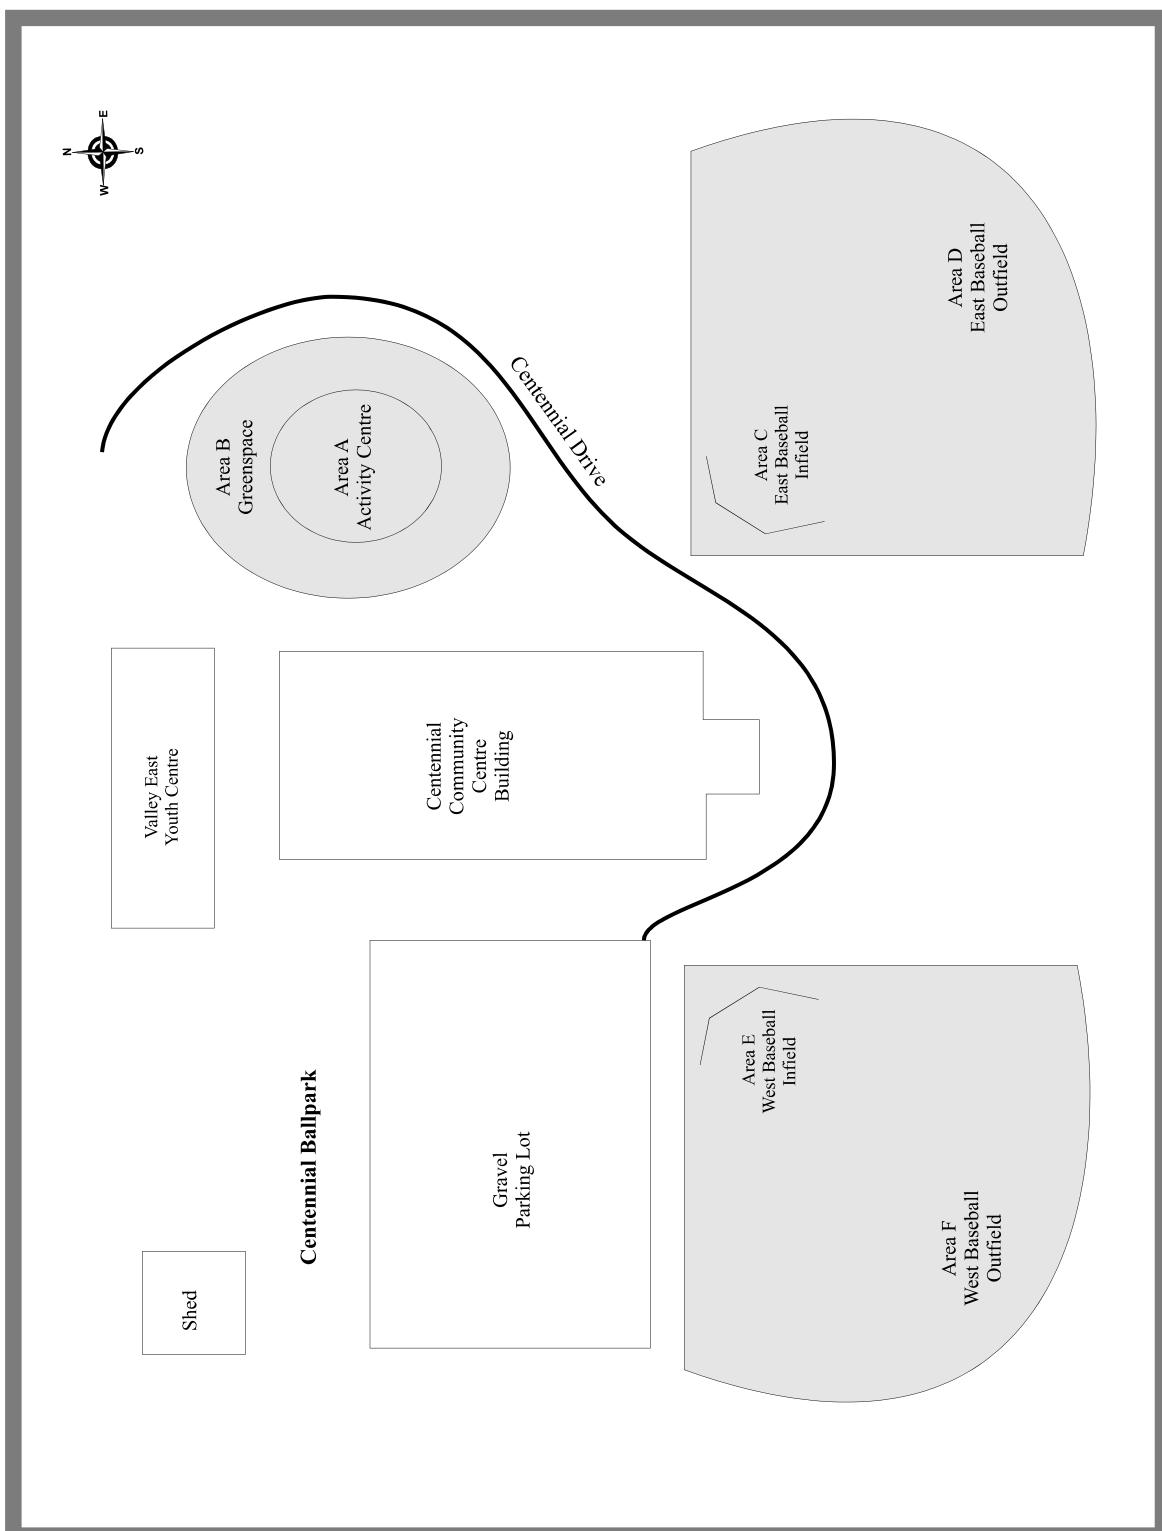

**Map C5.10.11:** Tiger Field, Garson - 2001.

## 5.11 Guilletville Park Map

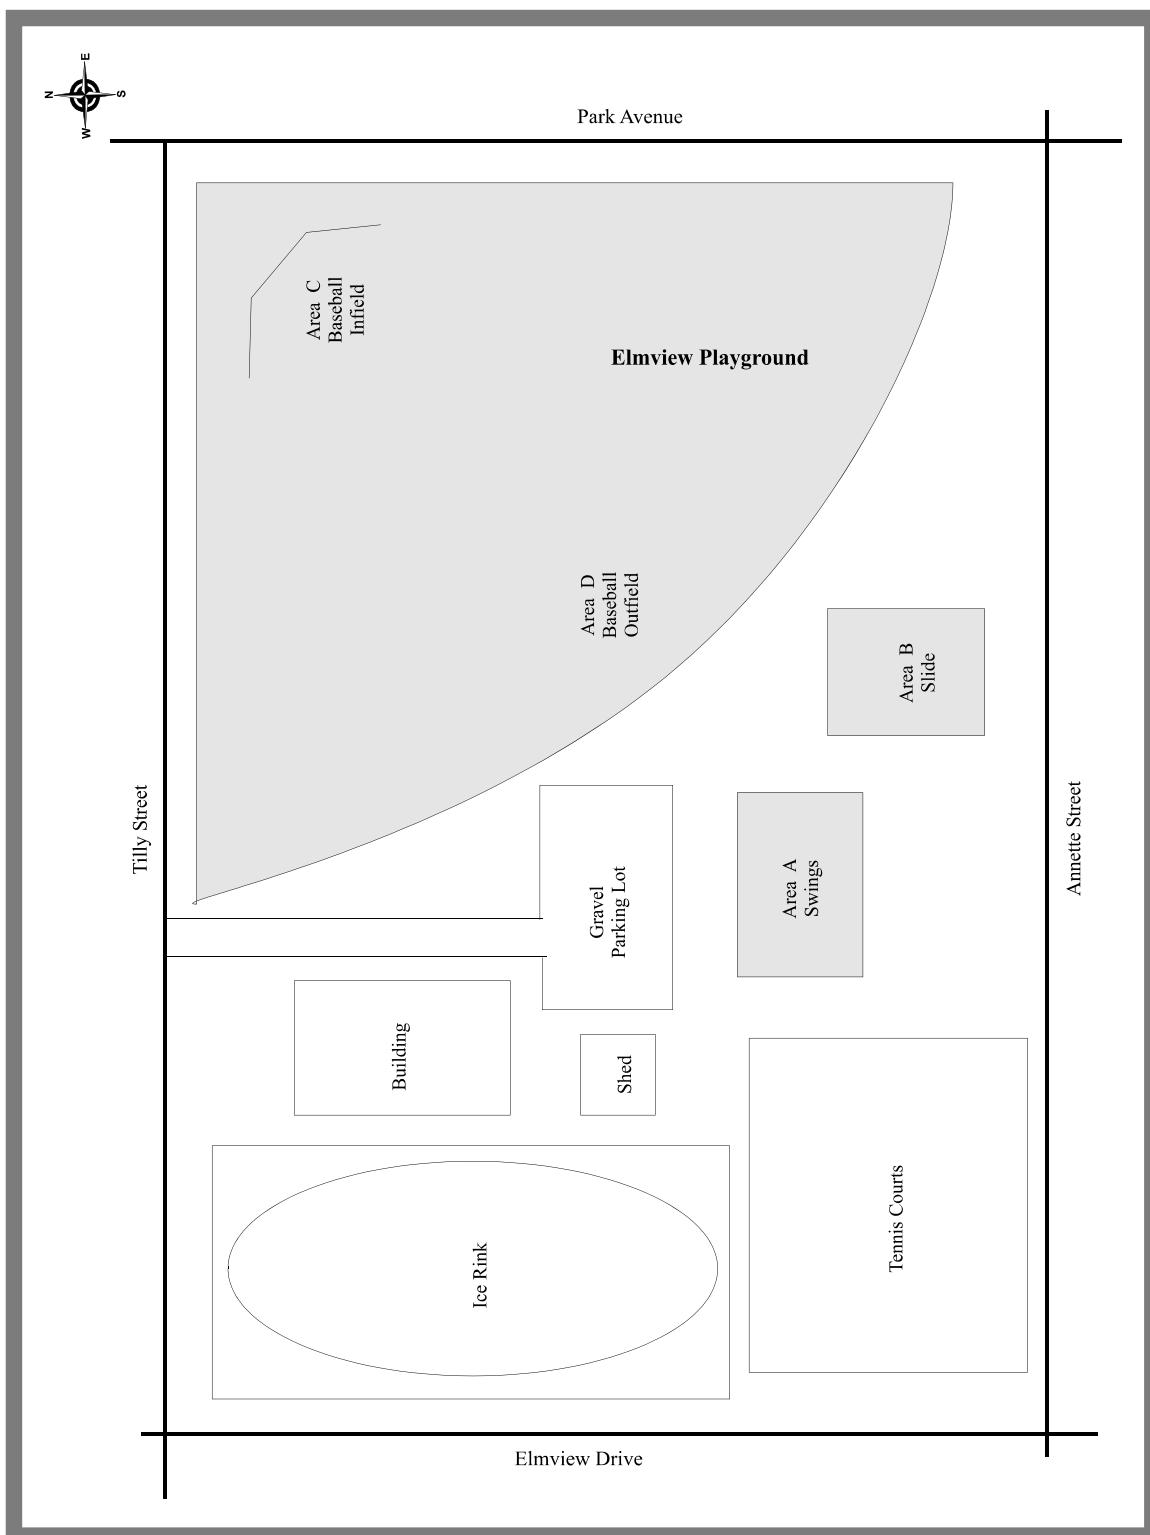

**Map C5.11.1:** Guilletville Playground, Guilletville - 2001.

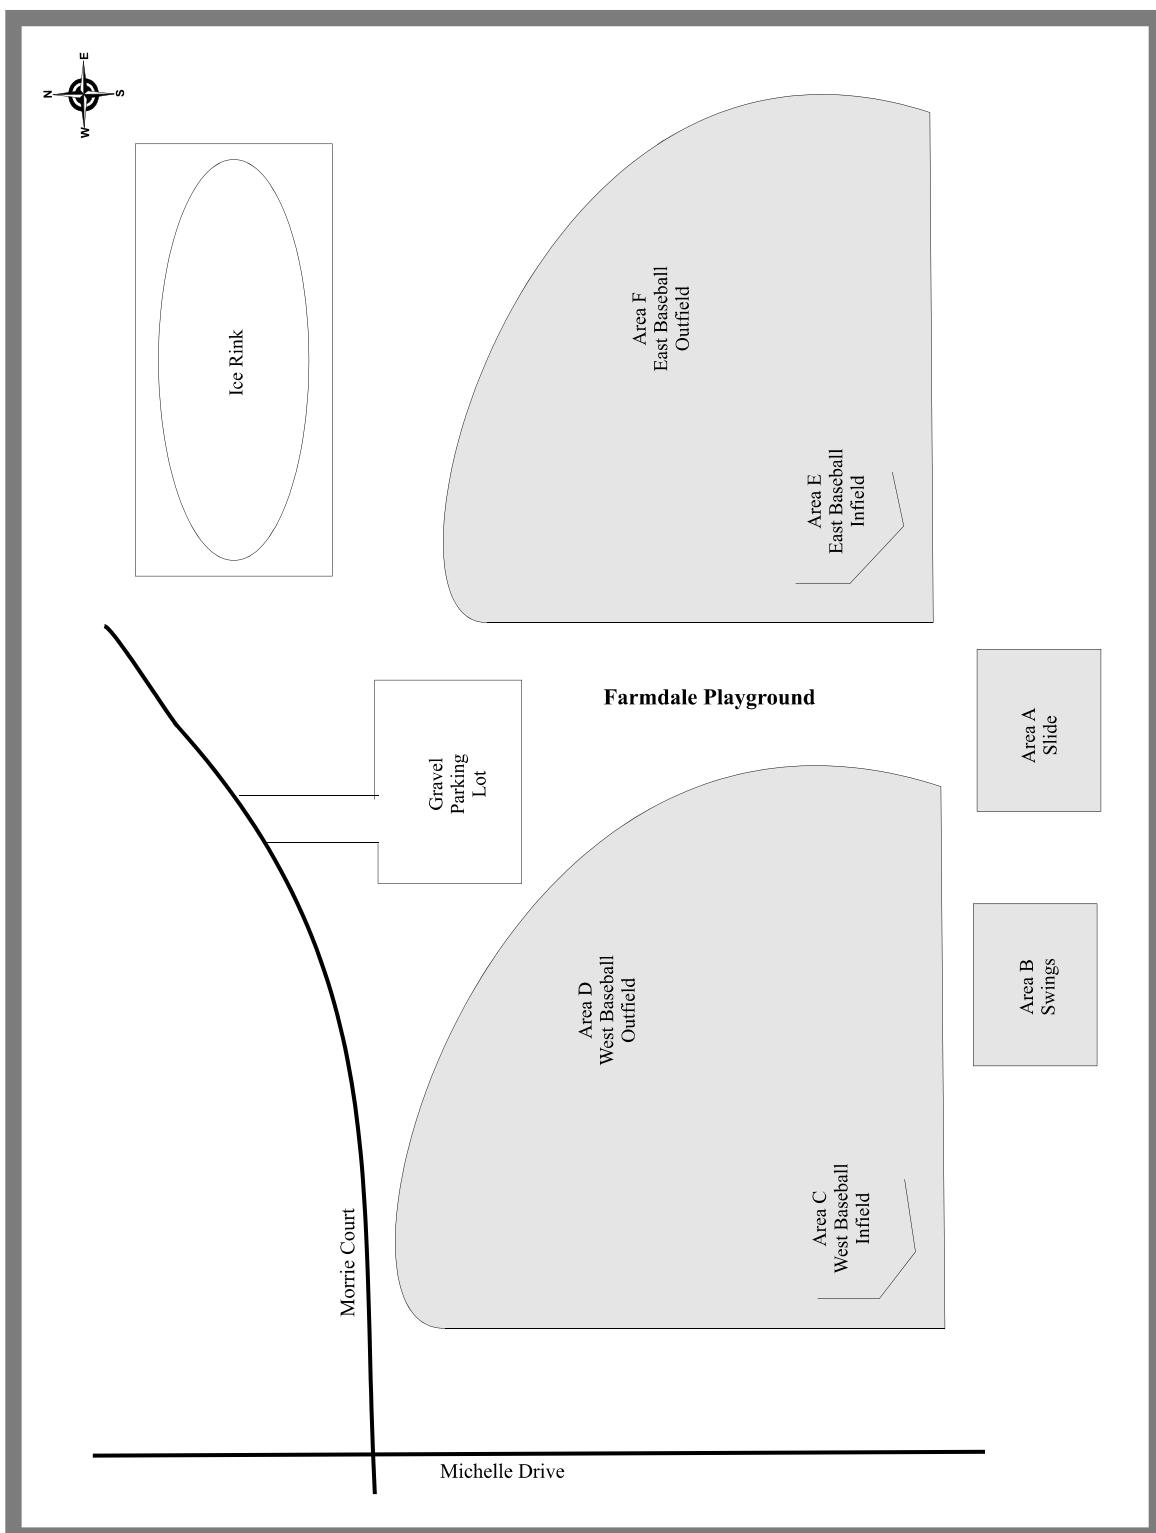

## 5.12 Hanmer Park Maps

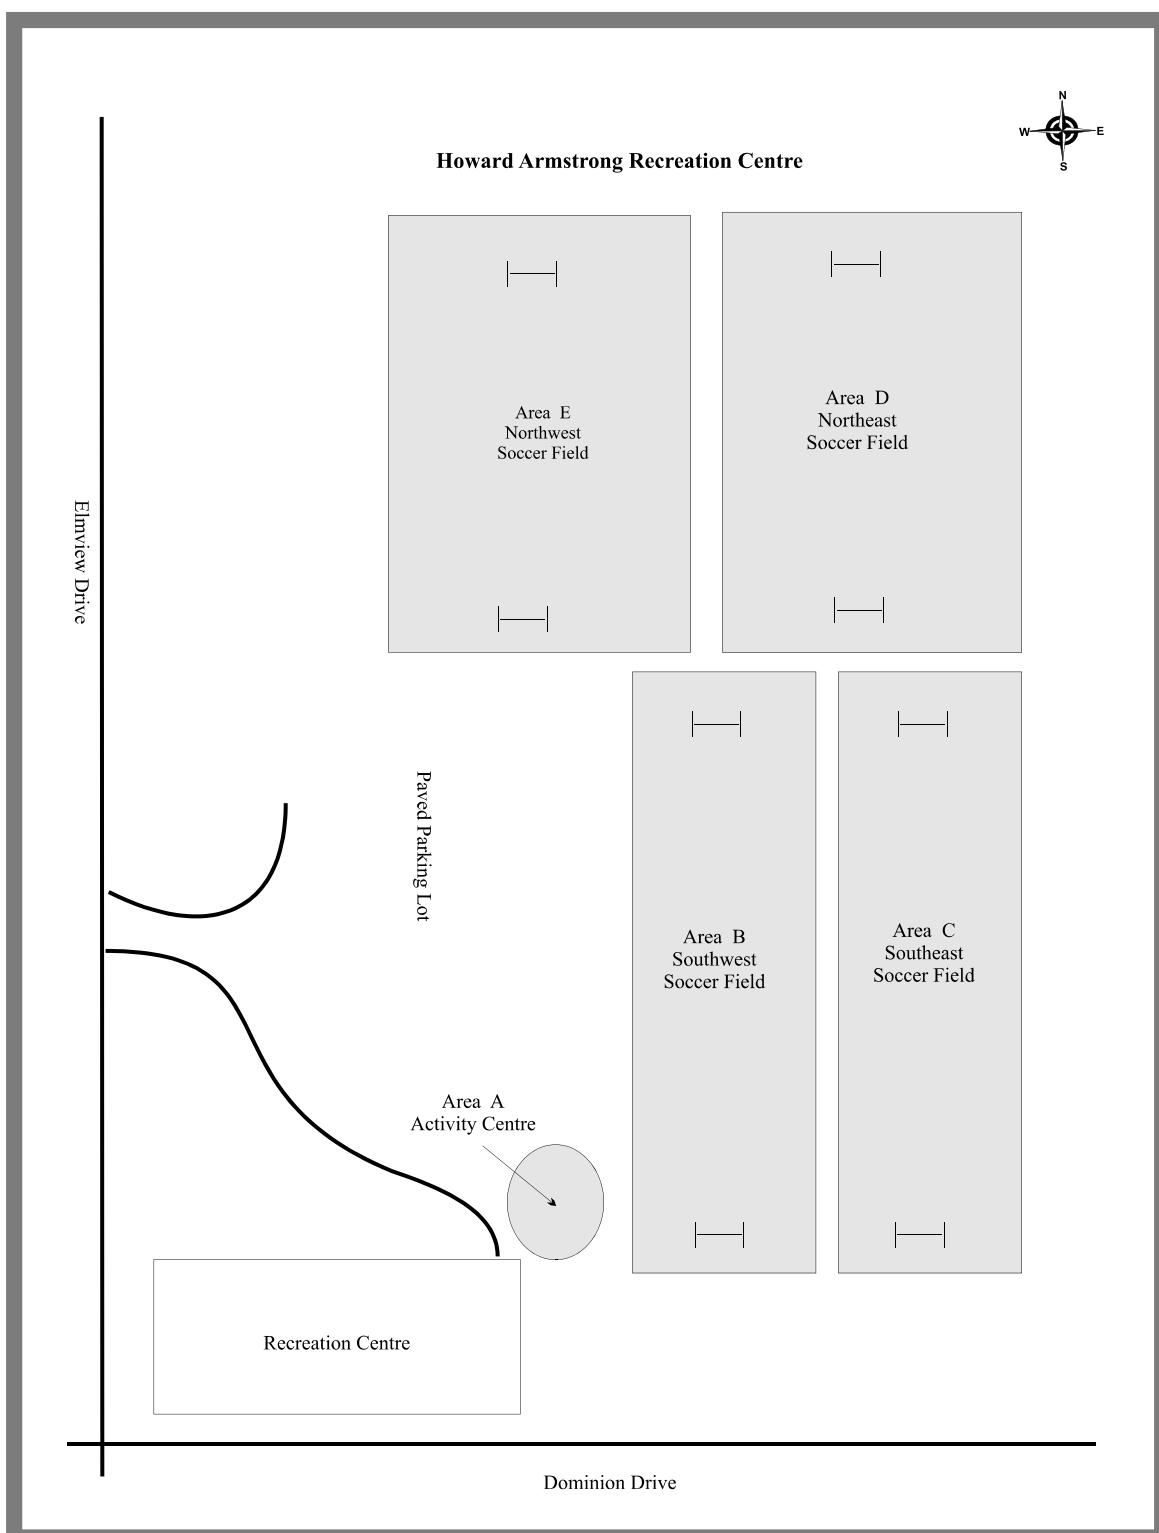

**Map C5.12.1:** Centennial Ballpark, Hanmer - 2001.

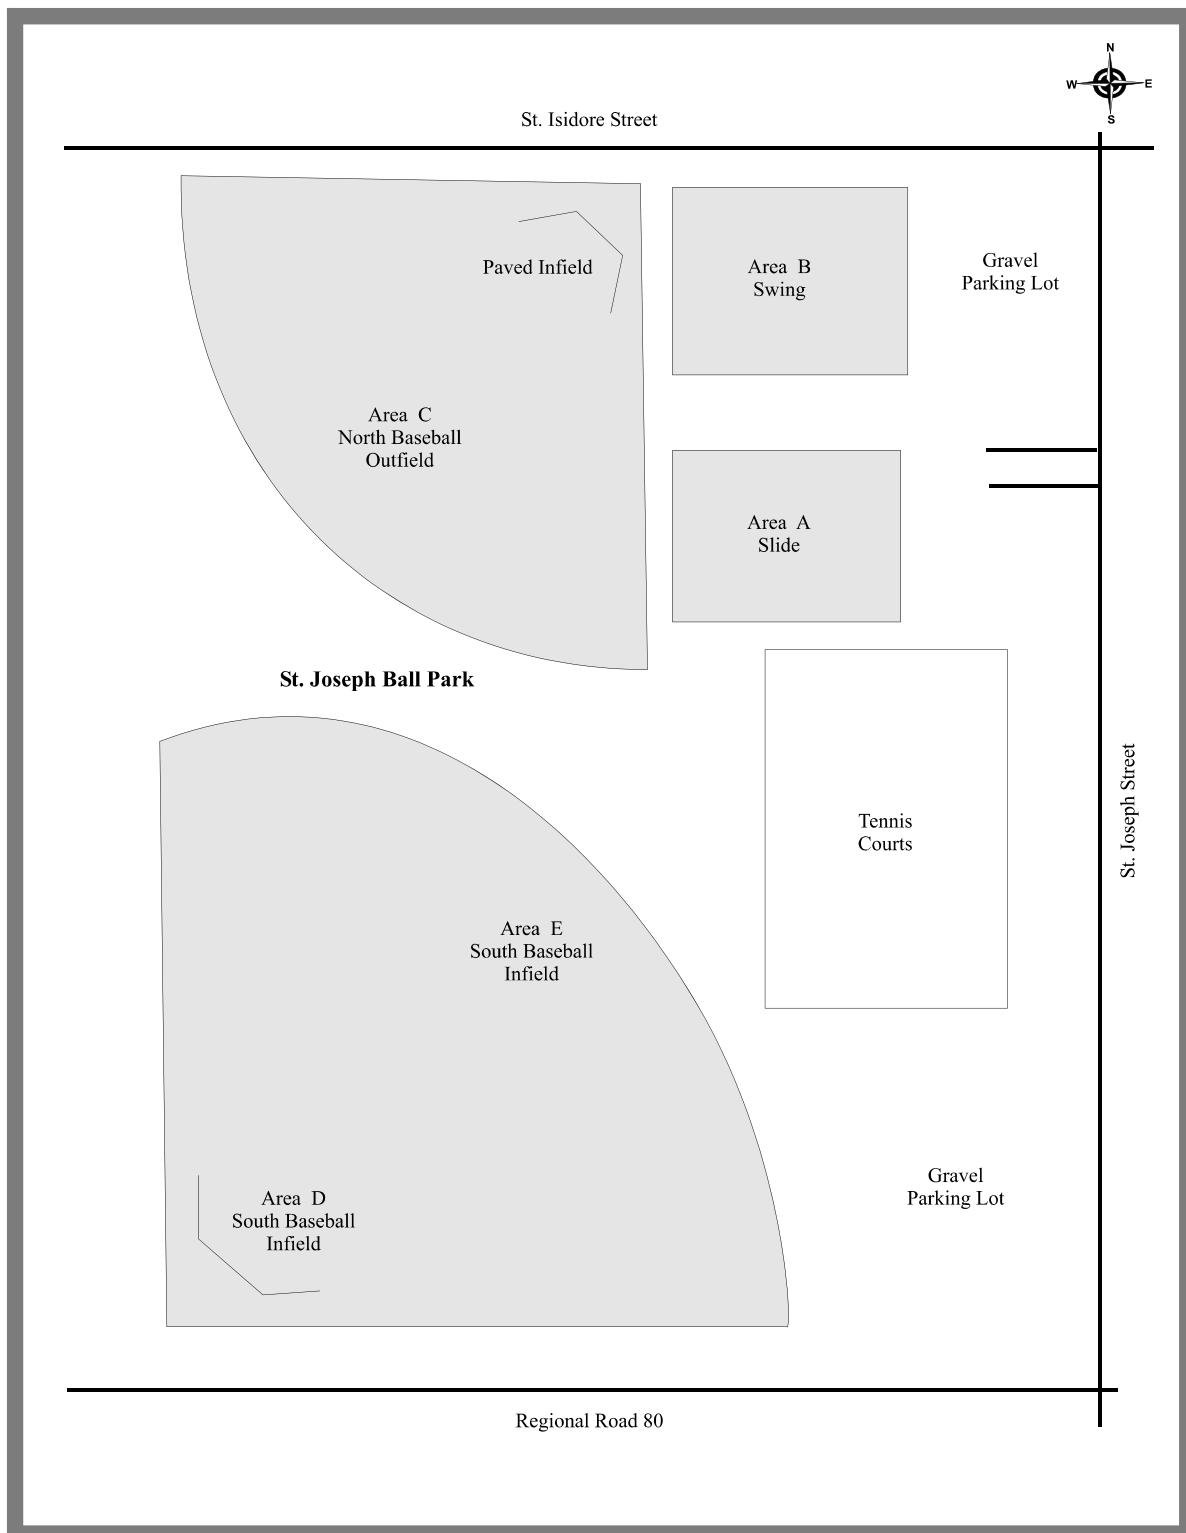

**Map C5.12.2: Elmview Playground, Hanmer - 2001.**

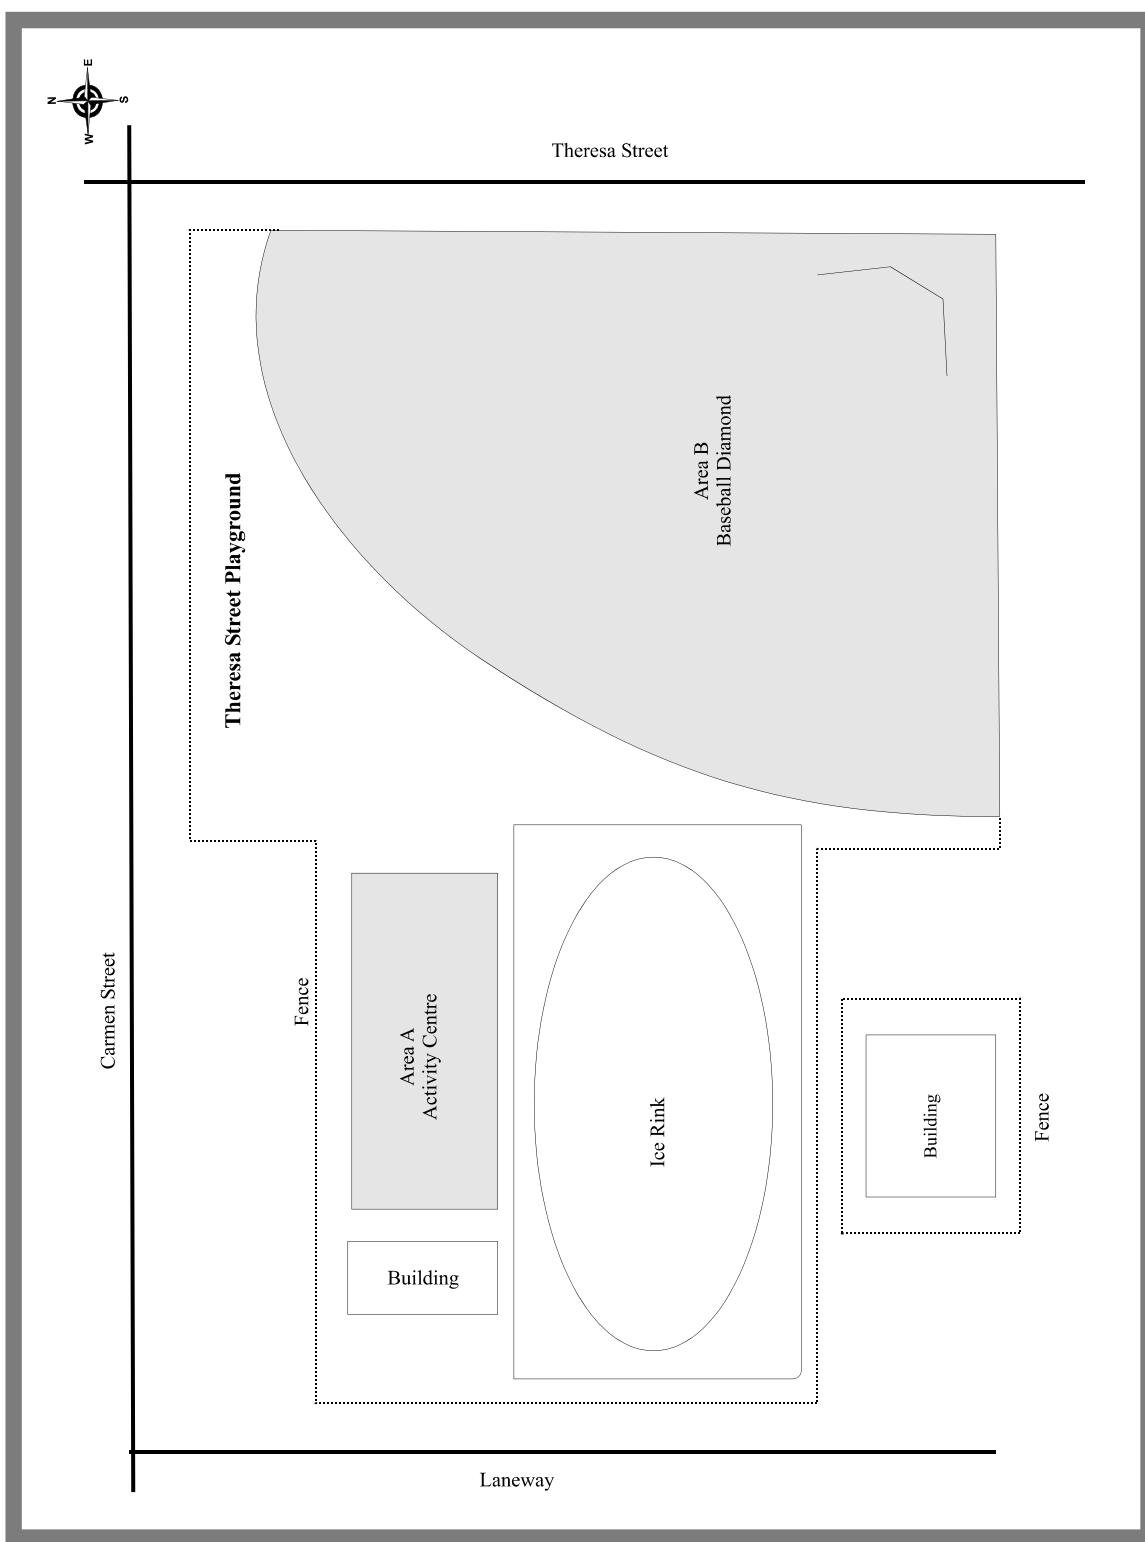

**Map C5.12.3: Farmdale Playground, Hanmer - 2001.**

**Map C5.12.4:** Howard Armstrong Rec. Centre, Hanmer - 2001.

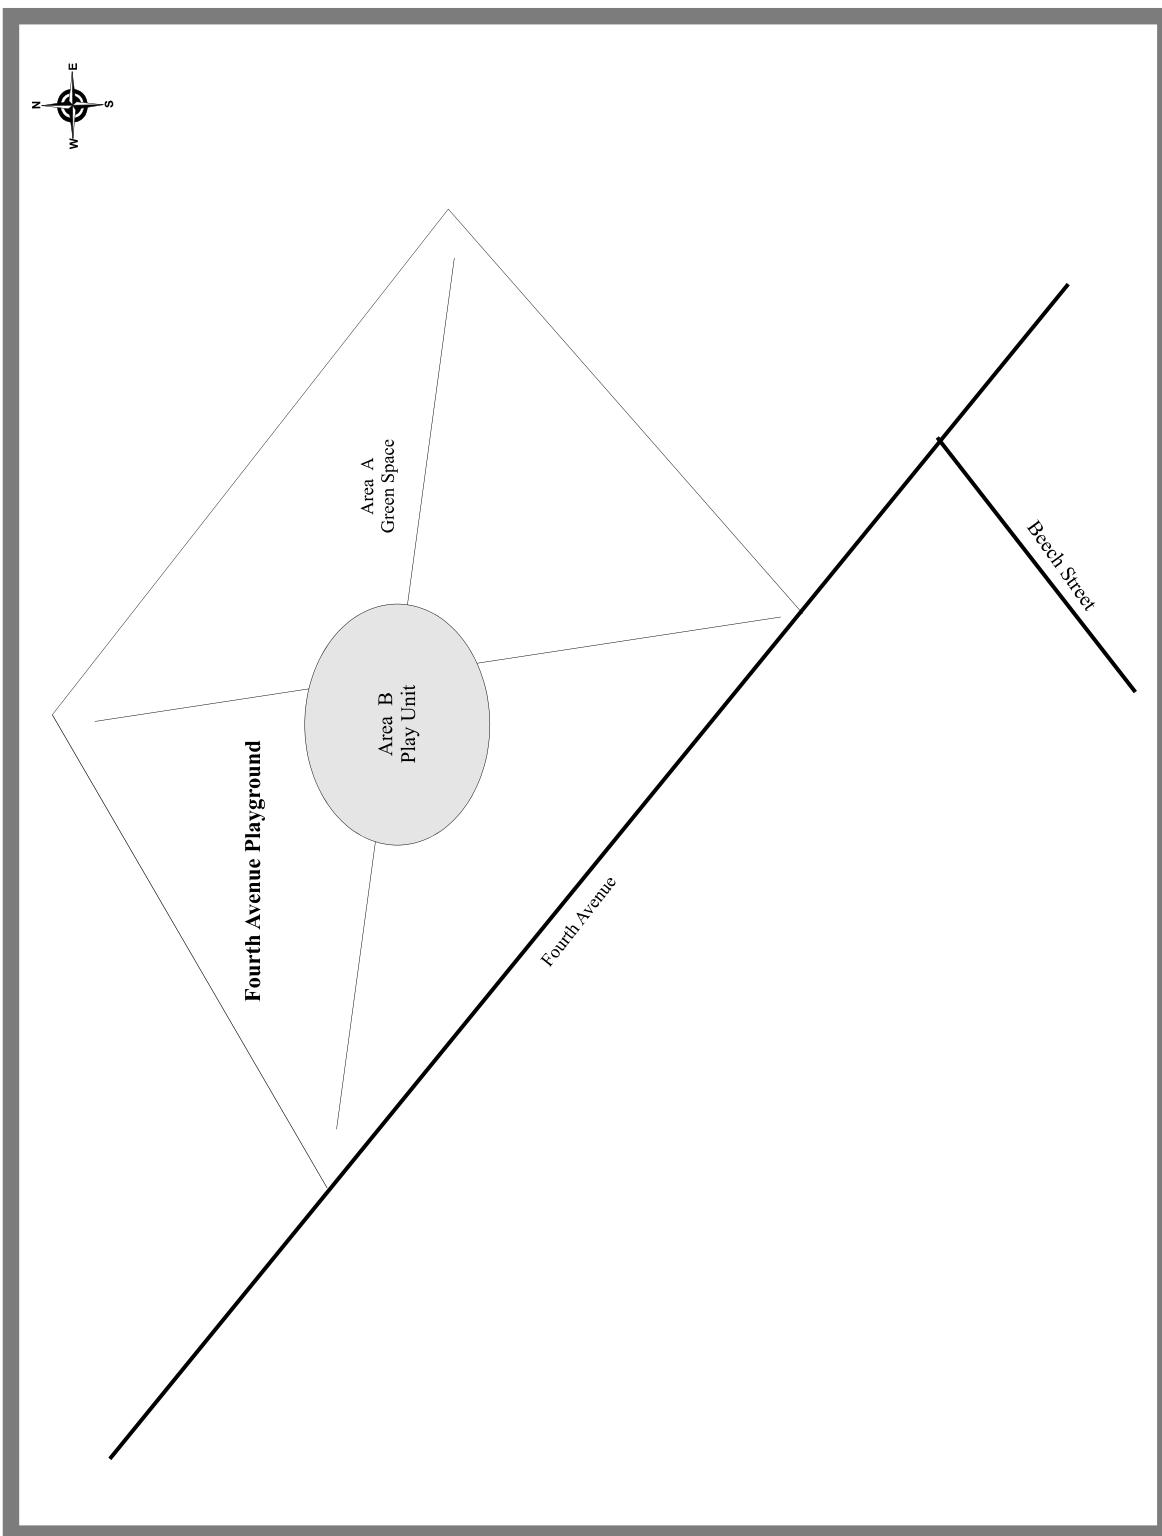

**Map C5.12.5:** St. Joseph Ball Park ( Lion's Playground), Hanmer - 2001.

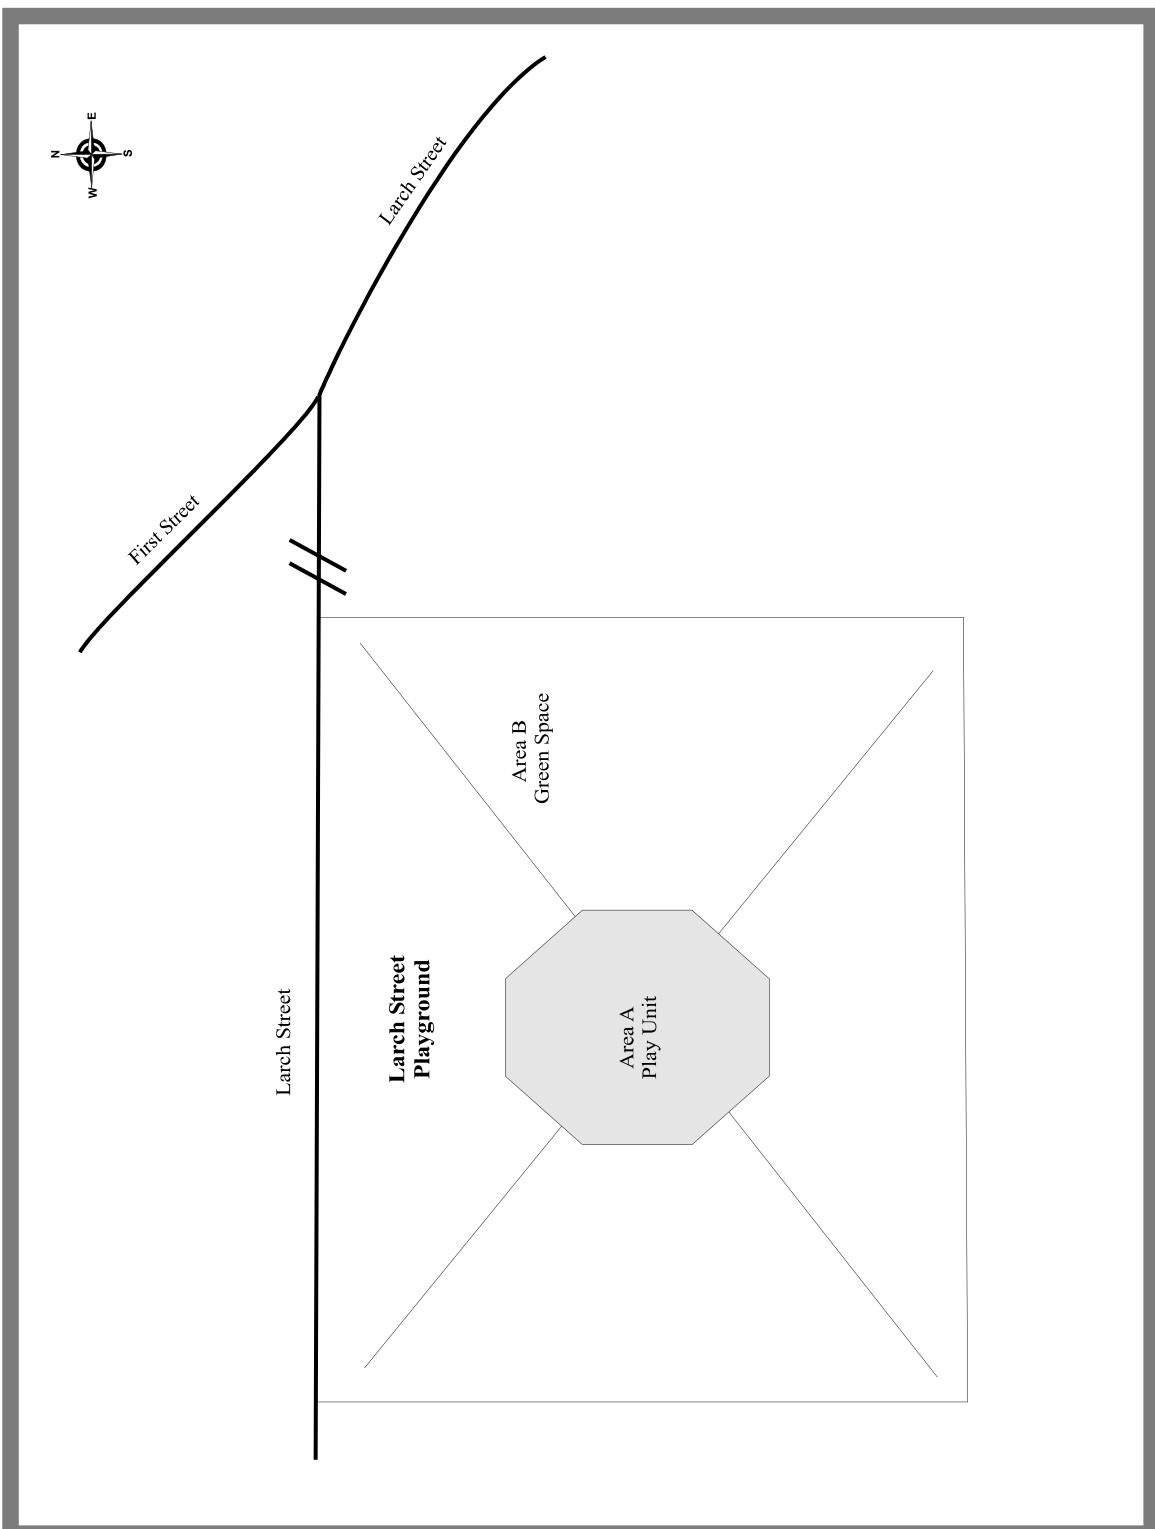

**Map C5.12.6:** Theresa Playground (Hanmer Playground), Hanmer - 2001.

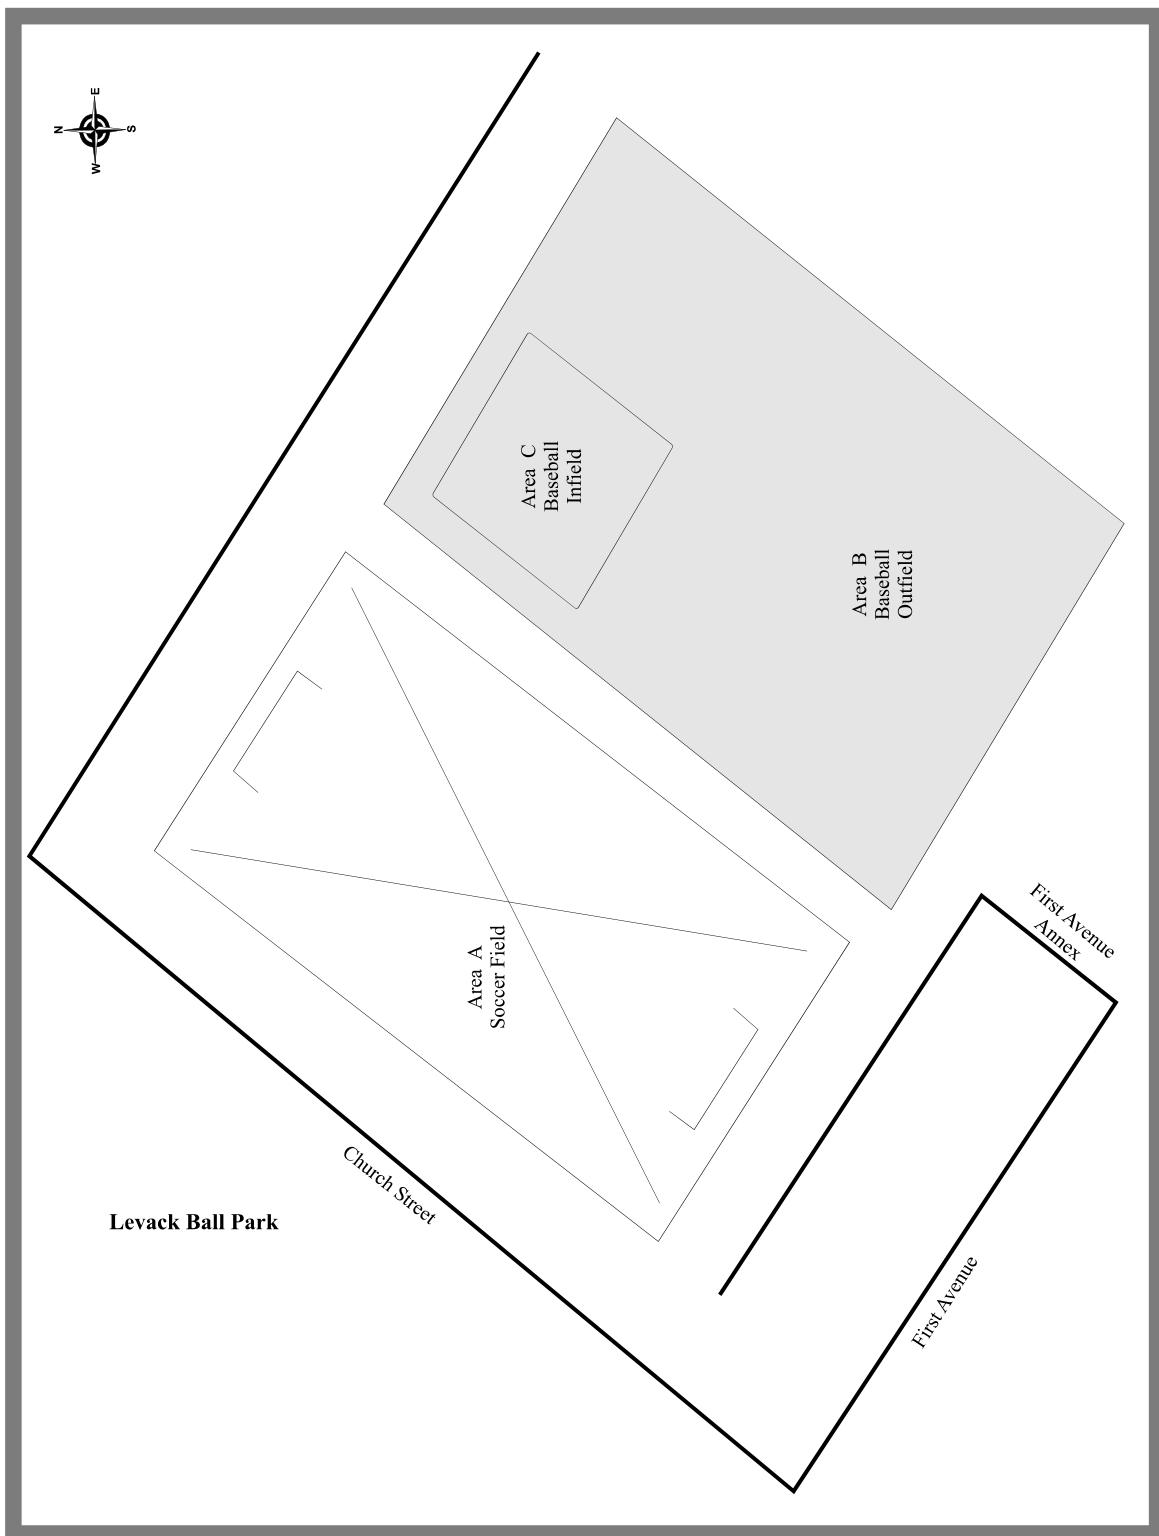

### 5.13 Levack Park Maps

**Map C5.13.1:** 4<sup>th</sup> Avenue Playground, Levack - 2001.

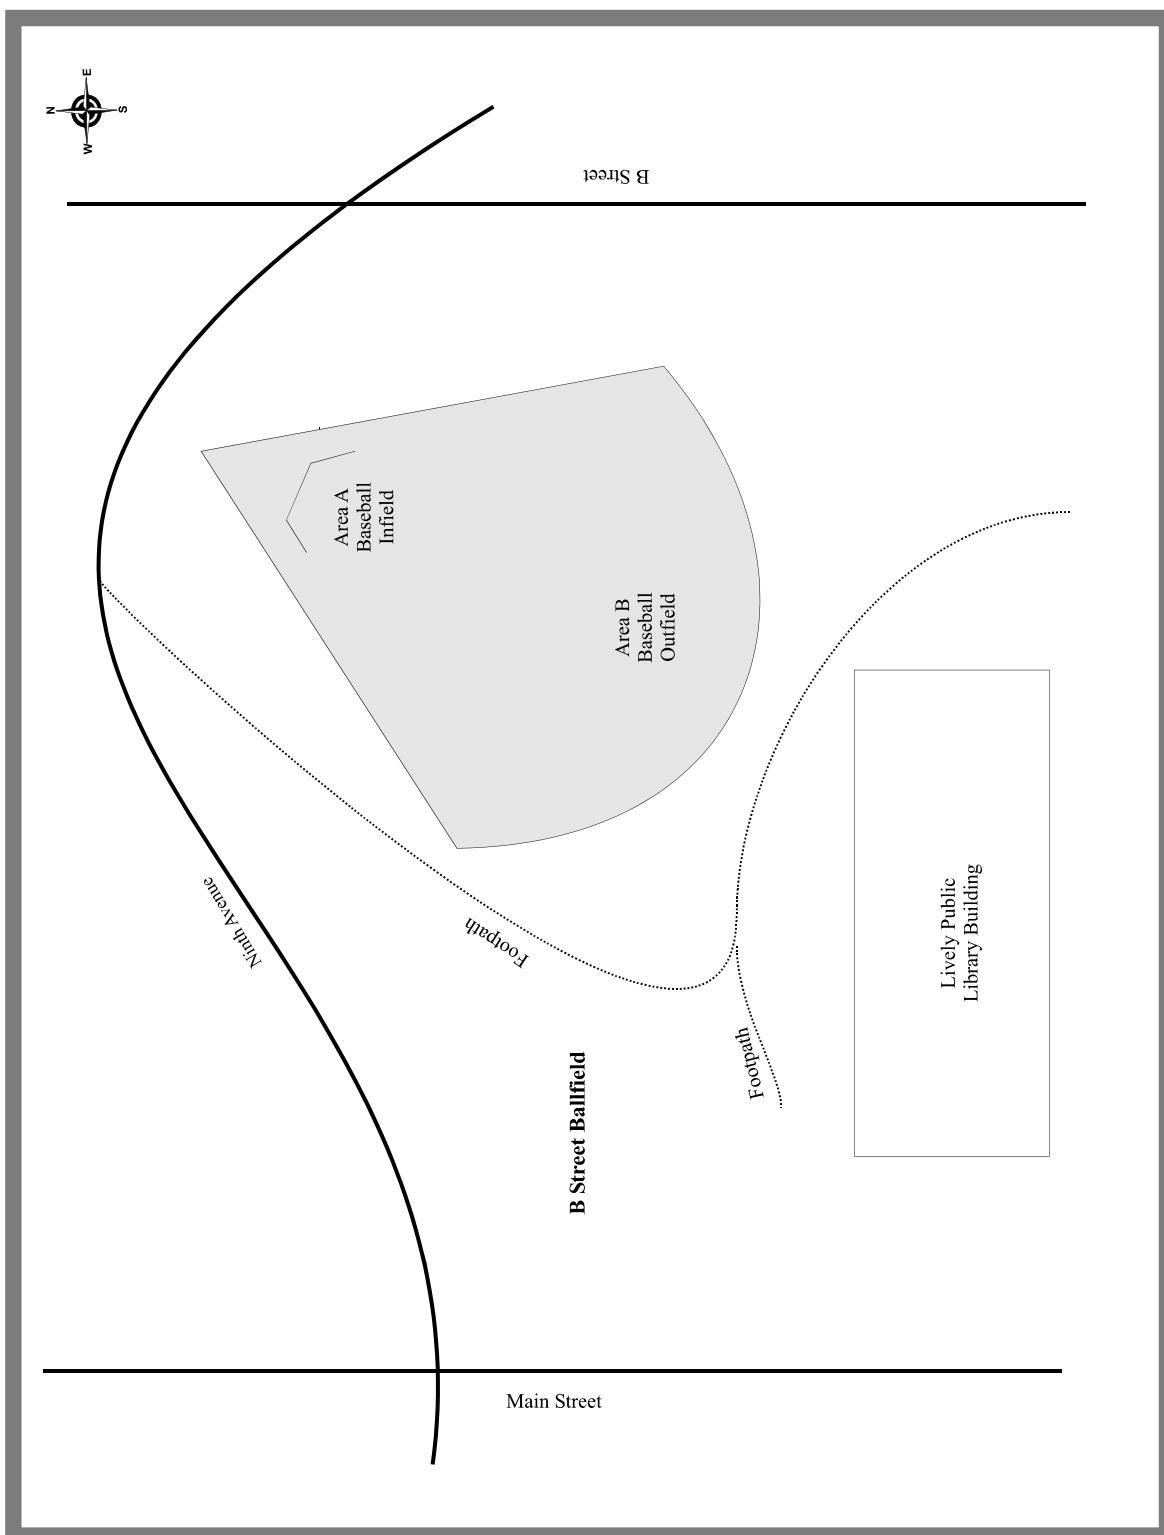

**Map C5.13.2:** Larch Street Playground, Levack - 2001.

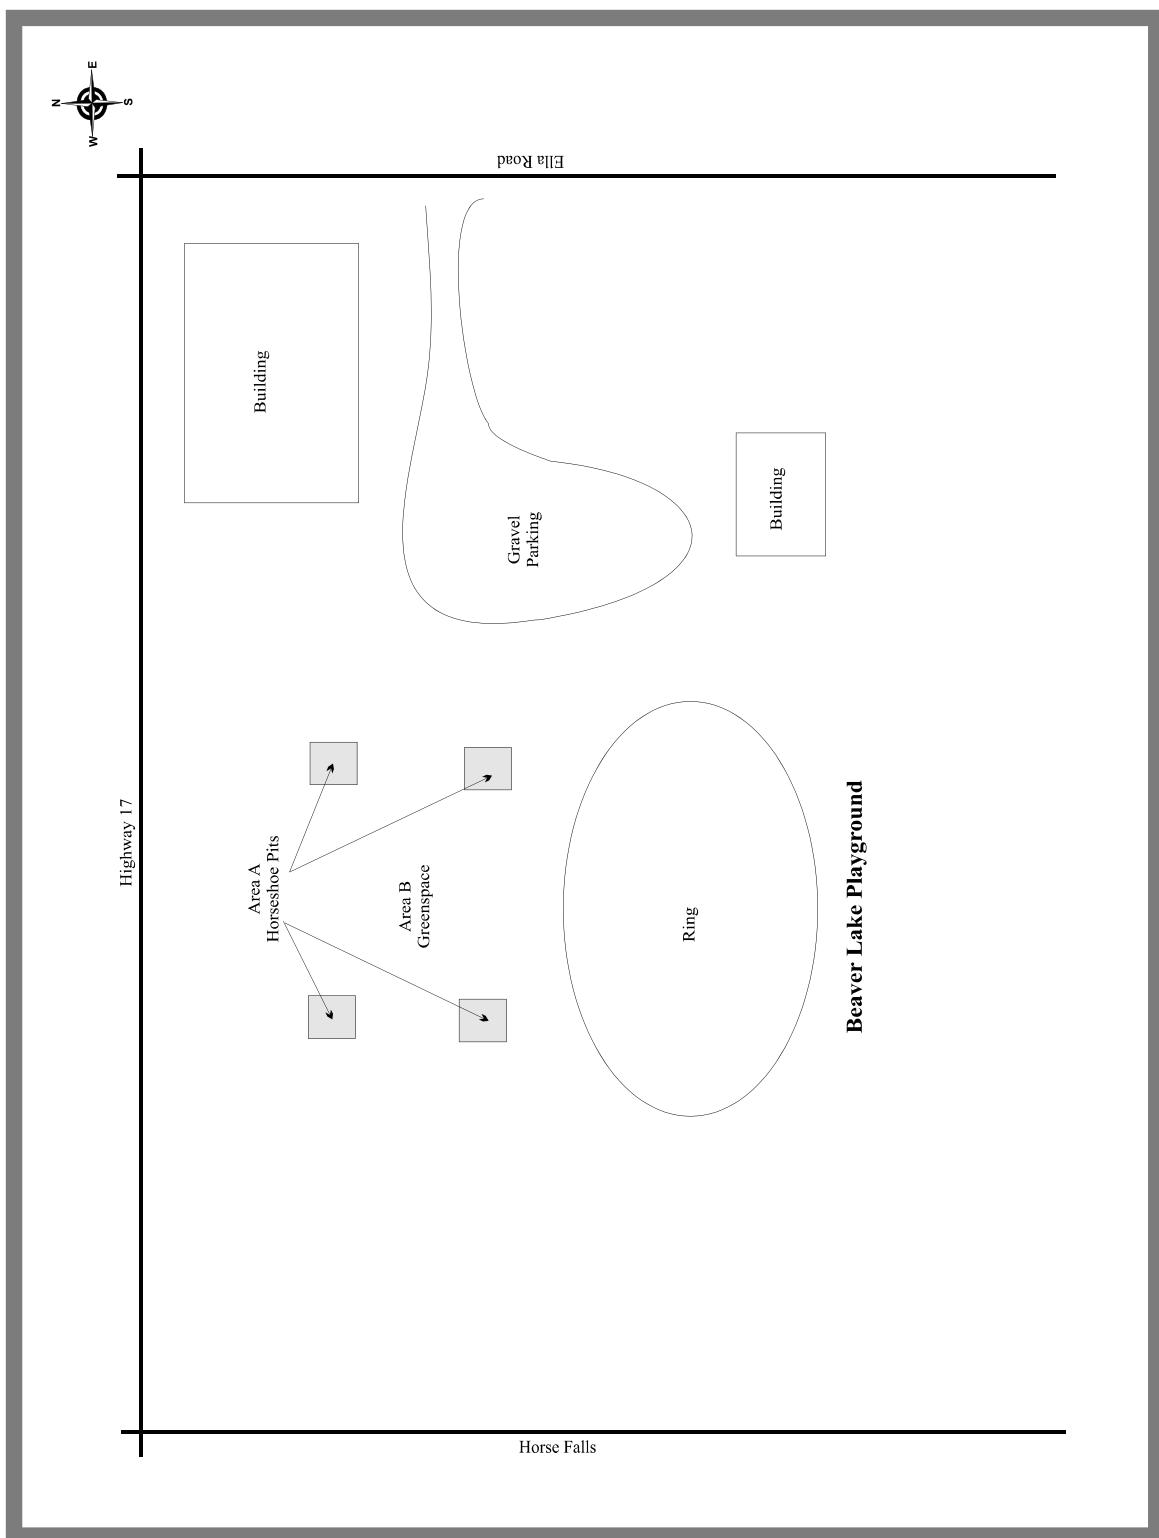

**Map C5.13.3:** Levack Ball Park, Levack - 2001.

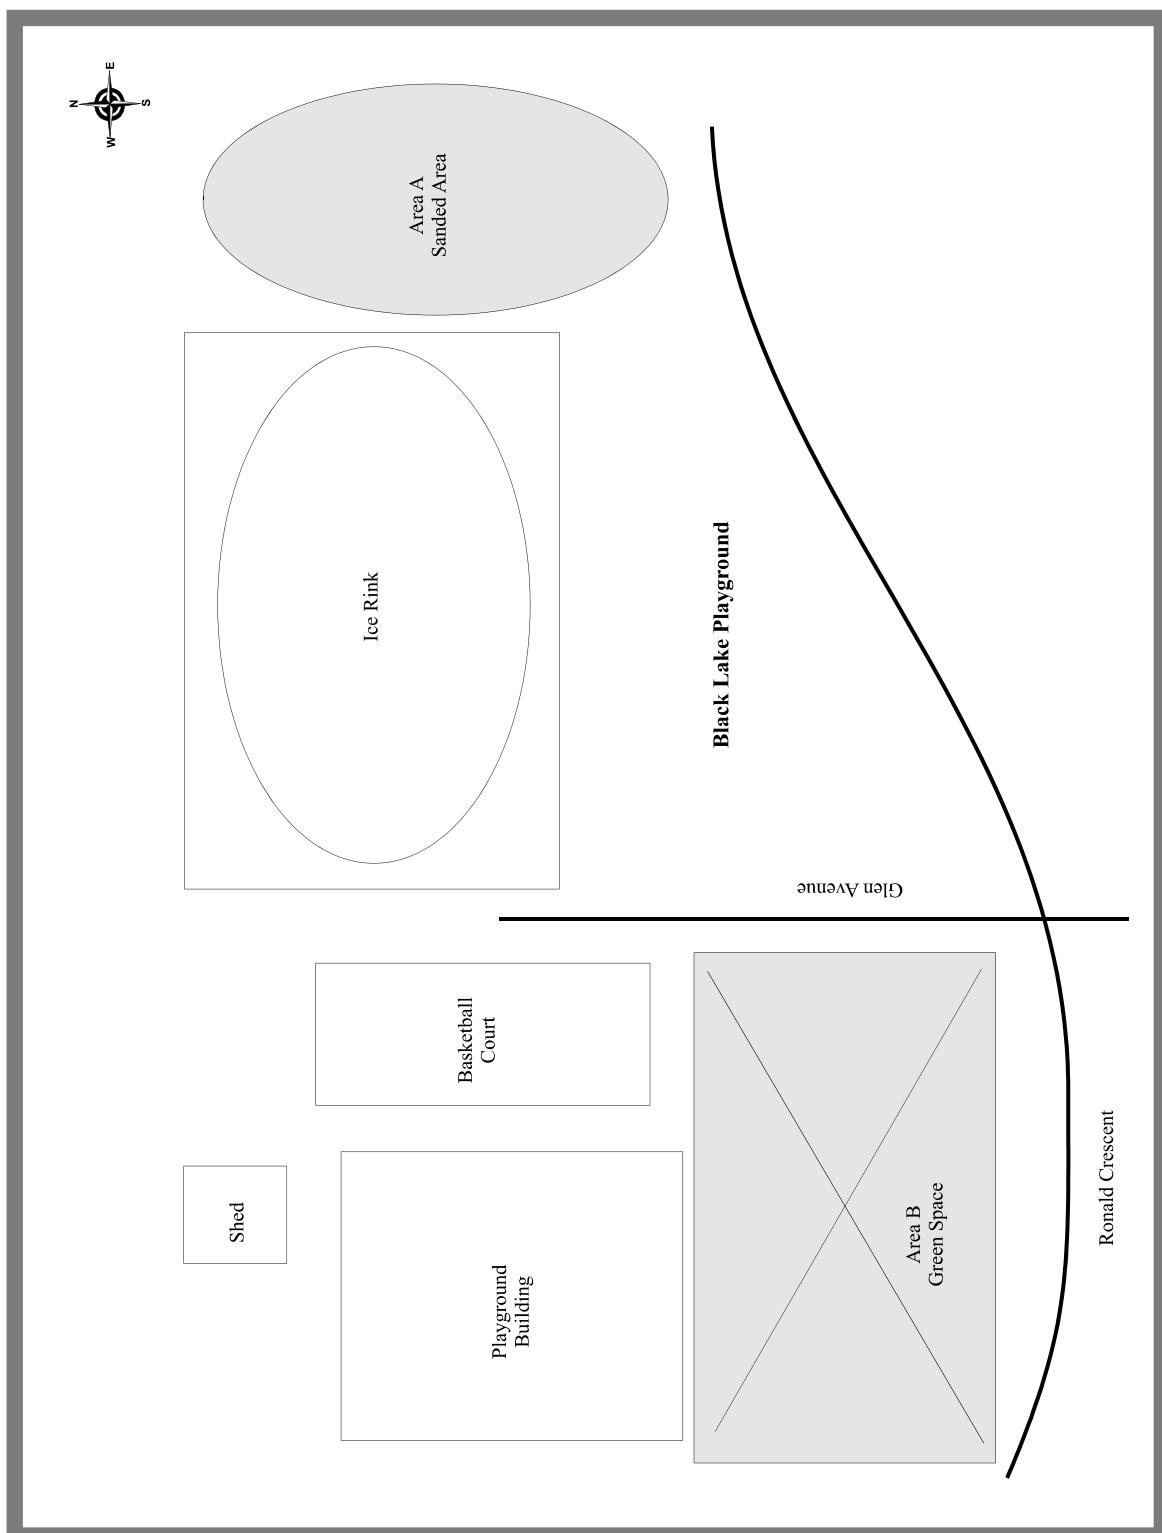

## 5.14 Lively Park Maps

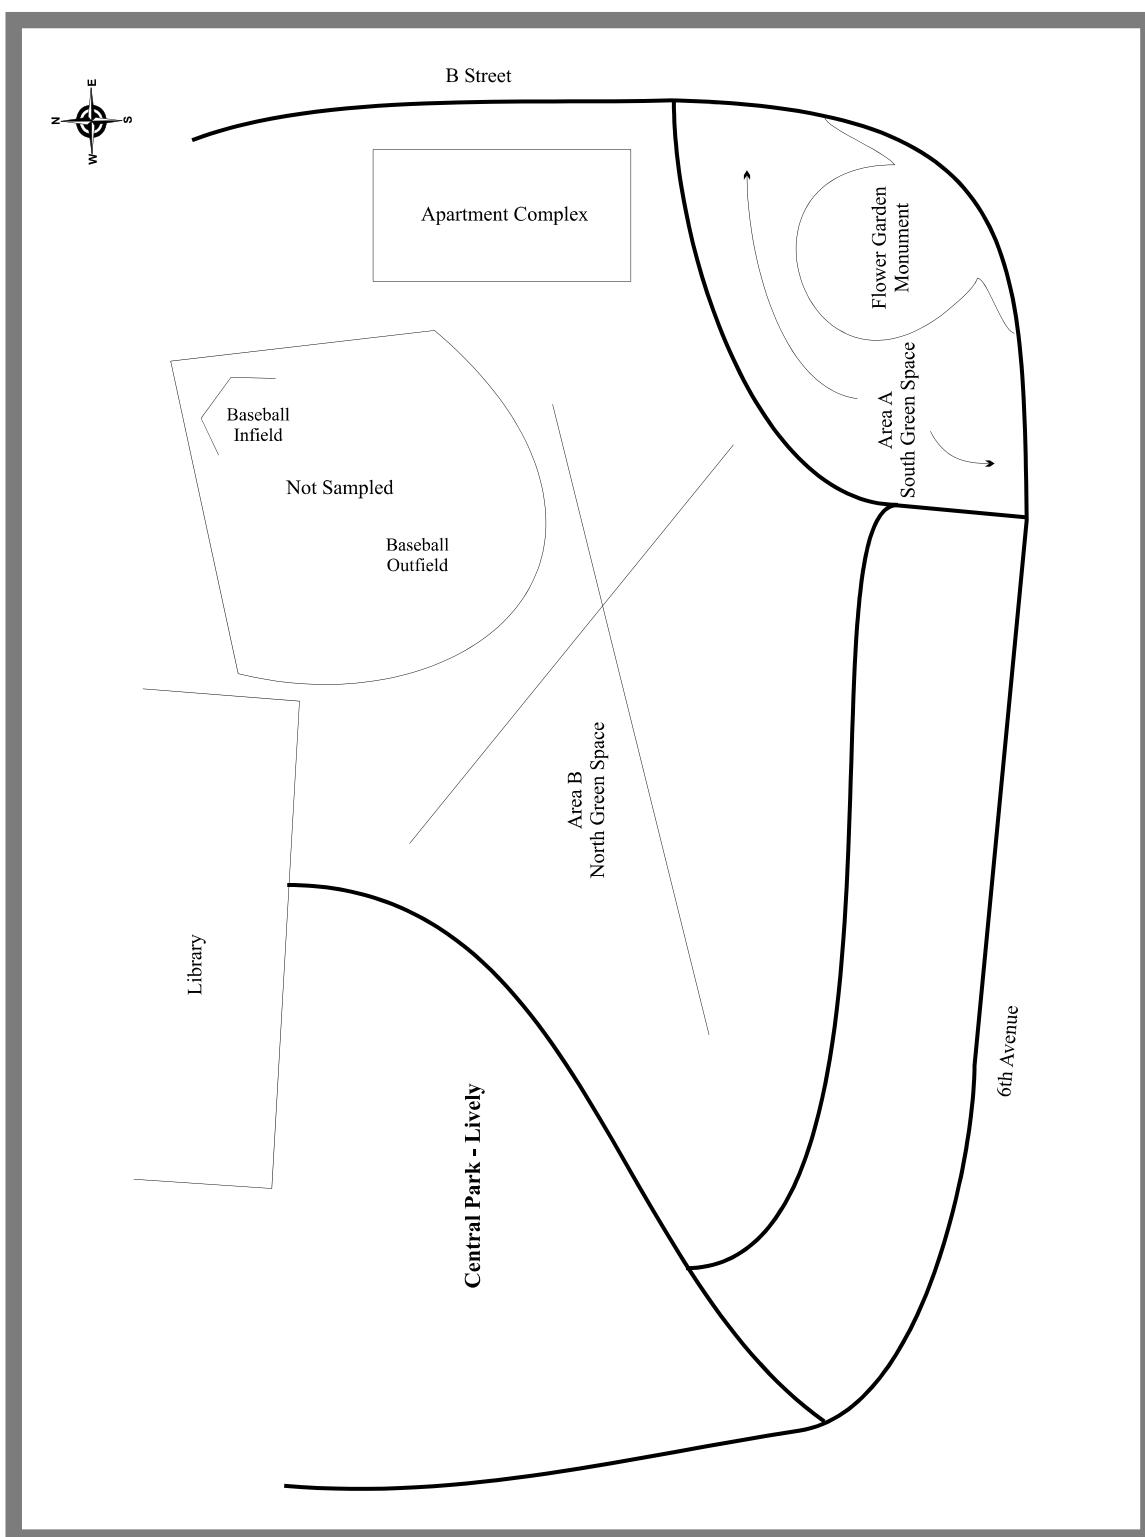

**Map C5.14.1:** B Street Ballfield (George Vanier), Lively - 2001.

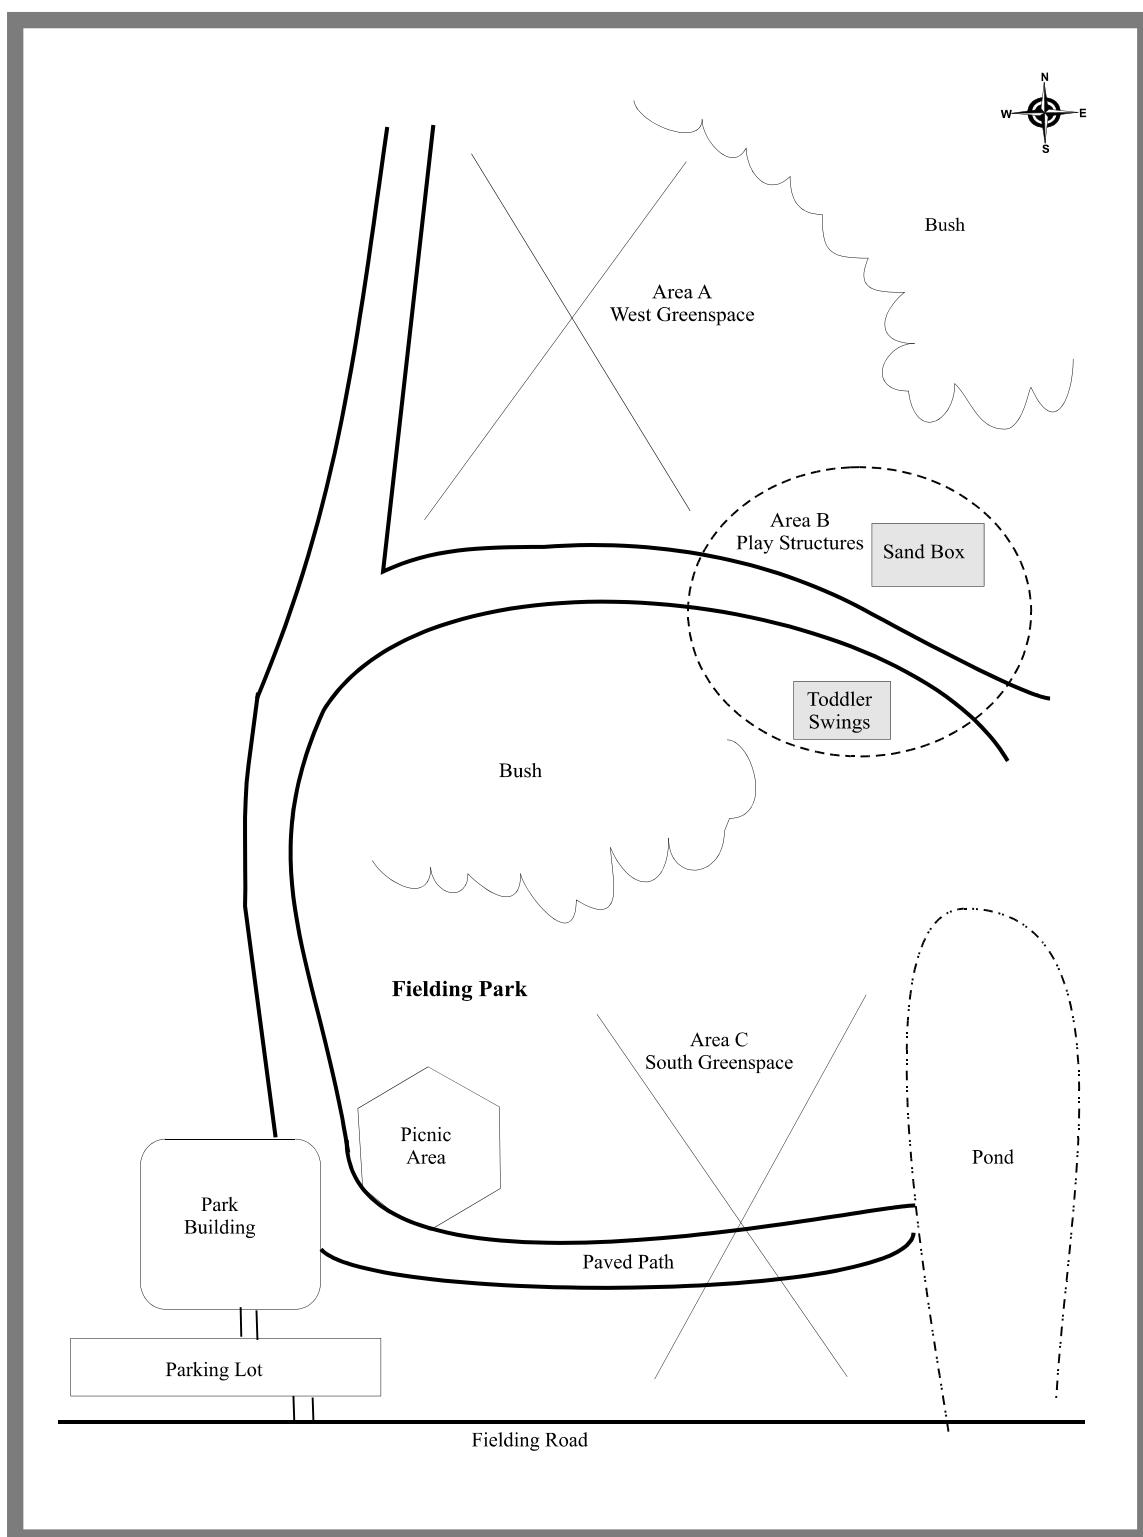

**Map C5.14.2:** Beaver Lake Playground, Lively - 2001.

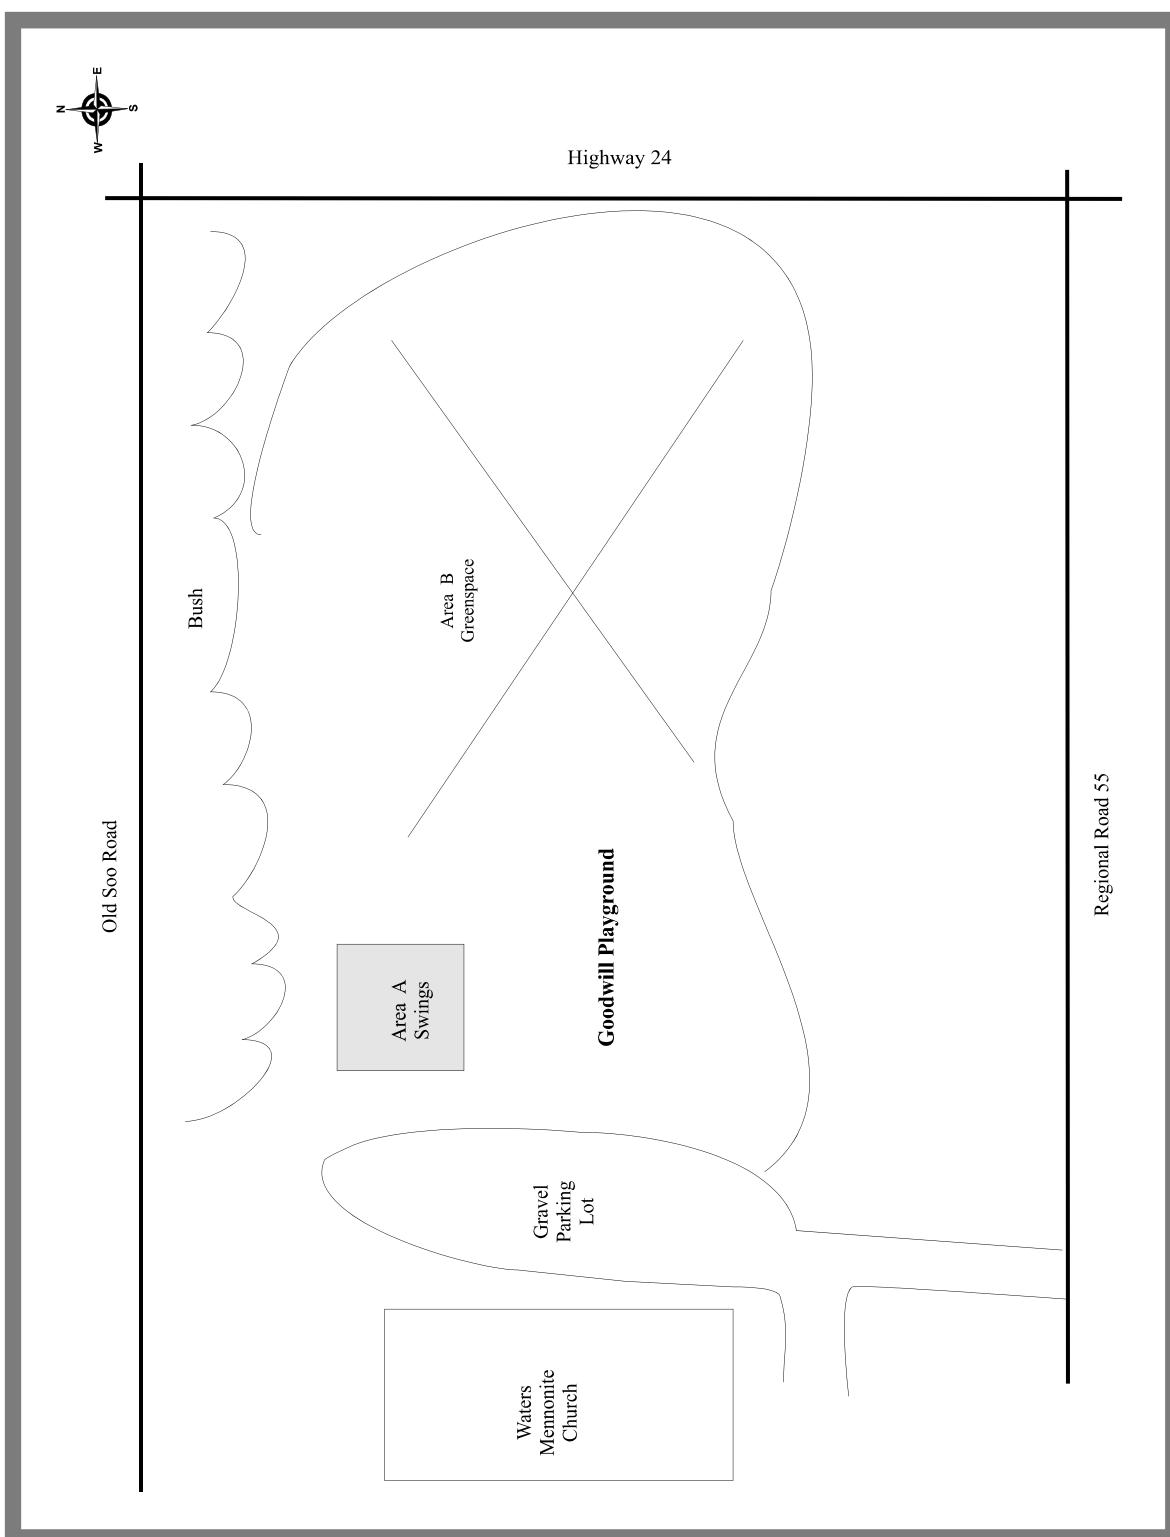

**Map C5.14.3:** Black Lake Road Playground, Lively - 2001.

**Map C5.14.4:** Central Park, Lively - 2001.

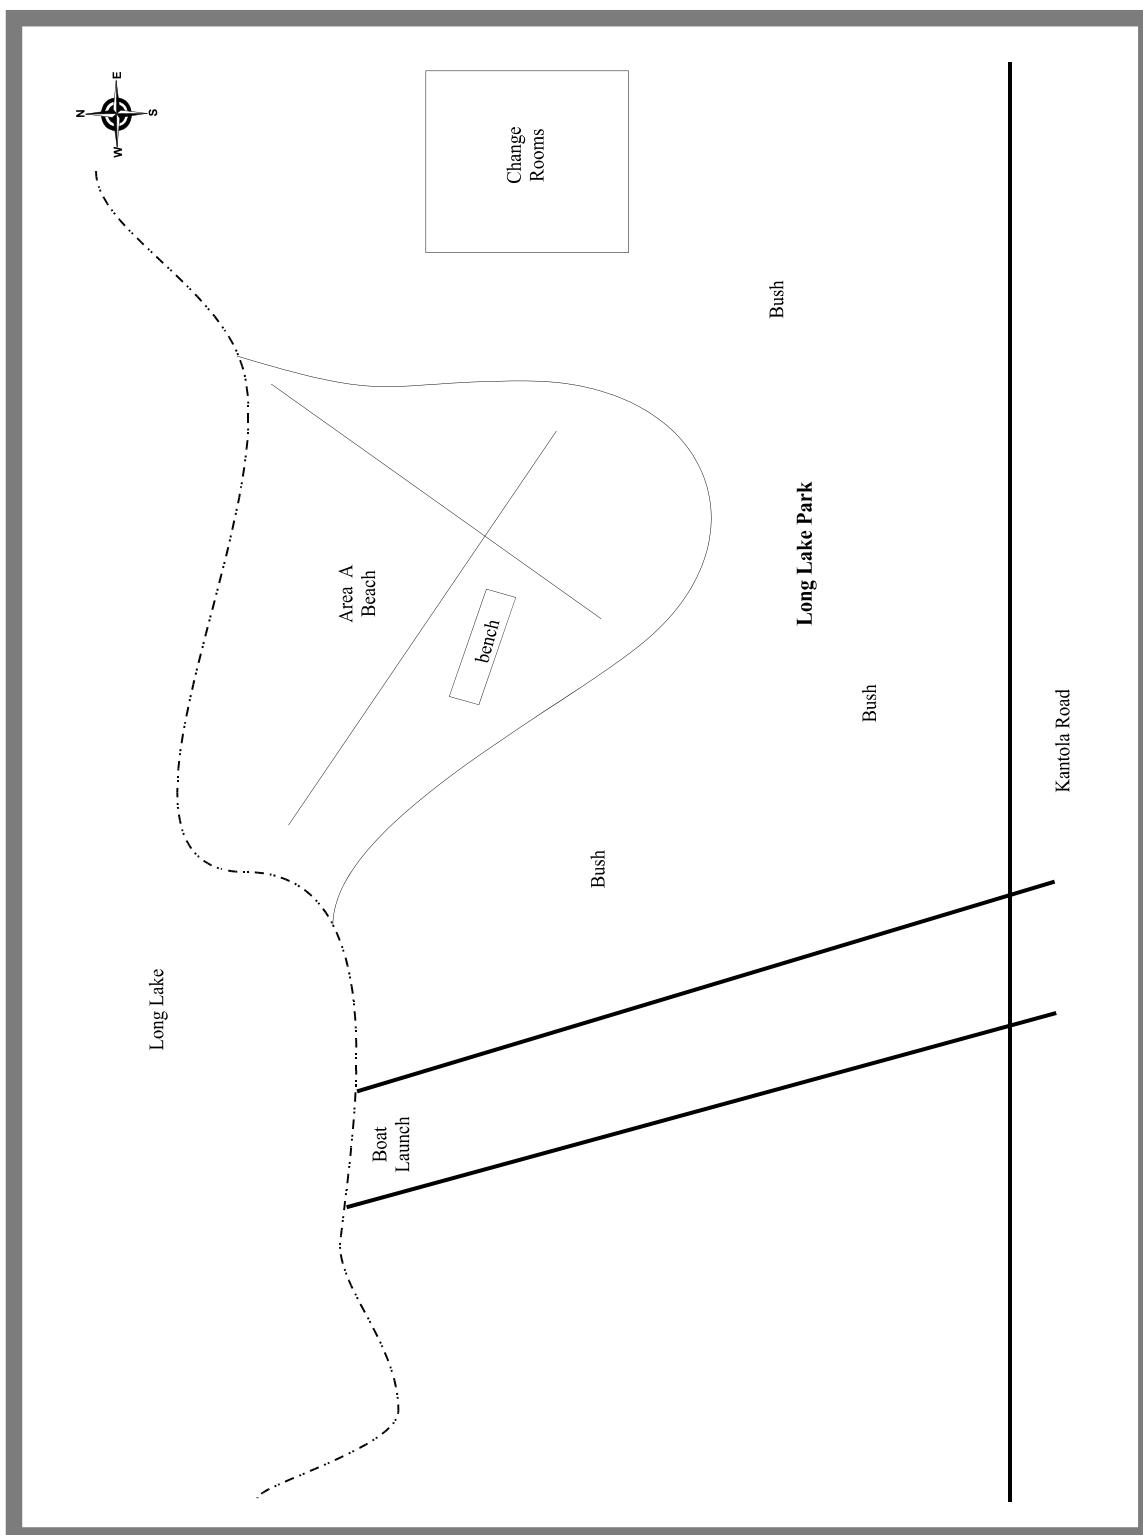

**Map C5.14.5:** Fielding Memorial Park Complex, Lively - 2001.

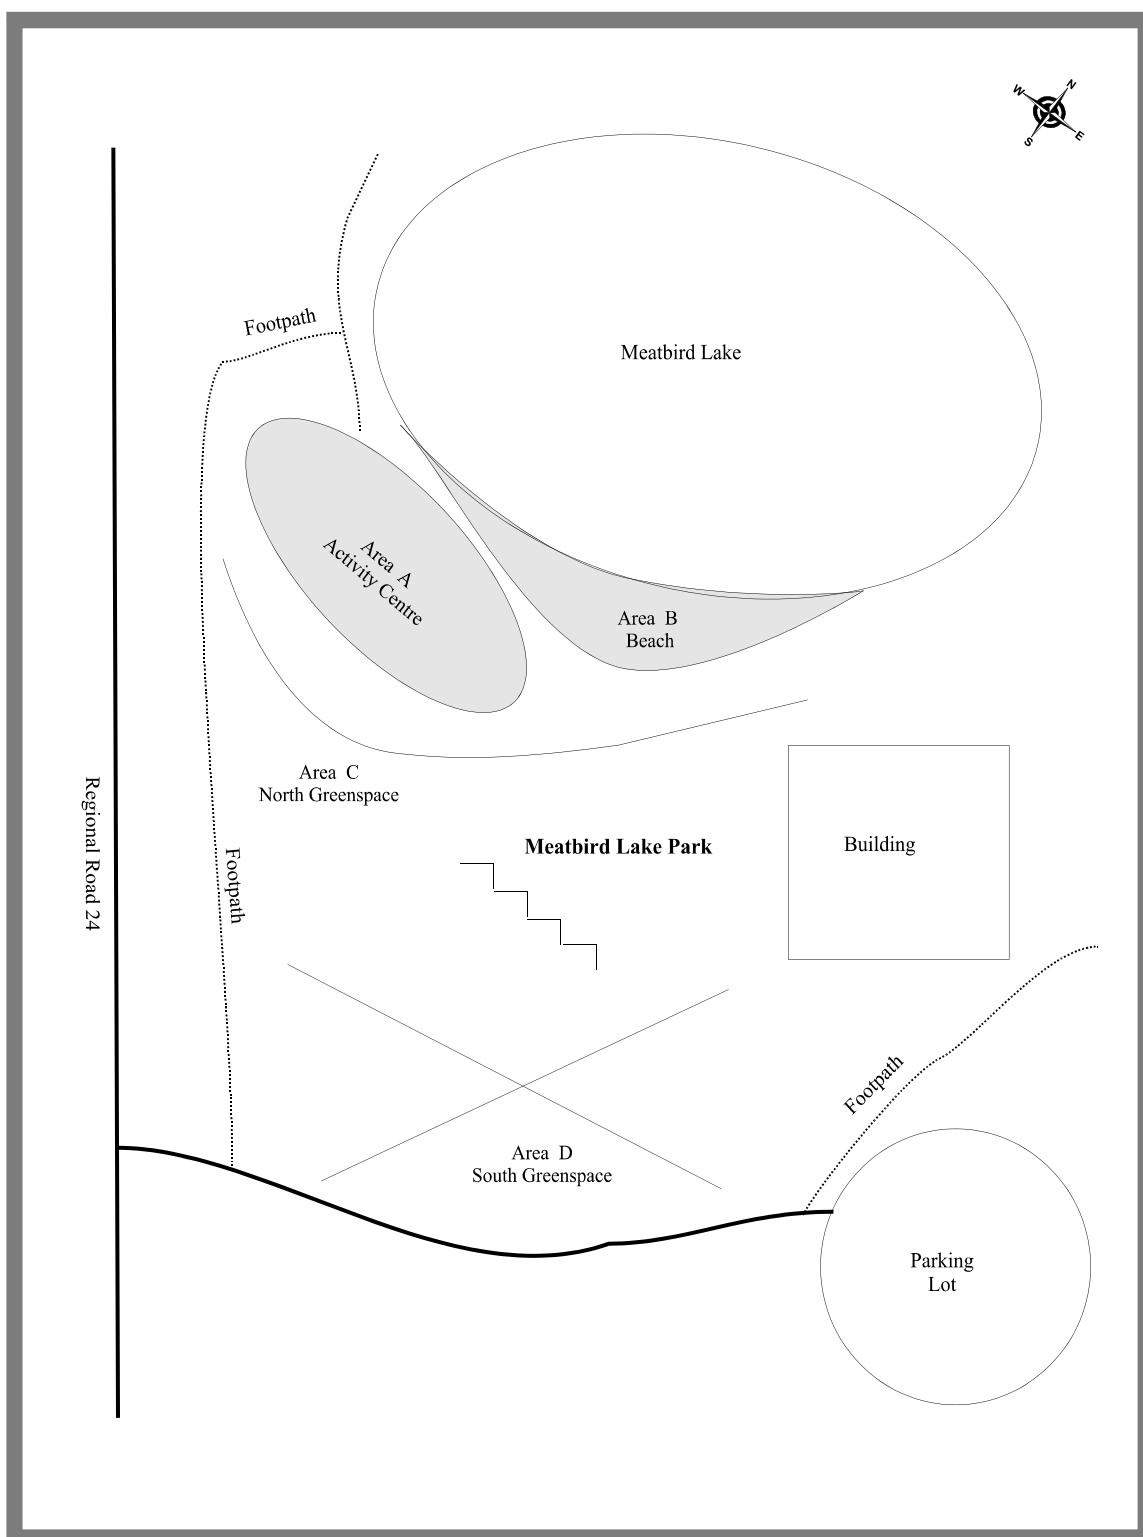

**Map C5.14.6:** Goodwill Playground, Lively - 2001.

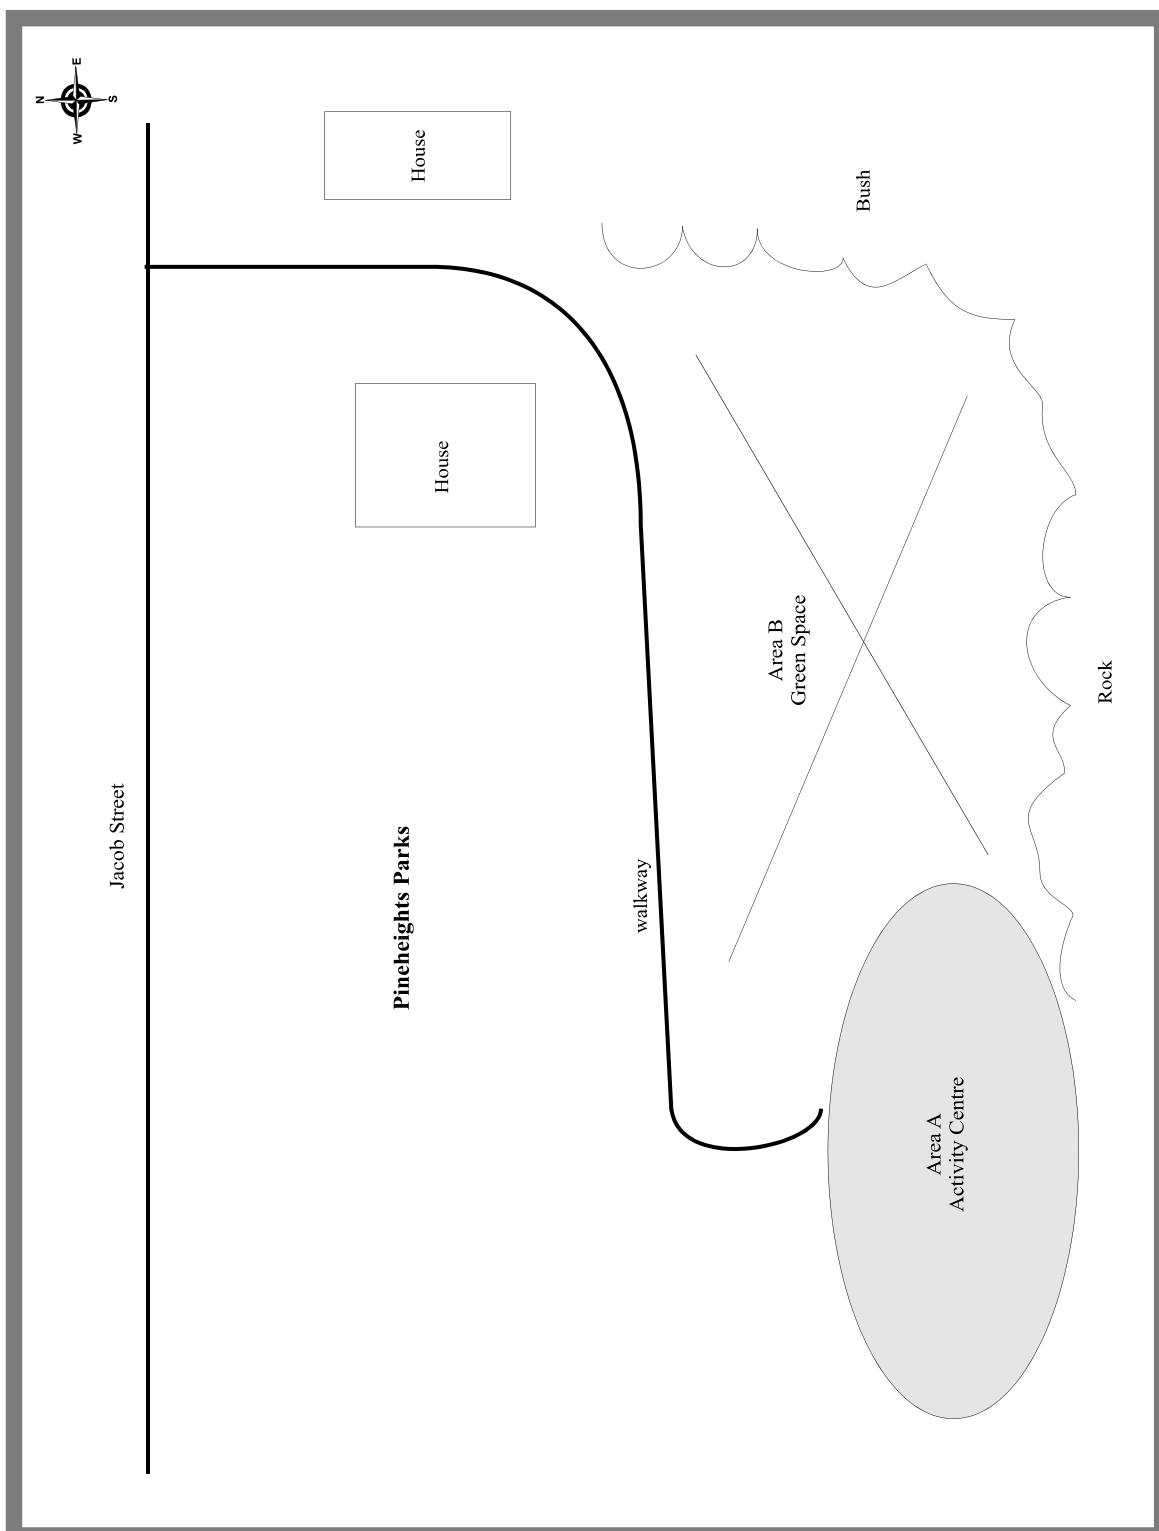

**Map C5.14.7: Hillcrest Sports Centre, Lively - 2001.**

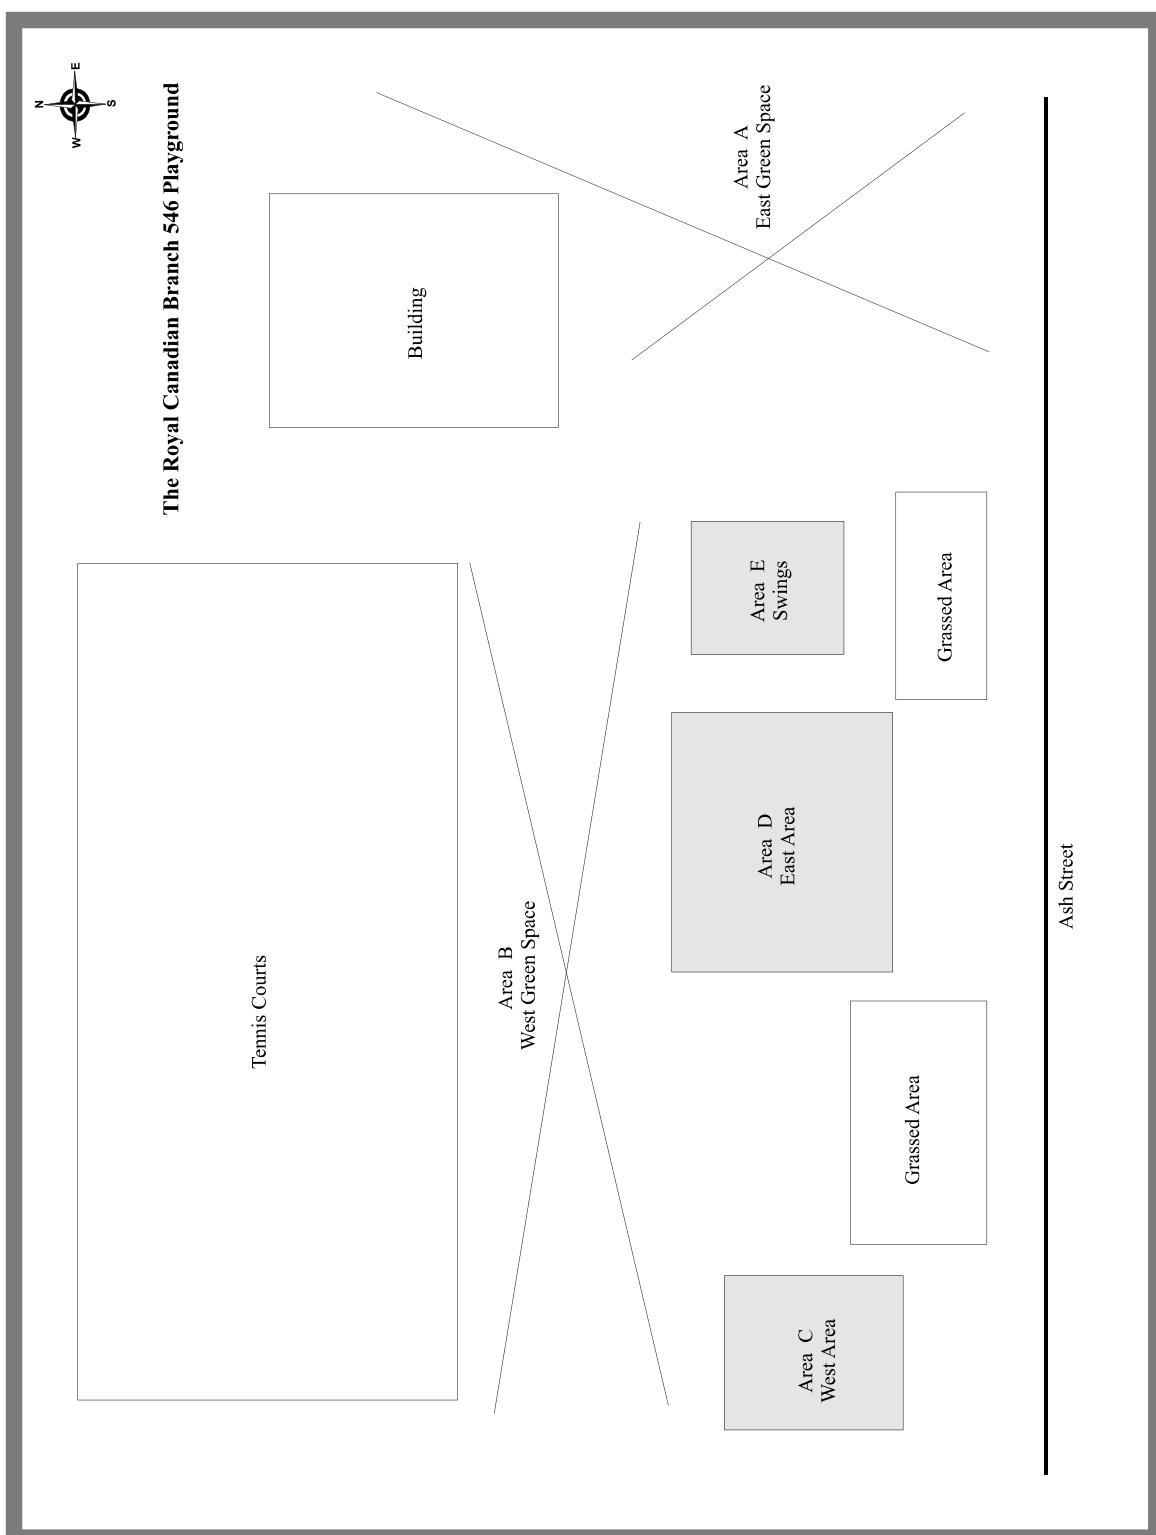

**Map C5.14.8:** Long Lake Park, Lively - 2001.

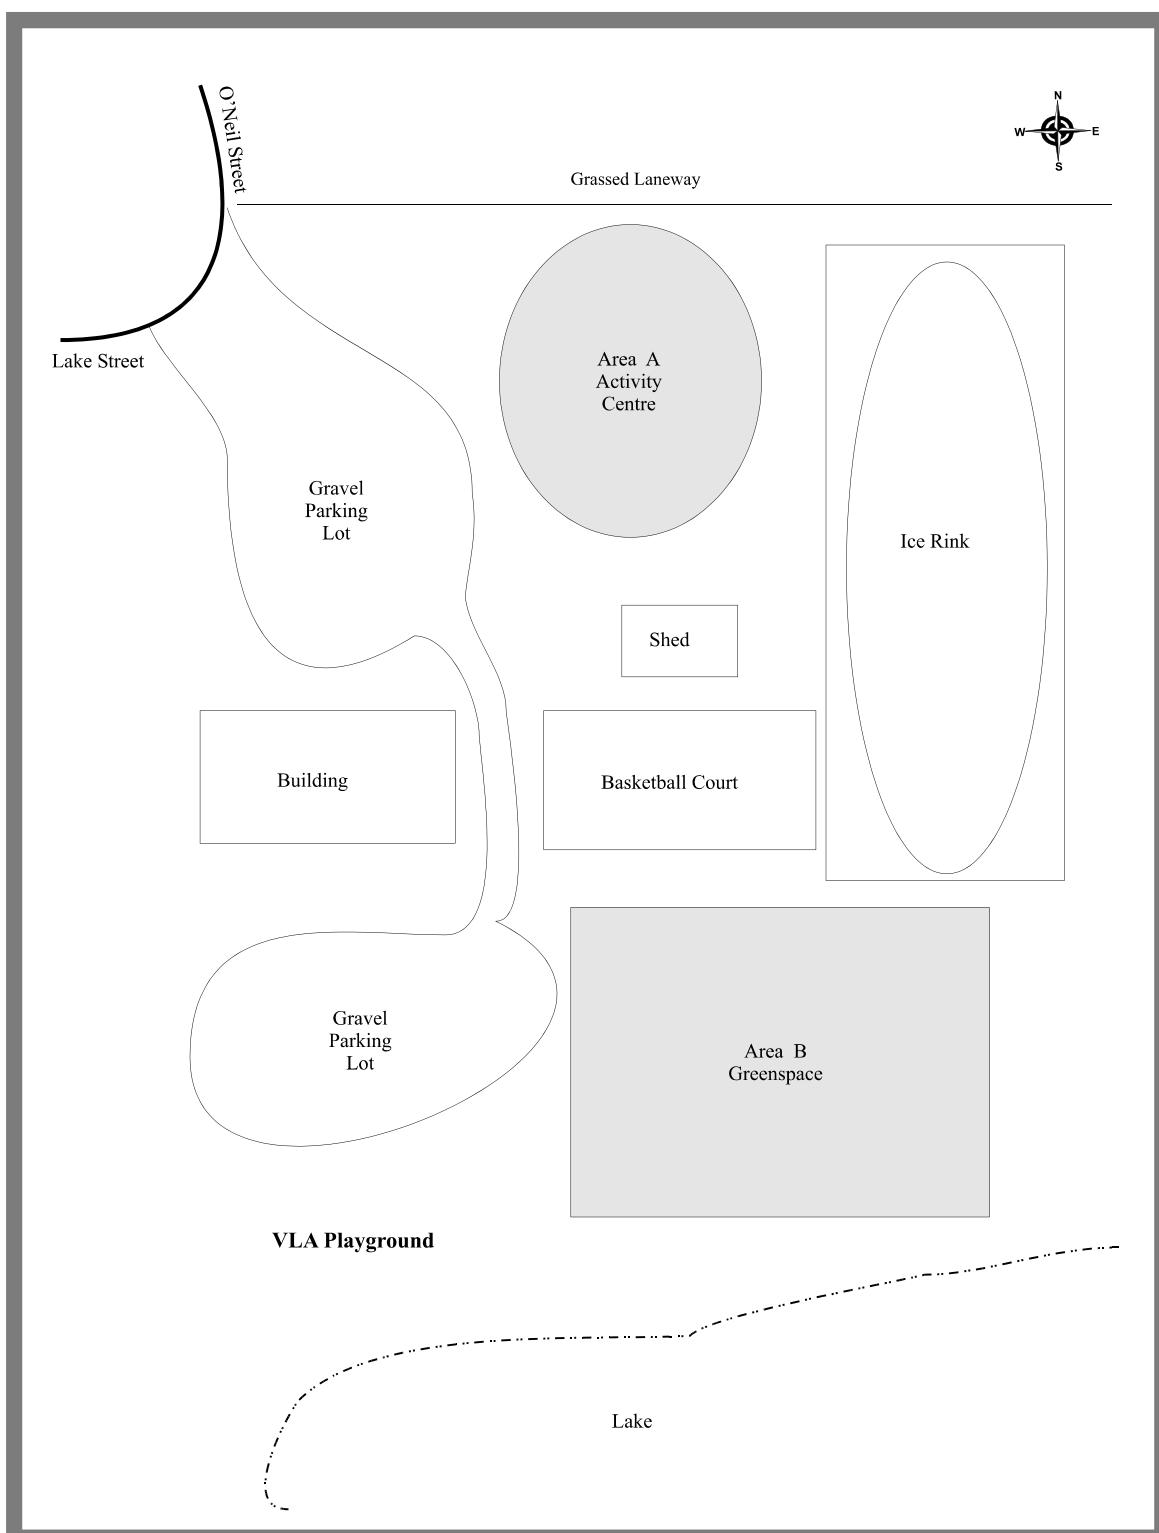

**Map C5.14.10:** Pineheights Playground, Lively - 2001.

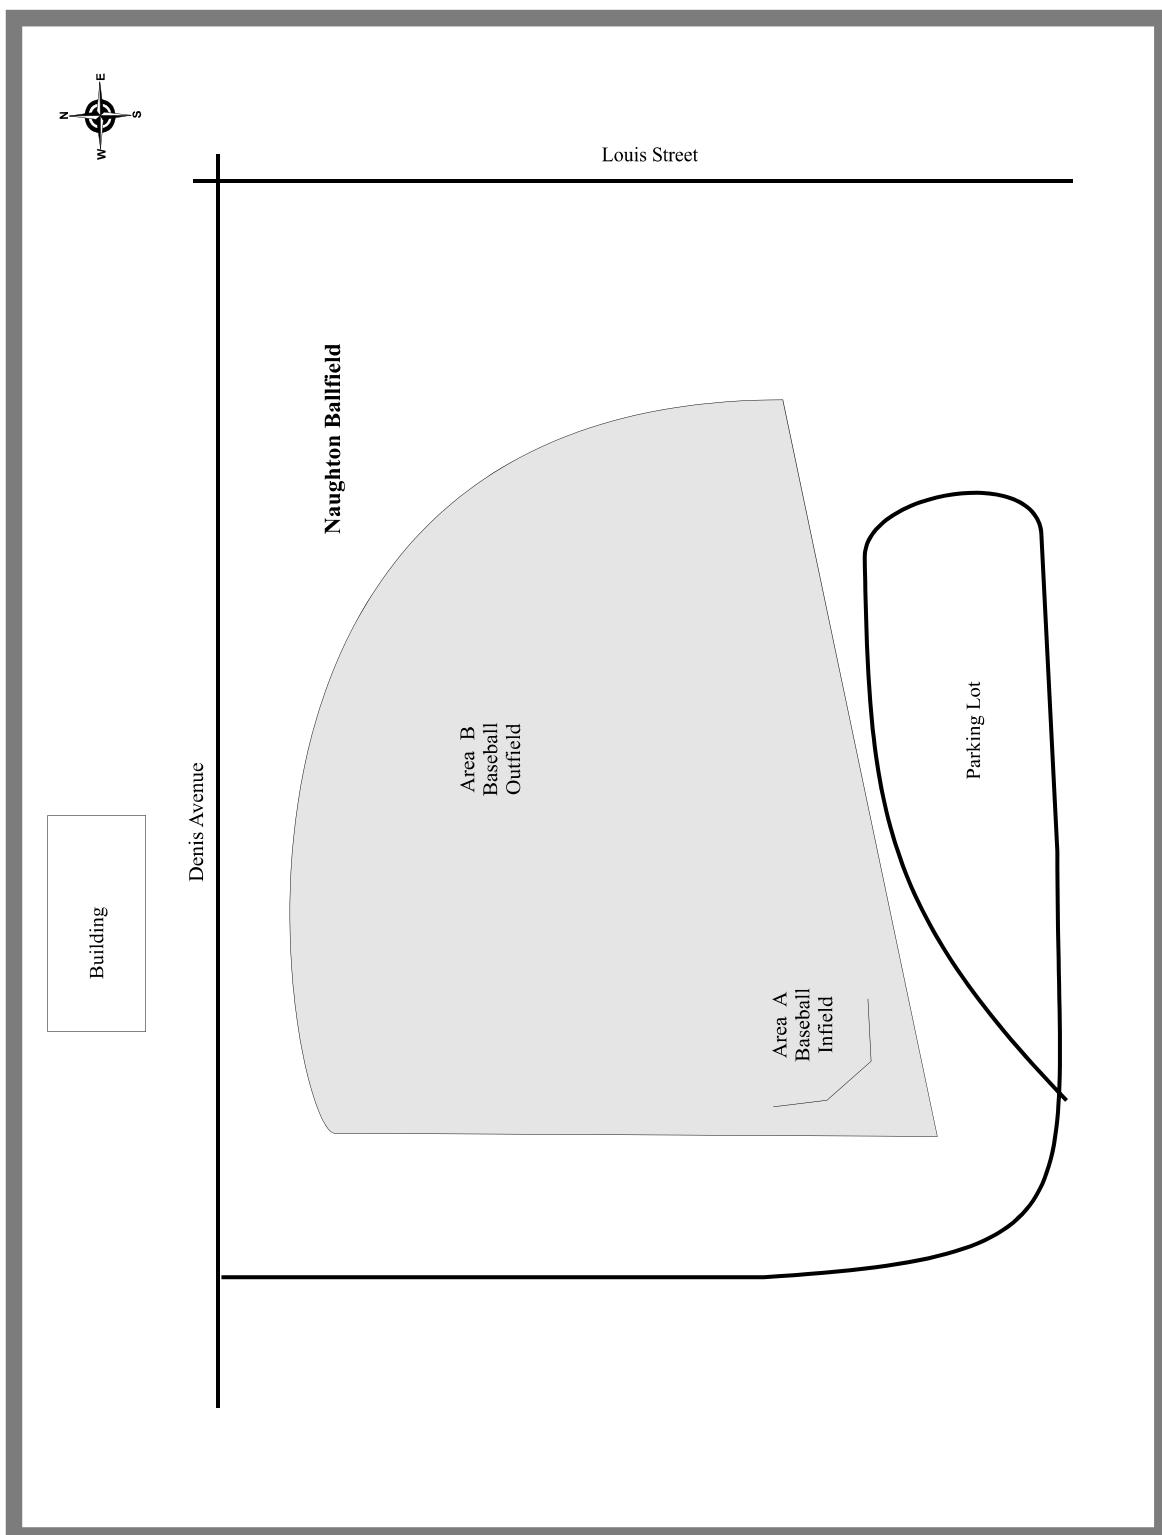

**Map C5.14.11:** Royal Canadian Legion Branch 546 Playground, Lively - 2001.

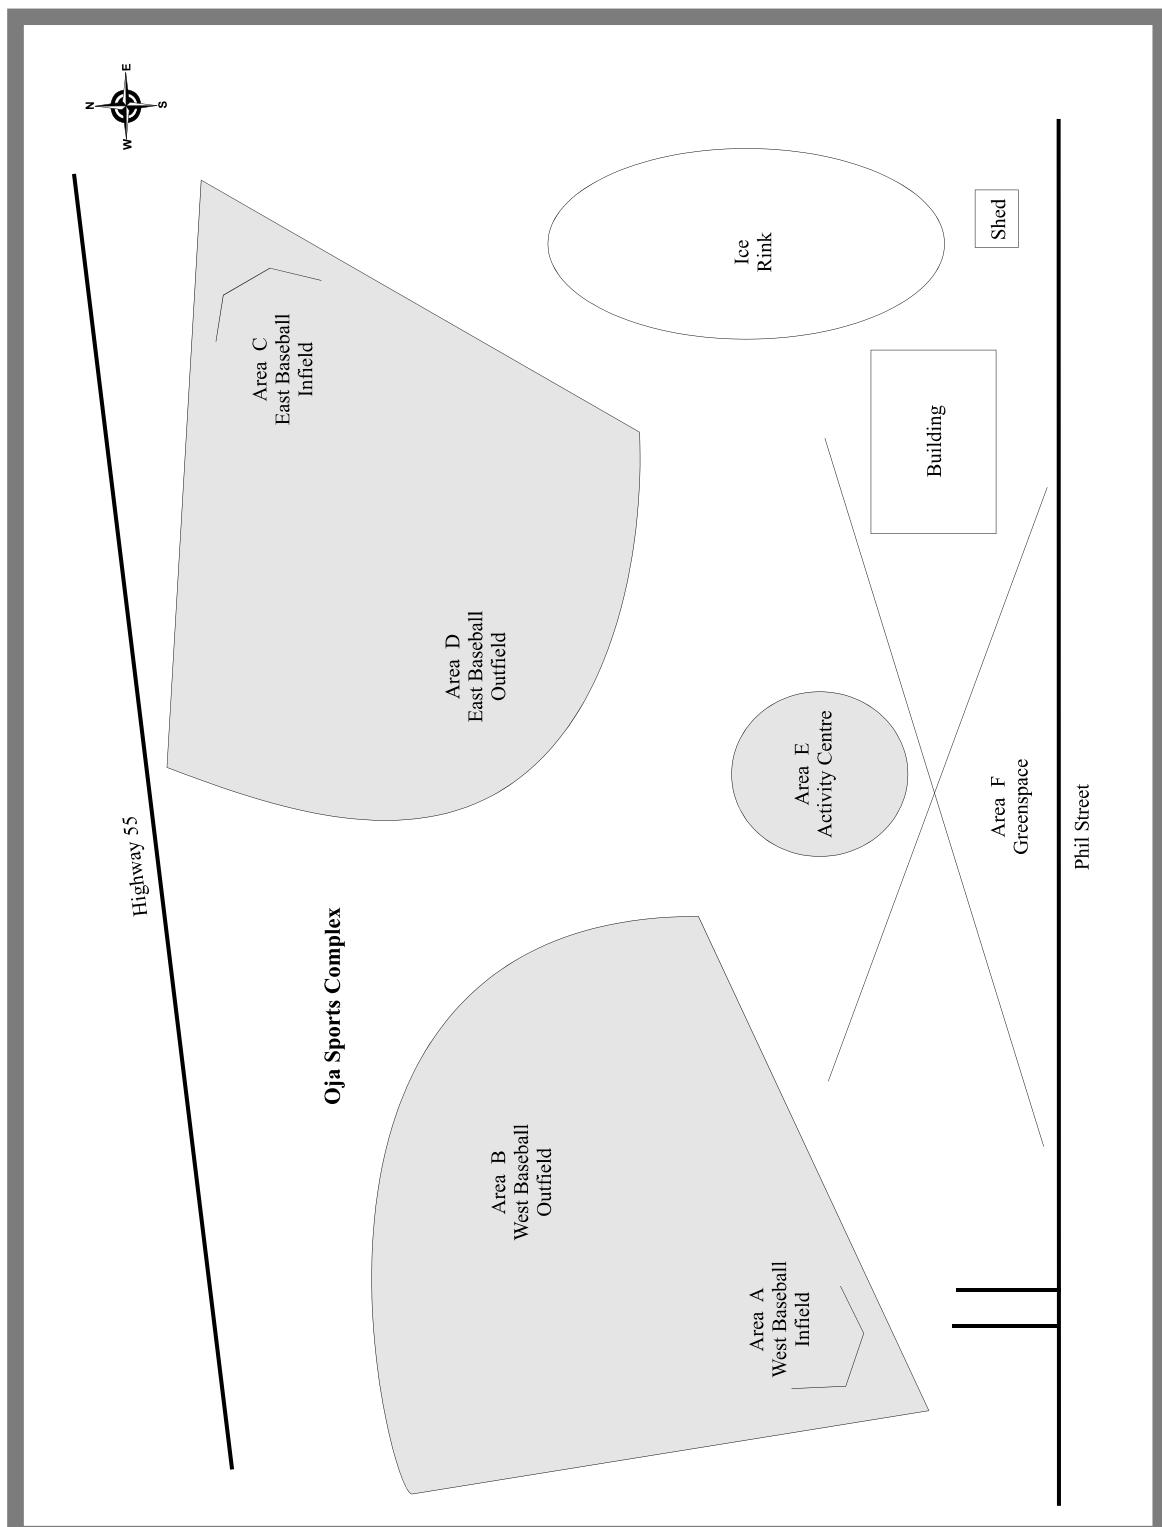

**Map C5.14.12:** V.L.A. Playground, Lively - 2001.

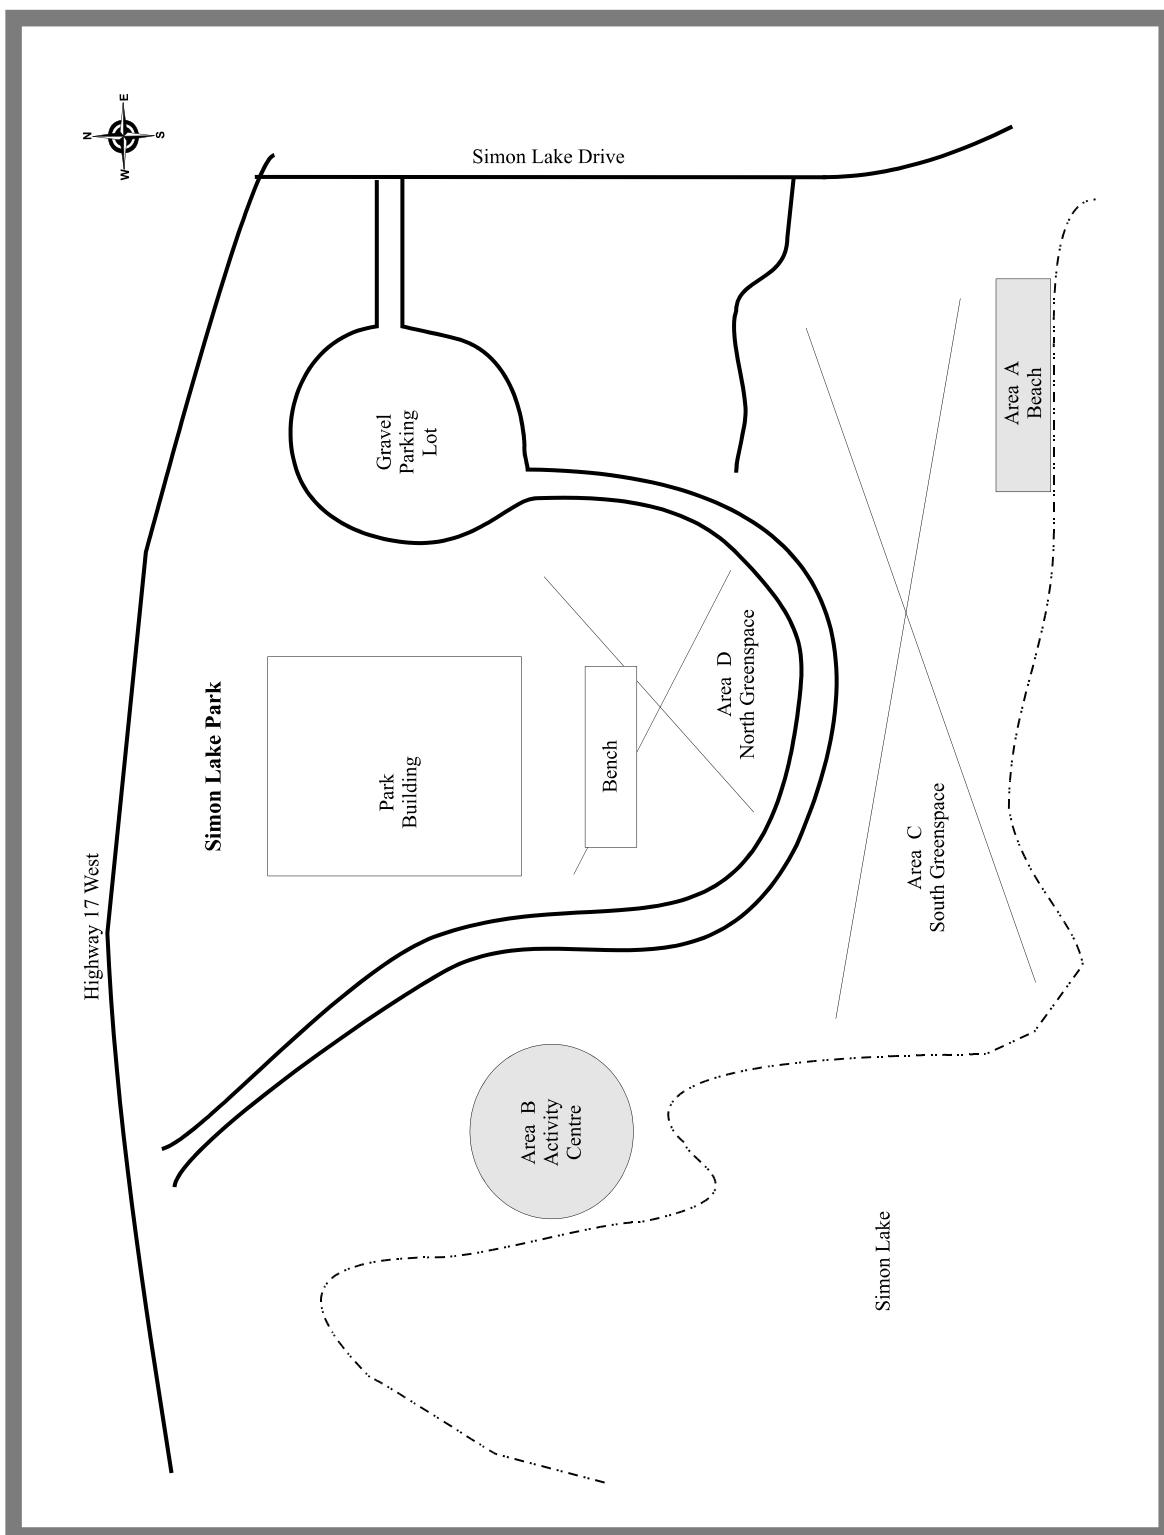

## 5.15 Naughton Park Maps

**Map C5.15.1:** Naughton Ballfield, Naughton - 2001.

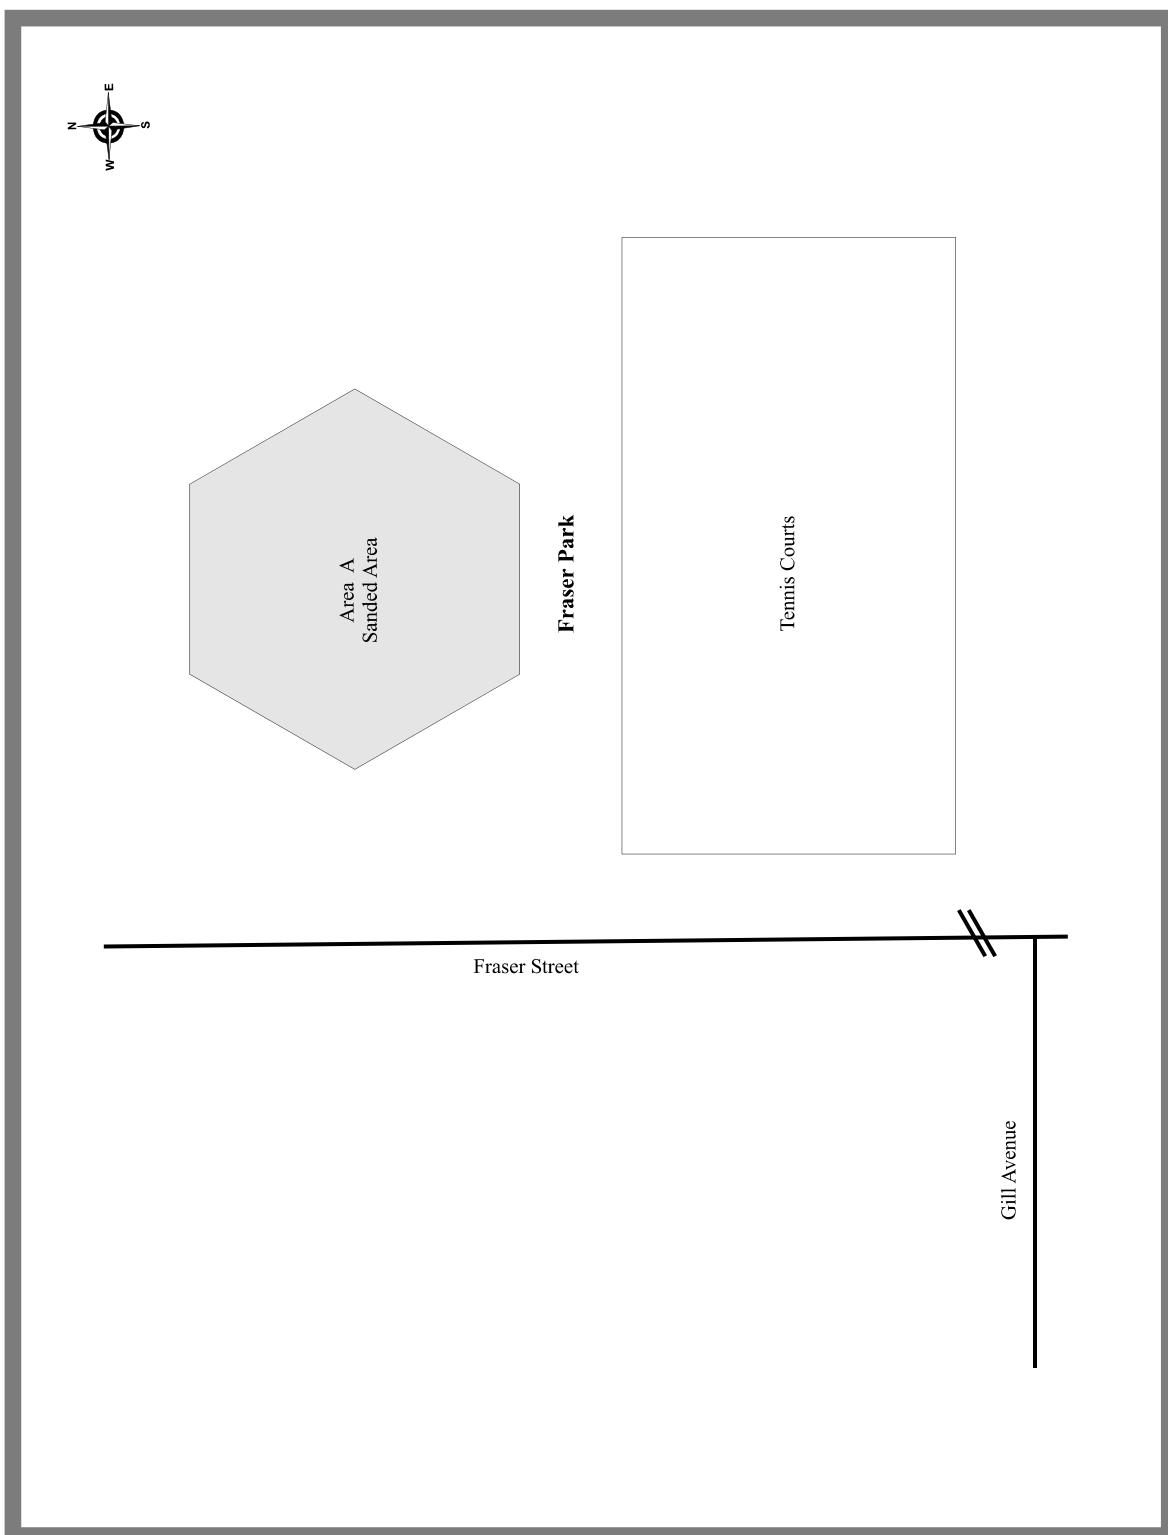

**Map C5.15.2:** Oja Sports Complex (Simon Lake Sports Complex), Naughton - 2001.

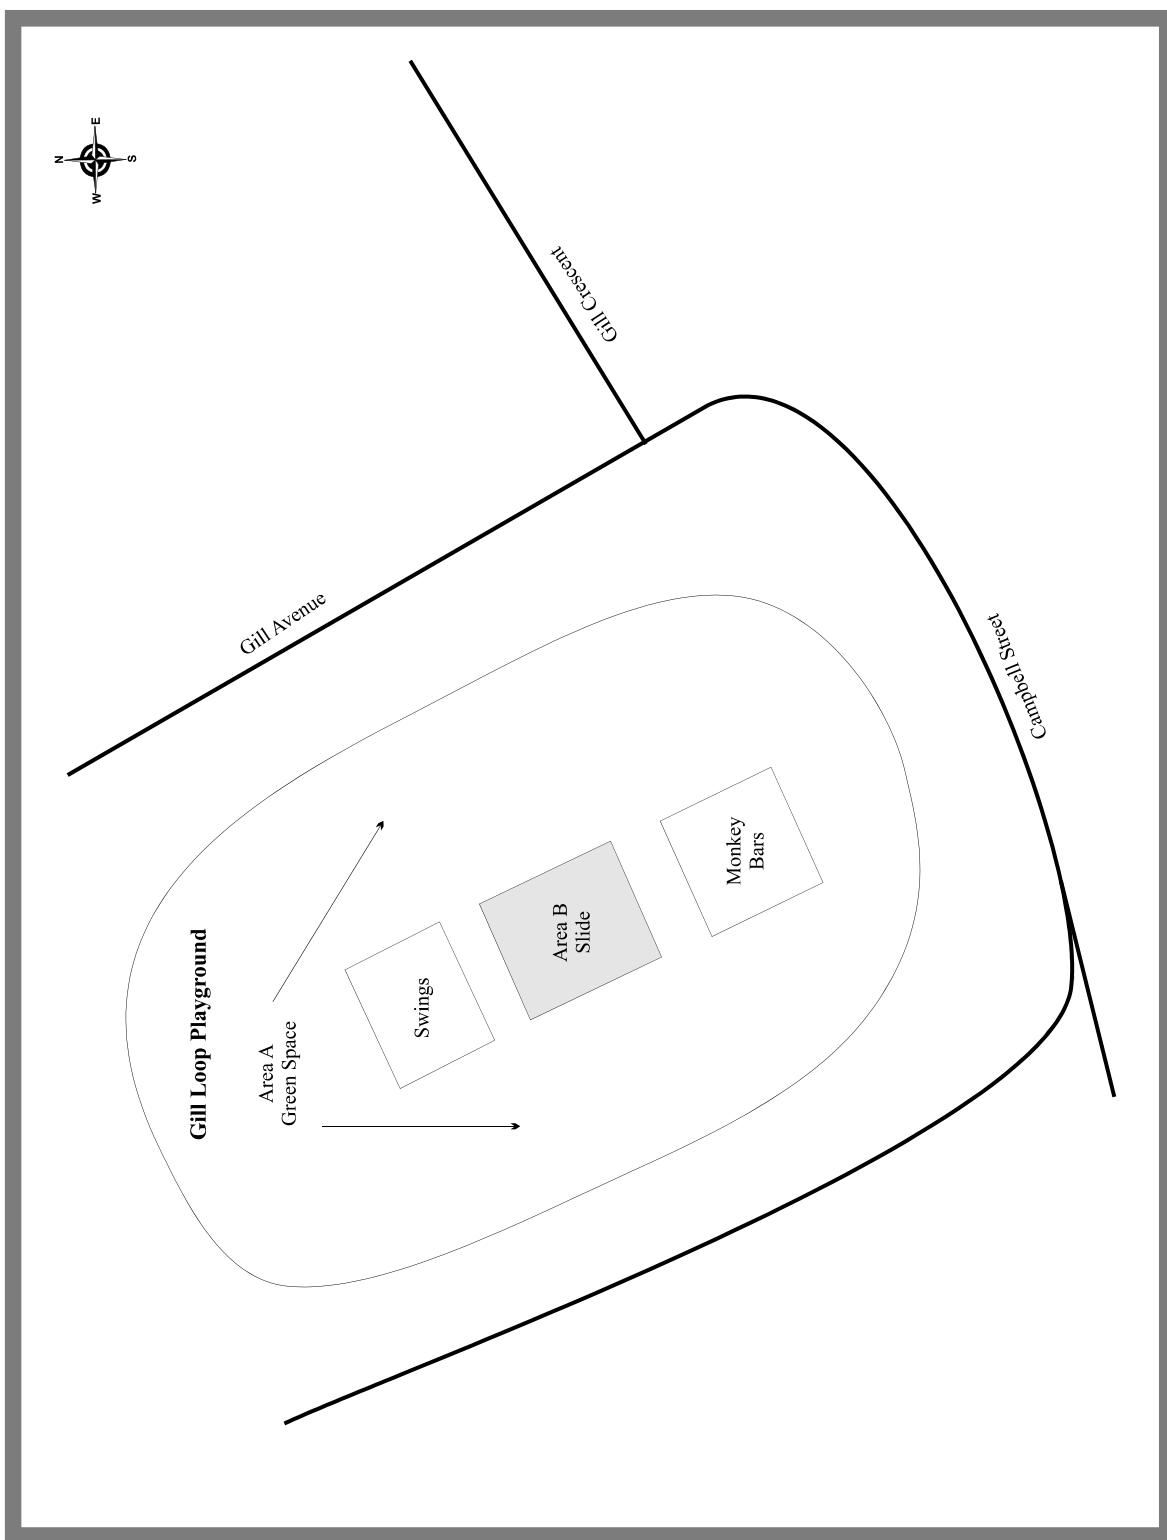

**Map C5.15.3:** Simon Lake Park, Naughton - 2001.

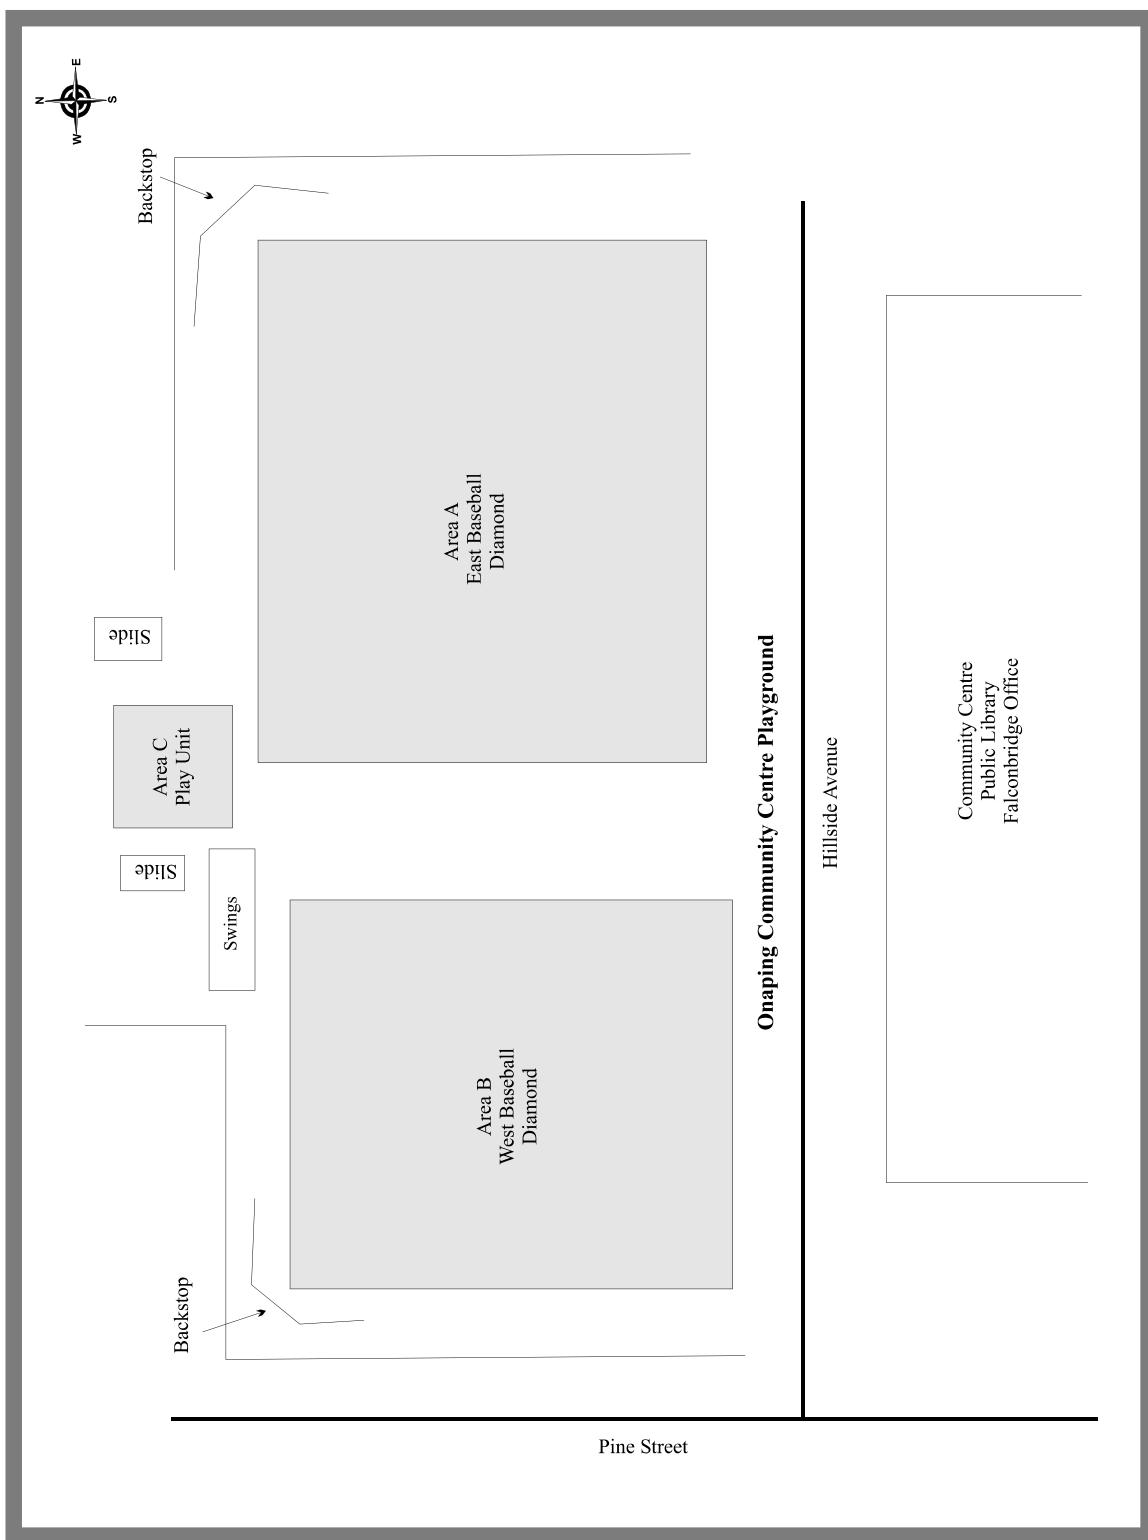

## 5.16 Onaping Falls Park Maps

**Map C5.16.1:** Fraser Park (Onaping Tot Lot), Onaping Falls - 2001.

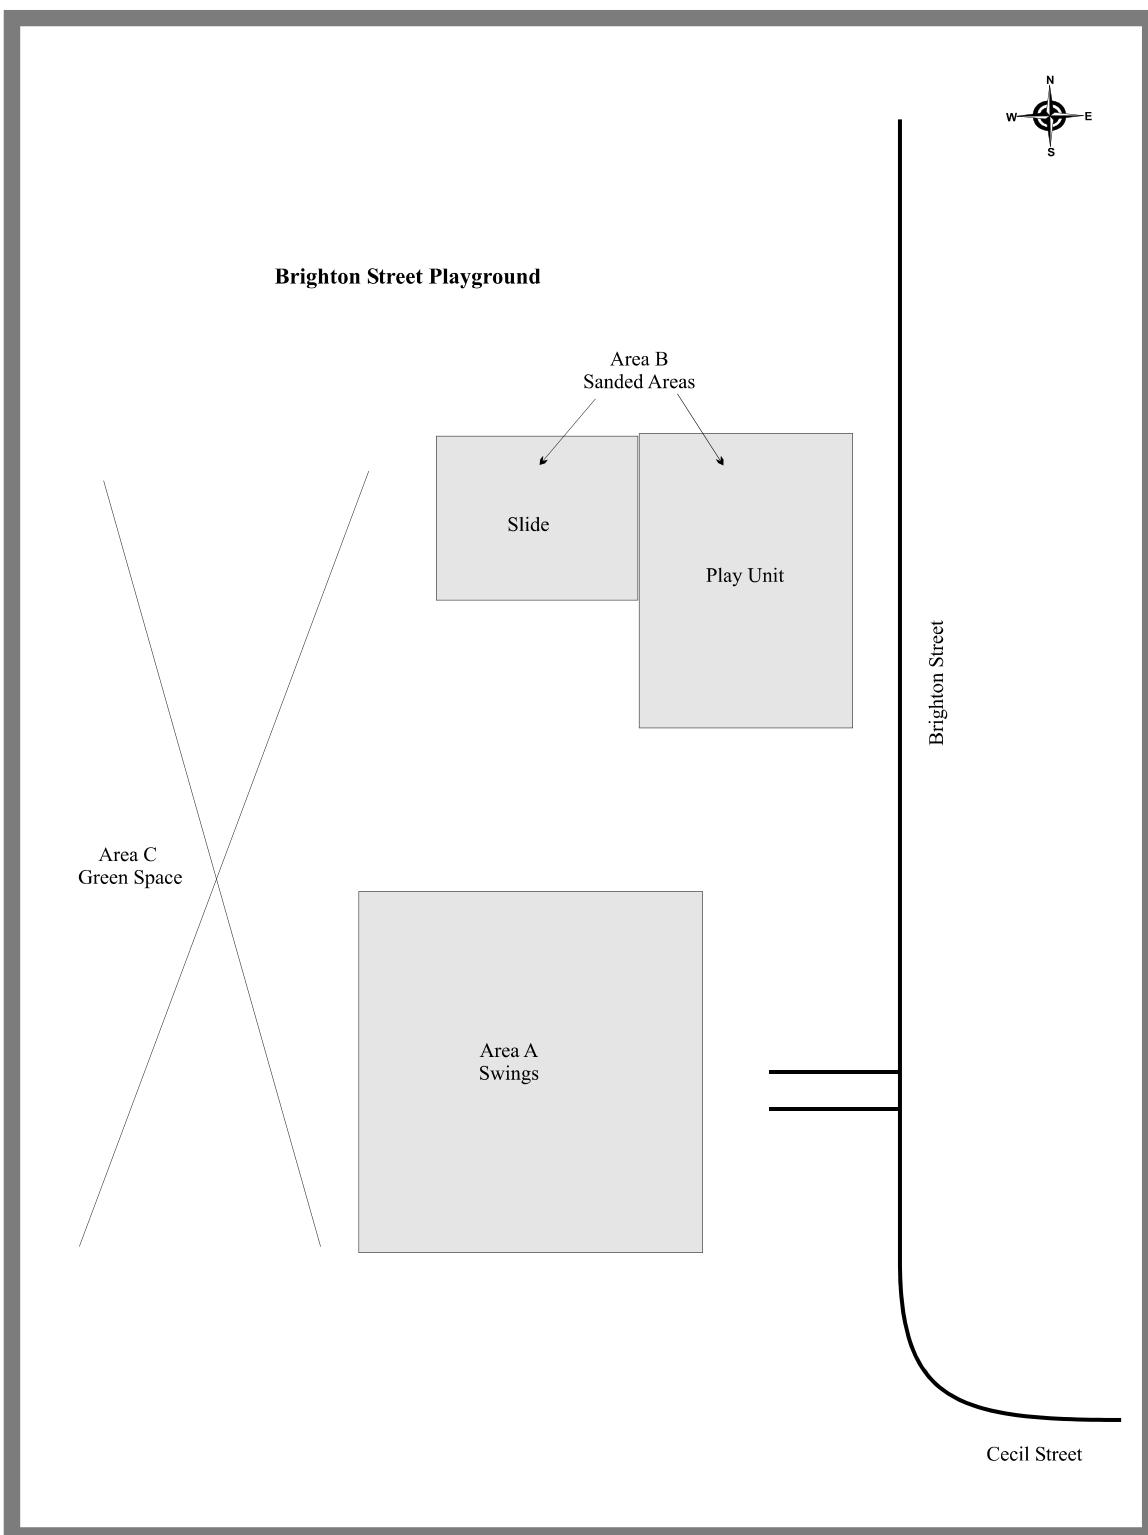

**Map C5.16.2:** Gill Loop Playground, Onaping Falls - 2001.

**Map C5.16.3:** Onaping Community Centre Playground, Onaping Falls - 2001.

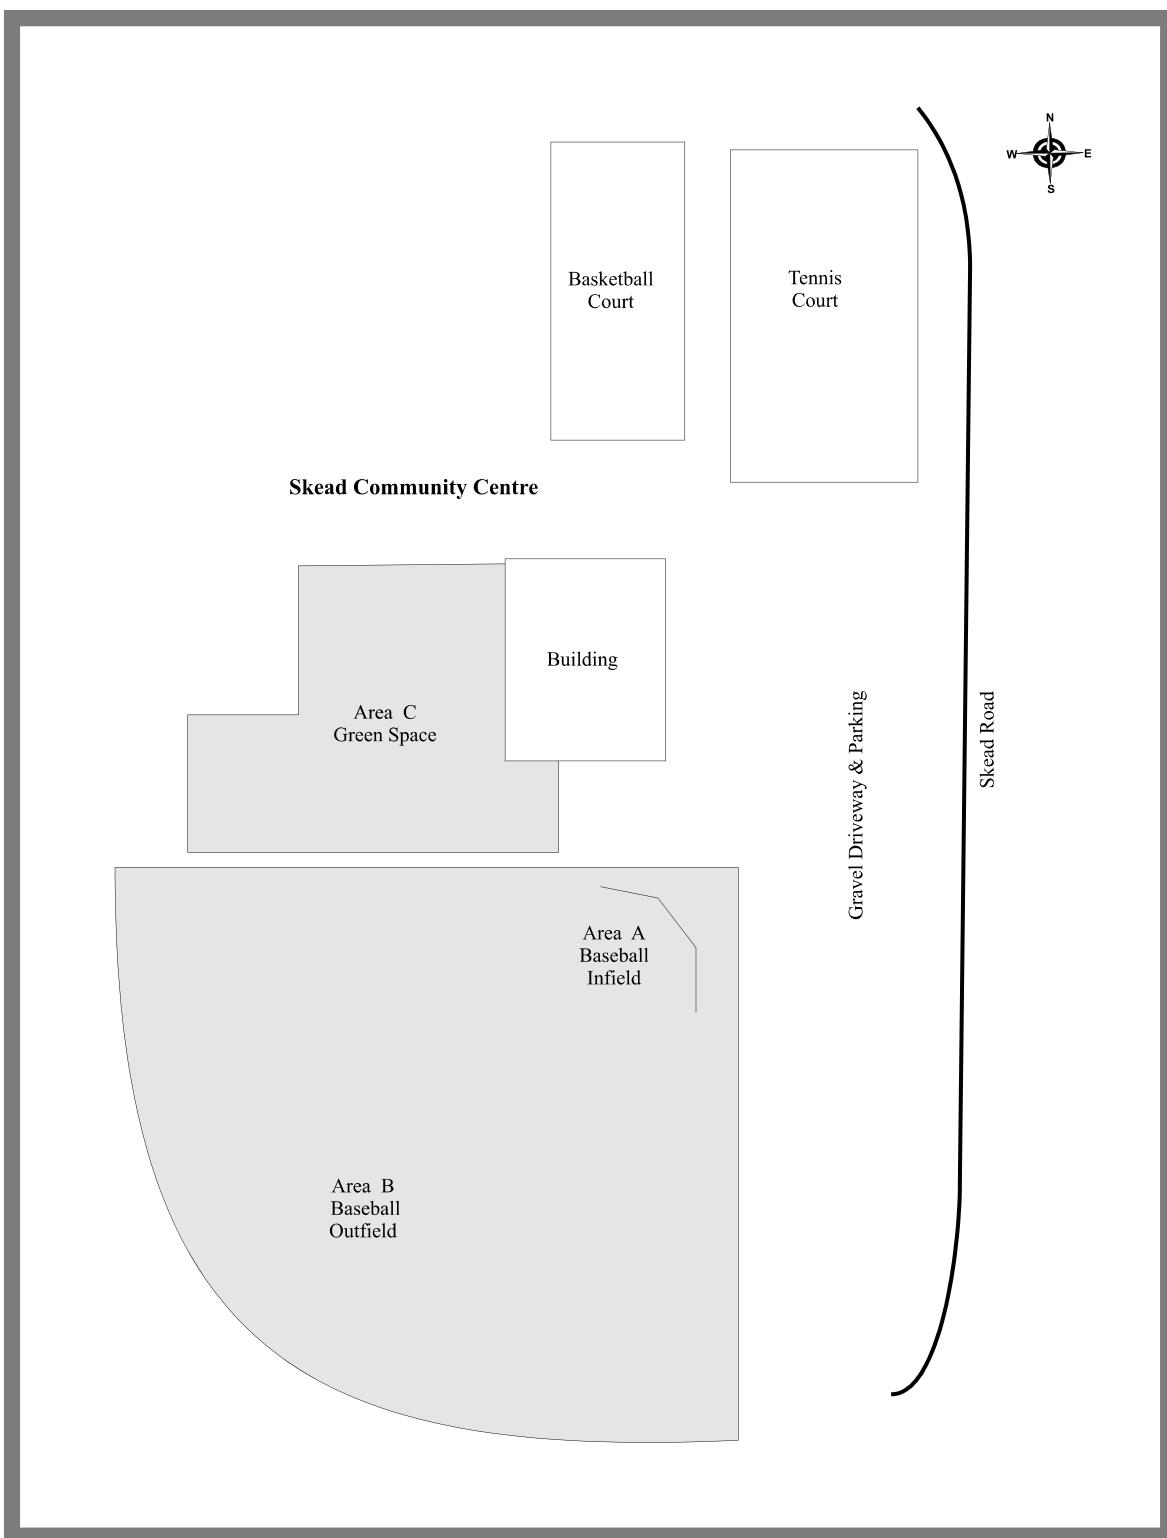

## 5.17 Skead Park Maps

**Map C5.17.1:** Brighton Street Playground, Skead - 2001.

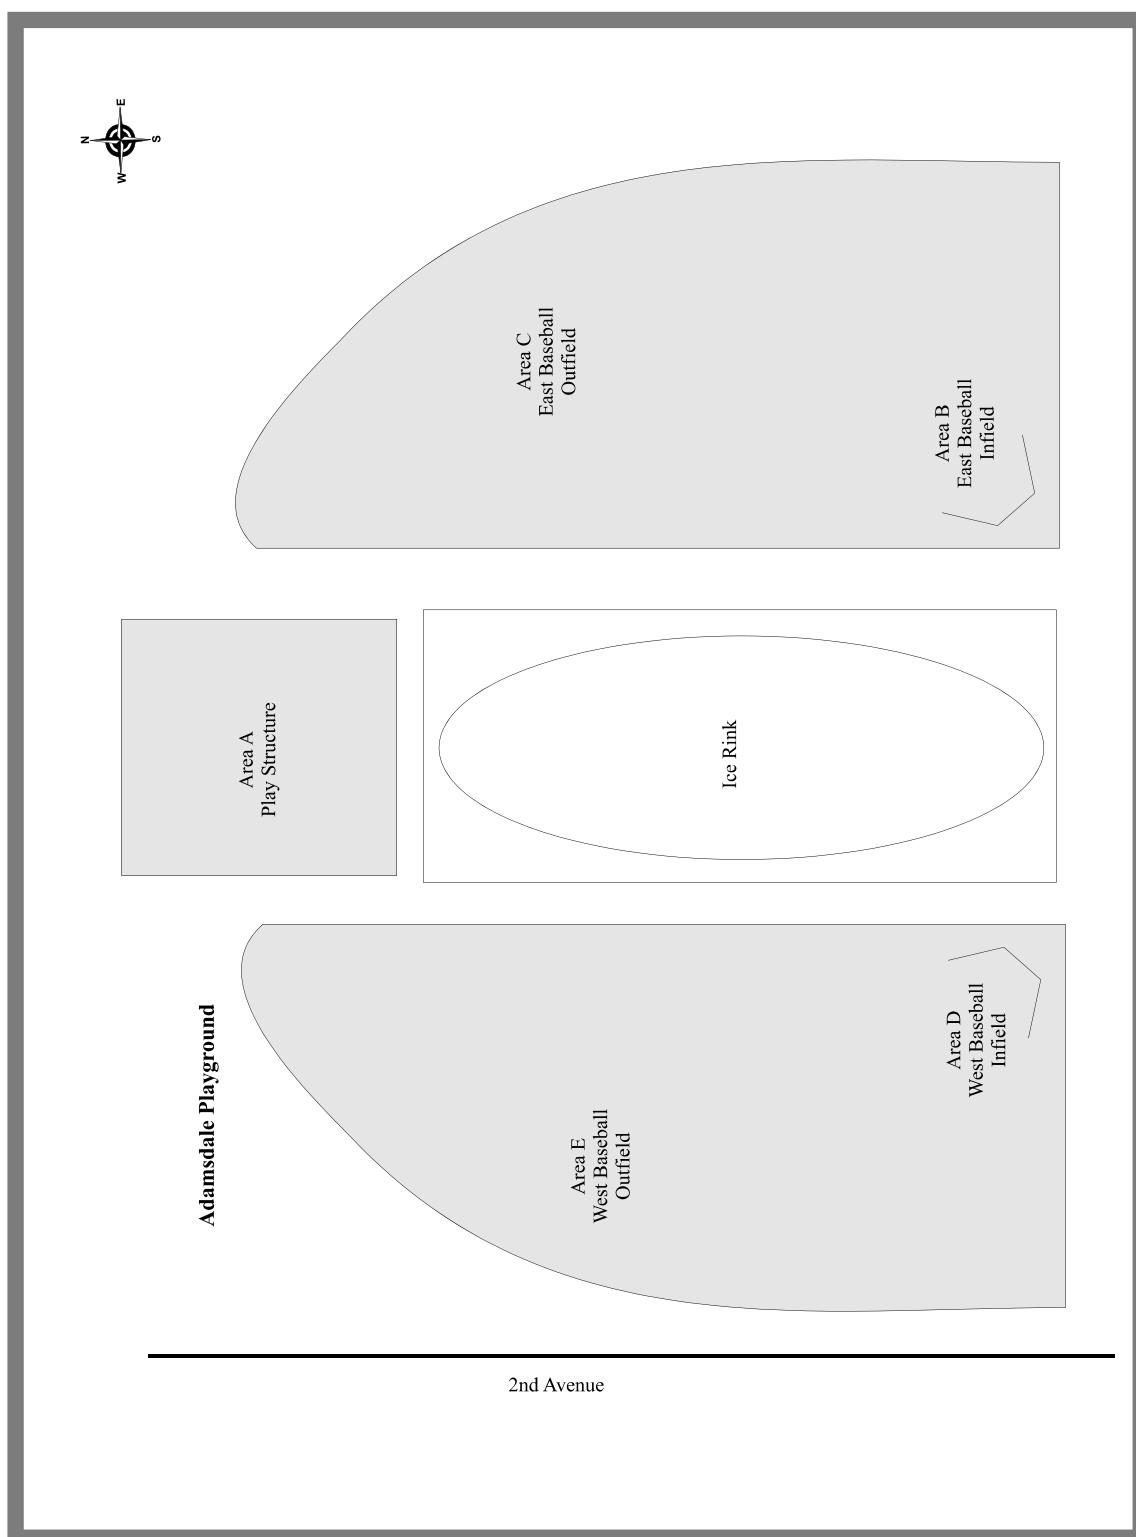

**Map C5.17.2:** MacLennan Playground (Silver Birch Crescent Playground), Skead - 2001.

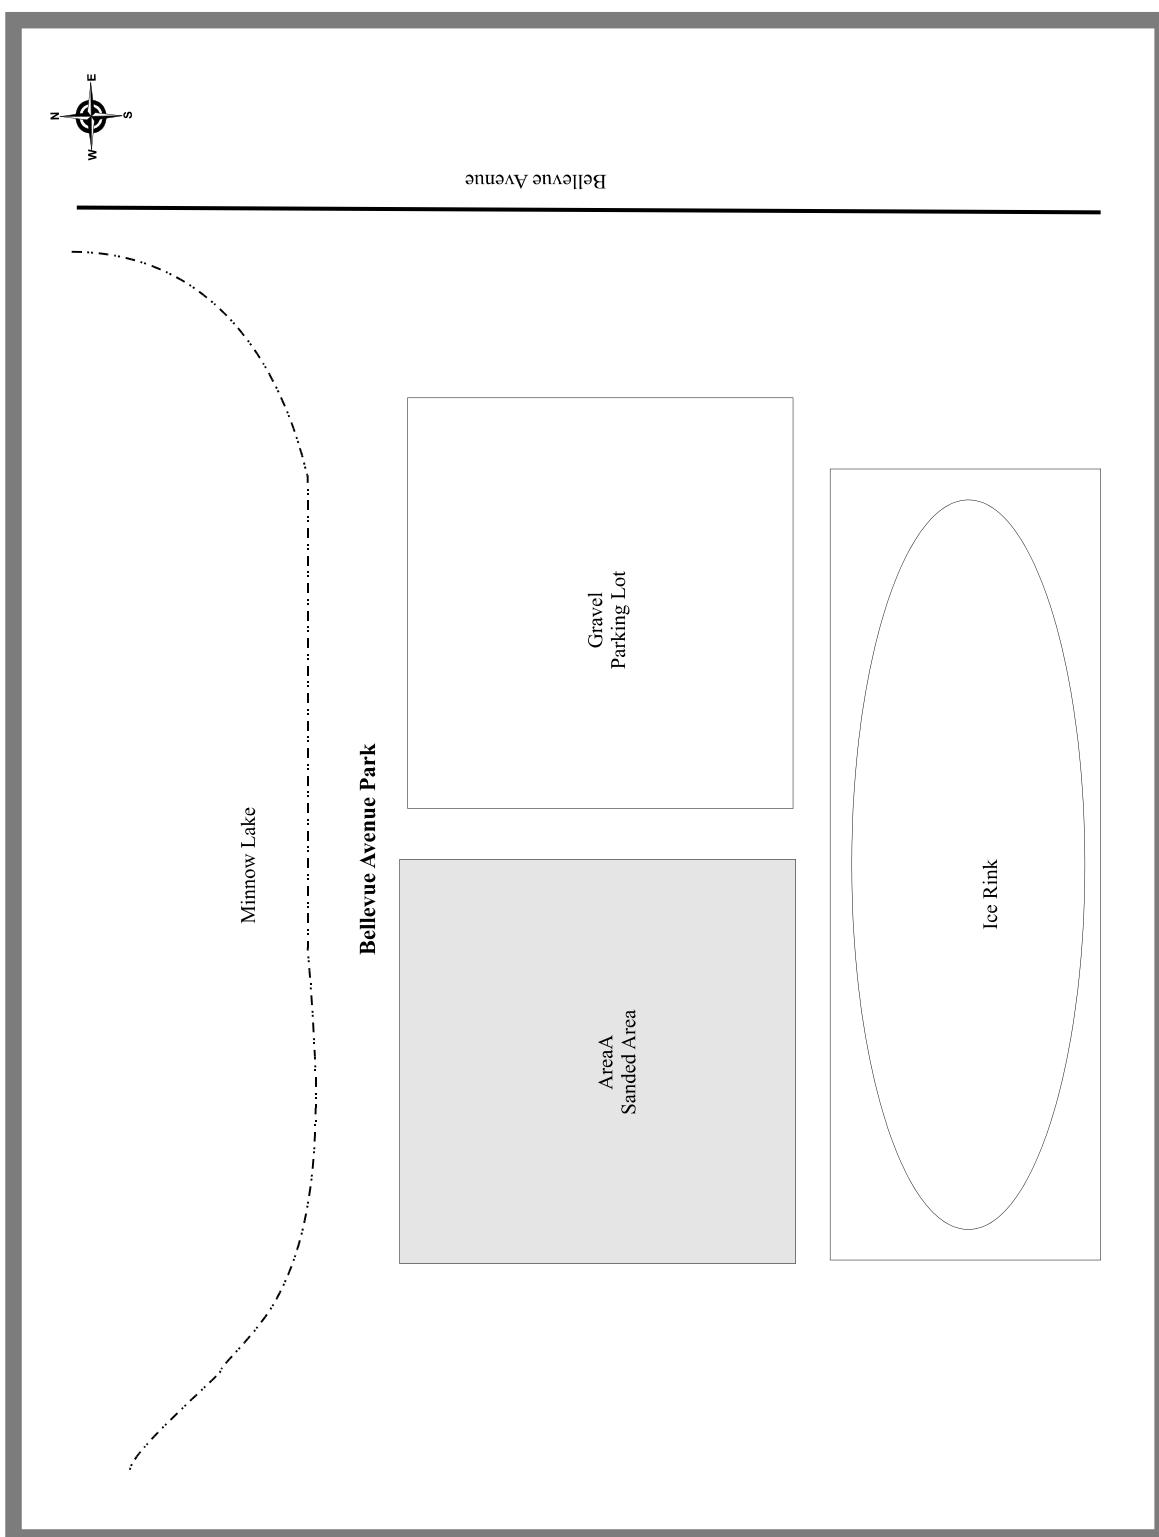

**Map C5.17.3:** Skead Community Centre, Skead - 2001.

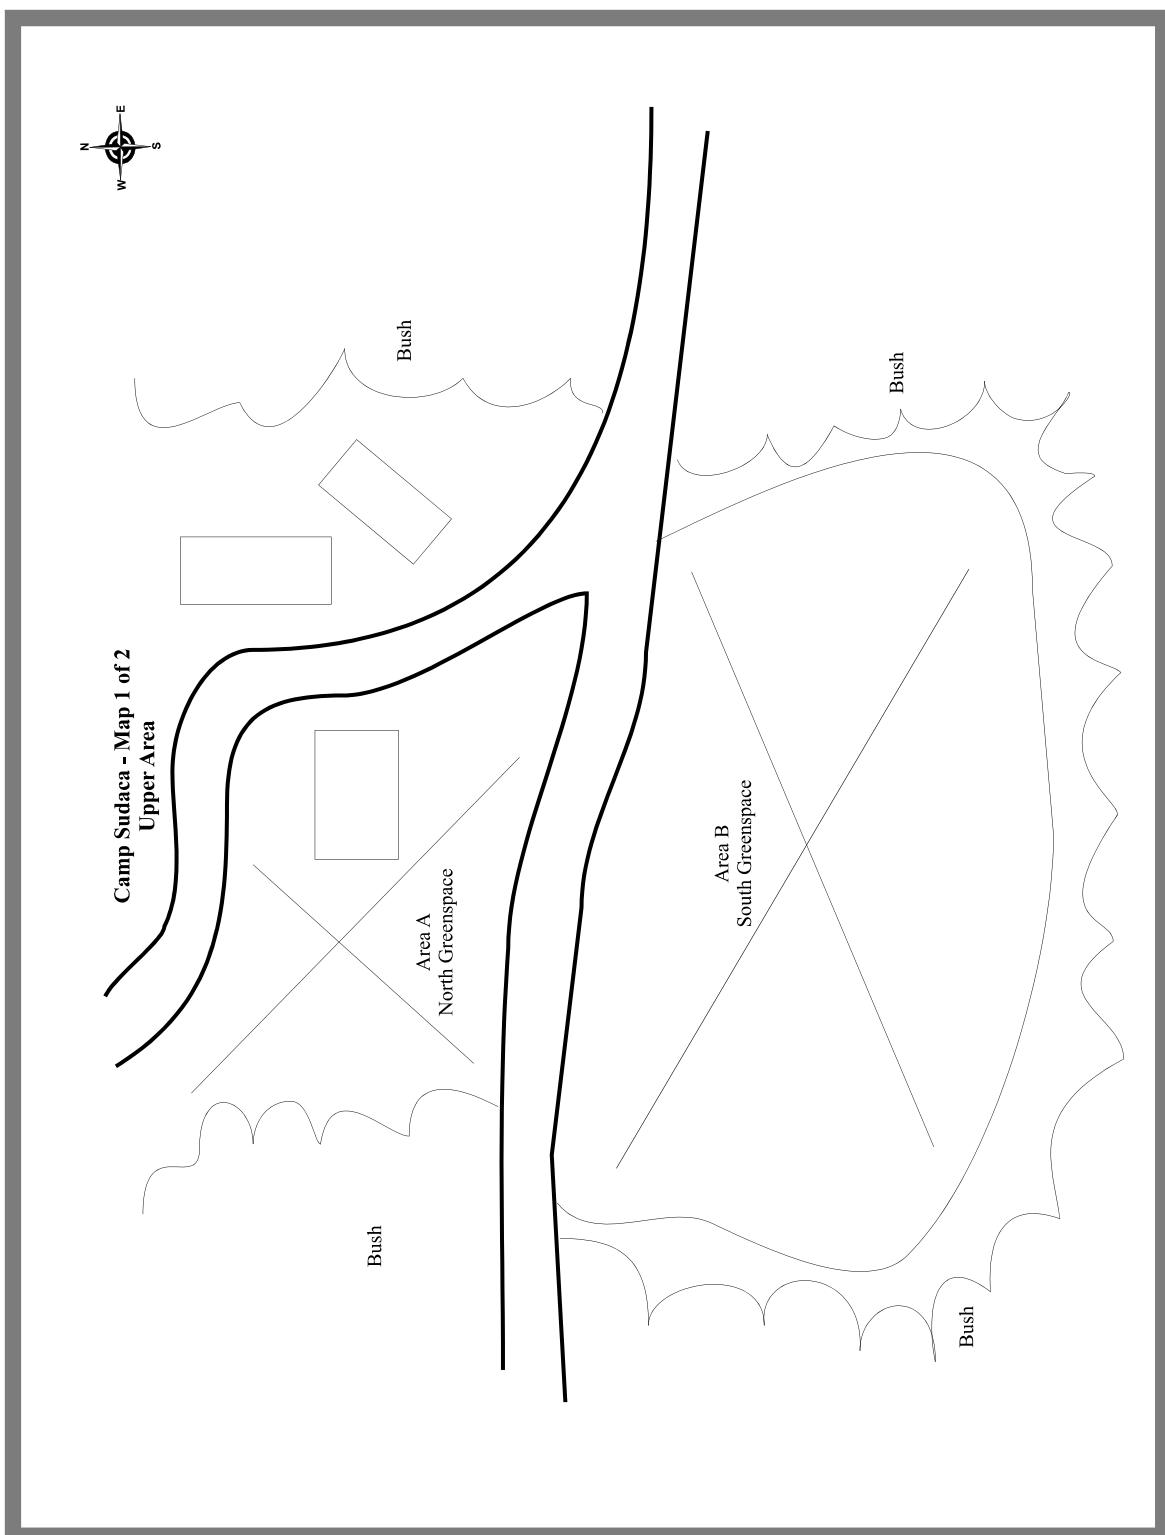

## 5.18 Sudbury East Park Maps

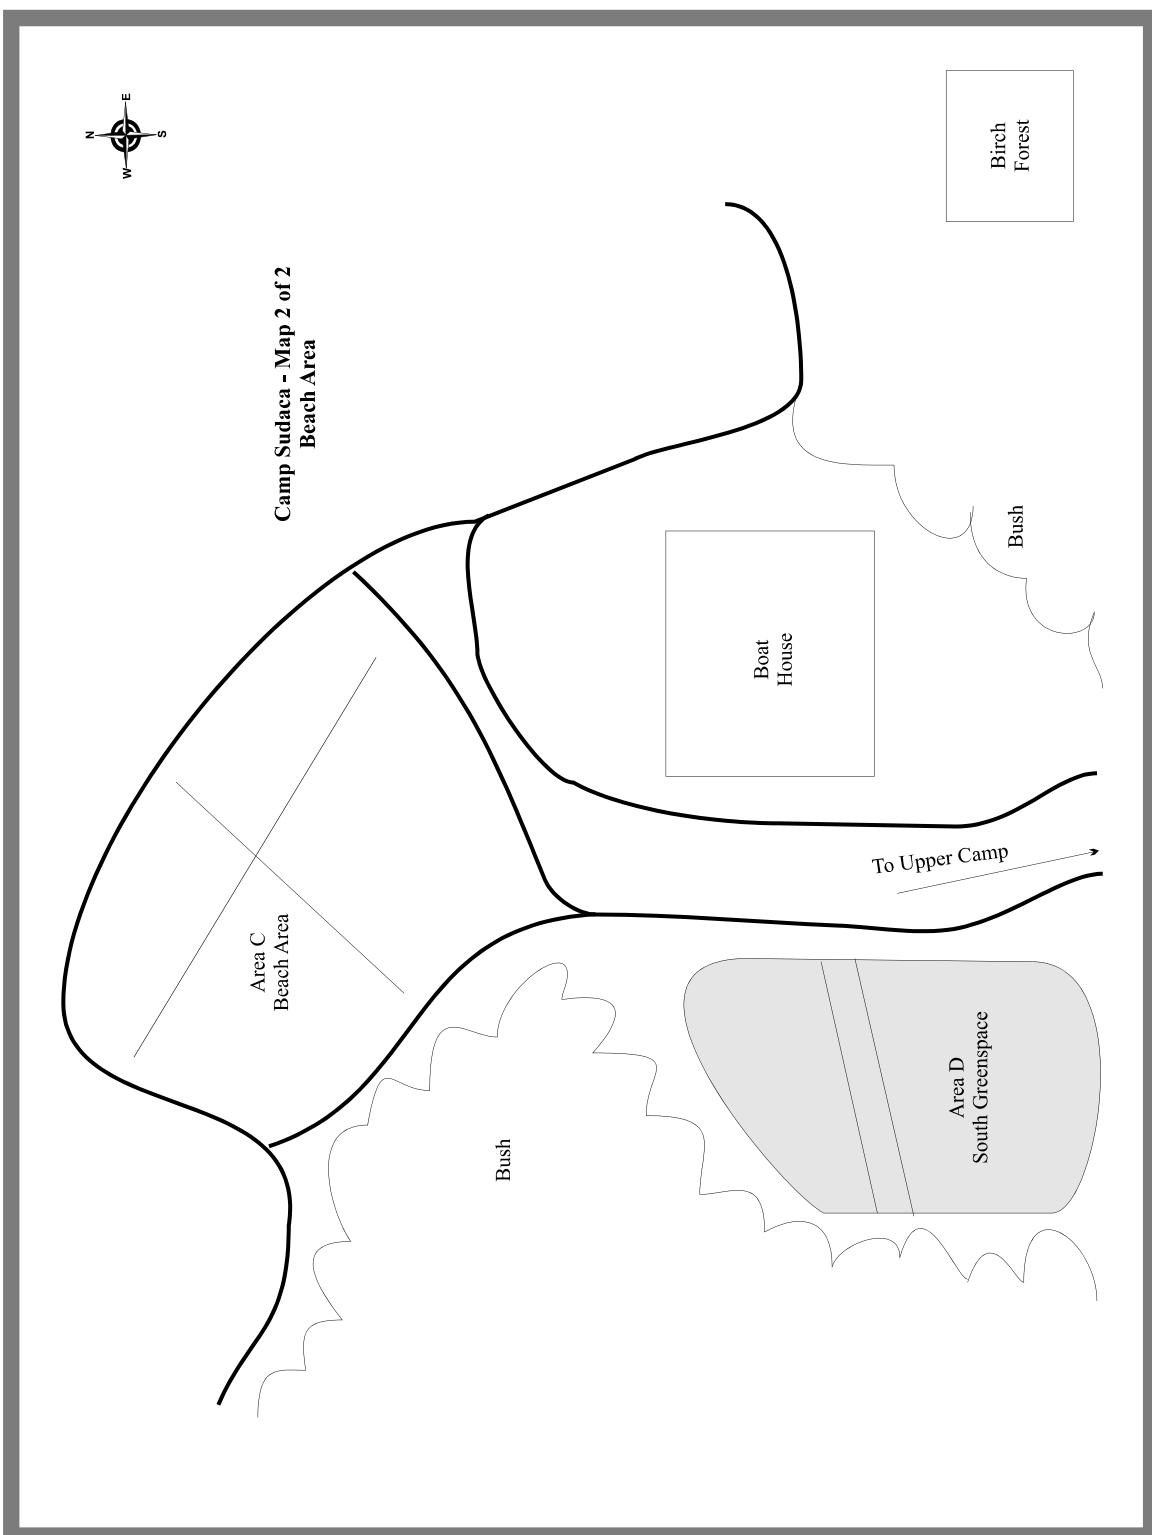

**Map C5.18.1:** Adamsdale Playground, Sudbury East - 2001.

**Map C5.18.2:** Bellevue Avenue Park, Sudbury East - 2001.

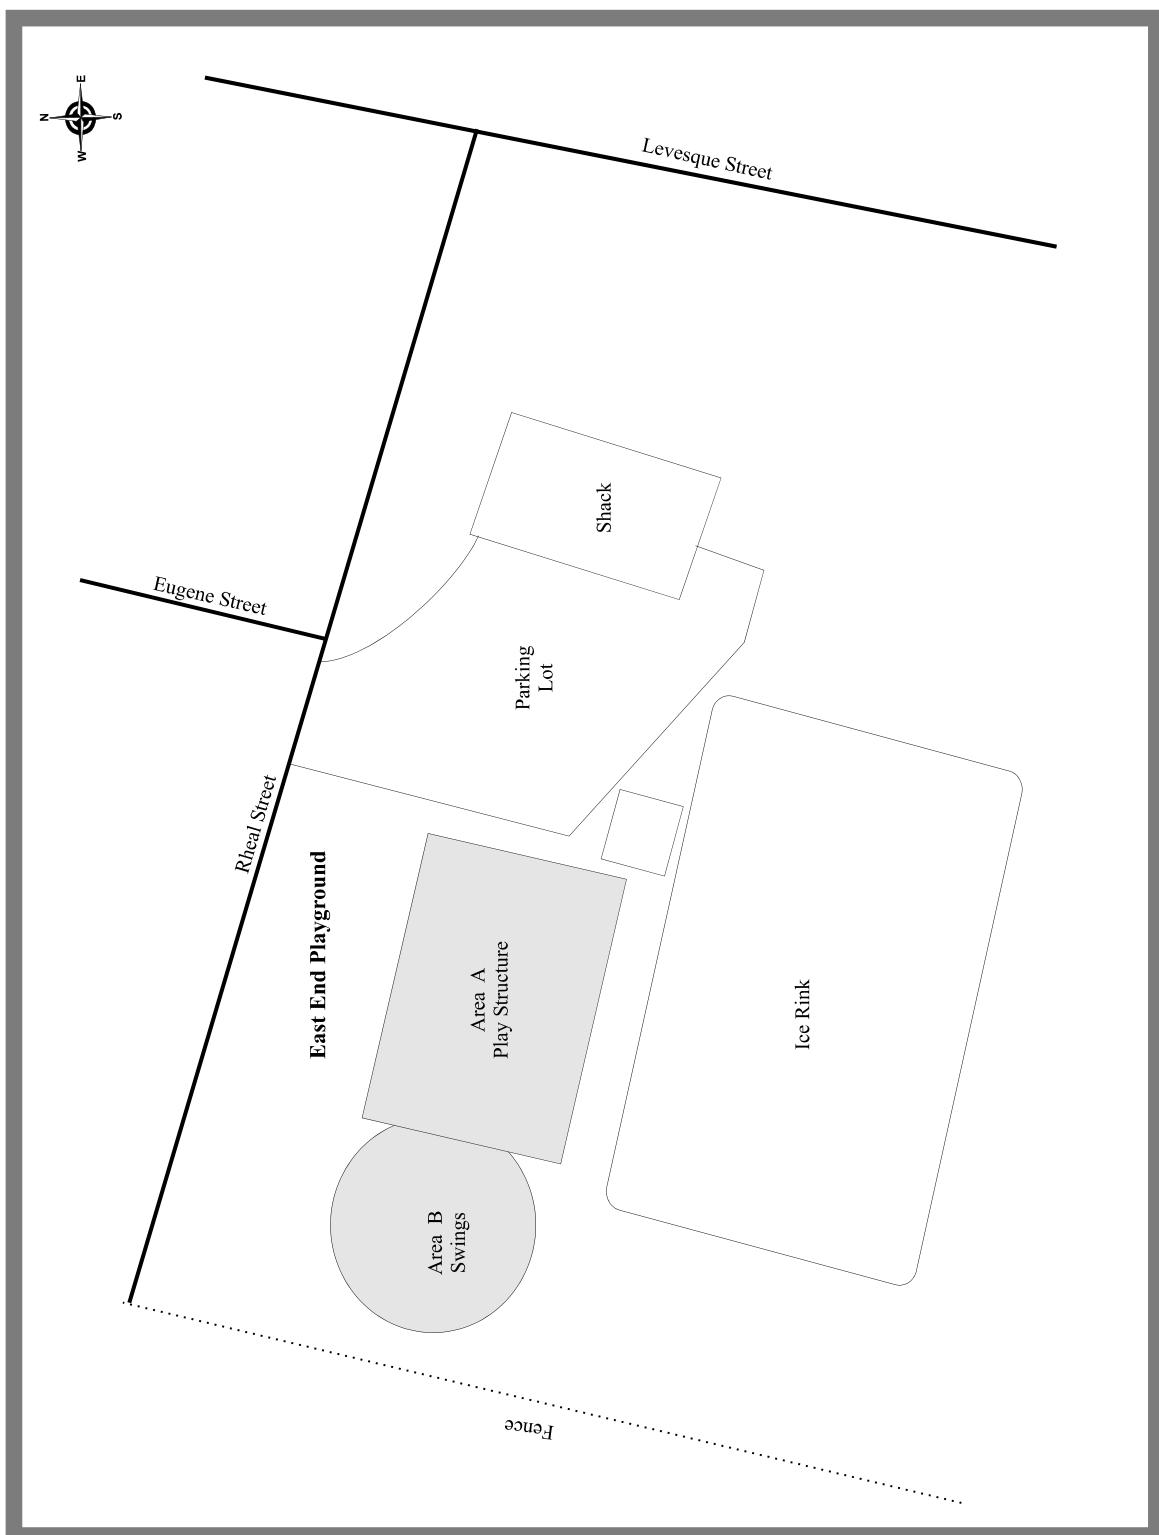

**Map C5.18.3.1:** Upper Area of Camp Sudaca, Sudbury East -2001.

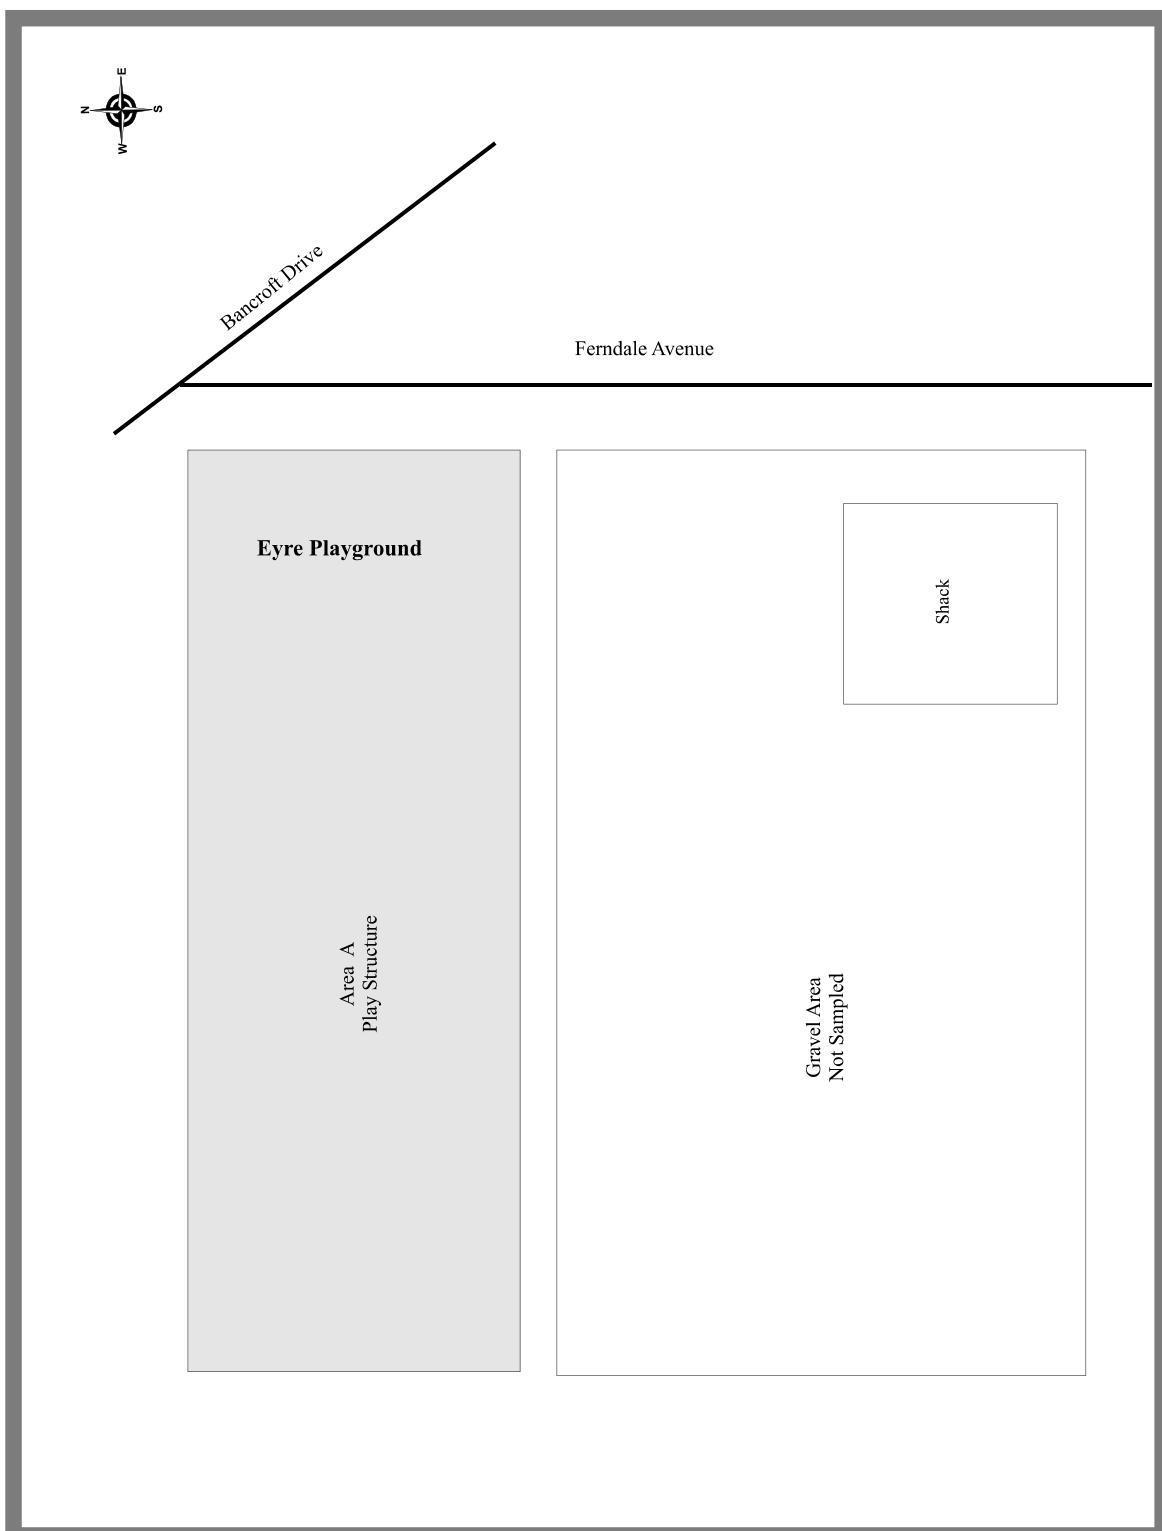

**Map C5.18.3.2:** Beach Area of Camp Sudaca, Sudbury East - 2001.

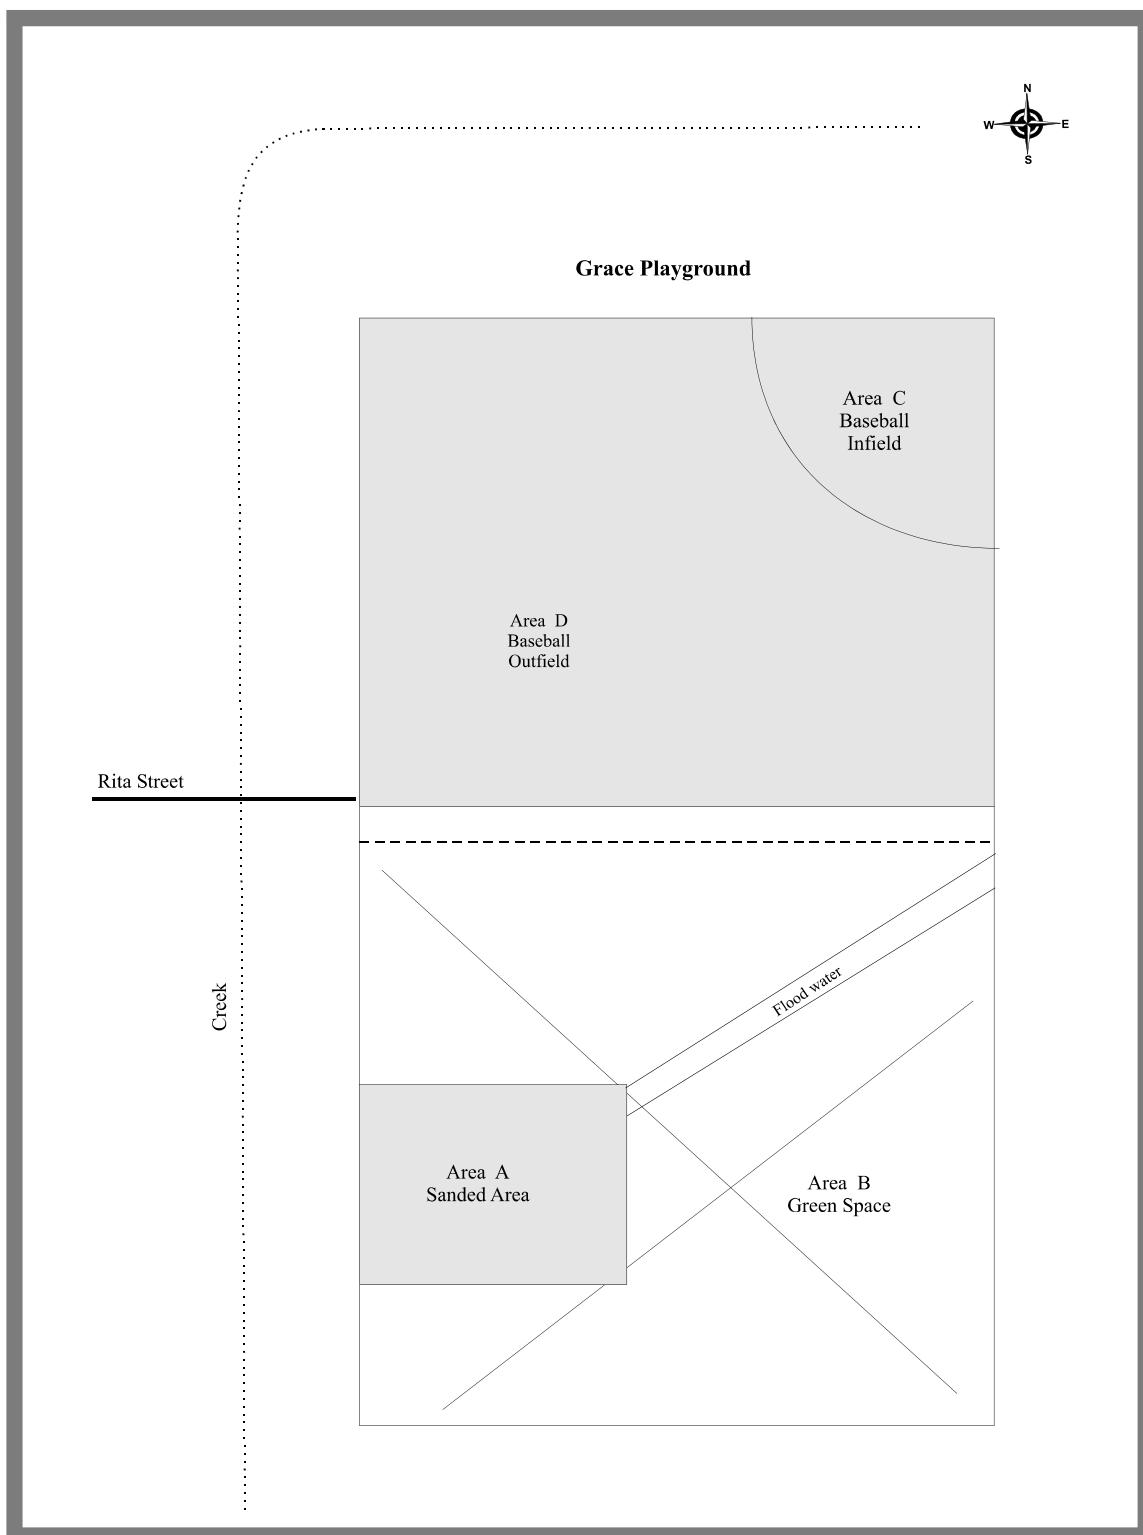

**Map C5.18.4:** Carmichael Community Centre & Arena, Sudbury East - 2001.

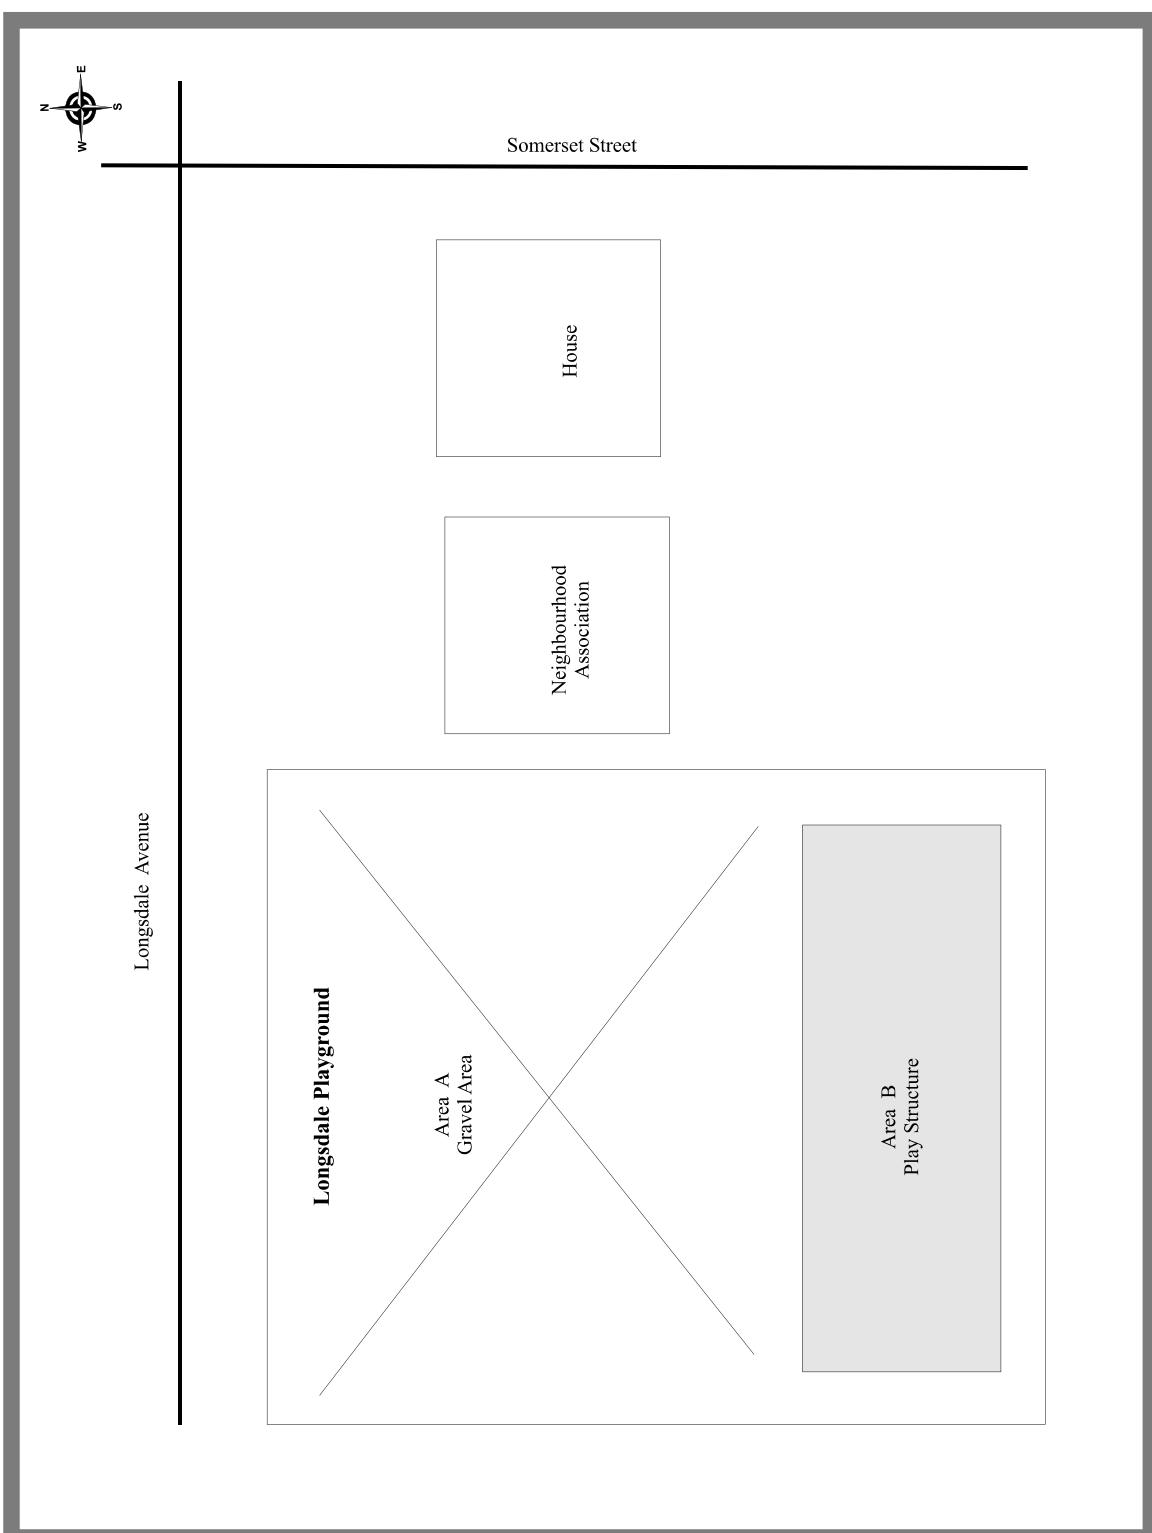

**Map C5.18.5:** East End Playground, Sudbury East - 2001.

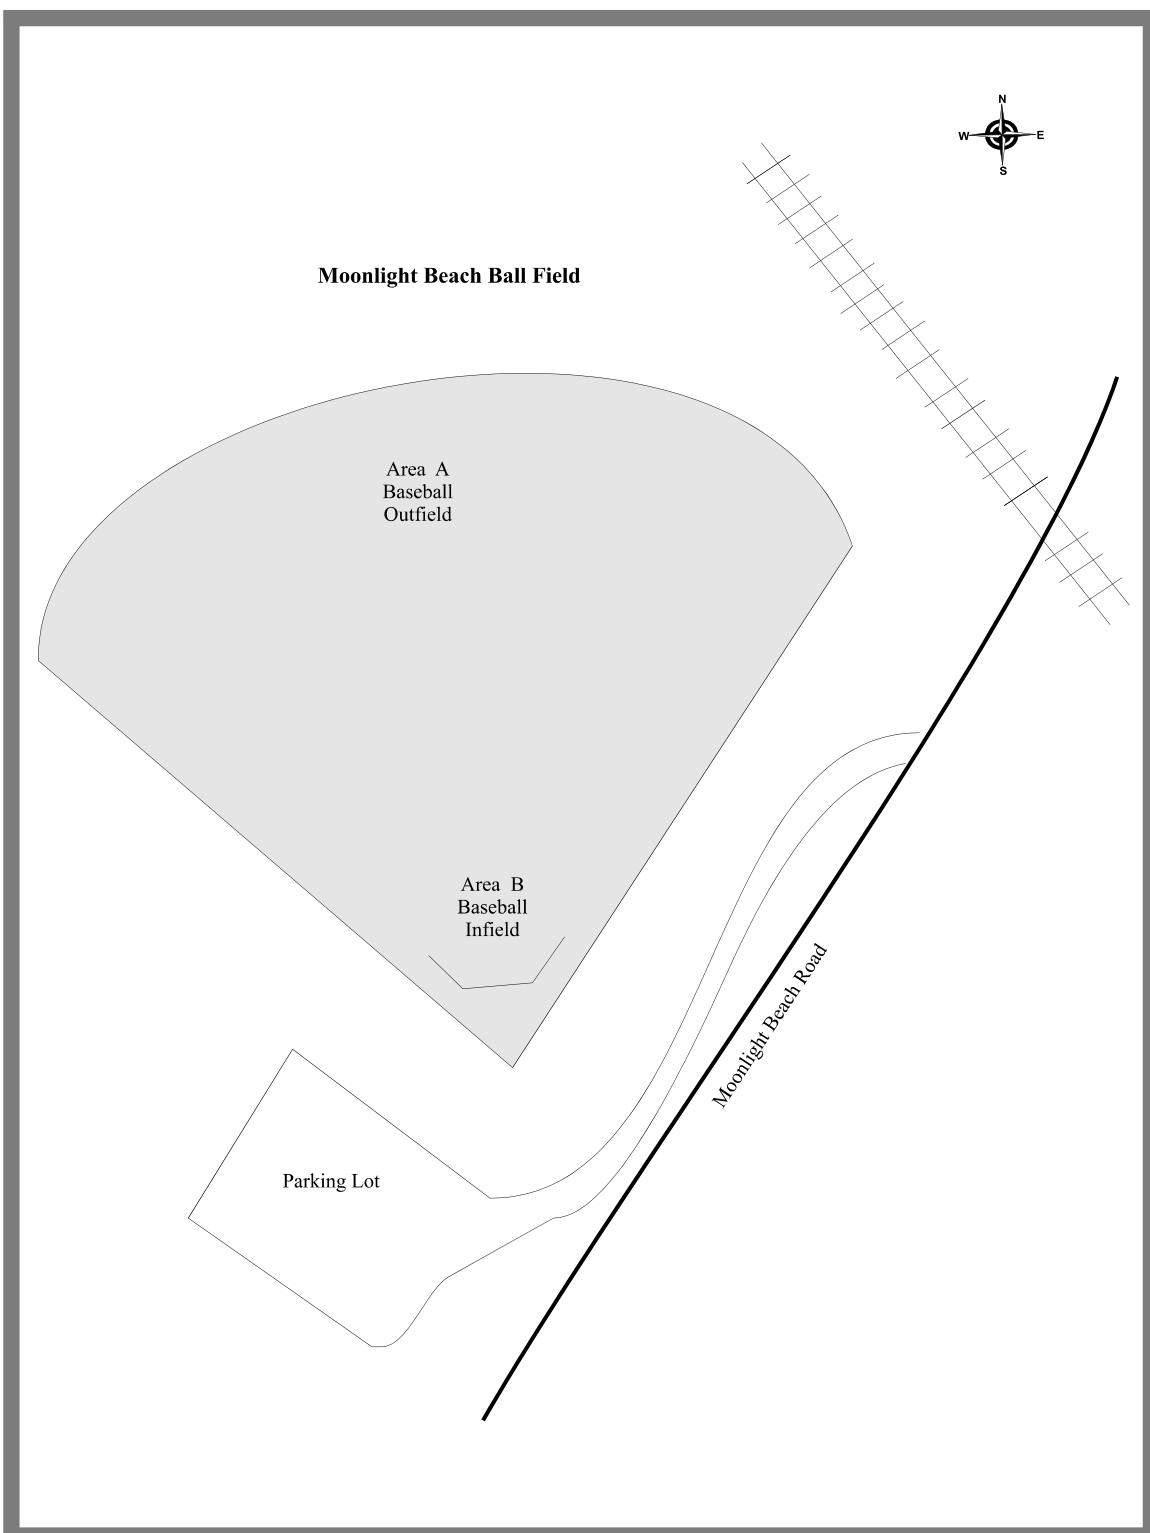

**Map C5.18.6:** Eyre Playground, Sudbury East - 2001.

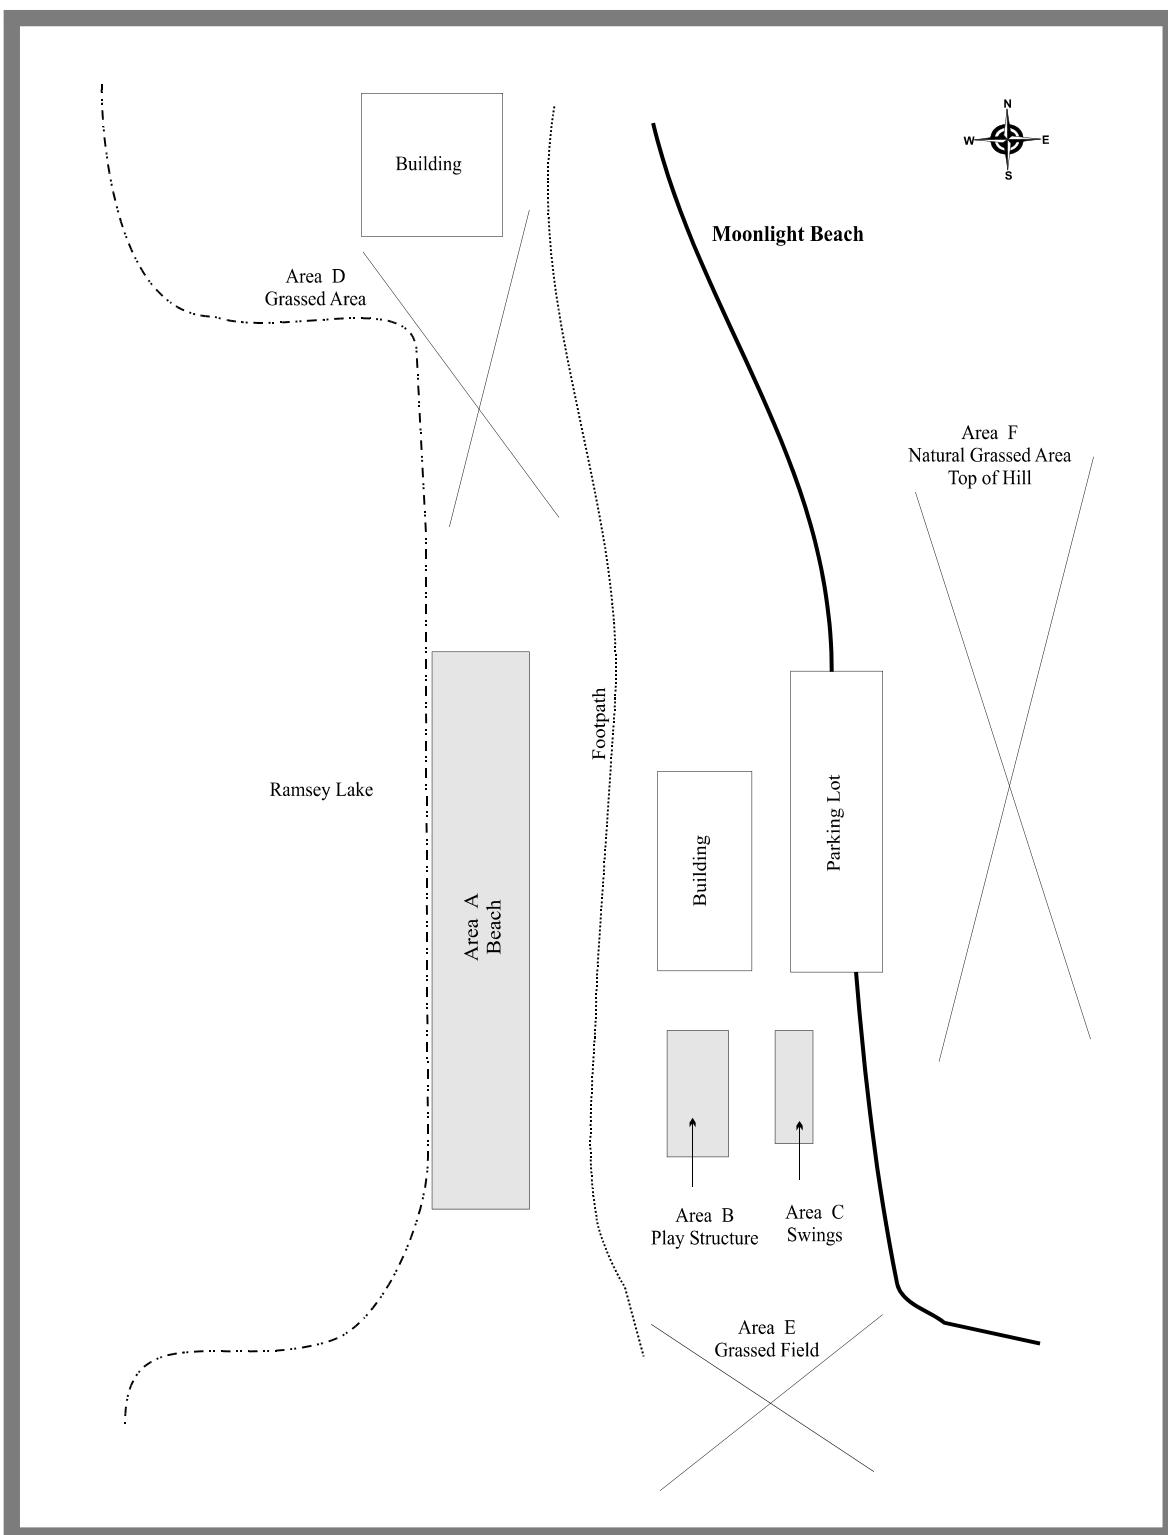

**Map C5.18.7:** Grace Playground, Sudbury East - 2001.

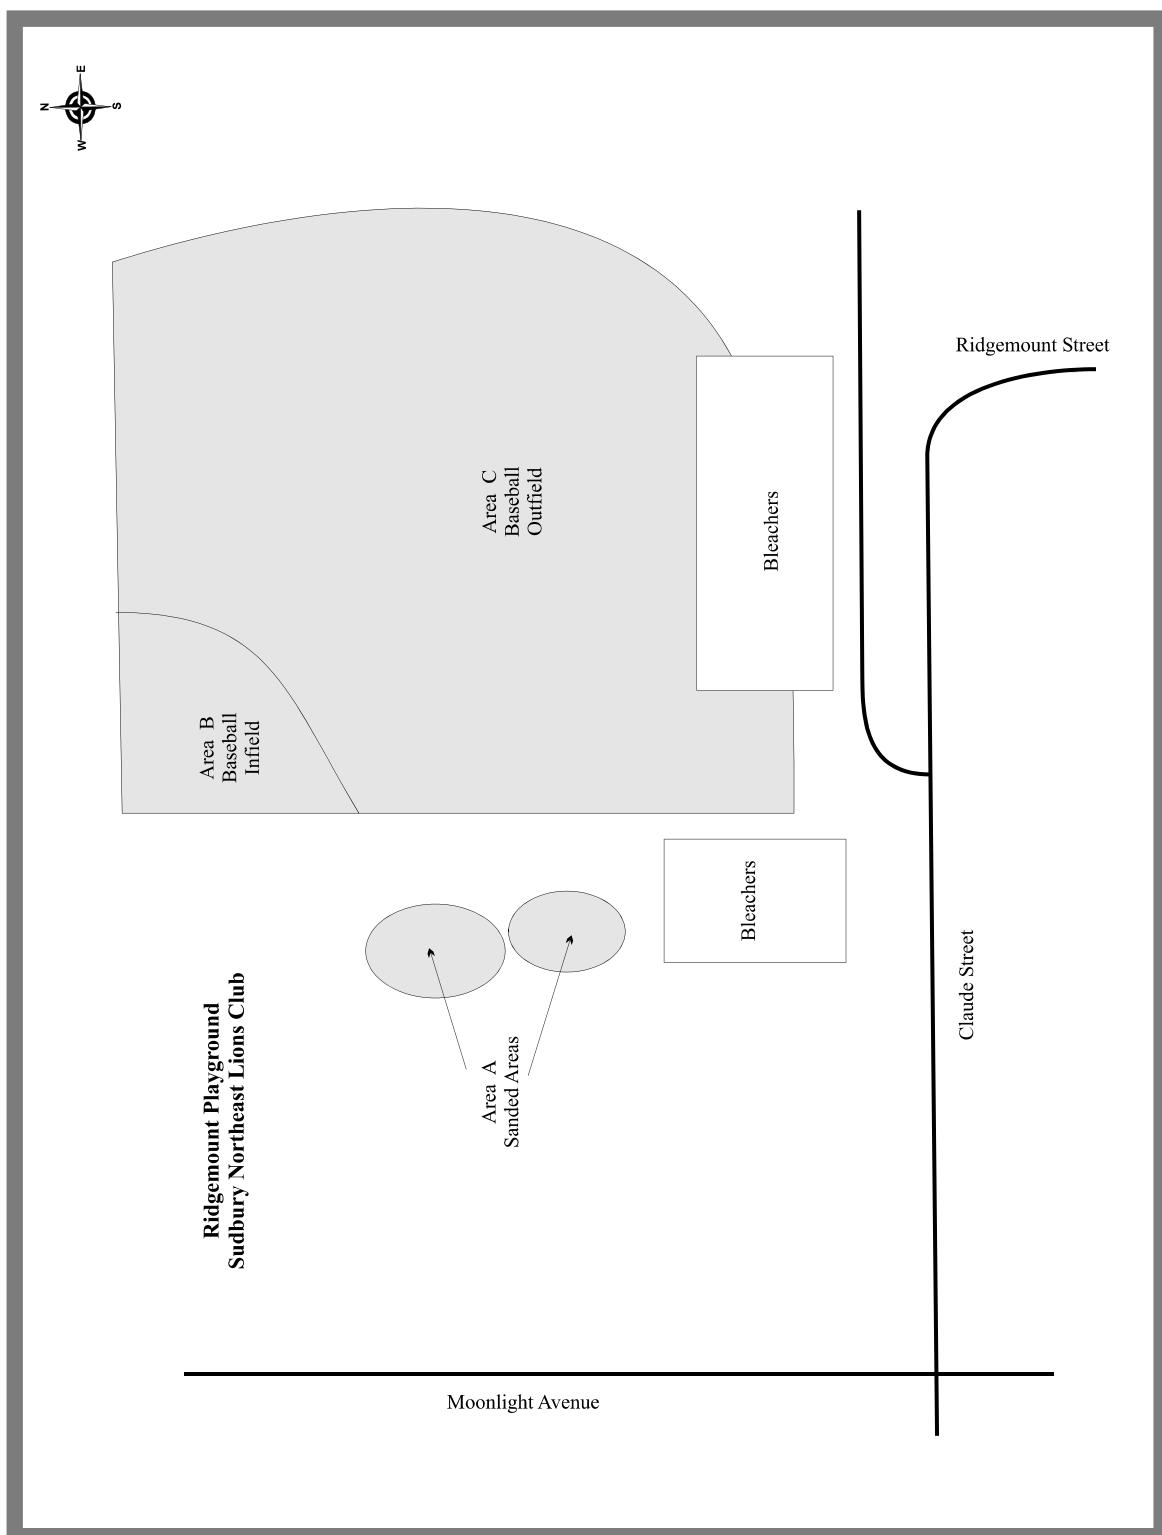

**Map C5.18.8:** Lonsdale Playground, Sudbury East - 2001.

**Map C5.18.9:** Moonlight Beach Ball Park, Sudbury East - 2001.
